Raymund A. Paredes, COMMISSIONER OF HIGHER EDUCATION

### Agency Mission

The Texas Higher Education Coordinating Board provides leadership and coordination for the Texas higher education system and promotes access, affordability, quality, success and cost efficiency through 60x30TX, resulting in a globally competitive workforce that positions Texas as an international leader.

### Agency Vision

The THECB will be recognized as an international leader in developing and implementing innovative higher education policy to accomplish our mission.

### Agency Philosophy

The THECB will promote access to and success in quality higher education across the state with the conviction that access and success without quality is mediocrity and that quality without access and success is unacceptable.

The Coordinating Board's core values are:

**Accountability:** We hold ourselves responsible for our actions and welcome every opportunity to educate stakeholders about our policies, decisions, and aspirations.

**Efficiency:** We accomplish our work using resources in the most effective manner.

**Collaboration:** We develop partnerships that result in student success and a highly qualified, globally competent workforce.

**Excellence:** We strive for excellence in all our endeavors.

The Texas Higher Education Coordinating Board does not discriminate on the basis of race, color, national origin, gender, religion, age or disability in employment or the provision of services.

## History and Purpose of the TEXAS Grant Program

The TEXAS (Towards EXcellence, Access, and Success) Grant Program is the foundational state student financial aid program for students enrolled at public universities, encouraging needy students to prepare for college by choosing a rigorous high school curriculum, thereby contributing to their participation and success in higher education. The state of Texas has invested \$3.3 billion in the program, which was authorized by the Texas Legislature in 1999 (*see Table 8*). This has enabled the program to play a vital role in providing access to a higher education for more than 460,000 students through the 2014-15 academic year.

The requirement that priority be given to returning students who received initial TEXAS Grant awards, as well as the academic progress and GPA requirements for renewal (continuation) awards reflect a strong emphasis on retaining students so that they graduate, and therefore have a greater opportunity for a career and financial security. The TEXAS Grant Program supports the four goals of the Texas Higher Education Plan for 2015-30, *60x30TX*:

- By 2030, at least 60 percent of Texans ages 25 -34 will have a certificate or degree
- By 2030, at least 550,000 students in that year will complete a certificate, associate, bachelor's, or master's from an institution of higher education in Texas
- By 2030, all graduates from Texas public institutions of higher education will have completed programs with identified marketable skills
- By 2030, undergraduate student loan debt will not exceed 60 percent of first year wages for graduates of Texas public institutions

The following characteristics of the TEXAS Grant Program set it apart from most state grant programs in the country:

- Coverage of Tuition and Fees - institutions must ensure that all recipients of TEXAS Grant funding receive non-loan financial aid to cover their full tuition and fees (up to their demonstrated financial need).
- Need Plus Merit - While the program was designed as a need-plus-merit program from the outset, the current Priority Model provides additional merit-based requirements to prioritize the distribution of limited funding to financially needy students who are more academically prepared to succeed in college.

### Changes Affecting the Program

The following events had a significant impact on the TEXAS Grant Program, in order of occurrence:

- Statewide changes in the required curriculum for high school graduation (2001)
- Tuition increases following deregulation of tuition (2004)
- Legislation phasing out grant eligibility for students attending private or independent four-year institutions (2005) and later, community, state, and technical colleges (2013)
- Establishment of target award amounts, encouraged by the Texas Higher Education Coordinating Board (THECB) to serve more students (2012)
- Establishment of the Priority Model eligibility requirements (2013)

When the program began, the Texas public high school curriculum included the following three options for students: the Minimum High School Program (MHSP), a more rigorous curriculum called the Recommended High School Program (RHSP), and an even more rigorous curriculum called the Distinguished Achievement Program (DAP).

Large increases in appropriations for the four-year period following the inaugural biennium ensured that all qualifying students would receive grant awards. In FY 2000, less than 50 percent of freshmen with financial need had graduated under the RHSP or DAP. However, in 2001, the RHSP became a requirement for all students to graduate, absent parental authorization to opt out. By 2004, almost 80 percent of students met the new standard, resulting in significant increases in the number of students who were eligible for TEXAS Grants.

The second key event was the Texas Legislature's passage of legislation allowing governing boards of public universities to set designated tuition rates for their institutions. This deregulation of tuition resulted in annual tuition increases beginning with the 2004 Spring Semester. The statutory maximum annual TEXAS Grant award amount is the statewide average of tuition and fees; therefore, the tuition increases resulted in increased maximum award amounts allowed by statute (*see Table 9*).

State legislation passed in 2005 initiated a phase-out of participation in the TEXAS Grant Program by private or independent institutions. Students attending these institutions who received initial awards in the 2005 Fall semester or earlier were allowed to qualify for renewal awards. Funding was shifted from the TEXAS Grant Program to the Tuition Equalization Grant (TEG) program to accommodate students attending private or independent institutions.

Beginning with the 2012 Fall Semester, each year the THECB has recommended that institutions make award amounts for no more than a specified "target" amount that is less than the maximum amount allowed by statute, to stretch appropriated dollars to serve more students. This has increased the amount of non-loan aid that institutions must offer students to make up the difference between TEXAS Grant awards and tuition and fees. The percentage of average statewide tuition and fees covered by TEXAS Grants has decreased from 100 percent in 2000 to 58.2 percent in 2015 (*see Table 9*).

The Texas Legislature passed the TEXAS Grant College Readiness Reform Act in 2011 to distribute limited funding first to students who have demonstrated the greatest potential for academic success leading to a baccalaureate degree. In fall 2013, the Priority Model for selecting initial year award recipients was implemented. Institutions must first make initial year awards to students meeting Priority Model requirements, before awarding any remaining funds for initial awards to students who meet only the Basic Eligibility requirements.

Legislation passed in 2013 phased out community, state, and technical college student eligibility for initial TEXAS Grant awards beginning in the 2014 Fall semester. A one-time transfer of TEXAS Grant funds to the Texas Educational Opportunity Grant (TEOG) Program was made to assist students attending these institutions. This report highlights data for TEXAS Grant recipients who attended four-year public universities and health-related institutions (HRIs) in FY 2013, FY 2014, and FY 2015. Additional information on grant awards to students attending, community, state, and technical colleges appears in *Appendix H*.

Texas high school graduation plan options were changed as a result of state legislation, for students entering the ninth grade beginning with the 2014-15 school year. This required administrative rule amendments to align the TEXAS Grant rule terminology for high school curriculum with the new graduation plan terminology, but did not change the principles underlying the priority and basic eligibility model.

## Statutory Reporting Requirements

Section 56.311 of the Texas Education Code requires that the Coordinating Board annually provide the Legislature a report regarding the operation of the TEXAS Grant Program, including the following information from the three preceding state fiscal years:

- (1) Allocations of TEXAS Grants by eligible institution, disaggregated by initial and subsequent awards;
- (2) The number of TEXAS Grants awarded to students, disaggregated by race, ethnicity, and expected family contribution;
- (3) Disaggregated by race, ethnicity, and expected family contribution and reported both on a statewide basis and for each eligible institution, the number of TEXAS Grants awarded to students who meet:
  - (A) only the eligibility criteria described by Section 56.304 (relating to *Basic Eligibility requirements*); or
  - (B) the eligibility criteria described by Section 56.3041(2)(A) (relating to *Priority Model requirements*); and
- (4) The persistence, retention, and graduation rates of students receiving TEXAS Grants.

## Eligibility Requirements and Enrollment Pathways

### Award Priorities

All students must have need to qualify for TEXAS Grant awards. Need is determined by subtracting the Expected Family Contribution (EFC) from the student's Cost of Attendance (COA). Expected Family Contribution (EFC) is a calculated amount, based on a formula established by Congress, of how much the student's family can be expected to contribute toward the student's education costs in an academic year. COA is the total of costs related to a student's enrollment in a postsecondary institution, including tuition and fees, room and board, allowances for books and supplies, transportation, miscellaneous personal expenses, and other applicable expenses, as specified in Section 472 of the Higher Education Act.

If appropriations are insufficient to allow awards to all qualifying students, priority must be given to students who meet renewal award requirements. In determining which students receive an **initial** TEXAS Grant award from funds remaining after renewal awards, institutions must assign the highest priority to students who meet the Priority Model requirements and whose EFC does not exceed 60 percent of the statewide average amount of tuition and fees. Students must meet at least two of four criteria demonstrating college preparedness to qualify under the Priority Model requirements. Any remaining funds may be awarded to students who meet only the Basic Eligibility requirements and have the greatest amount of financial need.

*Figure 1* provides details on eligibility requirements and enrollment pathways.

**Figure 1. Initial Eligibility Requirements and Enrollment Pathways**

Basic Eligibility	Priority Model Eligibility	Enrollment Pathways
<ul style="list-style-type: none"> <li>• Texas resident</li> <li>• Demonstrate financial need</li> <li>• Apply for all available financial aid</li> <li>• Not have a baccalaureate degree</li> <li>• Enroll at least three-quarter time</li> <li>• Register with Selective Service</li> <li>• Achieve one of the enrollment pathways (see box to the right)</li> <li>• Priority goes to students with an EFC below 60% of average tuition and fees at 4-year public institutions</li> </ul>	<p>In addition to meeting Basic Eligibility requirements, must meet at least two of the following four criteria:</p> <ul style="list-style-type: none"> <li>• Earn 12 hours of college credit courses (e.g. dual credit, AP); or graduate under the Distinguished Level of Achievement High School Plan or the International Baccalaureate Program.</li> <li>• Complete a math course beyond Algebra II</li> <li>• Rank in top third of high school graduating class or attain a B average</li> <li>• Achieve a college readiness threshold as determined by the Texas Success Initiative</li> </ul>	<p>Enroll as an undergraduate in a baccalaureate degree program within:</p> <ul style="list-style-type: none"> <li>• 16 months of high school graduation</li> <li>• 12 months of an honorable military discharge (must have enlisted within 12 months of high school graduation)</li> <li>• within 12 months of receiving an associate degree or</li> <li>• "TEOG Pathway" – Enroll after having received a TEOG award at another institution and having completed at least 24 credit hours at a Texas institution with at least a 2.5 GPA.</li> </ul>

### Continuation (Renewal) Awards

To receive a continuation award, a student must:

- Be enrolled at least  $\frac{3}{4}$  time as an undergraduate student who previously received a TEXAS Grant award and not have earned a baccalaureate degree
- Not have been convicted of a felony or crime involving a controlled substance
- Have financial need
- At the end of the first year, meet institutional Satisfactory Academic Progress (SAP) requirements
- Maintain program SAP requirements by completing at least 24 semester credit hours and achieving a 2.5 or higher GPA for each year following the initial award year

### Limitations

Beginning with awards for the 2015-16 academic year, a student's eligibility for TEXAS Grant ends once he or she has attempted 150 semester credit hours or the equivalent, regardless of whether or not the TEXAS Grant paid for those hours, unless the student is granted a hardship extension. Each recipient's remaining TEXAS Grant eligibility will be monitored to ensure compliance with program requirements, as outlined in *Figure 2*:

**Figure 2. TEXAS Grant Maximum Period Allowed, by Enrollment Pathway**

<b>Entering the Program as a High School Graduate</b>	<p>The maximum period allowed for receiving the grant is the first of:</p> <ul style="list-style-type: none"> <li>• 5 years after the start of the semester in which the student received the first award, if the student's degree plan is 4 years or less</li> <li>• 6 years after the start of the semester in which the student received the first award if the student's degree plan is more than 4 years</li> <li>• 150 semester credit hours (SCH) attempted or 150 SCH attempted while receiving a TEXAS Grant, or</li> <li>• completion of a baccalaureate degree</li> </ul>
<b>Entering the Program with an Associate Degree</b>	<p>The maximum period allowed for receiving the grant is the first of:</p> <ul style="list-style-type: none"> <li>• 3 years after the start of the semester in which the student received the first award, if the student's degree plan is 4 years or less</li> <li>• 4 years after the start of the semester in which the student received the first award if the student's degree plan is more than 4 years</li> <li>• 150 SCH attempted or 90 SCH attempted while receiving the grant, or</li> <li>• completion of a baccalaureate degree</li> </ul>
<b>Entering the Program as a Transfer Student (former TEOG recipient)</b>	<p>The maximum period allowed for receiving the grant is the first of:</p> <ul style="list-style-type: none"> <li>• 150 semester credit hours attempted or 150 SCH attempted while receiving the grant</li> <li>• completion of a baccalaureate degree</li> </ul>

### Allocations of Funds to Institutions

In past years, the Coordinating Board determined institutional allocations based on a variety of factors, including the estimated number of renewal awards for eligible returning students and the estimated number of students eligible for initial awards. However, legislation that became effective September 1, 2013 requires that the methods for determining fund allocations for all state financial aid programs be determined through negotiated rulemaking.

The Negotiated Rulemaking Committee for Texas Grant Program Allocations established a method of determining fund allocations based on estimated renewal awards and initial year award estimates, calculated using a formula that takes into consideration multiple criteria. The detailed specifications for determining allocations are published in the TEXAS Grant rules in the Texas Administrative Code, Title 19, Part 1, Chapter 22, Subchapter L.

Allocations for the upcoming academic year are announced to institutions as early as possible in the spring semester of the preceding academic year. Institutions must encumber or return any unspent funds by February 20. Funds returned to the Board are reallocated to institutions that have requested additional funds.

Because initial TEXAS Grant awards for students attending state and community and technical colleges were discontinued beginning in fall 2014, no allocations were made to these institutions for FY 2015. As

mentioned previously, a one-time transfer of TEXAS Grant funds to the Texas Educational Opportunity Grant Program (TEOG) occurred to assist students attending two-year institutions. The institutions requested funds for renewal awards as needed, and the funds were disbursed from unencumbered program funds.

*Table 1* shows total allocations to public universities and health-related institutions (HRIs) for the reporting period:

**Table 1. Allocations to Public Universities and HRIs**

FY 2013	FY 2014	FY 2015
\$ 257,420,002	\$ 302,186,668	\$ 325,021,667

The above figures represent an increase of approximately 21% from FY 2013 to FY 2015.

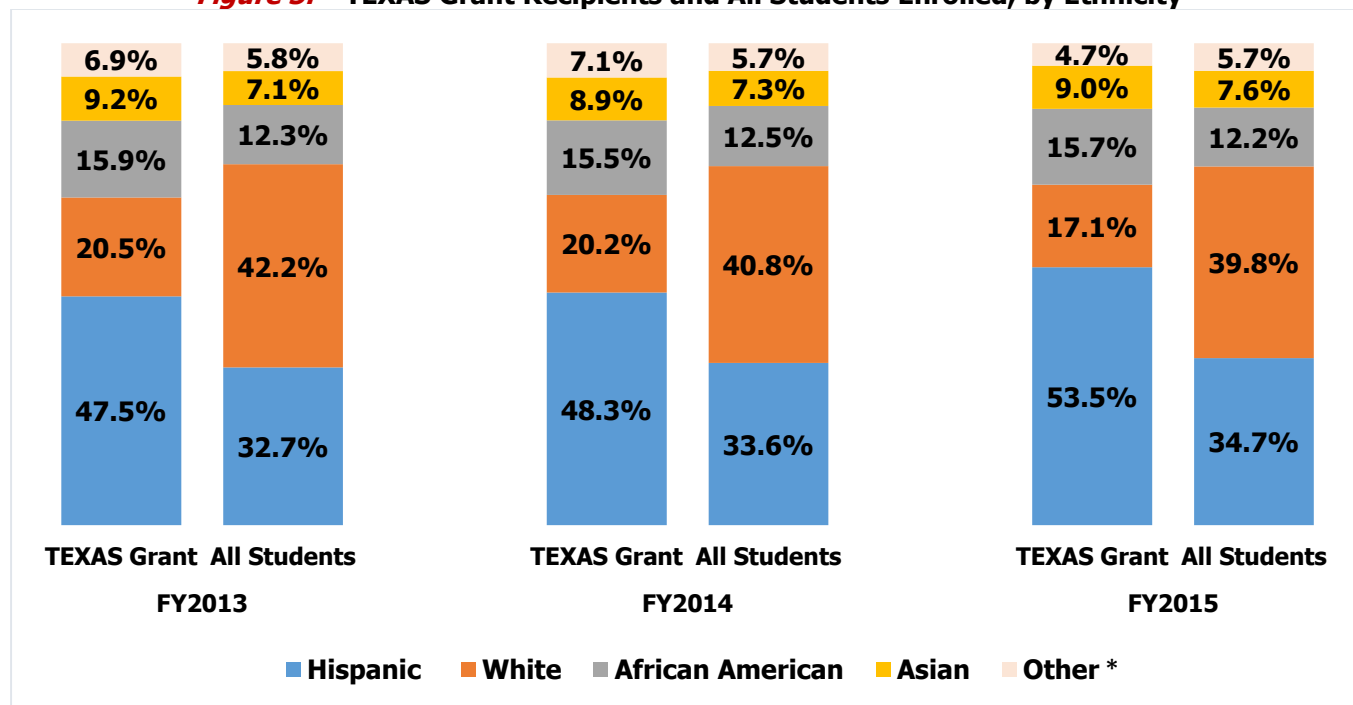

*Appendix A* reflects the total allocation to each public university and HRI.

*Appendix E* shows the total disbursements to students attending these institutions, disaggregated by initial year awards and renewal awards. *Appendix H* includes the total amount disbursed by each community and technical college.

### Race/Ethnicity – Recipients Attending Public Universities & HRIs

Total enrollment at Texas public universities and HRIs increased by 27,322 from the Fall Semester of 2013 to the Fall Semester of 2015, to 492,672 students, a 6 percent increase. The total number of students receiving TEXAS Grants while attending these institutions increased by 10,876, representing a 19 percent increase during this period as indicated in *Figure 3* and *Table 2*.

**Figure 3. TEXAS Grant Recipients and All Students Enrolled, by Ethnicity**

Source: Financial Aid Data System (FADS) and TEXAS Grant End-of-Year Reports

\*Other includes American Indian/Alaskan Native, International, Native Hawaiian/Pacific Islander, Multiracial, and Unknown/Not Reported.

The relative differences between the percentages of Asian, African American, and white students receiving TEXAS Grants and the percentages of those races/ethnicities represented among all enrolled students changed very little during the three-year reporting period. In all three years, the number of Hispanic students receiving TEXAS Grants exceeded the number of Hispanic students represented in the total student population by more than 14 percent, exceeding representation in the total population by 18.8 percent in FY 2015. The percentage of white students receiving TEXAS Grants continued to be approximately half of the percentage of white students represented in the total student population, while the percentage of Asian and African American students receiving TEXAS Grants closely mirrored representation in the total student population.

**Table 2. Comparison of TEXAS Grant Recipients and Total Enrollment, by Ethnicity**  
Students Attending Public Universities and HRIs

## EFC - Recipients Attending Public Universities and HRIs

Expected Family Contribution (EFC) is a calculated amount, based on a formula established by Congress, of how much the student's family can be expected to contribute toward the student's education costs in an academic year.

As stated previously, if appropriations are insufficient to allow awards to all eligible students, priority must be given to students who qualify for continuation awards.

In determining which students receive an **initial** award from funds remaining after renewal awards, institutions must assign the highest priority to students who meet the Priority Model requirements and whose EFC does not exceed 60 percent of the statewide average amount of tuition and fees for that academic year, shown below for FY 2013-15. Remaining funds may be awarded to students who meet the Basic Eligibility requirements, prioritized by level of need.

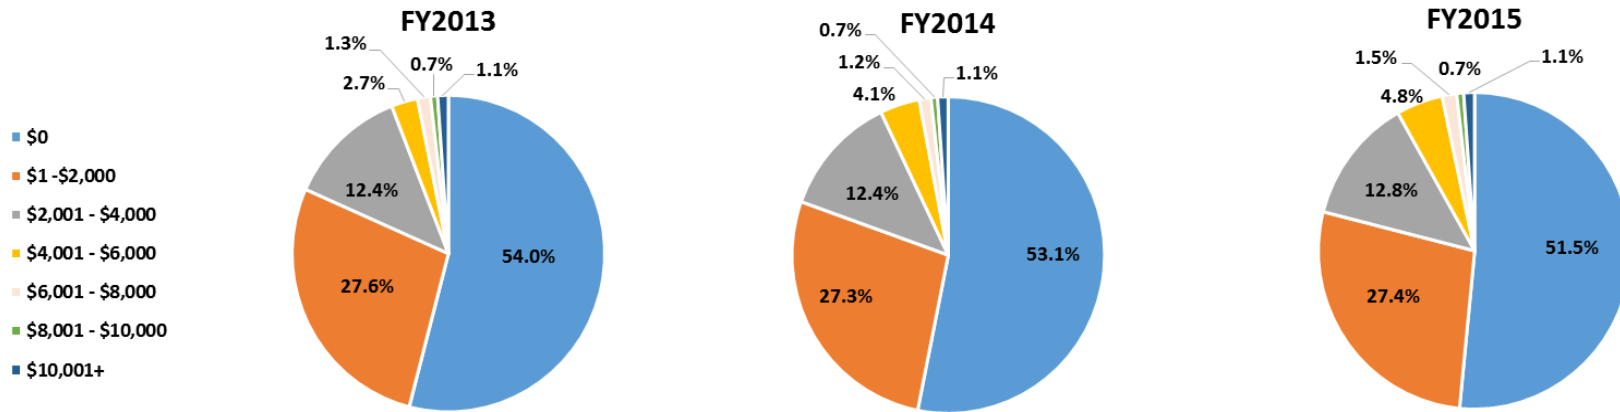

Students must have financial need to qualify for initial and continuation TEXAS Grant awards.

### Maximum EFC – First Priority for initial TEXAS Grants

- FY 2013: \$4,000
- FY 2014: \$4,620
- FY 2015: \$4,800

As noted in *Figure 4* and *Table 3*, for each year of the FY 2013-15 reporting period, more than half of all TEXAS Grants were awarded to students whose EFC at the time of the initial award was \$0. Approximately 80 percent of the grants were awarded to students whose EFC was under \$2,000. There was a small increase in the percentage of grant recipients whose EFC was in the \$4,001 – \$6,000 range during the three-year period.

**Figure 4. EFC for TEXAS Grant Recipients**

Source: FADS and TEXAS Grant End-of-Year Reports

## Race/Ethnicity - Priority Model and Basic Eligibility Requirements

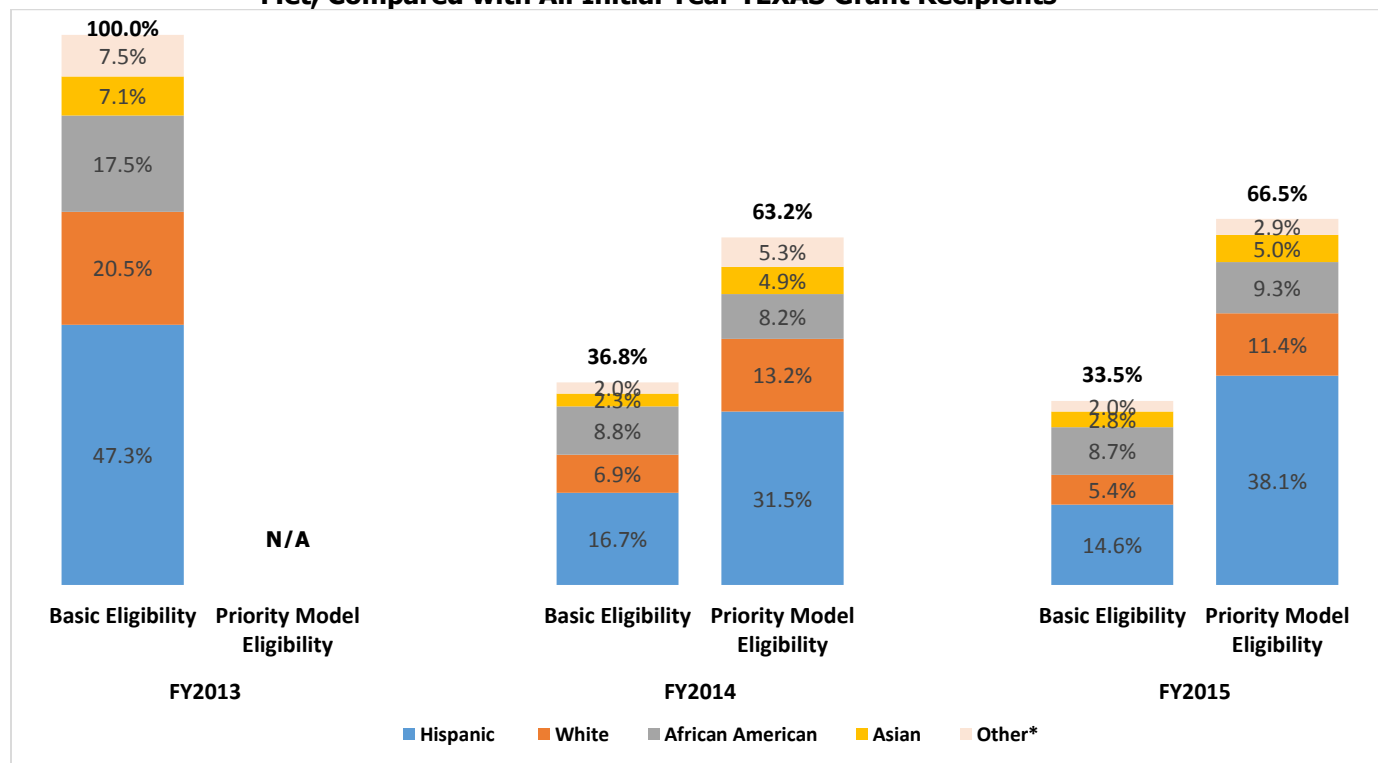

The data presented in this section pertain to initial year awards to students attending public universities and health-related institutions. As previously mentioned, the Priority Model was first implemented for students receiving initial year awards in FY 2014 (fall 2013). One element of interest being tracked is whether or not the introduction of the Priority Model has a significant impact on the racial/ethnic distribution of TEXAS Grants awarded to initial recipients. *Figure 5* and *Table 4* illustrate the variations among races/ethnicities represented by students receiving initial year awards under the Basic Eligibility requirements and those of the Priority Model. In both FY 2014 and FY 2015, Hispanic students received a significantly higher percentage of initial grants under the Priority Model than their white and African American counterparts.

Although these percentages are in keeping with the distribution of all TEXAS Grants among races/ethnicities, Hispanic students represented the greatest percentage increase in initial year Priority Model awards from FY 2014 to FY 2015, as follows:

- Hispanic students: 6.6 percentage point increase
- African American students: 1.1 percentage point increase
- White students: 1.8 percentage point decrease
- Asian students: 0.1 percentage point increase
- \*Other students: 2.4 percentage point decrease

In future years, as recipients through the Priority Model move toward graduation, there will be more robust data available for assessment of the impact of the Priority Model.

**Figure 5. Race/Ethnicity of Initial Year TEXAS Grant Recipients, by Eligibility Requirements Met, Compared with All Initial Year TEXAS Grant Recipients**

Source: FADS and TEXAS Grant End-of-Year Reports

Note: The above figures represent student race/ethnicity as a percentage of all initial year TEXAS Grant recipients.

\*Other includes American Indian/Alaskan Native, International, Native Hawaiian/Pacific Islander, Multiracial, and Unknown/Not Reported.

**Table 4. Basic Eligibility vs. Priority Model, by Ethnicity**  
TEXAS Grant Recipients Attending Public Universities and HRIs

Basic Eligibility (IY)			
2013			
Ethnicity	# of Students	Amount Disbursed	Percent Recipients
Hispanic	11,303	\$51,121,530	47.3%

## EFC – Priority Model and Basic Eligibility Requirements

Overall, the percentage of TEXAS Grant recipients with an EFC of \$4,000 or below has remained relatively the same between FY 2014 and FY 2015 (97% vs 96.1%). When comparing the EFC representation between FY 2014 and FY 2015, the largest difference was a 2.9 percentage point decrease in FY 2015 in the percentage of awards made to students whose EFC was \$0 and who qualified under the Basic Eligibility requirements. There was a 1.4 percentage point increase in the percentage of awards made to students whose EFC was between \$1 - \$2000 and who qualified under the Priority Model requirements in FY 2015, compared with FY2014.

## Graduation and Persistence Rates

**Graduation rates** are based on first-time, full-time degree-seeking students who enrolled in a minimum of 12 semester credit hours their first fall semester at a 4-year public university, and have graduated in four, five, or six years from the same or another Texas public or independent institution.

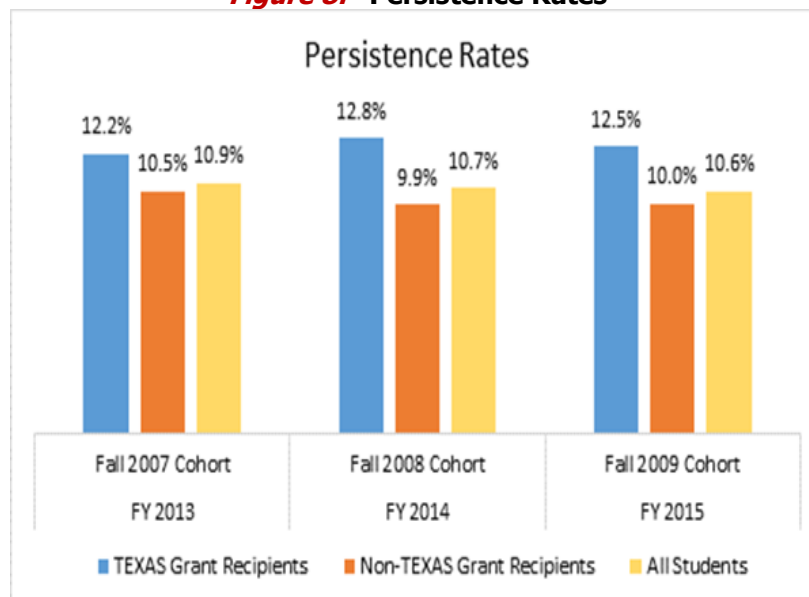

**Persistence rates** are based on first-time, full-time degree-seeking students who enrolled in a minimum of 12 semester credit hours their first fall semester at a 4-year public university are still enrolled in higher education after six academic years.

**Figure 7. Six-Year Graduation Rates**

Source: THECB CBM001, CBM009, FADS

**Figure 8. Persistence Rates**

Source: THECB CBM001, CBM009, FADS

When comparing the six-year graduation rates for TEXAS Grant recipients with those of non-TEXAS Grant recipients, there is not significant variation in differences over the three-year period. The same is true when comparing the rates for TEXAS Grant recipients with all students (which includes TEXAS Grant recipients). The largest difference occurred in FY 2014, when the six-year graduation rate for non-TEXAS Grant recipients was 8.7 percent higher than that of TEXAS Grant recipients and the rate for all students was 6.5 percent higher than for TEXAS Grant recipients.

Students whose families have the most limited resources often must overcome additional challenges that other students may not experience in progressing to college graduation. The 2016 Historical Trend Report titled, *Indicators of Higher Education Equity in the United States*, was the result of a collaboration between the Pell Institute for the Study of Opportunity in Higher Education (Pell Institute) and the Alliance for Higher Education and Democracy at the University of Pennsylvania (PennaHEAD). This report, based on national data, states, "In 2014, the 25 percent of dependent family members in the highest-income family quartile accounted for 54 percent of those who had attained a bachelor's degree by age 24, while individuals from the bottom quartile accounted for 10 percent of the total." Additionally, the report states, "Together the top two quartiles accounted for 72 percent of the total bachelor's degrees attained in 1970 and 77 percent in 2014. The bottom two quartiles accounted for 28 percent in 1970 and 23 percent in 2014 – a decline of 5 percentage points over this period."

The minimal family resources of TEXAS Grant recipients were demonstrated in *Figure 4*. In FY 2013, 2014, and 2015, more than half of all TEXAS Grant recipients' families were unable to pay any amount of the students' education costs, and an additional 27 percent could contribute only \$2,000 or less toward those costs. The maximum EFC to qualify for priority TEXAS Grants was \$4,000 in FY 2013, \$4,620 in FY 2014, and \$4,800 in FY 2015.

The persistence rates for all three student groups changed very little over the three-year reporting period. The persistence rate for TEXAS Grant recipients exceeded that of non-TEXAS Grant recipients by 1.7 percent in FY 2013, 2.9 percent in FY 2014, and 2.5 percent in FY 2015.

### Students Retained in the TEXAS Grant Program

*Tables 6, 6.1, and 7* reflect students who were retained in the TEXAS Grant Program for each year following the initial award year. Thus, these students continued to have need and continued to meet satisfactory academic progress and GPA requirements for each year after the initial award year. This is different from the standard persistence rates calculated by the agency, since a student may persist in college while not retaining in the grant program for many reasons (late application, change in level of need, academic performance issues, etc.).

**Table 6. Student Retention in TEXAS Grant Program - Basic Eligibility Requirements**

Cohort (Initial Award)	Initial Year number	1-yr Retention (award #2)	2-yr Retention (award #3)	3-yr Retention (award #4)	4-yr Retention (award #5)	5-yr Retention (award #6)
FY 2015	27,079					
FY 2014	27,251	18,549				
FY 2013	23,734	15,826	9,218

**Table 6.1. Student Retention Percentages - Basic Eligibility Requirements**

Cohort	1-yr Retention (award #2)	2-yr Retention (award #3)	3-yr Retention (award #4)	4-yr Retention (award #5)	5-yr Retention (award #6)
FY 2015					
FY 2014	68.1%				
FY 2013	66.7%	38.8%			
FY 2012	65.7%	38.7%	31.5%		
FY 2011	69.1%	37.1%	30.2%	12.7%	
FY 2010	70.2%	38.4%	31.0%	12.8%	0.1%
FY 2009	70.4%	39.2%	32.0%	12.8%	0.2%
FY 2008	68.1%	39.6%	32.8%	13.6%	0.2%

Source: FADS and TEXAS Grant End-of-Year Reports

In FY 2014, 27,251 students received an initial TEXAS Grant award under the Basic Eligibility requirements. A total of 18,549 (68.1 percent) were retained in the program for a second consecutive year in FY 2015.

The average rate of student retention in the program dropped to 38.6 percent for students receiving a third consecutive annual award, 31.5 percent for students receiving a fourth consecutive annual award, and 13.0 percent for students receiving a TEXAS Grant award for a fifth consecutive year. A goal for future reports is to provide additional data regarding the underlying reasons students did not continue to receive TEXAS Grant awards, such as failure to meet program academic progress or GPA requirements, changes in family financial circumstances, or changes in enrollment status.

Because the Priority Model was not implemented until fall 2014, there are not enough data to compare the program retention rates for students meeting only the Basic Eligibility requirements with those meeting the Priority Model Requirements. The one-year program retention percentage for students meeting the Priority Model Requirements in FY 2014 is 3.6 percent higher than those meeting the Basic Eligibility requirements in FY 2014.

**Table 7. Student Retention in TEXAS Grant Program – Priority Model**

Cohort	Initial number	1-yr retention	2-yr retention	3-yr retention	4-yr retention	5-yr retention
FY 2015	18,024					
FY 2014	17,260	12,382				
Retention %		71.7%				

Source: FADS and TEXAS Grant End-of-Year Reports

As indicated in *Table 6.1*, during the period FY 2008 – 15, the percentage of students who met the Basic Eligibility requirements and remained in the program at least one year after the initial award year ranged from 65.7 percent to 70.4 percent, for an average of 68.3 percent. The one-year program retention percentage for students meeting the Priority Model Requirements in FY 2014 is 3.4 percent higher than this average (see *Table 7*). Although this increase is modest, it is promising.

## History of Appropriations and Average Annual Tuition and Fees

The following table illustrates the Texas Legislature's continuing commitment to providing access to higher education for qualifying students who have the greatest amount of financial need. Although appropriations for the TEXAS Grant Program have increased for six of eight biennia since the program began, the average amount of tuition and fees has also increased each year.

**Table 8. History of Texas Grant Appropriations**

TEXAS Grant Appropriations					
FY	Biennial	Annual	Biennial Appropriation Percentage Increase/Decrease	Avg. Annual Amt. Tuition & Fees	Yr to Yr % Increase Avg. Tuition & Fees
2000	\$55,000,000	\$20,000,000	N/A	\$2,834	N/A
2001		\$35,000,000	N/A	\$2,990	5%

## Summary and Legislative Recommendations

The TEXAS Grant Program remains the state's signature student financial aid program for financially needy, academically prepared Texas students. The intent of the 1999 legislation authorizing the program was to ensure that the tuition and fees of these students are covered as long as they continue to meet program requirements. This intent is reflected in the requirement that maximum annual award amounts be equal to the statewide average of tuition and fees at public institutions, as well as the requirement that institutions offer non-loan aid to cover any difference between the amount of tuition and fees owed by a student and the amount of the TEXAS Grant awarded to the student. The statute also mandates that priority be given to students eligible for renewal, or continuation awards.

The legislative intent was realized during the first two years of the program. However, after the Recommended High School Program (RHSP) became the default curriculum for all students to graduate, the number of TEXAS Grant-eligible students increased dramatically. Additionally, tuition deregulation resulted in increased tuition and fees, beginning with the 2004 spring semester and continuing through FY 2015. *Table 9* demonstrates that funding for the program has not kept pace with increased tuition and fees and the increasing number of students qualifying for initial and renewal awards, despite significant increases in appropriations for the program over the years.

Measures have been taken in recent years to ensure that as many students as possible are served. Each year since FY 2012, the Coordinating Board has requested that institutions limit award amounts to a "target amount" of \$5,000 (see *Table 9*). In addition, legislation required implementation of the Priority Model for students receiving first-time TEXAS Grant awards in fall 2013. Students meeting at least two of four criteria representing greater college preparedness must receive priority over students meeting the Basic program eligibility requirements for initial awards. Prioritizing grants to students who are more likely to graduate improves the return on the state's investment.

Even though the Texas Legislature has invested over \$3.3 billion in the program and has assisted more than 460,000 students, the program now covers only approximately 58 percent of the statewide average amount of tuition and fees, due to the factors described above. Therefore, institutions must identify other non-loan aid to cover the remaining 42 percent owed by students.

### Staff Legislative Recommendations

The majority (60 percent) of students in the P-12 pipeline are poor. If Texas is to achieve the goals of the new strategic plan for higher education, *60x30TX*, higher education must continue to improve student access and completion. Coordinating Board staff recommend modifying TEXAS Grant provisions to encourage timely completion of degrees and to provide grant awards to more new students. In addition to two recommendations relating to this report and "cleanup" statutory language to provide greater clarity, the following recommendations will be considered by the Coordinating Board:

- Limit TEXAS Grant eligibility to 135 semester credit hours
- Require completion of 30 semester credit hours per academic year
- Limit TEXAS Grant awards to tuition, fees, and a book stipend, minus the federal Pell Grant
- Remove Work-Study as a potential matching fund to cover any difference in the amount of a TEXAS Grant and the actual amount of tuition and required fees

The current statute allows 150 hours of TEXAS Grant eligibility, whereas the majority of undergraduate degrees require only 120 semester credit hours. Allowing students five years to complete a four-year degree program may encourage students to enroll in unnecessary coursework, increasing costs to the student and the state. The funds expended for unnecessary coursework could instead be used to fund initial awards to more new students.

TEXAS Grant recipients are currently required to complete 24 semester credit hours per academic year, which is not sufficient to graduate with a baccalaureate degree in four years, if the student completes this number of hours each year. A requirement that students complete 30 semester credit hours per year to receive renewal awards would increase the likelihood of degree completion in four years. This recommendation is coupled with the recommendation that the Coordinating Board be authorized to use any unexpended balance from the prior biennium, to allow institutions to make summer TEXAS Grant awards. This would provide students more flexibility in completing 30 semester credit hours per academic year.

TEXAS Grants are currently awarded up to the student's cost of attendance, which includes the cost of books, supplies, room and board, transportation, and personal expenses. Limiting TEXAS Grant awards to cover the cost of tuition, fees, and a book stipend, minus the amount of a Pell Grant award, would distribute limited funding to more students and would reduce the possibility of students using funds inappropriately for non-educational expenses.

The statute requires institutions to use non-loan funds, which includes work-study funds, to cover a student's tuition and fees if the TEXAS Grant does not meet a student's need. Work-study is not a direct payment to the student until after the tuition bill is due, and therefore should not be used as a matching fund. In addition to removing work-study funds as a potential matching fund, Coordinating Board staff recommend exempting institutions from the matching requirement for TEXAS Grant recipients whose EFC exceeds the priority EFC (60 percent of the statewide average amount of tuition and fees at public four-year institutions).

Implementation of the above recommendations, combined with established annual target award amounts and continued application of the Priority Model, would strengthen the overall effort to use limited TEXAS Grant funds more effectively.

\*Total disbursements exceed total allocations due to late refunds, prior year funds transfers, and donations received.

Note: For state financial aid programs, the merger of the University of Texas at Brownsville and the University of Texas – Pan American became effective in FY2016.
