INDEPENDENT AUDITORS' REPORT

To the Board of Regents of The University of Texas System To the Board of Directors of The University of Texas Investment Management Company

Report on the Financial Statements

We have audited the accompanying financial statements of the Permanent University Fund (the "PUF") which comprise the statements of fiduciary net position, as of August 31, 2015 and 2014, and the related statements of changes in fiduciary net position for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

The University of Texas Investment Management Company ("UTIMCO" or "management") is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the PUF's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the PUF's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the Permanent University Fund as of August 31, 2015 and 2014, and the changes in its fiduciary net position thereof for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 1, the financial statements of the PUF are intended only to present the fiduciary net position of the PUF as of August 31, 2015 and 2014, and the changes in its fiduciary net position for the years then ended in conformity with accounting principles generally accepted in the United States and do not purport to, and do not, present the fiduciary net position of UTIMCO or The University of Texas System, as of August 31, 2015 or 2014, or the changes in their fiduciary net positions for the years then ended.

As also discussed in Note 1, the financial statements of the PUF include only the investment related assets and liabilities and changes therein which are being managed by UTIMCO and do not include the PUF's 2.1 million acres of land. This report, therefore, is not intended to be a complete presentation of the PUF's assets, liabilities, additions, and deductions.

As discussed in Note 2, the financial statements include investments valued at \$13,548,351,602 (75.3% of total assets) and \$12,742,901,418 (70.9% of total assets) as of August 31, 2015 and 2014, respectively, whose fair values have been estimated by management in the absence of readily determinable fair values. Management's estimates are based on procedures performed by management which use information provided by the fund managers or the general partners.

Our opinion is not modified with respect to these three matters.

Other Matters

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis on pages 4 through 7 be presented to supplement the financial statements. Such information, although not a part of the financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the financial statements, and other knowledge we obtained during our audits of the financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Report on Supplemental Schedules

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules listed in the table of contents are presented for the purpose of additional analysis and are not a required part of the financial statements. These schedules are the responsibility of the PUF's management and were derived from and relate directly to the underlying accounting and other records used to prepare the financial statements. Such schedules have been subjected to the auditing procedures applied in our audits of the financial statements and certain additional procedures, including comparing and reconciling such schedules directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, such schedules are fairly stated in all material respects in relation to the financial statements as a whole.

October 30, 2015

MANAGEMENT'S DISCUSSION AND ANALYSIS (MD&A) (Unaudited)

Our discussion and analysis of the Permanent University Fund's (PUF) financial performance provides an overview of its activities for the years ended August 31, 2015 and 2014. This discussion was prepared by The University of Texas Investment Management Company (UTIMCO) and should be read in conjunction with the PUF's financial statements and notes. The PUF is a public endowment contributing to the support of 18 institutions and 6 agencies in The University of Texas System (UT System) and The Texas A&M University System (TAMU System). The Texas Constitution and various state statutes designate The University of Texas System Board of Regents (UT Board) as the fiduciary for the management of certain public endowment and operating funds. The UT Board has entered into an Investment Management Services Agreement delegating investment management responsibility for all investments to UTIMCO.

The purpose of the MD&A is to provide an objective and easily readable analysis of the PUF's financial statements based upon currently known facts, decisions and conditions.

Financial Highlights

The PUF's net fiduciary position after distributions increased by \$125.1 million from \$17,364.9 million to \$17,490.0 million, or approximately 0.72% for the year ended August 31, 2015, compared to an increase of \$2,512.4 million or approximately 16.92% for the year ended August 31, 2014. The change in net fiduciary position from year to year is mainly attributable to the following:

- 1. The PUF posted a net investment return of 0.43%, calculated using the Modified Dietz Method as described by the CFA Institute, for the year ended August 31, 2015. Investments in private investments, developed country equities and hedge funds were the biggest contributors to the 2015 return. For the year ended August 31, 2014 the PUF posted a net investment return of 15.11%. Investments in developed country equities, emerging markets equities and real estate were the biggest contributors to the 2014 returns.
- 2. Fiscal year 2015 contributions of PUF Lands mineral income decreased by 28.59% from \$1,129.7 million to \$806.7 million and represented 4.55% of the average value of the PUF investments during the year, compared to fiscal year 2014 contributions which increased by 31.9%, from \$856.5 million to \$1,129.7 million and represented 7.0% of the average value of the PUF investments during the year. PUF Lands expenses were \$13.0 million and \$8.3 million for the years ending August 31, 2015 and 2014, respectively. PUF Lands consist of more than 2.1 million acres in 19 counties primarily in West Texas.
- 3. The PUF's annual distribution to the Available University Fund (AUF) decreased by 12.97% in fiscal year 2015, compared to an increase of 36.2% in fiscal year 2014.

Use of Financial Statements and Notes

The PUF's financial statements were prepared in accordance with accounting principles generally accepted in the United States of America as prescribed by the Governmental Accounting Standards Board (GASB). PUF's activities are accounted for as a fiduciary fund, therefore two financial statements are typically required under GASB: the statement of fiduciary net position and the statement of changes in fiduciary net position.

In compliance with the reporting requirements of Section 66.05 of the <u>Texas Education Code</u>, we have included as supplementary information a schedule of changes in cost of investments and investment income. We have also included as supplementary information a comparison summary of investments.

The notes to the financial statements contain supplemental information that is essential for the fair presentation of the financial statements.

Statements of Fiduciary Net Position

The statements of fiduciary net position present assets, liabilities, and the net position of the PUF under UTIMCO management as of the end of the fiscal year. These statements, along with all of the PUF's financial statements, are prepared using the accrual basis of accounting, whereby PUF investment income is recognized when earned and PUF expenses are recognized when incurred.

The PUF invests in a broad mix of investments and is actively managed to its benchmark, the Endowment Policy Portfolio. The Endowment Policy Portfolio is the index or benchmark for the endowment funds that UTIMCO manages. The return of the Endowment Policy Portfolio is the sum of the weighted benchmark returns for each asset class. UTIMCO allocates PUF investment assets to internally and externally managed portfolios in accordance with approved asset allocation policies, and attempts to supplement the endowment corpus by increasing purchasing power over time. In doing so, UTIMCO increases the PUF resources available to fund the debt service on bonds issued by the UT Board and the TAMU System Board of Regents to fund capital expenditures and to fund academic excellence programs at The University of Texas at Austin, Texas A&M University, and Prairie View A&M.

The following summarizes the statements of fiduciary net position (in millions):

	2015	2014	2013
Assets			
Investments, at Fair Value	\$ 17,539.7	\$ 17,438.9	\$ 14,851.3
Other Assets	454.0	530.4	413.1
Total Assets	17,993.7	17,969.3	15,264.4
Total Liabilities	503.7	604.4	411.9
Net Position Held in Trust	\$ 17,490.0	\$ 17,364.9	\$ 14,852.5

Statements of Changes in Fiduciary Net Position

Changes in fiduciary net position as presented on the statements of changes in fiduciary net position are based on activity of the PUF investments. The purpose of these statements is to present additions to the PUF resulting from net investment income and contributions from PUF Lands mineral income and to present deductions from the PUF resulting from distributions to the AUF and administrative and investment expenses.

The net decrease in investments of the PUF was \$31.3 million during the year compared to a net increase in investments of \$2,110.7 million for the year ended August 31, 2014. Investment expenses totaled \$40.8 million, \$44.5 million, and \$45.0 million, respectively, for the years ended August 31, 2015, 2014, and 2013.

The PUF's objectives are:

- Provide a predictable, stable stream of distributions over time,
- Provide that the inflation adjusted value of distributions is maintained over the long-term, and
- Provide that the inflation adjusted value of the PUF's net position after distributions is maintained over rolling 10-year periods.

Distributions to the AUF decreased by \$113.8 million, from \$877.4 million in fiscal year 2014 to \$763.6 million, in fiscal year 2015. The fiscal year 2014 distribution amount increased by \$233.1 million from the fiscal year 2013 distribution of \$644.3 million. PUF distributions are determined by the UT Board as provided in the Texas Constitution, which directs the UT Board to establish a distribution policy that provides stable, inflation-adjusted distributions to the AUF and preserves the real value of the PUF investments over the long term. The annual distributions are calculated based on the trailing twelve-quarter average net position of the PUF as of February 28 of each year. For the years ending August 31, 2015 and 2014, respectively, distributions were 5.50% and 7.00% of the trailing twelve-quarter average net position. Distributions to the AUF are made at the discretion of the UT Board subject to the following overriding conditions of the Texas Constitution:

- 1. Distributions must be at least equal to the amount needed to pay debt service on PUF Bonds;
- 2. Distributions may not increase from the preceding year (except as necessary to pay debt service on PUF Bonds) unless the purchasing power of PUF Investments for any rolling 10-year period has been preserved;
- 3. Distributions may not exceed 7% of the average net fair market value of PUF investments in any fiscal year, except as necessary to pay debt service on PUF Bonds.

	2015	2014	2013

Note 1 – Organization and Basis of Presentation

(A) The Permanent University Fund (PUF) is a state endowment contributing to the support of eligible institutions of The University of Texas System (UT System) and The Texas A&M University System (TAMU System). The PUF was established in the Texas Constitution of 1876 through the appropriation of land grants previously given to The University of Texas, as well as an additional one million acres. Additional land grants to the PUF were completed in 1883 with the contribution of another one million acres. Today, the PUF contains over 2.1 million acres of land located primarily in 19 counties in West Texas (PUF Lands).

PUF Lands are managed by UT System administration and produce two streams of income: mineral and surface. UT System administration remits mineral income to the PUF, and distributes surface income to the Available University Fund (AUF). The mineral income retained by the PUF is invested and managed by The University of Texas Investment Management Company (UTIMCO).

(B) The accompanying financial statements report the investment in securities of the PUF, including the assets, liabilities, mineral contributions of the PUF Lands and investment income. Expenses related to the PUF's security investments and PUF Lands, as well as distributions from the PUF to the AUF, are also included. The PUF Lands value is not included in the accompanying financial statements because the statements are only intended to include the investment assets which are being managed by UTIMCO.

The activities of the PUF are accounted for as a fiduciary fund. The financial statements of the PUF use an economic resources measurement focus and the accrual basis of accounting, whereby revenues are recorded when earned and expenses are recorded when a liability is incurred regardless of the timing of cash flows. The financial statements of the PUF are prepared in accordance with accounting principles generally accepted in the United States of America as prescribed by the Governmental Accounting Standards Board (GASB).

The supplemental Schedule of Changes in Cost of Investments and Investment Income has been prepared for the purpose of complying with the reporting requirements of Section 66.05 of the <u>Texas</u> <u>Education Code</u>.

The annual combined financial statements of UT System are prepared in accordance with the Texas Comptroller of Public Accounts' Annual Financial Reporting Requirements and include information related to the PUF. The accompanying financial statements of the PUF may differ in presentation from the Texas Comptroller of Public Accounts' Annual Financial Reporting Requirements.

(C) Management has evaluated subsequent events through October 30, 2015, the date the financial statements were available to be issued. No subsequent events requiring adjustment to, or disclosure in, the financial statements were identified as a result of this evaluation.

Note 2 – Significant Accounting Policies

(A) *Security Valuation* -- Investments with readily determinable fair values are primarily valued on the basis of market valuations provided by independent pricing services.

Fixed income securities held directly by the PUF are fair valued based upon prices supplied by Interactive Data and other major fixed income pricing services, external broker quotes and internal pricing matrices.

Equity security fair values are based on the closing price on the primary exchange on which the security is traded (if a closing price is not available, the average of the last reported bid and ask price is used).

Physical commodities, specifically gold, are fair valued using the composite closing price from Bloomberg for the XAU currency code which represents the standard for one troy ounce of gold.

Private investment funds, which consist of non-regulated investment funds, are fair valued by management. The fair values of these investments are estimated by management using the investment's capital account balance at the closest available reporting date, as communicated by the investment manager, adjusted for contributions and distributions subsequent to the latest available reporting date as well as consideration of any other information, which has been provided by the investment manager or other source. In rare cases the private investment funds are valued at cost, but only when management considers it to be the best approximation of fair value. As of August 31, 2015 and 2014, investments in private investment funds in the amount of \$5,603,507,710 and \$4,857,361,671, respectively, have been estimated by management.

Hedge funds, developed country equity, emerging markets equity and fixed income investment funds and certain other private placements are fair valued by management based on net asset value information provided by the investment managers as well as other relevant factors as indicated above. As of August 31, 2015 and 2014, investments in these funds in the amount of \$7,944,843,892 and \$7,885,539,747, respectively, have been estimated by management.

The statements of fiduciary net position include investments in private investment funds, hedge funds and other private placements as described above fair valued in the aggregate at \$13,548,351,602 (75.3% of total assets) and \$12,742,901,418 (70.9% of total assets) as of August 31, 2015 and 2014, respectively, whose fair values have been estimated by management in the absence of readily determinable fair values.

(B) **Foreign Currency Translation** -- The accounting records of the PUF are maintained in U.S. dollars. Investments in securities are fair valued at the daily rates of exchange on the valuation date. Purchases and sales of securities of foreign entities and the related income receipts and expense payments are translated into U.S. dollars at the exchange rate on the dates of the transactions. The PUF does not isolate that portion of the results of the change in fiduciary net position resulting from changes in foreign exchange rates on investments from fluctuations arising from changes in market prices of securities held on the statements of changes in fiduciary net position. Such fluctuations are included with the net (decrease) increase in investments.

(C) *Investment Income and Investment Expenses* -- Interest income is accrued as earned. Dividend income is recorded on the ex-dividend date. Dividend and interest income are recorded net of foreign taxes where recovery of such taxes is not assured. For the years ended August 31, 2015 and 2014, interest and dividend withholding in the amounts of \$3,355,424 and \$3,044,597, respectively, have been netted against dividend and interest income. Investment income includes net

realized and unrealized currency gains and losses recognized between accrual and payment dates on dividend and interest transactions. Investment expenses are recorded on the accrual basis as incurred.

(D) *Security Transactions* -- Security transactions are recorded on a trade date basis. Gains and losses on securities sold are determined on the basis of average cost.

(E) *Use of Estimates* -- The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ materially from these estimates.

(F) **Derivative Instruments** -- Derivatives are financial instruments whose fair value is derived, in whole or part, from the value of any one or more underlying securities or assets, or index of securities or assets, such as stocks, bonds, commodities, or currencies. The PUF from time to time uses various derivative instruments, as allowed under The University of Texas System Board of Regents (UT Board) approved derivative investment policy guidelines. Derivative instruments included under these policies include futures, forwards, swaps and various forms of options. Futures contracts and foreign currency exchange contracts are fair valued at closing market prices on valuation date. Options and swaps are fair valued by using broker quotes or using models with primarily externally verifiable model inputs. Derivative instruments in the PUF are used to achieve the following objectives:

- implement investment strategies in a low cost and efficient manner,
- alter the PUF's market (systematic) exposure without trading the underlying cash market securities, through purchases or short sales, or both, of appropriate derivatives,
- construct portfolios with risk and return characteristics that could not be created with cash market securities,
- hedge and control risks, or
- facilitate transition trading.

Through the use of derivative instruments, the complex risks that are bound together in traditional investments can be separated and managed independently. The primary intent of the PUF's investment in derivative instruments is to manage and implement investment strategies more effectively and at a lower cost than would be possible in the cash market. All of the PUF's derivative instruments are considered investment derivatives, and therefore do not qualify for hedge accounting; all changes in fair value are included in the net (decrease) increase in investments in the statement of changes in fiduciary net position.

Options Written -- When the PUF writes an option, an amount equal to the premium received by the PUF is recorded as a liability and is subsequently adjusted to the current fair value of the option written. Premiums received from writing options that expire unexercised are treated by the PUF on the expiration date as realized gains from investments and are included in the net (decrease) increase in investments in the statement of changes in fiduciary net position. The difference between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or, if the premium is less than the amount paid for the closing purchase transaction, as a realized loss and are included in the net

(decrease) increase in investments in the statements of changes in fiduciary net position. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security or currency in determining whether the PUF has realized a gain or loss. If a put option is exercised, the premium reduces the cost basis of the securities purchased by the PUF.

The PUF as writer of an option bears the market risk of an unfavorable change in the price of the security underlying the written option. Written options are marked to market on a daily basis, and are included as a liability on the statements of fiduciary net position.

Swaps -- The PUF invests in certain types of swaps to increase or decrease its exposure to long-term interest rates, certain commodity and equity sector returns, market events, and currency fluctuations. Swaps are agreements between two parties to exchange periodic payments on the notional value of the contract multiplied by a stated fixed interest rate versus a stated floating interest rate, or on a commodity or equity sector return versus a specified cost per contract. Swaps are marked to market on a daily basis, and are included, at fair value, on the statements of fiduciary net position. Cash flows may occur when a swap is opened, when it resets, if or when it is prematurely terminated by both parties to the agreement, and when it reaches maturity. The frequency of the resets is defined by the term sheet of the particular swap agreement, and varies from instrument to instrument. These instruments involve market and/or credit risk in excess of the amount recognized in the statements of fiduciary net position. Risks arise from the possible inability of counterparties to meet the terms of their contracts and from movement in currency and securities fair values and interest rates.

Futures Contracts -- The PUF enters into futures contracts to facilitate various trading strategies, primarily as a tool to increase or decrease market exposure to various asset classes. Upon entering into a futures contract, initial margin deposit requirements are satisfied by the segregation of specific securities as collateral for the account of the broker (the PUF's agent in acquiring the futures position). During the period the futures positions are open, the contracts are marked to market daily; that is, they are fair valued at the close of business each day, and a gain or loss is recorded between the fair value of the contracts that day and on the previous day. The daily gain or loss is referred to as the daily variation margin which is settled in cash with the broker each morning for the amount of the previous day's mark to market. The amount that is settled in cash with the broker each morning is the carrying and fair value of the futures contracts, and is included on the statements of fiduciary net position. The PUF executes such contracts either on major exchanges or with major international financial institutions and minimizes market and credit risk associated with these contracts through the managers' various trading and credit monitoring techniques.

Foreign Currency Contracts -- The PUF enters into forward foreign currency exchange contracts to hedge against foreign currency exchange rate risks on its non-U.S. dollar denominated investment securities and to facilitate trading strategies primarily as a tool to increase or decrease market exposure to various foreign currencies. When entering into a forward currency contract, the PUF agrees to receive or deliver a fixed quantity of foreign currency for an agreed-upon price on an agreed future date. These contracts are fair valued daily and the PUF's net equity therein, representing unrealized gain or loss on

the contracts as measured by the difference between the forward foreign exchange rates at the dates of entry into the contracts and the forward rates at the reporting date, is included in the statements of fiduciary net position. Realized and unrealized gains and losses are included in the net (decrease) increase in investments in the statements of changes in fiduciary net position. These instruments involve market and/or credit risk in excess of the amount recognized in the statements of fiduciary net position. Risks arise from the possible inability of counterparties to meet the terms of their contracts and from movement in currency and securities fair values and interest rates.

(G) *Cash and Cash Equivalents* -- Cash and cash equivalents consist of money market investments, cash held at the State Treasury, foreign currencies and other overnight funds. Cash and cash equivalents are an integral part of the PUF's investment activities, and as such are included in the investments balance on the statements of fiduciary net position.

(H) *Contributions from PUF Lands* -- The mineral income earned from PUF Lands is recorded as remitted by UT System administration and presented on the accompanying statements of changes in fiduciary net position as a contribution to fiduciary net position.

(I) **Recently Issued Accounting Standards** -- GASB Statement No. 72 (Statement 72), *Fair Value Measurement and Application*, effective 2016, clarifies the definition of fair value, establishes principles for measuring fair value, provides additional fair value guidance, and enhances disclosures about fair value measurements. Management is evaluating the effect that Statement 72 will have on the PUF's financial statements.

(J) *Reclassification* -- Certain items in the 2014 financial statements and related notes have been reclassified to conform with 2015 classification.

Note 3 – Investment Risk

The investment risk disclosure that follows relates to the PUF's investments before securities lending transactions and the investment of cash collateral. Disclosures relating to securities lending are provided in Note 4. Risk disclosures relating to the PUF's investments in hedge funds, private investments, and public market funds are discussed in Note 5.

(A) Credit Risk

Article VII, Section 11b of the Texas Constitution authorizes the UT Board, subject to procedures and restrictions it establishes, to invest the PUF in any kind of investment and in amounts it considers appropriate, provided that it adheres to the prudent investor standard. This standard provides that the UT Board, in making investments, may acquire, exchange, sell, supervise, manage, or retain, through procedures and subject to restrictions it establishes and in amounts it considers appropriate, any kind of investment that prudent investors, exercising reasonable care, skill and caution, would acquire or retain in light of the purposes, terms, distribution requirements, and other circumstances of the fund then prevailing, taking into consideration the investment of all of the assets of the PUF rather than a single investment.

Credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical

rating organization (NRSRO). The PUF's investment policy does not provide specific requirements or limitations with regards to investment ratings. Per GASB Statement No. 40 (GASB 40), *Deposit and Investment Risk Disclosures, an amendment to GASB Statement No. 3*, unless there is information to the contrary, obligations of the U.S. government or obligations explicitly guaranteed by the U.S. government are not considered to have credit risk and do not require disclosure of credit quality. GASB 40 also provides that securities with split ratings, or a different rating assignment between NRSROs, are disclosed using the rating indicative of the greatest degree of risk. The following table presents each applicable investment type grouped by rating at August 31, 2015 and 2014:

	Augus	Rating	
Investment Type	Investment Type 2015		
Investments:

(B) Concentrations of Credit Risk

The PUF's investment policy statement contains the limitation that no more than 5% of the market value of fixed income securities may be invested in corporate or municipal bonds of a single issuer. As of August 31, 2015 and 2014, the PUF does not hold any direct investments in any one issuer of corporate or municipal bonds that is 5% or more of the market value of the PUF's fixed income investments.

(C) Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the PUF will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the PUF will not be able to recover the fair value of its investment or collateral securities that are in the possession of another party. Texas State Statutes and the PUF's investment policy statements do not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits or investments. As of August 31, 2015 and 2014, the PUF does not have any deposits or investments that are exposed to custodial credit risk.

(D) Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. Interest rate risk inherent in the PUF is measured by monitoring the modified duration of the overall investment portfolio. Modified duration estimates the sensitivity of the PUF's investments to changes in interest rates. The PUF has no specific policy statement limitations with respect to its overall modified duration. The following table summarizes the PUF's modified duration by investment type at August 31, 2015 and 2014:

Notes to Financial Statements (cont.)

The PUF has purchased options on ten year constant maturity swaps and certain currencies, with expirations ranging from five to seven years, as insurance against possible future increases in inflation. As of August 31, 2015, these options had a notional value of \$5,120,000,000 and a fair value of \$17,322. As of August 31, 2014, these options had a notional value of \$5,120,000,000 and a fair value of \$709,571. The risk of loss on these options is limited to the premiums paid by the PUF upon the purchase of the options, which totaled \$29,215,008 as of August 31, 2015 and 2014, respectively. The PUF also purchased puts on the Japanese Yen, with expirations ranging from one to two years, as insurance against the possibility of a downturn in the Japanese economy. As of August 31, 2015, these puts had a notional value of \$567,039,496 with a fair value of \$31,417 and a

loss limited to \$6,082,756 which represents the premiums paid. As of August 31, 2014, these puts had a notional value of \$567,039,496 with a fair value of \$306,303 and a loss limited to \$4,225,757 which represents the premiums paid. It is estimated that these options would not change the 2015 duration of total debt securities of 6.85 and the total duration of 3.79. It is estimated that these options would adjust the 2014 duration of total debt securities of 6.32 downward by approximately 0.05, and the total duration of 3.35 downward by approximately 0.05. One of the PUF's external managers also uses options and interest rate and credit default swaps to modify the duration of its portfolios in a cost efficient manner. It is estimated by management that these positions held by the external manager would not significantly adjust the duration of the PUF as presented above.

(E) Investments with Fair Values That Are Highly Sensitive to Interest Rate Changes

The PUF may invest in various mortgage backed securities, such as collateralized mortgage backed obligations. The PUF also may invest in investments that have floating rates with periodic coupon changes in market rates, zero coupon bonds and stripped Treasury and Agency securities created from coupon securities. No percentage of holdings limitations are specified in the investment policy statements regarding these types of securities. As of August 31, 2015 and 2014, the PUF's investments include the following investments that are highly sensitive to interest rate changes:

Collateralized mortgage obligations which are subject to early payment in a period of declining interest rates. The resultant reduction in expected total cash flows will affect the fair value of these securities. These securities amounted to \$42,877,097 and \$42,099,009 as of August 31, 2015 and 2014, respectively.

Mortgage backed securities which are subject to early payment in a period of declining interest rates. The resultant reduction in expected total cash flows will affect the fair value of these securities. These securities amounted to \$19,479,608 and \$15,903,725 as of August 31, 2015 and 2014, respectively.

Asset backed securities which are backed by home equity loans, auto loans, equipment loans and credit card receivables. Prepayments by the obligees of the underlying assets in periods of decreasing interest rates could reduce or eliminate the stream of income that would have been received. These securities amounted to \$3,272,396 and \$4,271,832 as of August 31, 2015 and 2014, respectively.

(F) Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of the PUF's non-U.S. dollar investments. There are no limitations on investments in non-U.S. denominated bonds or common stocks in relation to the PUF's total fixed income and developed country equity exposures in the PUF's investment policy statement.

The classification of domestic common stock and foreign common stock is based on the country of domicile of the issuer, not the currency in which the security is traded. The following table summarizes the PUF's non-U.S. dollar investments by asset type at August 31, 2015 and 2014:

	August 31,			
Investment Type	2015	2014

(G) Counterparty (Credit) Risk

The derivative instruments utilized by the PUF contain varying degrees of off-balance sheet risk whereby changes in the fair values of securities underlying the financial instruments may exceed the amounts recognized in the statements of fiduciary net position. The PUF manages these risks on an aggregate basis along with the risks associated with its other investments as part of its overall risk management process.

The PUF had gross counterparty exposure as of August 31, 2015 for options, swaps, and foreign currency exchange contracts shown in the following table:

tions									
Assets		Assets Liabilities		Assets]	Liabilities		
	Notional	Notional			Fair Value as of August 31, 2015		r Value as of gust 31, 2015	Counterparty Rating

As of August 31, 2015 and 2014, the PUF also had investments in futures contracts, options on futures contracts and exchange-cleared swaps. Futures contracts, options on futures, and exchange-cleared swaps expose the PUF to minimal counterparty credit risk since they are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees them against default. Therefore, they are not presented in the table above.

Counterparty risk for swaps, options and foreign currency exchange contracts which are traded overthe-counter is mitigated by having master netting arrangements between the PUF and its counterparties, and by the posting of collateral on a daily basis by the counterparty to the PUF to cover the PUF's exposure to a counterparty above the limits set in place in each master netting agreement. Collateral posted by counterparties is held by the PUF in one of its accounts at the PUF's custodian bank. As of August 31, 2015 and 2014, the PUF held \$16,383,644 and \$9,830,502 respectively, of collateral related to derivative instruments other than futures, and had on deposit with brokers \$9,429,909 and \$2,925,128, respectively, as collateral related to derivative instruments other than futures.

Note 4 – Securities Lending

In accordance with the prudent investor investment standards, the PUF loans securities to certain brokers who pay the PUF negotiated lenders' fees. These fees are included in investment income in the statement of changes in fiduciary net position. The PUF receives qualified securities and/or cash as collateral against the loaned securities. The collateral, when received, will have a market value of 102% of loaned securities of U.S. issuers and a market value of 105% for loaned securities of non-

U.S. issuers. If the market value of the collateral held in connection with loans of securities of U.S. issuers is less than 100% at the close of trading on any business day, the borrower is required to deliver additional collateral by the close of the next business day to equal 102% of the market value. For non-U.S. issuers, the collateral should remain at 105% of the market value of the loaned securities at the close of any business day. If it falls below 105%, the borrower must deliver additional collateral by the close of the following business day. The fair value of securities loaned and the fair value of collateral held are as follows at August 31, 2015 and 2014:

				2015	2014
Securities	2015	2014	Type of	Fair Value	Fair Value
on Loan	Fair Value	Fair Value	Collateral	of Collateral	of Collateral
U.S. Government	\$ 30,447,719	\$ 72,962,585	Cash	\$ 31,068,936	\$ 74,443,979

	\$ 62,211,509	\$ 25,518,067		\$ 63,877,956	\$ 26,055,800

Cash received as collateral for securities lending activities is invested and reinvested in a commingled pool managed exclusively for the benefit of the PUF. The University of Texas System General Endowment Fund (GEF), The University of Texas System Intermediate Term Fund (ITF) and other UT Board accounts that participate in securities lending activities by the securities lending agent. The pool is managed in accordance with investment guidelines established in the securities lending contract between the PUF and its securities lending agent. The maturities of the investments in the pool do not necessarily match the term of the loans, rather the pool is managed to maintain a maximum dollar-weighted average maturity of 60 days and an overnight liquidity of 20%. Lending income is earned if the returns on those investments exceed the rebate paid to borrowers of the securities for interest on the cash collateral received. The income remaining after the borrower rebates is then shared by the PUF and the securities lending agent on a contractually negotiated split. If the investment of the cash collateral does not provide a return exceeding the rebate or if the investment incurs a loss of principal, the payment of the shortfall to the borrower is made from the PUF and the securities lending agent in the same proportion as income is shared.

The PUF's pro-rata share of collateral pool investments, rating by NRSRO, and weighted average maturity at August 31, 2015 and 2014 is shown in the following table:

Collateral pool investments are uninsured, and are held by the PUF's securities lending agent, in its name, on behalf of the PUF, except for the investments in repurchase agreements which are held in the securities lending agent's name by a third party custodian not affiliated with the PUF or the borrower of the associated loaned securities. Therefore, the collateral pool is not exposed to custodial credit risk because the pool investments are not held by counterparties to the lending transactions or the counterparties' trust department or agent.

Cash collateral is recorded as an asset with an equal and offsetting liability to return the collateral on the statements of fiduciary net position. Pool investments are valued at cost which because of the nature of these investments is indicative of fair value. Investments received as collateral for securities lending activities are not recorded as assets because the investments remain under the control of the transferor, except in the event of default.

In the event of default, where the borrower is unable to return the securities loaned, the PUF has authorized the securities lending agent to seize the collateral held. The collateral is then used to replace the borrowed securities where possible. Due to some market conditions, it is possible that the original securities cannot be replaced. If the collateral is insufficient to replace the securities, the securities lending agent has indemnified the PUF from any loss due to borrower default.

As of August 31, 2015 and 2014, the PUF had no credit risk exposure to borrowers because the amounts the PUF owed to borrowers exceeded the amounts the borrowers owed the PUF.

There were no significant violations of legal or contractual provisions, no borrower or securities lending agent default losses, and no recoveries of prior period losses during the years ended August 31, 2015 and 2014.

Note 5 – Investment Funds

Investment funds include exchange traded funds, index funds, Securities and Exchange Commission regulated mutual funds, externally managed funds, limited partnerships, and corporate structures which are generally unrated and may be unregulated. The composition of investment funds at August 31, 2015 and 2014 is summarized in the table below as they are classified within the asset mix of the PUF.

The PUF invests in hedge funds through unit interests in investment pools established in the name of the UT Board. Amounts presented in the PUF's financial statements and related note disclosures represent the PUF's pro-rata share of these investment pool assets. The hedge fund pools are invested in private placements with external investment managers who invest in equity and fixed income securities, including related derivatives, of both domestic and international issuers. These investment managers may invest in both long and short securities and may utilize leverage in their portfolios. The funds invested may be subject to a lock-up restriction of typically one to three years before the investment may be withdrawn from the investment manager without significant penalty. There are certain risks associated with these private placements, some of which include investment manager risk, market risk, and liquidity risk, as well as the risk of utilizing leverage in the portfolios. The hedge fund pools have committed \$360,204,563 of future funding to various hedge fund investments as of August 31, 2015 of which the PUF's pro-rata portion is \$171,858,640.

The PUF invests in private investments in investment pools created in the name of the UT Board. Amounts presented in the PUF's financial statements and related note disclosure for the years ending August 31, 2015 and 2014, represent the PUF's pro-rata share of these investment pool assets. The private investment pools are invested in limited partnerships with external investment managers or general partners who invest primarily in private equity securities. These investments are domestic and international, are illiquid, and may not be realized for a period of several years after the investments are made. There are certain risks associated with these investments, some of which are liquidity risk, market risk, event risk, and investment manager risk. Certain of these investments are held through limited liability companies, of which UTIMCO is the manager of the limited liability companies. The private investment pools have committed \$6,131,575,809 of future funding to various private market investments as of August 31, 2015 of which the PUF's pro-rata portion is \$4,157,208,398.

Public market funds are invested in exchange traded funds, index funds, and private placements with external investment managers who invest in equity and fixed income securities, including related derivatives, of both domestic and international issuers. These funds are characterized as public market funds based on individual risk/return characteristics and their relationship to the overall asset mix of the PUF. Some of these investment managers may invest in both long and short securities and may utilize modest leverage in their portfolios. Certain of these investments are held through limited liability companies of which UTIMCO is the manager of the limited liability companies. There are certain risks associated with these investments, some of which are investment manager risk, market risk, and liquidity risk, as well as the risk of utilizing leverage in the portfolios. Future fundings in the amount of \$54,244,444, of which the PUF's pro-rata portion is \$31,808,942, have been committed to certain public market funds as of August 31, 2015.

The PUF, in conjunction with the GEF and the ITF, invests in certain long-only public markets managers in separate investment pools created in the name of the UT Board. The PUF, the GEF and the ITF are the sole investors in these pools, and therefore, jointly own 100% of the assets of these separately managed investment pools. The net assets and the income, expenses, realized and unrealized gains and losses of these pools have been allocated based on the proportional unit ownership of the PUF, the GEF and the ITF, and the PUF's pro-rata share has been consolidated into the statements of fiduciary net position, the statements of changes in fiduciary net position, and the accompanying note disclosures.

Hedge funds, private investments, and public market funds include investments in private placement vehicles that are subject to risk which could result in the loss of invested capital. The risks include the following:

- *Key personnel risk* -- The success of certain funds is substantially dependent on key investment managers and the loss of those individuals may adversely impact the fund's performance.
- *Liquidity risk* -- Many of the PUF's investment funds may impose lock-up periods which would cause the PUF to incur penalties to redeem its units or prevent the PUF from redeeming its shares until a certain period of time has elapsed.
- *Limited transparency* -- As private placement investment vehicles, these funds may not disclose the holdings of their portfolios.
- *Investment strategy risk* -- These funds often employ sophisticated investment strategies and may use leverage which could result in the loss of invested capital.

Investments in hedge funds, private investments, and public market funds are also subject to the investment risks discussed in Note 3. Fixed income investments held by these funds would also be subject to credit risk and interest rate risk; moreover, they may invest in securities whose fair values would be sensitive to changes in interest rates.

Note 6 – Written Options

For the year ended August 31, 2015, the PUF wrote call options on interest rate swaps, commodities, currencies and equities. The following discloses the contracts outstanding, the expiration date, and the fair values of the outstanding written call options contracts as of August 31, 2015:

							Value t 31, 2015	
Туре	Underlying	Contracts	Expiration Date	As	ssets		iabilities

The change in fair value of open swap positions for the year ending August 31, 2014 was an increase in the amount of \$667,774, which is included in the net (decrease) increase in investments on the statement of changes in fiduciary net position. The PUF recognized gains in the amount of \$10,132,028 on swaps which are included in the net (decrease) increase in investments on the statement of changes in fiduciary net position for the year ended August 31, 2014.

Note 8 – Futures Contracts

During the years ended August 31, 2015 and 2014, the asset classes that used futures include domestic and foreign debt, and commodities. The change in fair value of open futures contracts for the year ending August 31, 2015 was an increase in the amount of \$39,253,565, which is included in the net (decrease) increase in investments on the statement of changes in fiduciary net position. The change in fair value of open futures contracts for the year ending August 31, 2014 was an increase in the amount of \$19,315,019 which is included in the net (decrease) increase in investments on the statement of changes in fiduciary net position. The PUF had \$2,836,755 and \$4,430,684 on deposit with brokers for collateral as margin for the futures contracts as of August 31, 2015 and 2014, respectively. Short futures may be used by the PUF to hedge the PUF's interest rate or currency risk associated with security positions. For the year ended August 31, 2015, the net realized loss on futures contracts was \$152,241,148, which is included in the net (decrease) increase in investments on the statement of changes in fiduciary net position. For the year ended August 31, 2014, the net realized gain on futures contracts was \$6,606,614.

Futures contracts on commodities are traded on several different exchanges around the world. The daily cash settlements made by the investment manager for these open commodities contracts are made on a net basis to each respective exchange. The carrying and fair value, for August 31, 2015 and 2014, shown in the table below for these open contracts do not include amounts previously

settled with the exchanges. Net cash settlements for these open commodities contracts amounted to \$62,909,058 and \$24,396,157 as of August 31, 2015 and 2014, respectively.

During the years ended August 31, 2015 and 2014, certain of the PUF's investment managers trading in commodity futures on the London Metals Exchange (LME) closed out various long contract positions with offsetting short contract positions. For contracts traded and closed on the LME, cash settlement does not occur until the expiration date of the contract. The gross notional value of these long and short positions are shown below with the associated pending cash settlement amounts shown as the carrying and fair value as of August 31, 2015 and 2014.

The following discloses the type, number of contracts, expiration date, notional value, and the carrying and fair values at August 31, 2015 for futures contracts:

Note 9 – Foreign Currency Exchange Contracts

The tables below summarize by currency the contractual amounts of the PUF's foreign currency exchange contracts at August 31, 2015 and 2014. Foreign currency amounts are translated at exchange rates as of August 31, 2015 and 2014. The "Net Buy" amounts represent the U.S. dollar equivalent of net commitments to purchase foreign currencies, and the "Net Sell" amounts represent the U.S. dollar equivalent of net commitments to sell foreign currencies.

The change in fair value of open foreign currency exchange contracts for the year ending August 31, 2014 was an increase in the amount of \$6,500,008 which is included in the net (decrease) increase in investments on the statement of changes in fiduciary net position.

Note 10 – Purchase Agreements

UTIMCO, as investment manager of the funds under the control and management of the UT Board, entered into a security purchase agreement with the UT Board. The agreement commits the funds under management, including the PUF, to purchase up to \$3,742,770,000 in UT System flexible rate notes in the event of a failed remarketing of such notes. The individual funds under management are not committed to a specific amount, rather all of the funds may be required to provide for the amount noted.

The PUF also has an agreement with the TAMU System Board of Regents which commits the PUF to acquire up to \$125,000,000 of Texas A&M System flexible rate notes in the event of a failed remarketing of such notes.

Note 11 – Distributions to the Available University Fund

The Texas Constitution allows for (a) distributions to the AUF from the "total return" on PUF investments, including income return as well as capital gains (realized and unrealized) and (b) the payment of PUF expenses from PUF assets. The Texas Constitution directs the UT Board to establish a distribution policy that provides stable, inflation-adjusted annual distributions to the AUF and preserves the real value of the PUF investments over the long term. Accordingly, distributions to the AUF in any given fiscal year are subject to the following: (1) A minimum amount equal to the amount needed to pay debt service on PUF bonds; (2) No increase from the preceding year (except as necessary to pay debt service on PUF bonds) unless the purchasing power of PUF investments for any rolling 10-year period has been preserved; (3) A maximum amount equal to seven percent of the average net fair market value of PUF position in any fiscal year, except as necessary to pay debt service on PUF bonds. Distributions from the PUF to the AUF for the years ended August 31, 2015 and 2014, were \$763,552,645 and \$877,373,812, respectively. The UT Board has approved an amount of \$772,876,690 for the PUF distribution to the AUF for the year ending August 31, 2016.

Note 12 – Fees and Expenses

The PUF incurs investment management fees from various external managers of the PUF. The fees, generally assessed quarterly, are based on a percentage of the market value of investments held by each individual investment manager and currently range from 0.10% to 1.50%. In addition to quarterly investment management fees, the PUF may pay performance-based management fees for investment performance in excess of certain defined benchmarks as provided for in the managers' contracts. The investment management fees presented in the statements of changes in fiduciary net position represent only those paid directly from the PUF, and do not include fees incurred and charged by general partners in private investments, by mutual fund managers, and by hedge fund managers as these types of fees are netted directly against returns for those investments in accordance with standard industry practice. The investment management fees assessed by external managers and paid directly by the PUF for the years ended August 31, 2015 and 2014, were \$24,328,479 and \$29,123,909, respectively.

UTIMCO assesses the PUF a management fee to cover the costs of managing the PUF investments and providing day-to-day operations. These fees are based on a budget prepared by management and approved by the UT Board. The fees assessed for the years ended August 31, 2015 and 2014, were \$13,033,233 and \$12,302,184, respectively.

Custodial fees and expenses are assessed by the financial institution which holds the PUF's assets. Fees are based on the number of accounts, market value of the PUF, and transaction activity in accordance with the contractual agreement with the institution. Additional fees are assessed for performance measurement, risk measurement and on-line communication services per the contractual agreement. The fees assessed for the years ended August 31, 2015 and 2014, were \$2,278,513 and \$1,940,641, respectively.

Analytical and risk measurement fees, in the amounts of \$385,045 and \$363,890, were also incurred during the years ended August 31, 2015 and 2014, respectively, to maintain a sophisticated risk measurement system for the PUF.

Accounting fees, in the amount of \$291,355 and \$207,968, were paid by the PUF during the years ended August 31, 2015 and 2014, respectively, for external and UT System internal audit services.

Background check fees are incurred as part of the due diligence efforts undertaken as part of the hiring of investment managers. Fees in the amounts of \$170,996 and \$151,604 were incurred for the years ending August 31, 2015 and 2014, respectively.

Consulting fees, in the amount of \$146,591 and \$180,480, respectively, for the years ending August 31, 2015 and 2014 were incurred for investment strategy and other investment consulting services.

The PUF incurs legal fees associated with the review of new investment manager agreements and with due diligence efforts undertaken as part of the hiring of new investment managers. For the years ended August 31, 2015 and 2014, fees incurred were \$138,873 and \$170,407, respectively.

Foreign tax consulting and filing fees are incurred by the PUF for investment managers domiciled in certain foreign countries and for those that invest in securities issued in certain foreign countries. Fees in the amounts of \$30,594 and \$70,224 were incurred for the years ending August 31, 2015 and 2014, respectively.

The PUF is assessed a fee by UT System to cover expenses related to the management of the PUF Lands. The fee assessed for the years ended August 31, 2015 and 2014, were \$12,985,198 and \$8,304,061, respectively. Fees are also assessed to cover costs associated with UT System personnel in their efforts to provide assistance to the UT Board and the Chancellor of the UT System in their oversight responsibilities of UTIMCO. Fees in the amounts of \$159,060 and \$156,960 were charged to the PUF for the years ended August 31, 2015 and 2014, respectively.

* Net decrease in cash and money markets during the year.

** Includes net realized gains(losses) on futures contracts, written options and foreign currency contracts.

*** The amounts shown in this column represent the change in the PUF's pro-rata cost basis of the securities held in long-only public markets manager's accounts that are invested through separate investment pools created in the name of the UT Board. The PUF, GEF and ITF are the sole investors in these pools, and therefore, jointly own 100% of the assets of these separately managed accounts.
