CERTIFICATE

Agency Name Texas A&M Veterinary Medical Diagnostic Laboratory

This is to certify that the information contained in the agency Legislative Appropriations Request filed with the Legislative Budget Board (LBB) and the Governor's Office Budget Division (Governor's Office) is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the Governor's Office will be notified in writing in accordance with Article IX, Section 7.01 (2018-19 GAA).

557 Texas A&M Veterinary Medical Diagnostic Laboratory

Mission and Scope

The mission of the Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) is to promote and protect animal health, public health, food safety and agricultural economic interests in Texas and beyond. Our vision is to be the global leader in providing innovative, state-of-the-art veterinary diagnostic services.

Created by the 60th Legislature in 1967, TVMDL is the only state agency with a mandate to provide veterinary diagnostic services to the citizens of Texas. TVMDL is a member of the Texas A&M University System and is governed by its Board of Regents. TVMDL provides rapid, accurate, state-of-the-art diagnoses for animal and zoonotic (infecting both humans and animals) diseases. TVMDL is composed of four laboratories: two full service laboratories (College Station and Amarillo) and two poultry laboratories (Center and Gonzales). The full-service laboratories are staffed and equipped to provide the full range of diagnostic testing procedures in the disciplines of bacteriology, endocrinology, virology, mycology, serology, toxicology, molecular genetics and pathology for all species of livestock, poultry, companion animals and exotic animals. The TVMDL staff consists of 23 veterinarians, most with advanced degrees (MS or PhD) and/or board certification. In addition, 9 staff with PhDs in various specialties round out the professional staff.

Samples submitted to TVMDL originate from all regions of Texas, the nation and the globe. Our testing provides an early detection, identification and response testing capacity for both routine and high consequence diseases (e.g. Foot and Mouth Disease, Avian Influenza), vector-borne diseases (e.g. West Nile Virus, Chaga's Disease) and bioterrorism agents (e.g. plague, anthrax); provides diagnostic tests to aid in commerce (intrastate, interstate and international trade); provides drug testing for pari-mutuel racing animals and livestock shows; and contributes to the protection and health of animal/human interactions.

TVMDL is one of the highest volume veterinary diagnostic laboratories in the nation. It routinely receives and processes nearly 150,000 submissions and performs approximately 800,000 tests per year. The agency values its general revenue support which allows TVMDL to keep fees reasonable, so submissions stay at a critical mass for effective biosurveillance. The laboratory is accredited by the American Association of Veterinary Laboratory Diagnosticians (AAVLD), American Association for Laboratory Accreditation (ISO 17025) and the Racing Medication Testing Consortium (RMTTC). TVMDL is a Level 1 member of the National Animal Health Laboratory Network (NAHLN). Construction of a new headquarters laboratory in College Station was completed in 2016 and has allowed TVMDL to enhance the technologies and services it provides to clients as well as meet the requirements to maintain accreditation as one of the premier veterinary diagnostic laboratories in the nation. As a NAHLN Level 1 laboratory, TVMDL participates in national targeted surveillance programs for foreign animal diseases that pose significant economic threats to Texas livestock and poultry. TVMDL staff routinely work with NAHLN partners and are leaders in establishing testing standards. In addition, we actively participate in critical preparedness and response training for a statewide or national animal/public health disease emergency.

Veterinary diagnostic laboratories (VDLs) are often the first line of defense for both the animal and public health sectors. VDLs must have animal disease diagnostic systems capable of providing adequate capacity and capability for early detection and characterization of newly emergent, accidental, or intentionally introduced diseases, including potential bioterrorism events.

Current initiatives to strengthen TVMDL's diagnostic capabilities and capacity, thereby improving our preparedness and level of service, include: collaborating with other state agencies and Texas A&M University System components for the development, validation and implementation of new diagnostic technologies for endemic and high consequence pathogens; developing early detection and testing protocols which can provide surge testing capacities for responding to, and recovering from, a foreign animal or zoonotic disease introduction; investing in infrastructure and equipment, with emphasis on advanced technology and robotics; development of an agency-specific high consequence disease diagnostic response plan; integration of TVMDL's emergency response plan with other local, state, and federal programs; enhancing our quality system to provide customers with validated, quality-controlled test results; and investments in current and future veterinary diagnosticians and

Administrator's Statement

Automated Budget and Evaluation System of Texas (ABEST)

557 Texas A&M Veterinary Medical Diagnostic Laboratory

homeland security professionals.

TVMDLs' Accomplishments and Their Impacts on the Citizens of Texas and the Agricultural Community:

- In addition to over 500,000 tests/year for domestic diseases, TVMDL performs over 250,000 assays annually for high consequence disease agents (e.g. Foot and Mouth Disease, Avian Influenza). TVMDL's routine testing capacity is the backbone of an animal and zoonotic disease surveillance system for Texas.
- TVMDL plays a key role in facilitating livestock commerce, an industry worth nearly \$18 billion. Each month TVMDL performs an average of 12,000 tests to aid producers and animal owners in selling and transporting animals within the state, across state lines, and internationally.
- The American Association of Veterinary Laboratory Diagnosticians (AAVLD) conducted a 5-year site review in May 2016, awarding TVMDL full accreditation for testing of all species. The Drug Testing Laboratory successfully completed accreditation by the Racing Medication Testing Consortium (RMTTC) in early 2016, to add to its previous ISO 17025 international accreditation. Such external, 3rd-party accreditations assure the quality and validity of our test results. TVMDL's quality management program provides a system for the ongoing monitoring of test performance and laboratory quality.
- TVMDL participates in USDA training and proficiency testing surveillance programs for high consequence pathogens such as highly pathogenic avian influenza ("bird-flu"), foot and mouth disease, exotic Newcastle disease, chronic wasting disease, scrapie, and classical swine fever. TVMDL tests over 24,000 samples annually for these animal disease surveillance initiatives. In July 2015, TVMDL diagnosed the first case of chronic wasting disease (CWD) in captive-bred Texas deer. CWD is a progressive, fatal disease with no known treatment or cure which poses a severe threat to both wild and farmed deer. Since then, TVMDL has conducted over 103,000 tests for CWD to aid the Texas Animal Health Commission and the Texas Parks and Wildlife Department, as well as the nearly \$2.5 billion deer industry, respond to this significant disease outbreak.
- In response to industry needs, TVMDL developed or implemented 9 new tests and 20 new panels during fiscal year 2016 and 2017.
- During FY17, TVMDL tested over 8,100 animals to ensure drug-free racing and livestock show events.
- In early 2018, as part of routine surveillance for Avian Influenza, TVMDL picked up a positive flock of birds just prior to being shipped to slaughter. The agency provided testing support for all follow up surveillance on multiple other farms with ties to the index farm, allowing regulators and the company to quickly determine the extent of the infection and successfully respond to prevent any further spread. This quick response also preserved vital markets, both nationally and internationally, for the entire poultry industry.

In 2018 TVMDL collaborated with USDA and one other state diagnostic laboratory to develop and implement the first real-time video and data sharing system for joint investigation of possible foreign animal disease incursions into the US.

Administrator's Statement

86th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

557 Texas A&M Veterinary Medical Diagnostic Laboratory

Technical Budget Structure Change

Texas A&M Veterinary Medical Diagnostic Laboratory is requesting a bill pattern structure change to Method of Finance, in order to become aligned with other institutions of higher education in Texas. Other A&M System agencies, each defined as institutions of higher education, have submitted a similar request. The requested technical change was submitted to both the Legislative Budget Board and the Governor's Office of Budget, Policy and Planning during the budget structure change process in the Spring of this year.

Exceptional Item: Funding TVMDL Poultry Laboratories
Requested Amount: \$1,200,000

This exceptional item will add based funding for the Texas poultry laboratories located in Center, and Gonzales as well as the mandated Texas Pullorum-Typhoid program. These laboratories provide critical diagnostic services to the multi-billion-dollar poultry industry in the State and are responsible for the six million birds in Texas. They are the first line of defense in providing test results which allow poultry companies to make crucial business decisions in an outbreak situation. Both laboratories were transferred to TVMDL in 1991 without an increase in General Revenue and generate operating losses each year. Funding is needed to continue critical diagnostic and surveillance services for the state's important poultry industry.

Exceptional Item: Biosurveillance and Bioterrorism Capacity Development Program
Requested Amount: \$2,340,000

This new program will ensure early, rapid and accurate detection of animal and zoonotic (animal and human) disease threats, potential bioterrorism events, changes in antimicrobial resistance of pathogens as well as the timely and effective communication of disease data to decision makers, to mitigate the effects of disease events on the health, food security and financial well-being of all Texans. The program will invest in professionals and tools required to provide training programs for diagnostic laboratory specialists needed to augment existing staff and replace expected losses of expertise. We request funding to develop a program that will (1) build a much-needed veterinary diagnostic workforce, (2) enhance laboratory automation, and (3) develop epidemiologic tools necessary for TVMDL to respond to these ever-increasing and serious threats posed by disease outbreaks.

It is imperative that we begin to invest in trained, experienced veterinary diagnosticians that will recognize the first signs of a potentially devastating animal or zoonotic disease threat (e.g. Foot and Mouth Disease, Anthrax, Influenza) or changes in antimicrobial resistance of pathogens is vital to protecting the Texas economy, animal and public health. Doing so allows TVMDL to provide real time analysis and reporting of disease surveillance data that will provide baseline prevalence rates for diseases and offer specific outbreak data on the health of animal populations and the threat to human populations, the food supply and the economy.

Agency Approach to Additional 10% Budget Reduction:

A 10% budget reduction would be implemented by delaying critical capital equipment expenditures, operating costs, and FTE reductions. Personnel expenditures account for nearly 70% of the agency's budget. Budget reductions of this magnitude would critically impair the agency from meeting its primary strategy and goal: providing diagnostic services and disease surveillance for the State of Texas.

Administrator's Statement

Automated Budget and Evaluation System of Texas (ABEST)

557 Texas A&M Veterinary Medical Diagnostic Laboratory

Texas A&M University System-wide Funding Issues and Needs:

Base Funding – Maintaining an equitable, reliable, and predictable source of funding for higher education is critical to allow our institutions to plan and grow, teach and support our students through to graduation, and pursue excellence. This base funding is provided by the State through both formula and non-formula support.

Formula funding, which accounts for 80 percent of our institutions' net GR appropriations, supports the core instructional, operational and infrastructure costs at our institutions and is not keeping pace on a per student basis as enrollments grow. And that is before considering inflation. Consistent formula appropriations that fund student enrollment growth and inflation are needed to avoid adverse impacts on students' success. Our highest priority is additional funding in the formulas to cover student enrollment growth through the spring 2019 semester. Any additional funding you can provide through the formulas to increase the rates to cover the cost of inflation on the state's share of the cost of educating students will help to offset pressure on the portion of core costs borne by tuition .

Until formula funding can keep pace with enrollment growth and inflation, non-formula support remains a critical source of base funding. The Legislature has already enacted two recent major step downs on non-formula support items. For the general academics, these items were cut by approximately one-third last session. These cuts are on top of the 25 percent reductions in special items made during the 2011 session. We request that non-formula support items be maintained at current levels in the upcoming biennium.

We also request consideration of expanding the Small Institution Supplement – both in lengthening the runway to include institutions up to 20,000 headcount and increasing the amount of funding provided through this formula supplement. Institutions with fewer than 20,000 students do not have the economies of scale of a research or emerging research institution and therefore are not able to operate on the formula-only funding. Additional funding through this mechanism could be an important tool in getting institutions to a point of financial stability as they grow to the 20,000 student enrollment.

Even though the A&M Agencies do not have an operations formula, they need base funding support much in the same manner as the formulas that provide basic, on-going support for the academics and health related institutions.

Outcomes Based Funding - Our Board is increasingly incorporating performance and outcomes into our internal budget review processes. We welcome a continued dialog on this issue during the legislative session. However we believe there are several fundamentals that are important in consideration of any performance funding system:

- Any performance funding should be an incentive bonus on top of current formula funding. Again, formula funding is not keeping pace on a per student basis as enrollments grow. Reallocating existing formula funding for performance will negatively impact some of the very institutions that performance funding is trying to incentivize.
- A fundamental consideration with any performance funding model is the need to avoid penalizing institutions already performing at a high level vs. putting in place a system that rewards those that have room to improve.
- Any performance funding model should be implemented over an extended period of time.

Higher Education Group Health Insurance – We request funding to cover increases in covered enrollments and in health care costs that are beyond our control . We would also request restoration of some of the ever-widening gap in funding level for our employees as compared to the employees in the state employees ERS group insurance plan.

Administrator's Statement

7/30/2018 4:00:28PM

86th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

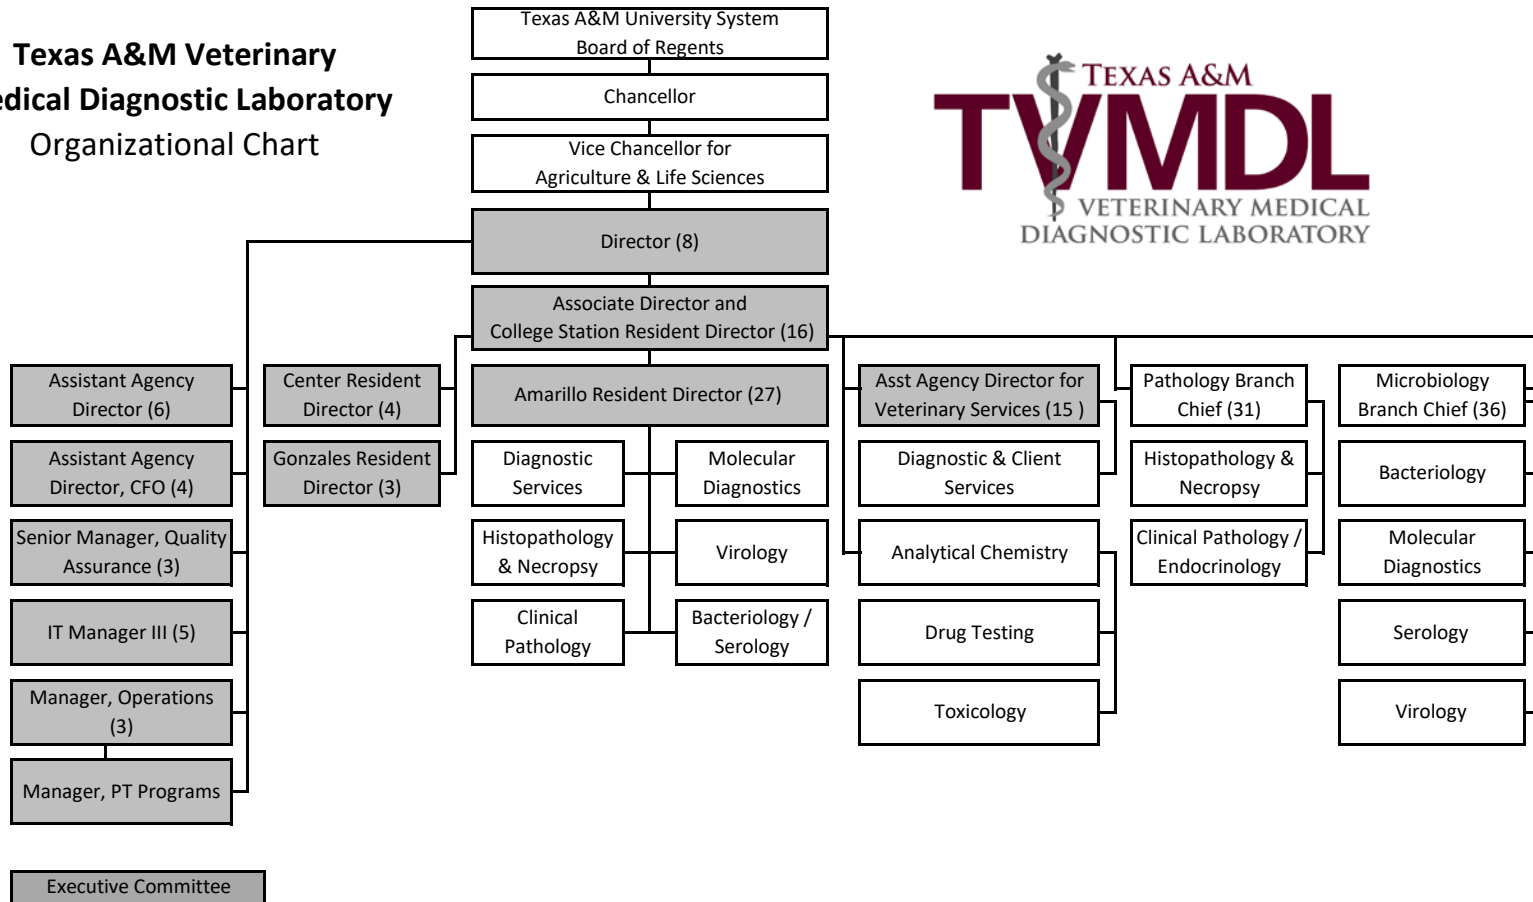

557 Texas A&M Veterinary Medical Diagnostic Laboratory

Student Financial Aid – We request increased support for student financial aid because it is vitally important for our students and families and will help students graduate with lower debt. However, since it is a method of paying for tuition and fees and does not increase much needed funding for the universities, we request increases to TEXAS grants and other financial aid programs be made in conjunction with funding the formula that provides the state's share of the costs of educating students .

Other Matters:

Background Checks - Texas A&M Veterinary Medical Diagnostic Laboratory will continue to conduct background checks for all external and internal applicants filling new or vacant budgeted, wage, or student positions. This published agency procedure is consistent with the Texas A&M University System regulation governing background checks.

Texas A&M Veterinary Medical Diagnostic Laboratory Organizational Chart

Discipline Descriptions

Bacteriology	This laboratory processes samples from companion animals, livestock, and exotic animals that may be infected with or harboring potentially infectious bacteria. Experienced technicians employ various media to isolate bacterial/fungal organisms to identify clinically significant organisms or potential pathogens. This section provides information used in treatment options for herd health management decisions such as antibiotic selection.
Clinical Pathology & Endocrinology	This section receives blood, body fluids and secretions along with tissue aspirates from a variety of domestic animals, zoo animals, wildlife species, and birds. Tests help determine illness or abnormalities. Clinical pathologists are available for consultation on these laboratory-generated results. The section also uses state-of-the-art technology to determine the levels of hormones to aid in the confirmation of diseases, the detection of pregnancy and stages of the estrous cycle. In addition, semen analysis can aid in the evaluation of the fertility status of male breeding animals.
Diagnostic & Client Services	This section is the first line of communication with our clients. They are responsible for entering case data into an electronic reporting system, fielding client calls, providing result interpretation and test recommendations, distributing reports and answering questions about TVMDL services. The section is also responsible for opening each shipment, ensuring samples submitted contain the appropriate paperwork, and assigning each case to the correct testing laboratory. Specimens are submitted from Texas, the US and international clients for routine testing, import/export and surveillance.
Drug Testing	Organized in response to the Texas Racing Act, this lab serves as the state's legal testing facility for canine and equine racing animals and functions as a confirmatory testing facility for other racing labs. In addition to support of the livestock show industry, it offers pre-purchase exams.
Histopathology	Veterinary pathologists perform evaluation on samples collected or submitted from live or dead animals to diagnose disease or cause of death. Pathologists have at their disposal a variety of tissue stains to identify the presence of microorganisms, pigments, or tissue deposits. Veterinary practitioners or oncologists can use this information to determine appropriate therapies.
Molecular Diagnostics	This lab provides fast and reliable genetic tests to help veterinarians diagnose and monitor animal diseases and detect genetic defects. The lab employs the latest molecular, genetic, and computer technologies for routine diagnosis, disease-outbreak investigation, and bioterrorism readiness.
Necropsy	TVMDL pathologists perform more than 1,200 necropsies annually on a variety of species. The pathology staff has expertise in handling large animals, exotics, small ruminants, and surgical biopsies.
Operations & Safety	Safety programs ensure the safety of our workforce is the first and foremost priority. This section ensures that safety programs are robust and that facilities meet both biosafety and biosecurity standards.
Poultry Programs	Texas requires that all domestic poultry used in the production of offspring for the sale or trade be pullorum-typhoid negative and that poultry going to public exhibition or sale must be pullorum-typhoid tested and found to be free of infection, or originate from a certified pullorum-typhoid clean flock. TVMDL performs testing to allow poultry owners to comply with these requirements
Quality Assurance	The Quality Assurance Programs ensure the standardization of agency best practices. This allows TVMDL to ensure the maximum extent possible, the correctness of the tests and diagnostic interpretations it generates.
Serology	The serology section performs diagnostic testing and provides information on serological diagnosis for infectious diseases. In addition to serologic diagnosis of infectious diseases, the section provides immune profiling for herd health status and conducts tests required for interstate or international shipment of food animals and companion animals and their genetic products.
Toxicology	Toxicology tests many substances, including: animal tissues, ingesta, blood and urine, plants, feed, hay, water, baits and fertilizer, all in an attempt to help producers and animal owners diagnose causes of illness or death in animals. The staff also investigates nutritional imbalances, conducts therapeutic drug monitoring and offers instrumental analysis for feed additives, pesticides, and other substances.
Virology	Virology offers state-of-the-art diagnostic testing for major viruses of cattle, horses, dogs, and cats, and selected testing for viruses of pigs, sheep, wildlife, and exotics. The lab is responsible for analysis of specimens for evidence of viral infection in clinically ill animals or those suspected of acting as subclinical carriers of viruses that can cause disease in other animals.

CODE	DESCRIPTION	Exp 2017	Est 2018	Bud 2019	BL 2020	BL 2021
------	-------------	----------	----------	----------	---------	---------

TVMDL promotes animal health and protects agricultural, companion animal and public health interests in Texas and beyond. TVMDL receives nearly 150,000 submissions and performs approximately 800,000 tests per year. The laboratory is accredited by the American Association of Veterinary Laboratory Diagnosticians (AAVLD), and is one of only fourteen Level 1 members of the federal National Animal Health Laboratory Network (NAHLN).

TVMDL provides many services that are vital to protecting the Texas animal and public health sectors. The agency's testing contributes to an animal and zoonotic disease surveillance system; provides an early detection, identification and response testing capacity for high consequence diseases; provides diagnostic tests to aid in commerce; and is a critical component of biosurveillance for new diseases and bioterrorism incidents.

Samples submitted to TVMDL originate from all regions of Texas and the nation, providing the foundation of a robust statewide, regional and national surveillance program. In 2016-2017, in addition to its routine submissions, TVMDL performed targeted surveillance testing for high consequence pathogens, including: pH1N1 influenza, equine piroplasmiasis, exotic Newcastle disease, scrapie, avian influenza, classical swine fever, chronic wasting disease, and pseudorabies virus. TVMDL is certified to perform testing for foot and mouth disease, African swine fever, rinderpest and contagious equine metritis. Any one of these diseases has the potential to devastate the \$18 billion Texas livestock and poultry industries.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The ability of TVMDL to ensure effective disease management through diagnostic testing and disease surveillance would be impacted by the following factors: 1) a diversion of personnel during a high consequence disease event; 2) a budget reduction in TVMDL general revenue or loss of fee-generated revenue forcing TVMDL to reduce the number of staff available for routine diagnostic testing and delaying equipment upgrades to maintain competency; 3) a reduction in samples submitted to the laboratory secondary to an economic downturn or service interruption; 4) a loss of accreditation; and 5) an inability to meet federal biosafety and biosecurity standards and testing demands secondary to facility deficiencies. Any of the aforementioned circumstances would result in an inability to accurately and reliably perform an adequate number of diagnostic tests/services and surveillance activities.

STRATEGY DESCRIPTION AND JUSTIFICATION:

TVMDL provides the drug testing for animals in equine/canine racing events and those in livestock shows. It is important to identify the use of illegal drugs in racing and show animals to maintain consumer confidence in the sport and this source of tax revenue for the state.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The numbers of animals tested is determined by the number of race tracks in operation and the number of racing days authorized to each track by the Texas Racing Commission. The number of livestock shows participating in drug testing and the number of entrants into each of these shows also impacts this strategy. Any of these factors (see Objective 1 above) could compromise the agency's ability to perform adequate testing.

FULL TIME EQUIVALENT POSITIONS:		2.4	2.4	2.4	2.4	2.4

STRATEGY DESCRIPTION AND JUSTIFICATION:

To provide funds through the Texas Higher Education Coordinating Board’s formula funding to support infrastructure costs for agencies located in Brazos County . The formula generates the general revenue amount (Fund 1) and TVMDL uses Fee Revenue (Fund 763 and 764) to cover the additional costs not covered by the formula.

Items in this strategy include utilities, building maintenance and repairs, and janitorial services for facilities located inside Brazos County.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

External factors impacting this strategy include inflationary increases in the cost of utilities and materials required for repairs and maintenance of facilities, and changes in the Texas Higher Education Coordinating Board’s recommended formula funding.

(1) - Formula funded strategies are not requested in 2020-21 because amounts are not determined by institutions.

2009	OTHER OPERATING EXPENSE	85,320	85,320
5000	CAPITAL EXPENDITURES	50,000	50,000
TOTAL, OBJECT OF EXPENSE		\$600,000	\$600,000

METHOD OF FINANCING:

1	General Revenue Fund	600,000	600,000
TOTAL, METHOD OF FINANCING		\$600,000	\$600,000

DESCRIPTION / JUSTIFICATION:

The exceptional item will add base funding for the two Texas poultry laboratories located in Center (Shelby County), and Gonzales (Gonzales County) as well as the mandated Texas Pullorum-Typhoid program. In 1991, the 72nd Legislature transferred the responsibilities for the Texas Pullorum-Typhoid Act, as well as the two poultry diagnostic laboratories, from the Texas Agricultural Experiment Station, now Texas A&M AgriLife Research, to TVMDL. The poultry laboratories were transferred to TVMDL without an increase in General Revenue funding.

Since that time, the poultry laboratories continue to operate at a deficit annually. The annual deficit between the fees generated and operational expenses averages \$250,000 per laboratory. The laboratories provide critical diagnostic services to the multi-billion-dollar poultry industry in the State and are responsible for surveillance of the six million birds in Texas. These labs are strategically located in the heart of the poultry regions of Texas. TVMDL is the first line of defense in providing test results which allow poultry companies to make crucial business decisions in an outbreak situation. In a poultry disease outbreak, even hours can make a real difference in stopping the spread of the disease. Several poultry diseases (Avian Influenza, Salmonella) are also of public health significance. Disease outbreaks can also quickly interrupt the food supply chain for poultry and egg products.

EXTERNAL/INTERNAL FACTORS:

Both laboratories continue to generate losses each year, forcing the agency to supplement with funding from other sources. As a result, other agency funding priorities and technological advancements are continuously delayed. Some poultry testing services provided by TVMDL are mandatory, either for national programs or for international

5000	CAPITAL EXPENDITURES	450,000	0
TOTAL, OBJECT OF EXPENSE		\$1,462,500	\$880,000
METHOD OF FINANCING:			
1	General Revenue Fund	1,462,500	880,000
TOTAL, METHOD OF FINANCING		\$1,462,500	\$880,000

DESCRIPTION / JUSTIFICATION:

This new program will ensure early, rapid and accurate detection of animal and zoonotic (animal and human) disease threats, potential bioterrorism events, changes in antimicrobial resistance of pathogens as well as the timely and effective communication of disease data to decision makers, to mitigate the effects of disease events on the health, food security and financial well-being of all Texans. The program will invest in professionals and tools required to provide training programs for diagnostic laboratory specialists needed to augment existing staff and replace expected losses of expertise. It is critical for TVMDL to build a veterinary workforce with specialized training in laboratory disease diagnosis. Shortage of these diagnosticians puts the State's \$18 billion livestock industry, and public health at risk for a potentially devastating disease outbreak.

In addition to training programs, investments in sample handling automation and robotic tools will allow machines to take over routine and repetitive testing procedures, increasing efficiency and freeing the skilled workforce for higher-level tasks, such as data analysis, novel assay development, and communication of information. Adding epidemiology expertise will enable TVMDL to more effectively develop sound surveillance strategies, validate new test methods, rapidly analyze results, identify trends and communicate vital information to clients and decision makers to implement data-driven disease planning and responses.

This effort will employ five laboratory professionals, two veterinary trainees, three technicians and one support staff, to be supplemented by assistance and involvement by current TVMDL veterinarians, scientists, and IT professionals. Equipment needs include two automated liquid handling robots, sample preparation robots, barcoding instrumentation, computer-to-instrument interfacing software, high throughput testing platforms, and analysis and reporting software.

Agency name:
Texas A&M Veterinary Medical Diagnostic Laboratory

CODE	DESCRIPTION	Excp 2020	Excp 2021
-------------	--------------------	------------------	------------------

EXTERNAL/INTERNAL FACTORS:

A diagnostic laboratory fully-staffed with trained, experienced veterinary diagnosticians that will recognize the first signs of a potentially devastating animal or zoonotic disease threat (e.g. Foot and Mouth Disease, Anthrax, Influenza) or changes in antimicrobial resistance of pathogens is vital to protecting the Texas economy, animal and public health. TVMDL would be able to provide real time analysis and reporting of disease surveillance data that will provide baseline prevalence rates for diseases and offer specific outbreak data on the health of animal populations and the threat to human populations, the food supply and the economy. Leveraging laboratory automation will maximize workflow efficiency and utilization of staff, expedite testing results, reduce human errors and allow for increased throughput at TVMDL.

PCLS TRACKING KEY:

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

Out year costs beyond FY 2020 and FY 2021 will include salary and personnel costs to continue programs.

ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:

2022	2023	2024
\$880,000	\$880,000	\$880,000

21.1%	Commodities	21.1 %	25.5%	4.4%	\$763,328	\$2,991,675	25.2 %	21.5%	-3.7%	\$695,048	\$3,231,265	
	Total Expenditures		23.0%		\$863,700	\$3,748,267		18.0%		\$725,320	\$4,025,876	

B. Assessment of Fiscal Year 2016 - 2017 Efforts to Meet HUB Procurement Goals

Attainment:

In FY 2016, the agency exceeded the agency and statewide goal for commodity purchases.
 In FY 2017, the agency exceeded the statewide goal in commodity purchases.
 In FY 2017, the agency exceeded the statewide and agency goal in special trade.

Applicability:

The heavy construction and building and construction categories not applicable due to agency’s operations in FY 2016 or FY 2017 as neither category had budgeted or actual expenditures.

Due to no Building Construction funding, thus no expenditures in professional services in FY 2016.

-In fiscal year 2016 “Special Trade” expenditures accounted for only .74% of total expenditures.

-In fiscal year 2017 “Special Trade” expenditures accounted for only .14% of total expenditures

Factors Affecting Attainment:

In both fiscal years, 35% in FY 2016 and 55% in FY 2017 of the agency’s biddable purchases were made against existing contracts, such as: State Term contracts, TXMAS contracts, DIR contracts, TAMU System wide contracts and cooperative contracts. These represented best value to the agency in both time and financial savings. Due to nature of the agency mission and the highly specialized laboratory scientific products and supplies locating qualified HUB vendors is challenging as there are few HUBs listed in the specific commodity codes. In FY 2016 45% of the agency’s expenditures were sole source, only available from one manufacturer. In FY 2017 57.14% were sole source, with 38% multiyear renewals, and 10% from governmental entities. For purchases requiring bids in FY 2016, 50% of the HUB vendors solicited responded, with only 25% of those responding, being competitive enough to receive an award. Not all contract decisions such as fleet card and insurance

6.A. Historically Underutilized Business Supporting Schedule

expenditures are within the agencies control.

The Agency is required to utilize the TAMUS agreement for facilities, grounds and custodial services. The agency captures subcontracting opportunities that are reported.

"Good-Faith" Efforts:

The agency made the following good faith efforts to comply with statewide HUB procurement goals per 34 TAC 20.285:

1. Use training of the employees to emphasize the need to solicit from a diverse of ethnicities and service disabled veterans.
2. Encourage minority business to become HUB certified.
3. Participate in activities coordinated by other members of the A&M System, HUB Discussion Workgroup, Outreach Legislative Committee and coordination of Vendor Forums.
4. Monitor HUB Subcontracting Plans on projects over \$100,000 to make sure they meet HUB requirements.
5. Recruit Mentor's and Protégé's to become a part of the Mentor/Protégé program with the State of Texas.
6. Keep the Director informed on monthly and year to date HUB expenditures and activities.
7. Actively participate in any activities of the Texas Universities HUB Coordinators Alliance (TUHCA) - Gulf Coast Chapter to promote the HUB Program.
8. Educate vendors on how to become HUB certified through the State of Texas.
9. Promote HUB awareness through training of new agency employees in AggieBuy with purchasing role. On Line web base training thru trainraq is available.

NO FUNDS WERE PASSED THROUGH TO OTHER STATE AGENCIES OR INSTITUTIONS OF HIGHER EDUCATION

USE OF HOMELAND SECURITY FUNDS

The Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) utilizes funding to enhance diagnostic laboratory systems. These enhanced systems increase TVMDL's capacity for detecting, identifying, characterizing, and responding to high consequence agricultural, emerging and/or zoonotic diseases. Monies are utilized to enhance quality systems, information management, sample receipt and processing, testing capacity, training, and outreach activities.

86th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

Date: 7/30/2018
 Time: 1:11:49PM

Agency code: 557 Agency name: Texas A&M Veterinary Medical Diagnostic Laboratory

Item Priority and Name/ Method of Financing	REVENUE LOSS			REDUCTION AMOUNT			PROGRAM AMOUNT		TARGET
	2020	2021	Biennial Total	2020	2021	Biennial Total	2020	2021	Biennial Total

1 Diagnostic Service and Disease Surveillance

Category: Programs - Delayed or Deferred Capital Projects

Item Comment: TVMDL has continued to defer needed laboratory capital equipment in order to reduce expenses. The agency must replace equipment in order to consistently deliver quality, timely, relevant and affordable results to livestock, poultry and companion animal owners.

Strategy: 1-1-1 Provide Diagnostic Service and Disease Surveillance

General Revenue Funds

1 General Revenue Fund	\$0	\$0	\$0	\$100,000	\$100,000	\$200,000	\$100,000	\$100,000	\$200,000
General Revenue Funds Total	\$0	\$0	\$0	\$100,000	\$100,000	\$200,000	\$100,000	\$100,000	\$200,000
Item Total	\$0	\$0	\$0	\$100,000	\$100,000	\$200,000	\$100,000	\$100,000	\$200,000

FTE Reductions (From FY 2020 and FY 2021 Base Request)

2 Diagnostic Service and Disease Surveillance

Category: Programs - Service Reductions (Other)

Item Comment: The agency would also reduce travel and other professional development expenses. Reductions in this category will negatively impact our ability for staff to gain continuing education, quality and safety training. A reduction in this area will also negatively impact in-person client relations and assuring relevancy of testing services.

Strategy: 1-1-1 Provide Diagnostic Service and Disease Surveillance

General Revenue Funds

Item Total	\$0	\$0	\$0	\$27,726	\$27,726	\$55,452	\$27,726	\$27,726	\$55,452

FTE Reductions (From FY 2020 and FY 2021 Base Request)

3 Diagnostic Service and Disease Surveillance & Indirect Administration

Category: Programs - Service Reductions (FTEs-Layoffs)

Item Comment: At this increment of reductions, attrition of employees would begin. Personnel costs account for nearly 70% of TVMDL's total budget. Recent budget cuts have already reduced funding levels by 4 FTE's. As personnel cuts occur, TVMDL struggles to meet customer testing requirements, and maintain acceptable turnaround times.

Strategy: 1-1-1 Provide Diagnostic Service and Disease Surveillance

General Revenue Funds

1 General Revenue Fund	\$0	\$0	\$0	\$114,953	\$114,953	\$229,906	\$114,953	\$114,953	\$229,906

Item Total	\$191,589	\$191,589	\$383,178	\$127,726	\$127,726	\$255,452	\$127,726	\$127,726	\$255,452

FTE Reductions (From FY 2020 and FY 2021 Base Request) 3.5 3.5

4 Diagnostic Service and Disease Surveillance & Indirect Administration

Category: Programs - Service Reductions (FTEs-Layoffs)

Item Comment: The agency will be forced to further cut FTE's in this scenario. These reductions adversely influence the agency's ability to meet its mission and be prepared to respond to and recover from a high consequence agriculture or zoonotic disease outbreak. A reduction in staffing will translate into a loss in business and reduction in testing income as well.

Strategy: 1-1-1 Provide Diagnostic Service and Disease Surveillance

FTE Reductions (From FY 2020 and FY 2021 Base Request)

3.2 3.2

5 Diagnostic Service and Disease Surveillance & Indirect Administration

Category: Programs - Service Reductions (FTEs-Layoffs)

Item Comment: Budget reductions of this magnitude would critically impair the agency from meeting its primary strategy and goal: providing diagnostic services and disease surveillance for the State of Texas. FTE's or programs would be eliminated at this level of funding loss.
