REQUEST FOR LEGISLATIVE APPROPRIATIONS

For Fiscal Years 2020 and 2021

Submitted to the Governor's Office of Budget and Planning and the Legislative Budget Board

by

Texas A&M International University

Revised October 19, 2018

CERTIFICATE

Agency Name _____ Texas A&M International University

This is to certify that the information contained in the agency Legislative Appropriations Request filed with the Legislative Budget Board (LBB) and the Governor's Office Budget Division (Governor's Office) is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the Governor's Office will be notified in writing in accordance with Article IX, Section 7.01 (2018-19 GAA).

761 Texas A&M International University

The South Texas Border Region:

As the nation's largest inland port, Laredo continues to be a thriving economic engine in a region propelled by the banking, logistics, international commerce, and manufacturing industries. In addition to the region's remarkable growth, 44% of its population is under 25 years of age, with only 17.5% of those 25 years and older holding a baccalaureate degree. Not surprisingly, their children are overwhelmingly the first in their family to attend college, the first step in turning the tide of a region plagued with a poverty rate of over 30%. For these young people to prosper economically, and participate fully as productive citizens, a great proportion of them must enter and finish college as evidenced by the considerably lower, local poverty rate of just over 5% for those over 25 possessing a baccalaureate degree.

Serving a young and productive population in a rapidly growing region, Texas A&M International University (TAMIU), has shared in this rapid growth. Its enrollment has more than doubled in the past 15 years to over 7,600 students. To be certain, neither the University nor the State should be satisfied with the educational attainment of the region, but if the baccalaureate attainment rate of today is contrasted with that before the University existed in its present form, a then-bleak picture has grown consistently brighter. In 1990, only 11% of those age 25 and above held a baccalaureate degree. This over 50% increase in baccalaureate degree attainment eclipses that of the State, which stands at 38% for the same period, due in large part to the State's past investment in the University and our prudent use of State funds to provide academic and financial support to these students. Among the regional universities with the lowest administrative costs, TAMIU has proven its ability to attract, retain, and graduate students who in decades past would not have attended or graduated from college.

With a 2018 freshman cohort, over 50% the first in their family to attend college, the University still has much it can do to fulfill its mission of improving "...the quality of lives for the citizens of the border region." With crucial support, including formula and non-formula appropriations, TAMIU will continue its proven success in doing so.

Student Success:

TAMIU aspires to be a premier university of choice, serving as the agent of change for the people of the region through multicultural teaching, research, and service. Beginning with an aggressive outreach initiative which takes proven strategies for enrolling and succeeding in higher education to high schools throughout the South Texas region, and anchored by a broad array of programs targeting academic success and personal growth, our Student Success Program creates a comprehensive support structure of peer mentors, tutors, academic and financial advisors, and counselors. Most importantly, any student success program must begin prior to admission and continue through graduation.

The success of our program is evident in our enrollment growth, along with our retention and graduation rates of an overwhelmingly Hispanic population, most of whom (78%) receive some form of financial aid. With a first-year student persistence rate among the highest in the State at 86.3%, TAMIU has a six-year graduation rate of 53.8%. Perhaps the greatest indicator of success, however, is the 78% gainful employment rate of our graduates—8% over the State average. Our return on investment comes not only from our graduates' transition to productive citizenry, but also in a regional unemployment rate which mirrors the State's rate of 4%, while other South Texas border counties range from 6.2% to 10.8%.

The University continues to earn accolades for its transformative ability to increase graduates' income mobility, rocketing them from the bottom 40% to the top 40% of income. TAMIU ranked first in Texas and third in the nation for enhanced income mobility in studies by Stanford University's Equality of Opportunity Project. The American Council on Education, citing the Project, recognized TAMIU as a top scoring Texas institution in its national report, "Minority Serving Institutions as Engines of Upward Mobility." Additional acclaim has come from Washington Monthly Magazine, which singled out TAMIU as 4th for "Best Bang for the Buck" among the nation's Southern Schools. News of the University's accessibility, affordability and value added has enhanced undergraduate and graduate student recruitment.

761 Texas A&M International University

Community College and Expanding School District Relationships:

TAMIU has built a strong relationship with Laredo College (LC), formerly known as Laredo Community College. Our 2+2 articulation agreement embeds a TAMIU advisor in the LC campus' outreach office to provide counsel on courses necessary for the students' eventual transfer and attainment of a baccalaureate degree. This advisor serves as a one-stop resource for students wishing to transfer by providing degree plan and admissions information and financial services support. The University pursues aggressive outreach to these students by also conducting transfer fairs which assist students transitioning to the University.

As a regional University of choice, the University has also extended this model arrangement, actively seeking new Memoranda of Understanding with other community colleges, including Southwest Texas Junior College (Uvalde), Alamo Colleges (San Antonio), and San Jacinto College (Pasadena).

More importantly, the University is reaching out to future students at an even earlier juncture by offering courses to high school students at the Laredo Independent School District's Early College High School (ECHS) and at TAMIU's own Julieta & Frank Staggs Academy of International and STEM Studies. Located adjacent to the campus, the ECHS is ranked 22nd in the State and 113th in the Nation among Best High Schools and is the only Exemplary high school in Laredo. Our Academy was established through legislation approved by the 79th Texas Legislature and provides an innovative, accelerated curriculum for motivated Texas high school juniors and seniors. Our 2018 graduating class earned an average of 63 semester credit hours with an average GPA of 3.25. These gifted students have already successfully completed more than two years of college coursework—while still in high school! We believe these models, with high school students taught by University faculty at the University, guarantee an appropriate level of rigor to ensure students' future success following their high school graduation.

Veterans' Affairs:

Texas A&M International University is committed to being military friendly by assisting all veterans with the transition to University life and to productive careers. Upon admission to the University, veterans have a one-on-one meeting with the veteran affairs coordinator to review specific degree plan requirements and University services. Thereafter, veterans are assisted each semester with the educational benefit certification process to ensure timely awarding of veteran benefits and advised of important upcoming events and deadlines. The veteran affairs coordinator also works with Laredo College and other institutions of higher education to assist veterans transferring between institutions to ensure accurate and timely benefit awards and with the Texas Veterans Workforce to assist veterans with obtaining employment, both, while attending the University and following graduation. Our military friendly services are offered not only to our veterans, but to their dependents, as well.

High Priority Requests of The Texas A&M University System:

Base Funding – Maintaining an equitable, reliable, and predictable source of funding for higher education is critical to allow our institutions to plan and grow, teach and support our students through to graduation, and pursue excellence. This base funding is provided by the State through both formula and non-formula support.

Formula funding, which accounts for 80 percent of our institutions' net GR appropriations, supports the core instructional, operational and infrastructure costs at our institutions and is not keeping pace on a per student basis as enrollments grow. And that is before considering inflation. Consistent formula appropriations that fund student enrollment growth and inflation are needed to avoid adverse impacts on students' success. Our highest priority is additional funding in the formulas to cover student enrollment growth through the spring 2019 semester. Any additional funding you can provide through the formulas to increase the rates to cover the cost of inflation on the state's share of the cost of educating students will help to offset pressure on the portion of core costs borne by tuition.

Administrator's Statement

86th Regular Session, Agency Submission, Version 1

Automated Budget and Evaluation System of Texas (ABEST)

761 Texas A&M International University

Until formula funding can keep pace with enrollment growth and inflation, non-formula support remains a critical source of base funding. The Legislature has already enacted two recent major step downs on non-formula support items. For the general academics, these items were cut by approximately one-third last session. These cuts are on top of the 25 percent reductions in special items made during the 2011 session. We request that non-formula support items be maintained at current levels in the upcoming biennium.

We also request consideration of expanding the Small Institution Supplement – both in lengthening the runway to include institutions up to 20,000 headcount and increasing the amount of funding provided through this formula supplement. Institutions with fewer than 20,000 students do not have the economies of scale of a research or emerging research institution and therefore are not able to operate on the formula-only funding. Additional funding through this mechanism could be an important tool in getting institutions to a point of financial stability as they grow to the 20,000 student enrollment.

Even though the A&M Agencies do not have an operations formula, they need base funding support much in the same manner as the formulas that provide basic, on-going support for the academics and health related institutions.

Outcomes Based Funding - Our Board is increasingly incorporating performance and outcomes into our internal budget review processes. We welcome a continued dialog on this issue during the legislative session. However, we believe there are several fundamentals that are important in consideration of any performance funding system: •Any performance funding should be an incentive bonus on top of current formula funding. Again, formula funding is not keeping pace on a per student basis as enrollments grow. Reallocating existing formula funding for performance will negatively impact some of the very institutions that performance funding is trying to incentivize.

•A fundamental consideration with any performance funding model is the need to avoid penalizing institutions already performing at a high level vs. putting in place a system that rewards those that have room to improve.

•Any performance funding model should be implemented over an extended period of time.

•Higher Education Group Health Insurance – We request funding to cover increases in covered enrollments and in health care costs that are beyond our control. We would also request restoration of some of the ever-widening gap in funding level for our employees as compared to the employees in the state employees ERS group insurance plan.

Student Financial Aid – We request increased support for student financial aid because it is vitally important for our students and families and will help students graduate with lower debt. However, since it is a method of paying for tuition and fees and does not increase much needed funding for the universities, we request increases to TEXAS grants and other financial aid programs be made in conjunction with funding the formula that provides the state's share of the costs of educating students.

High Priority Requests for Texas A&M International University:

The University was one of several beneficiaries of the 71st Texas Legislature's action on the South Texas Border Initiative which increased appropriations to enhance the scope and quality of universities along the Texas-Mexico Border. This special appropriation, originally called "Academic Program Development," provided access and support for at-risk, low income, first-generation, Hispanic students to be successful and even though nominally referred to as a Special Item, it was intended as base funding in addition to existing formula funding. The 76th Legislature obscured the purpose of this special appropriation by renaming it Institutional Enhancement, a non-formula source of funding given to universities across the State, in addition to those of the border region. With the unfortunate misnomer of "enhancement," this appropriation came to be seen as supplemental and unnecessary. The Legislature has found it necessary to impose multiple cuts to this item over the years to the point

Administrator's Statement 86th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

761 Texas A&M International University

that it now stands at less than 75% of that appropriated in 2000 - a time when enrollment was less than half of what it is today. Most importantly, as indicated above, even though significant progress has been made in expanding the number of individuals earning baccalaureate degrees, the region's population remains largely at-risk, low income, first-generation Hispanics—the same demographic profile which led to the implementation of the South Texas Border Initiative in the first place.

In addition to Institutional Enhancement (\$8.662,813), two other non-formula items are devoted to supporting and achieving student retention and graduation successnamely, Academic and Student Support (\$2.068,547), and Outreach and Enrollment (\$1,041,427). Together, these three non-formula items fund 41% of Education & General (E&G) faculty with Institutional Enhancement and Academic and Student Support used solely for faculty salaries and Outreach and Enrollment used for academic advisors, in addition to faculty salaries. These three items represent an integral part of the base funding for this University, and maintaining, not to mention improving, the success of graduating students from the South Texas region depends upon the continued appropriation of these three items. Given the similarity in strategies of all three items, we are requesting the merging of Institutional Enhancement and Outreach and Enrollment into our Academic and Student Support item.

Existing Non-formula Items – While the three items above are truly base funding for educating and supporting students' success and thus the highest priority, it is also vital that the University retain the funding for its remaining non-formula items which include \$262,917 for the Institute for International Trade (IIT) and \$238,761 for the Small Business Development Center (SBDC). The IIT publishes the highly regarded International Trade Journal, a source of scholarship for faculty, students and the general academic community, and supports vital research to enhance the border region's competitive position. The SBDC also supports research with applied economics projects and provides for economic development by increasing capital access, business starts and expansions, job creation, and retention.

Exceptional Items – The University is requesting the following exceptional item to provide the resources necessary to sustain growth and achieve the goals of the Coordinating Board's 60x30TX plan:

•Path to Academic and Student Success (PASS) - \$4,000,000 (biennial amount) – This item builds on the University's student success initiatives for freshmen and sophomores and expands them to juniors and seniors by initiating proven success measures to help students overcome academic challenges, building academic identity and sense of belonging, and monitoring student success and timely progress toward graduation. This item, if funded, will ensure the University's 6-year graduation rate, already in the top half of all institutions at 53.8%, will improve. As with our other base funding non-formula items, this item should be classified in the Instructional Support strategy with an Academic and Student Support focus.

Capital Projects – The Texas Higher Education Coordinating Board has calculated deficit of 216,013 square feet for the University (as of fall 2017). To help eliminate this deficit and accommodate our increasing student enrollment, we are requesting two capital projects.

•Addition and Renovation of Fine and Performing Arts Instructional and Support Spaces - \$10,000,000 – This addition of approximately 16,000 gross square feet and renovation of approximately 10,000 gross square feet provides new/renovated studios, classrooms, rehearsal halls, and individual instruction/practice spaces.

•Student Classroom and Events Center - \$75,000,000 – This addition of approximately 200,000 gross square feet of classroom, large assembly, activity, and related support spaces will provide necessary spaces to host large-format, institutional, and student events to meet the growing needs of the University. As the plans for this building are on the University's currently undeveloped property, the project also includes necessary infrastructure such as utilities, roads and parking, figuring into the higher cost.

Effects of a 10% Reduction:

Administrator's Statement 86th Regular Session, Agency Submission, Version 1

Automated Budget and Evaluation System of Texas (ABEST)

761 Texas A&M International University

A 10% reduction for the University amounts to \$1,214,407. A reduction of this magnitude could only be taken from the University's base funding non-formula items those items responsible for the academic success of our students. As these items fund solely faculty and advisors, any reduction would result in fewer course offerings and a possible increase in the number of lower-cost adjunct faculty. Due to the scarcity of qualified adjuncts in the Laredo region, it is impossible to substitute adjuncts for full-time faculty without compromising the quality of student support and academic programs. Our first year success program would also suffer, and without this crucial support for our at-risk, low income, first generation, Hispanic students, increased time to degree and overall lower graduation rates would follow.

Criminal Background Checks:

The University has a rule which outlines the process for conducting criminal background checks on all new hires in accordance with Texas A &M University System regulations.

Summary of Request:

The creation of Texas A&M International University has brought new life to the citizens of South Texas. Today, TAMIU is a University of choice, providing access to excellence focused on a measurably better life for all. With appropriate resources, the overwhelmingly Hispanic young men and women of this region are building better lives of meaning and purpose for themselves and their families and driving the State of Texas' growth. Adequate funding to sustain existing and new initiatives will ensure fulfillment of the University's mission, support student success, achieve the goals of the 60x30TX plan, and continue to extend the great American dream to all who are willing to work for and earn it.

Agency name:

AGENCY MISSION

Texas A&M International University (TAMIU), a member of The Texas A&M University System, prepares students for leadership roles in an increasingly complex, culturally diverse state, national, and global society. TAMIU provides a learning environment built on a solid academic foundation in the arts and sciences. The University offers a range of baccalaureate and master's programs and the Doctor of Philosophy degree in International Business Administration. In addition, the University pursues a progressive agenda for global study and understanding across all disciplines.

Through instruction, faculty and student research, and public service, Texas A&M International improves the quality of lives for citizens of the border region, the state of Texas, and national and international communities.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support.

The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium.

(1) - Formula funded strategies are not requested in 2020-21 because amounts are not determined by institutions.

FULL TIME EQ	QUIVALENT POSITIONS:	50.9	48.0	48.0	50.8	50.8

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model.

The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2020-21 because amounts are not determined by institutions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Academic and Student Support provides resources to recruit and retain faculty to provide students with a quality education, along with student scholarships and assistantships.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Academic and Student Support represents 5% of the University's total appropriations and funds 6% of E&G faculty. It is base funding for the University. Over the next two years, this special item funding will be used to retain and recruit faculty members and to provide opportunities for them to engage in sponsored research, which will increase revenues to the State of Texas. In addition, the funding of these faculty positions helps decrease our reliance on adjunct faculty, which is critical for maintaining and improving persistence rates for first- and second-year students.

Additional information on Academic and Student Support is available in Schedule 9, Non-Formula Support Information.

EXPLANATION OF BIENNIAL CHANGE (includes Rider amounts):

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Institute supports the international mission of the University by collecting and publishing economic indicators for the Texas -Mexico border region, promoting research on international trade and related issues, and encouraging scholarly productivity of its faculty and students. This funding has made possible the establishment of a database containing monthly border trade, including vehicular, passenger, truck, rail and pedestrian traffic on all major Texas-Mexico border points of entry. This information is available to business, government agencies, other institutions and the general public. The funding also supports numerous studies and research monographs and publications dealing with economic development and competitiveness of the border region.

GOAL:	3 Provide Non-formula Support					

The Institute will continue to publish the highly regarded International Trade Journal and will create a database for manuscript submissions and acceptance information for the Journal. The Institute is also working on a partnership with Taylor & Francis/Routledge, the Journal's current publishers, to get the Journal into the Social Science Citation Index which provides researchers and students with access to bibliographic and citation information needed to find research data, journals and researchers. The Institute will also expand cross-border relationships with Mexican and Central American businesses and continue to provide research opportunities in international business for faculty. As the Institute matures and becomes more established in the academic community, it will be able to attract higher level scholars, elevating the scholarly standing of the University. Its International Trade Journal, already well-established in its 30th year of publication, should continue to become increasingly selective and more widely known.

Additional information on the Institute for International Trade is available in Schedule 9, Non-Formula Support Information.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Small Business Development Center offers services which promote the growth, expansion, innovation, increased productivity, and improved management for small businesses. These services, which include individual business counseling and technical assistance, group training seminars and workshops, advocacy, and research information, not only facilitate new business start-ups and help existing business expand, but also strengthen the economies of Webb, Zapata and Jim Hogg counties.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The South-West Texas Border Small Business Development Center (SBDC) Network provides consulting and technical assistance to the small business community in Webb, Zapata, and Jim Hogg Counties. The goal is to help start and grow small businesses in the region.

•The mission of the SBDC is to aid entrepreneurs in creating regional economic growth through development and expansion of small businesses by fostering innovation, increased productivity, and improved management.

•The Eagle Ford Shale has generated an enormous economic impact in the region, and there is no sign of it diminishing in the near future.

•Entrepreneurs offer new ideas and services in many areas, including road expansion and maintenance, housing, food service, and more.

•New and expanded small businesses will increase employment opportunities in the region.

•Allows for development of new partnerships with local financial institutions who will fund these entrepreneurial efforts.

Additional information on the Small Business Development Center is available in Schedule 9, Non-Formula Support Information.

OBJECTIVE:	4 INSTITUTIONAL SUPPORT			Service Categori	les:	
GOAL:	3 Provide Non-formula Support					
	761 Texas A&M International University					

STRATEGY DESCRIPTION AND JUSTIFICATION:

The 74th Texas Legislature authorized an expansion of the University to 4-year status in fall, 1995. The South Texas Border Initiative supported the hiring of faculty and staff to handle the rapid growth in enrollment and the expansion of academic programs. Institutional Enhancement currently funds 19% of the University's total appropriation and 41% of E&G faculty. It represents a significant portion of base funding.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

As mentioned above, Institutional Enhancement represents 19% of the University's total appropriations, funds 41% of E&G faculty, and is a significant portion of the University's base funding. Over the next two years, this special item funding will be used to retain and recruit faculty members and to provide opportunities for them to engage in sponsored research, which will increase revenues to the State of Texas. In addition, the funding of these faculty positions helps decrease our reliance on adjunct faculty, which is critical for maintaining and improving persistence rates for first-and second-year students.

Additional information on Institutional Enhancement is available in Schedule 9, Non-Formula Support Information.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The University prepares students for success through an aggressive outreach to local and regional schools, establishing one-on-one relationships to guide high school students through the financial aid process. Upon entering the University, a comprehensive program of advisement and academic support ensures retention and timely graduation. This funding enables the University to provide non-traditional students with the environment and tools necessary for success and makes Closing the Gaps possible. The resources provided by this funding enable the State's underserved population to become productive participants in the Texas economy.

OBJECTIVE:	4 INSTITUTIONAL SUPPORT			Service Categori	les:	
GOAL:	3 Provide Non-formula Support					

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

•TAMIU will increase outreach to high school students beyond a 120 mile radius of the University therefore increasing overall student enrollment and semester credit hour production.

•Increased offerings of required supplemental instruction for challenging core courses resulting in increased GPA and increased retention rates.

•Expansion of summer academic boot camp offerings in mathematics and writing.

•Initiation of HB 5 College Prep Courses in mathematics and language arts made possible because of TAMIU with local area high schools and local community college.

•Expanded Texas Success Initiative Assessment (TSIA) testing in area high schools to increase participation and college readiness.

•Offer more diverse Freshman Seminar course options in the core curriculum that include service learning, honors, study abroad, and study away experiences.

Additional information on Outreach and Enrollment is available in Schedule 9, Non-Formula Support information.

Automated Budget and Evaluation System of Texas (ABEST)

Agency code: 761 Agency name: Texas A&M International University CODE DESCRIPTION Excp 2020 Excp 2021 Item Name: Path to Academic and Student Success (PASS) **Item Priority:** 1 No **IT Component: Anticipated Out-year Costs:** Yes Involve Contracts > \$50,000: No Includes Funding for the Following Strategy or Strategies: 03-05-01 Exceptional Item Request **OBJECTS OF EXPENSE:** 1001 SALARIES AND WAGES 1.800.000 1.800.000 1005 FACULTY SALARIES 200,000 200,000 TOTAL, OBJECT OF EXPENSE \$2,000,000 \$2,000,000 **METHOD OF FINANCING:** 1 General Revenue Fund 2,000,000 2,000,000 TOTAL, METHOD OF FINANCING \$2,000,000 \$2,000,000 **FULL-TIME EQUIVALENT POSITIONS (FTE):** 45.00 45.00

DESCRIPTION / JUSTIFICATION:

Path to Academic and Student Success will implement new, and bolster existing, student success initiatives to increase student persistence and graduation rates. These initiatives fall into three categories: (1) mitigating academic challenges, (2) building academic identity and sense of belonging, and (3) monitoring student success and timely progress toward graduation. This item builds on the success of our first-year success program by taking our intrusive advising model into the junior and senior years and providing supplemental instruction for challenging courses at, both, the lower and upper division levels to improve graduation rates. This item should be classified in the instructional support strategy with an academic and student support focus.

Major Accomplishments to Date and expected over the next two years:

A Summer Bridge Program for incoming freshman to provide intensive instruction for students with one or more TSI deficiencies so they pass the TSI and successfully transition to a college learning environment. Supplemental Instructors and Tutors for STEM and requisite nursing and business courses, both lower and upper division level, will provide additional instructional support, improving persistence and graduation rates. Monitoring student success and timely progress toward graduation will be achieved through an expansion of Academic Advising for upperclassmen, including transfer students.

Year established and funding source prior to receiving special item funding: $N\!/\!A$

Formula Funding: N/A DATE:

TIME:

10/15/2018

86th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST) DATE: 10/15/2018 TIME: 2:39:53PM

Agency code: 761	Agency name:	Texas A&M International University		
CODE DESCRIPTION			Excp 2020	Excp 2021
Non-General Revenue Sources of Funding: None.				

Consequences of Not Funding:

With a first-year student persistence rate among the highest in the State at 86.3%, TAMIU has a six-year graduation rate of 53.8%. The University believes both of these metrics could be improved, however, but this is only possible with the additional funding to support the new initiatives described above.

EXTERNAL/INTERNAL FACTORS:

•This exceptional item will fund the programming of academic and student support services that are crucial for the success of TAMIU's student population. The majority of our students hold multiple intersecting minority identities (at-risk, first-generation, low-income, non-native English speaker, female and Hispanic at the same time) all shown to hinder educational outcomes and predict low retention and graduation rates.

•The regional community leaders understand TAMIU's strength in successfully educating at-risk students and are supportive of the institution's student success efforts. PCLS TRACKING KEY:

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

Agency code: 761 Agency name: Texas A&M International University CODE DESCRIPTION Excp 2020 Excp 2021 Item Name: Additions and Renovation of Fine and Performing Arts Instructional and Support Spaces **Item Priority:** 2 No **IT Component: Anticipated Out-year Costs:** Yes Involve Contracts > \$50,000: Yes Includes Funding for the Following Strategy or Strategies: 02-01-02 Tuition Revenue Bond Retirement **OBJECTS OF EXPENSE:** 2008 DEBT SERVICE 784.662 784,662 TOTAL, OBJECT OF EXPENSE \$784,662 \$784,662 **METHOD OF FINANCING:** 1 General Revenue Fund 784.662 784,662 \$784,662 \$784,662 TOTAL, METHOD OF FINANCING

DESCRIPTION / JUSTIFICATION:

Addition of approximately 16,000 gross square feet and renovation of approximately 10,000 gross square feet in existing Center for the Fine and Performing Arts to provide additional instructional and student support spaces including studios, classrooms, rehearsal halls, and practice spaces to meet the increased enrollment demands in fine and performing art areas.

•This facility addition has been incorporated in the University Master Plan and is included in the plan filed with the Coordinating Board.

•University will allocate \$1 million in HEF to support this project.

•The University has outgrown its current facilities for fine and performing arts, and these physical limitations impact our ability to grow these programs.

•The initial facility design did not anticipate advancing technology impacts in the fine and performing arts and the introduction of computer aided technology classrooms.

•The University is home to the Laredo Philharmonic Orchestra, Laredo Theater Guild International, and Washington's Birthday Celebration Association cultural events.

These active external organizations use our facilities to promote appreciation of all forms of the fine and performing arts in the region.

Major Accomplishments to Date and expected over the next two years: It is not expected that the construction will be completed within two years.

Automated Budget and Evaluation System of Texas (ABEST)

Agency code: 761 Agency name: Texas A&M International University DESCRIPTION CODE Excp 2020 Excp 2021 Non-General Revenue Sources of Funding: N/A Consequences of Not Funding: The University's fine and performing arts offerings will be hampered without the additional space to address increasing enrollment in these programs, as the existing spaces do not allow for classes large enough to be economically viable.

EXTERNAL/INTERNAL FACTORS:

The explosive population growth in the Laredo and border region will require expanded educational opportunities, and this project supports the Higher Education Coordinating Board's 60x30TX plan by providing necessary resources. PCLS TRACKING KEY:

DESCRIPTION / JUSTIFICATION:

Addition of approximately 200,000 gsf of assembly, classroom, activity and related support spaces with resultant infrastructure including utilities, roads and parking. Built on the site of the University's currently undeveloped property, this construction will provide necessary spaces to host institutional and student events

•The building will include classroom and activity rooms to meet increased enrollment demands.

•The building will serve as a primary mass care housing venue for students evacuated from southern, regional campuses during emergency events such as hurricanes. TAMIU hosted students during Hurricane Ike and Hurricane Harvey.

•The building will provide space allowing the University to provide an additional venue in support of student activities and student focused programming including assemblies, forums, and commencement exercises pending.

•Due to continuously increasing enrollment, the University does not have a facility to support large-scale student events.

•The tremendous need for education and high quality educational facilities in this part of the State is of great interest to a large portion of the statewide leadership .

Major Accomplishments to Date and expected over the next two years:

It is not expected that the construction will be completed within two years.

B. Assessment of Fiscal Year 2016 - 2017 Efforts to Meet HUB Procurement Goals

Attainment:

Texas A&M International University exceeded two of five, or 40%, of the applicable statewide HUB procurement goals in FY 2016. Texas A&M International University exceeded one of five, or 20%, of the applicable statewide HUB procurement goals in FY 2017.

Applicability:

Heavy Construction catergory has not been applicable for fiscal years 2016 or 2017. Texas A&M International University Building Construction projects are typically managed through the Texas A&M University System.

Factors Affecting Attainment:

The number and types of projects the University bids per year vary depending on then-current needs and funding availability. Texas A&M International University ensures that HUB vendors are included in all possible solicitations, regardless of dollar value.

"Good-Faith" Efforts:

Texas A&M International University (TAMIU) continues to maintain a proactive program to support and promote HUB awareness through contact with University department staff. The Procurement Card training continues to focus in large part on instructing cardholders on the HUB program and on the importance of allowing HUBs to bid/contract for goods and services; and, also on how to effectively search for HUBs on the CMBL. Purchasing staff communicates with departments on the importance of doing business with HUBs as well. TAMIU continually explores ways to increase our level of HUB utilization through peer networking and by working closely with other State agencies to identify new HUB vendors. We actively participate in economic opportunity forums to increase HUB vendor base. The Purchasing Department solicits various minority groups on solicitations and encourages HUB participation in all contracts. Development of the Purchasing website promotes the HUB Program and encourages HUB solicitations in all purchases. TAMIU remains committed to supporting the State HUB Program.

Summary of Savings Due to Improved Document Production Standards

Description:

Chapter 2052 of the Government Code (State Agency Reports and Publications) addresses similar issues as the rider provision. Texas A&M International University has been following the statutory requirements in this chapter since they were enacted; there are no cost savings for this biennium.

	Net Assignable Square Feet in					
Gross Square Feet:	Project					
26,000	17,000					

Project Description

•Addition of approximately 16,000 gross square feet and renovation of approximately 10,000 gross square feet in existing Center for the Fine and Performing Arts to provide additional instructional and student support spaces. Spaces will include new/renovated studios, classrooms, rehearsal halls, and individual instruction/practice spaces.

•The addition/renovation of space will allow the University to meet the increased enrollment demands in all fine and performing art areas by providing new instructional and other support spaces for students.

•This facility addition has been incorporated in the University Master Plan and is included in the plan filed with the Coordinating Board.

•University will allocate \$1 million in local funds from its HEAF allocation in support of this project.

•The University has outgrown its current facilities for fine and performing arts, and these physical limitations impact our ability to grow these programs.

86th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

Agency 761 Texas A&M International University						
		Tuition Revenue		Cost Per Total

200,000	130,000					

Project Description

•Addition of approximately 200,000 gsf of assembly, classroom, activity and related support spaces with resultant infrastructure including utilities, roads and parking. Built on the site of the University's currently undeveloped property, this construction will provide necessary spaces to host institutional and student events

•The building will include classroom and activity rooms to meet increased enrollment demands.

•The building will serve as a primary mass care housing venue for students evacuated from southern, regional campuses during emergency events such as hurricanes.

TAMIU hosted students during Hurricane Ike and Hurricane Harvey.

•The building will provide space allowing the University to provide an additional venue in support of student activities and student focused programming including assemblies, forums, and commencement exercises.

761 Texas A&M International University				
Academic and Student Support				
(1) Year Non-Formula Support Item First Funded:	2014			
Year Non-Formula Support Item Established:	2014			
Original Appropriation:	\$1,841,015			

(2) Mission:

Academic and Student Support enables the hiring of faculty to handle the rapid growth in enrollment and the expansion of academic programs by providing resources to recruit and retain faculty to provide students with a quality education. This item is properly classified as an instructional support item focusing on academic and student support. Given the similarity of scope, the University has requested that its Institutional Enhancement and Outreach and Enrollment non-formula items be incorporated into this item.

(3) (a) Major Accomplishments to Date:

Funding 16 FTE faculty. This number has been reduced over time due to the cuts to non-formula items. The Texas Higher Education Coordinating Board recognizes the value of tenured and tenure track faculty's teaching and the positive impact they have on the success and persistence of undergraduates. This item helps lessen our reliance on less experienced teaching assistants and adjunct faculty.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Academic and Student Support represents 5% of the University's total appropriations and funds 6% of E&G faculty. It is base funding for the University. Over the next two years, this non-formula funding will be used to retain and, when necessary, recruit faculty members. In addition, the funding of these faculty positions helps decrease our reliance on adjunct faculty, which is critical for maintaining and improving persistence rates for first-and second-year students.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

The Academic and Student Support special item was created by a budget structure change in the 83rd Legislative Session to better reflect the scope of the initiative.

(5) Formula Funding:

N/A

(6) Category:

Instructional Support

(7) Transitional Funding:

Ν

(8) Non-General Revenue Sources of Funding:

None.

(9) Impact of Not Funding:

Academic and Student Support represents base funding for the core, teaching function of this institution. Since this appropriation is used exclusively to fund faculty, it is imperative that it continue to ensure both the quality and survival of academic programs. Without this crucial source of base funding, the University would be unable to fund all of the faculty positions critical for access to programs resulting in fewer course offerings and increased time to degree.

(10) Non-Formula Support Needed on Permanent Basis/Discontinu

This non-formula support is needed on an on-going, permanent basis. As previously noted, without continued funding of this item, at least until such time as the University realizes greater economies of scale, course offerings would have to be limited, as faculty positions would be reduced.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

The success of our program is evident in our enrollment growth, along with our retention and graduation rates of an overwhelmingly Hispanic population, most of whom (78%) receive some form of financial aid. With a first-year student persistence rate among the highest in the State at 86.3%, TAMIU has a six-year graduation rate of 53.8%. Perhaps the greatest indicator of success, however, is the 78% gainful employment rate of our graduates—8% over the State average. Our return on investment comes not only from our graduates' transition to productive citizenry, but also in a regional unemployment rate which mirrors the State's rate of 4%, while other, South Texas border counties range from 6.2% to 10.8%. None of this would be possible without the faculty to educate and graduate our students.

761 Texas A&M International University		
Institute for International Trade		
(1) Year Non-Formula Support Item First Funded:	1979	
Year Non-Formula Support Item Established:	1979	
Original Appropriation:	\$69,945	

(2) Mission:

The Institute supports the international mission of the University by collecting and publishing economic indicators for the Texas -Mexico border region, promoting research on international trade and related issues, and encouraging scholarly productivity of its faculty and students. The Institute was originally a part of the Graduate School of International Trade. When the College of Business Administration was established, the Institute served as an internal think tank for the University and the border region. The Institute for International Trade published the NAFTA Digest for several years prior to the establishment of NAFTA, and for several subsequent years. It also published the Border Business Indicators, a newsletter using a database established at the University, through the year 2010. The Institute continues to publish The International Trade Journal (ITJ), a highly regarded quarterly academic journal, now in its 32nd year of publication. This funding has also made possible the establishment of a database containing monthly border trade statistics, including vehicular, passenger, truck, rail, and pedestrian traffic on all major Texas-Mexico border points of entry. This information is free to access and available to businesses, government agencies, other institutions, and the general public. Numerous studies and research monographs and publications dealing with economic development and competitiveness of the border region have been made possible through this item.

(3) (a) Major Accomplishments to Date:

The Institute has become a major source of information on international trade. Its data collection, crucial for trending/forecasting, supports researchers/policymakers of the border region, and technology upgrades have made the service of dispensing time-sensitive data possible. Several partnerships have been established to promote scholarly research beneficial to the border region. In 2017, the Institute jointly sponsored a highly attended public-information forum on the likely consequences of "A World Without NAFTA", and produced testimony on NAFTA renegotiations at a hearing of the Office of the U.S. Trade Representative.

Scholars from around the world attend our annual conference where they present studies that help raise the level of education, knowledge base, and thus, the standard of living of the border region, enabling its population to reach for the standard the rest of Texas and the U.S. enjoy. The conference enhances the education of TAMIU students by affording them what is often their first opportunity to present research at an academic conference. As the quality of programs has continued to improve, we have been able to serve a larger population and extend our collaborative endeavors.

Business faculty serve on the Board of the ITJ, and Ph.D. students have engaged in its publication through manuscript reviews, book reviews, and other ways, allowing them to use the journal as a training platform.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The Institute will continue to promote its expertise on NAFTA-related issues by disseminating the findings from its project with the Inter-American Development Bank, the Universidad de Monterrey, and the Colegio de la Frontera Norte on the political economy of trade policy in the border region. The Institute will continue to publish the highly regarded journal, The ITJ, and will maintain a database for manuscript submissions and acceptance information for the journal. The Institute is also working in partnership with Routledge, Taylor & Francis Group, the current publishers, to get the Journal into the Social Science Citation Index which provides researchers and students with access to bibliographic and citation information needed to find research data, journals, and researchers. The Institute will also expand its cross-border relationships with Mexican and Central American businesses and public and private institutions so it can continue to provide research opportunities in international business for faculty and researchers. As the Institute matures and becomes more established in the academic community, it will be able to attract higher-level scholars to both the annual conference and the Journal, elevating the scholarly standing of the University. We are also seeking to improve our distribution of services, continuing to simplify access to our data via the internet, and addressing the possibility of additional data sets.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

These programs did not exist prior to funding and were established thanks to this appropriation.

(5) Formula Funding: N/A

(6) Category: Public Service

(7) Transitional Funding: N

(8) Non-General Revenue Sources of Funding:

None

(9) Impact of Not Funding:

The continuation of funding for the Institute is essential to the State's goal of making TAMIU a center of expertise and education in international issues – and, ultimately, to bringing the border region to a level of development on par with the rest of the State. Removing funding from the Institute could jeopardize the survival of many businesses in the Texas-Mexico border region. If not for this funding, programs to fortify higher education and business and economic development of the border region would not have materialized. Continued funding will support vital research by faculty and students to enhance the border region's competitive position. Furthermore, the continued enhancement of the reputations of both, the Institute's annual conference and The International Trade Journal, as outlets of scholarship for faculty, students, and the general academic community, and the accessibility of current and useful border data and research for businesses, scholars, and policy-makers, would be undermined if funding were further reduced or eliminated.

(10) Non-Formula Support Needed on Permanent Basis/Discontinu

This non-formula support is needed on a permanent basis. Support for undergraduate as well as graduate and faculty research has been made possible through this appropriation, helping the University achieve higher quality in research and teaching as manifest in its accreditation by SACS and the School of Business' accreditation by AACSB-International. This funding also supports the publication of the ITJ, which provides our Ph.D. students the ability to gain knowledge and experience in working with an academic journal. The ITJ also promotes the University and our annual conference on a global platform. This funding has also allowed for partnerships, such as a recent partnership with the Inter-American Development Bank and three Mexican universities to undertake a study of the political economy of trade policy in the U.S.-Mexico border region. In addition, the continuous collection of data on trade and development issues related to the economic interaction between the U.S. and Mexico and the availability of this data to businesses, government agencies, and other institutions and individuals helps to support the development of the local and regional economy.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

The ITJ's annual measure of citations per document within a four-year window as calculated by SCImago Journal and Country Rank has grown from an average of 0.254 over the period 2003-2007, to 0.439 in 2008-2012, to 0.625 from 2013 to 2017. The journal earned inclusion in the 2015 edition of the Chartered Association of Business Schools' Academic Journal Guide, a mark of recognition of the journal's scholarly standards that was renewed in 2018. Our goal is to continue this trend to increase the competitiveness of the journal. The WHT Conference regularly attracts over 150 registered participants. Evaluations of the conference emphasize the high quality of the organization, academic sessions, and keynote speakers. Our goal is to continue to increase the quality of the conference while providing attendees an enjoyable experience during their time at TAMIU. We also expected continued engagement with other institutions, such as those existing with the Tec de Monterrey, Universidad Regiomontana, Universidad Autonoma de Nuevo Leon, Universidad de Tamaulipas, Universidad de Monterrey, and Colegio de la Frontera Norte, to promote scholarly research beneficial to the border region.

Institutional Enhancement(Academic and Student Support)

(1) Year Non-Formula Support Item First Funded:	2000	
Year Non-Formula Support Item Established:	2000	
Original Appropriation:	\$5,872,337	

(2) Mission:

The University was one of several beneficiaries of the 71st Texas Legislature's action on the South Texas Border Initiative which increased appropriations to enhance the scope and quality of universities along the Texas-Mexico Border. This special appropriation, originally called "Academic Program Development," provided access and support for at-risk low income, first generation Hispanic students to be successful and even though nominally was referred to as a Special Item, it was intended as base funding in addition to existing formula funding. This initiative supported the hiring of faculty to handle the rapid growth in enrollment and the expansion of academic programs. This continues today with student enrollment more than doubling to over 7,600 over the past 15 years.Institutional Enhancement currently funds 19% of the University's total appropriation and almost one-third of all faculty. It represents a significant portion of base funding. This item should be classified as an instructional support strategy with an academic and student support focus. For this reason, the University has requested that this item be incorporated into its existing Academic and Student Support non-formula item.

(3) (a) Major Accomplishments to Date:

Funding 72 FTE faculty. This number has been reduced over time due to the decreases in non-formula funding. The Texas Higher Education Coordinating Board recognizes the value of tenured and tenure track faculty's teaching and the positive impact they have on the success and persistence of undergraduates. This item helps lessen our reliance on less experienced teaching assistants and adjunct faculty.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

As mentioned above, Institutional Enhancement represents 19% of the University's total appropriations, funds almost one-third of all faculty, and is a significant portion of the University's base funding. Over the next two years, this non-formula funding will be used to retain and, when necessary, recruit faculty members. In addition, the funding of these faculty positions helps decrease our reliance on adjunct faculty, which is critical for maintaining and improving persistence rates for first-and second-year students.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

As previously mentioned, Academic Program Development was first awarded by the 71st Legislature. The 76th Legislature obscured the purpose of this special appropriation by renaming it Institutional Enhancement.

(5) Formula Funding: N/A

(6) Category: Instructional Support

(7) Transitional Funding: N

(8) Non-General Revenue Sources of Funding:

None.

(9) Impact of Not Funding:

Institutional enhancement represents base funding for the core, teaching function of this institution. Since this appropriation is used exclusively to fund faculty, it is imperative that it continue to ensure both the quality and survival of academic programs. Without this crucial source of base funding, the University would be unable to afford all of its existing faculty positions resulting in fewer course offerings and increased time to degree.

(10) Non-Formula Support Needed on Permanent Basis/Discontinu

This non-formula support is needed on an on-going, permanent basis. As previously noted, without continued funding of this item course offerings would have to be limited, as faculty positions would be reduced. Additionally, the region's population remains largely at-risk, low income, first generation Hispanics – the same demographic profile which lead to this funding all those years ago.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

The success of our program is evident in our enrollment growth, along with our retention and graduation rates of an overwhelmingly Hispanic population, most of whom (78%) receive some form of financial aid. With a first-year student persistence rate among the highest in the State at 86.3%, TAMIU has a six-year graduation rate of 53.8%. Perhaps the greatest indicator of success, however, is the 78% gainful employment rate of our graduates—8% over the State average. Our return on investment comes not only from our graduates' transition to productive citizenry, but also in a regional unemployment rate which mirrors the State's rate of 4%, while other, South Texas border counties range from 6.2% to 10.8%. None of this would be possible without the faculty to educate and graduate our students.

Outreach & Enrollment(Academic and Student Support)

(1) Year Non-Formula Support Item First Funded:	2012
Year Non-Formula Support Item Established:	2012
Original Appropriation:	\$1,000,000

(2) Mission:

The University prepares students for success through intensive outreach to local and regional schools, establishing one-on-one relationships to guide high school students through the admissions and financial aid processes, providing non-traditional students in an underserved region with the tools necessary for success in support of 60x30TX. Although this item at one time focused primarily on recruitment and enrollment, reductions in recent sessions have resulted in a refocused effort. Upon entering the University, this item provides for a comprehensive program of orientation, advisement, and academic support to ensure retention and timely graduation. This item should be classified as an instructional support strategy with an academic and student support focus. For this reason, the University has requested that this item be incorporated into its existing Academic and Student Support non-formula item.

(3) (a) Major Accomplishments to Date:

•Funding 7 full-time faculty focused on developmental education and helping freshmen transition to university life.

•Funding 5 full-time professional academic advisors who provide counsel and academic support to first- and second-year students to bolster retention and timely graduation.

•Increased freshman applications by 132% (from fall 2009 to fall 2017)

•Increased first time freshman enrollment by 53% (from fall 2009 to fall 2017)

•Increased total, first-year persistence rate to 86.3% (2016 cohort) – among the highest of any regional university.

•Expanded Advising and Mentoring Center services (staffed by 5 full-time professional Academic Advisors and 36 part-time Student Mentors) for first- and second-year students including support for early alert referrals, provisionally admitted students, developmental education students, and students on probation.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

•Focus the University offerings and support services to increase overall student engagement and retention targeting a 90% total persistence rate.

•Increase semester credit hour enrollment through personalized academic advising.

•Expand supplemental instruction for challenging core courses.

•Review and retarget the HB 5 College Prep Course content in mathematics and language arts with local and area high schools and community college.

•Continue to diversify Freshman Seminar course options to personalize the needs of students.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

There was no funding source prior to receiving this.

(5) Formula Funding: N/A

(6) Category:

Instructional Support

(7) Transitional Funding: N

(8) Non-General Revenue Sources of Funding:

N/A

(9) Impact of Not Funding:

This item represents base funding for the core, teaching and instructional support functions of this institution. Since this appropriation is used exclusively to fund faculty and advisors, it is imperative that it continue to ensure the quality of academic programs and the effectiveness of our first- and second-year student success programs. Without this crucial source of base funding, the University would be unable to afford all of its existing faculty positions and professional academic advisors. This would result in fewer course offerings and a weaker first year success program which provides support for our at-risk, low income, first generation, Hispanic students, leading to increased time to degree and overall lower graduation rates.

(10) Non-Formula Support Needed on Permanent Basis/Discontinu

This item represents base funding for the core, teaching and instructional support functions of this institution. Since this appropriation is used exclusively to fund faculty and advisors, it is imperative that it continue to ensure the quality of academic programs and the effectiveness of our first- and second-year student success programs. Without this crucial source of base funding, the University would be unable to afford all of its existing faculty positions and professional academic advisors. This would result in fewer course offerings and a weaker first year success program which provides support for our at-risk, low income, first generation, Hispanic students, leading to increased time to degree and overall lower graduation rates.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

To ensure timely progress to degree, our retention rate is closely monitored by our advisors. Data of student engagement at the advising, writing, learning and tutoring centers are collected via student ID cards and analyzed to ensure student success. The success of our program is evident in our retention and graduation rates of an overwhelmingly Hispanic population, most of whom (78%) receive some form of financial aid. With a first-year student persistence rate among the highest in the State at 86.3%, TAMIU has a six-year graduation rate of 53.8%. Perhaps the greatest indicator of success, however, is the 78% gainful employment rate of our graduates—8% over the State average. Our return on investment comes not only from our graduates' transition to productive citizenry, but also in a regional unemployment rate which mirrors the State's rate of 4%, while other, South Texas border counties range from 6.2% to 10.8%. None of this would be possible without the faculty to educate and graduate our students and the advisors to provide instructional support.

Path to Academic and Student Success (Academic and Student Support)

(1) Year Non-Formula Support Item First Funded:	2020
Year Non-Formula Support Item Established:	2020
Original Appropriation:	\$2,000,000

(2) Mission:

Path to Academic and Student Success provides resources to implement new, and bolster existing, student success initiatives to increase student recruitment, persistence, and graduation rates. These initiatives fall into three categories: (1) mitigating academic challenges, (2) building academic identity and sense of belonging, and (3) monitoring student success and timely progress toward graduation. This item builds on the success of our first-year success program by taking our intrusive advising model into the junior and senior years and providing supplemental instruction for challenging courses at both, the lower and upper division, levels with a goal of improving graduation rates. This item should be classified in the instructional support strategy with an academic and student support focus.

(3) (a) Major Accomplishments to Date:

None. New initiative.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Mitigating academic challenges will be accomplished through a Summer Bridge Program for incoming freshman that will provide intensive instruction for students with one or more TSI deficiencies with the goal of having students pass the TSI and successfully transition to a college learning environment, and Supplemental Instructors and Tutors for STEM and requisite nursing and business courses, both lower and upper division level, to provide additional, instructional support, improving persistence and graduation rates. Monitoring student success and timely progress toward graduation will be achieved through an expansion of Academic Advising for upperclassmen, including transfer students.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None. New initiative.

(5) Formula Funding: N/A

(6) Category:

Instructional Support

(7) Transitional Funding:

Ν

(8) Non-General Revenue Sources of Funding:

None.

(9) Impact of Not Funding:

With a first-year student persistence rate among the highest in the State at 86.3%, TAMIU has a six-year graduation rate of 53.8%. The University believes both of these metrics could be improved, however, but this is only possible with the additional funding to support the new initiatives described above. Without intrusive advising at the upper division level and supplemental instruction to assist students with particularly challenging courses, students are subject to lose momentum as they hit academic roadblocks or focus on working instead of studying, both increasing time to degree.

(10) Non-Formula Support Needed on Permanent Basis/Discontinu

Permanent. As previously noted, without funding for these new initiatives, the University's success in increasing persistence and graduation rates will be limited.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

This item builds on the University's student success initiatives for freshmen and sophomores and expands them to juniors and seniors by mitigating academic challenges, building academic identify and sense of belonging, and monitoring student success and timely progress toward graduation. It is expected the University's 6-year graduation rate, already in the top half of all institutions at 53.8% will only improve.

	761 Texas A&M International University
Small Business Development Center	
(1) Year Non-Formula Support Item First Funded:	2008
Year Non-Formula Support Item Established:	2008

(2) Mission:

Original Appropriation:

The mission of the TAMIU Small Business Development Center (TAMIU SBDC) is to foster small business success. The TAMIU SBDC aims to create growth, expansion, innovation, increased productivity and improved management for entrepreneurs through one-on-one, confidential, no-cost business advising from certified business advisors, training, technical assistance, advocacy, business research, resource information and coordination with the U.S. Small Business Administration and other community business support services. The Center matches clients and expertise helping to create jobs and grow the Texas economy

The TAMIU SBDC serves many functions within higher education including community engagement, public service, applied economic projects and technology commercialization.

\$150.000

The TAMIU SBDC serves the small businesses and rural communities of Webb, Zapata and Jim Hogg Counties, and our certified professionals work closely with small business owners to achieve success resulting in economic impact and development.

(3) (a) Major Accomplishments to Date:

The TAMIU SBDC supports the growth and development of the Texas economy by assisting with the start-up and scale-up of small businesses through business advising, training, and research activities, leading to job creation, job retention, capital infusion, economic diversification, and business expansion. The TAMIU SBDC was recently awarded the "2018 SBDC Center of Excellence and Innovation" by the U.S. Small Business Administration San Antonio District office. This award distinguishes the TAMIU SBDC as among the best Centers in the State.

In its 9th year, the TAMIU SBDC "Small Business Management Certification Program" is recognized in the service area as a premier program providing foundational knowledge in the start-up and scale-up of small businesses. The program consists of courses in such areas as starting a business, preparing a business plan, financial control, government opportunities, financial management via QuickBooks, marketing a business via social media, and legal issues, and graduates approximately 100 small business owners and aspiring small business owners each year. Completion of the program enhances the management skills of the graduate and provides a good foundation for business success.

The SBDC program continues addressing increasing demand for small business services in emerging markets as the Texas economy diversifies and grows.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The TAMIU SBDC will continue to provide the highest quality services to Laredo and the surrounding communities. The TAMIU SBDC looks to continue increasing the number of clients served and economic impact indicators. In addition, the TAMIU SBDC Small Business Management Certification Program will continue to innovate and improve its offering to the communities served.

The TAMIU SBDC will look to innovate how it interacts with clients and specifically how it disseminates information on available services for those interested in the start-up or scale-up of a small business through continuing to produce an online video program shared via YouTube and Facebook, known as "Small Business Living".

In addition to our mobile business special event, the TAMIU SBDC has identified other local small business trends and looks to develop events to support and educate those interested in these trends. Current, local small business needs and trends include boutique fitness, emergency preparedness for restaurants, and human resources topics among others.

The demand for economic development via home-growing Texas businesses and jobs is as strong as ever. The SBDC is a proven and efficient means to continue the growth, expansion, innovation, increased productivity and improved management for small businesses in the South-West Texas Border service area.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

No prior funding source was available.

(5) Formula Funding: N/A(6) Category:

Public Service

(7) Transitional Funding: N

(8) Non-General Revenue Sources of Funding:

Primarily federal grants (U.S. Small Business Administration) and some user fees from training activities.

(9) Impact of Not Funding:

The TAMIU SBDC would be unable to continue operations without this funding. This would eliminate a program that is among the best in the State which not only results in exemplary business success for the small business community but cutting-edge innovation in the start-up and scale-up of small businesses. The SBDC network is among the most efficient program funded with a cost per job of approximately \$1,000, an industry low, and a return on investment that is nearly three times the cost of the program.

TAMIU SBDC Certified Business Advisors conduct market research to help companies export Texas goods and services. In addition, they help new businesses implement QuickBooks software to better manage revenues, expenses, payroll, benefits and taxes. Without funding, client services like these would be reduced or eliminated.

Additionally, there would be a \$153,177 loss of federal funds annually—an amount greater than this non-formula item—which would hamper our ability to support business development extension services.

(10) Non-Formula Support Needed on Permanent Basis/Discontinu

Non-formula support is needed on a permanent basis, as the long-term funding leverage with the U.S. Small Business Administration.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

The performance of the TAMIU SBDC is reviewed annually by the South-West Texas Border Small Business Development Center Network and is reviewed periodically by the U.S. Small Business Administration and the national association of SBDCs, America's SBDC. The TAMIU SBDC has achieved monumental small business success for its clients. In program year 2017 alone, the TAMIU SBDC assisted 699 businesses resulting in 104 combined business start-ups and expansions, 643 combined jobs created and retained, and \$18.1 million dollars in capital investment. This highlights not only the excellence in production of the center, but the innovation as well.
