763 University of North Texas Health Science Center at Fort Worth

INSTITUTIONAL VISION

The University of North Texas Health Science Center (UNTHSC) is organized around the following institutional principles:

- Our purpose: Transform lives in order to improve the lives of others
- Our vision: One University, built on values, defining and producing the providers of the future
- Our mission: Create solutions for a healthier community
- Our values: Serve Others First, Integrity, Collaboration, Respect, Be Visionary

Interprofessional Education

Our 33-acre campus in the heart of Fort Worth's Cultural District consists of five schools and colleges:

- Texas College of Osteopathic Medicine
- Graduate School of Biomedical Sciences
- School of Public Health
- School of Health Professions
- UNT System College of Pharmacy

UNTHSC is committed to developing collaborative, practice-ready health professionals by emphasizing team-oriented, evidence-based best practices, quality-improvement approaches and informatics. We believe our students will be better disposed to cooperative efforts as practitioners having experienced opportunities to learn about, from and with students from other professions. We are committed to integrating collaborative practice competencies and interprofessional education opportunities beginning with the initial year of our students' health care education and reinforcing these competencies across all years of their education and training. Students who experience interprofessional discipline are better prepared to contribute to a culture of patient safety and improved patient outcomes.

Education

With an enrollment of approximately 2,270 students as of Fall 2017, our academic reputation continues to grow in prominence. The Texas College of Osteopathic Medicine graduates more primary care doctors than any other medical school in the state. Our Rural Osteopathic Medical Education program strives to produce practice-ready graduates who can serve in rural communities that suffer from acute physician shortages. We recently partnered with the UNT College of Music in Denton to offer the world's first doctoral degree in performing arts health.

UNTHSC entered into a significant partnership to improve graduate medical education in North Texas. We recently teamed up with HCA Healthcare and Medical City Healthcare to create 500 new residency positions over the next seven years in 14 hospitals across the Dallas-Fort Worth area, making sure to keep more Texas-trained physicians here at home.

Our newest school, the UNT System College of Pharmacy, has now graduated its first two classes of pharmacists into the North Texas community. It is the first pharmacy school in North Texas and the first in the state to be located on an academic health science center campus. Graduates of the College of Pharmacy do more than count pills and fill prescriptions. They provide patient care, including medication management, and become an important part of the health care teams that take care of Texans.

763 University of North Texas Health Science Center at Fort Worth

Discovery/Research

UNTHSC has approximately \$50 million in sponsored research expenditures. Our innovative research in Alzheimer's disease includes the largest U.S. study looking at why Mexican-Americans develop Alzheimer's more than a decade sooner than other groups. Another study, launching in 2018 with more than \$6 million in federal funding, will examine the accuracy of a simple blood test to diagnose Alzheimer's at a primary care doctor's office. This would make Alzheimer's testing cheaper, easier and earlier, which would allow for better outcomes while saving resources.

We continue to achieve the milestones for our 1115 Healthcare Transformation Waiver programs and have the necessary infrastructure in place to ensure the future success of our Delivery System Reform Incentive Payment (DSRIP) projects. We remain committed to improving patient care efforts and innovation through participation in the RHP 10 Learning Collaborative.

Health Care

We specialize in primary care and prevention, healthy aging, and applied genetics. Our clinical practice includes specialists in cardiology, dermatology, family and sports medicine, gastroenterology, geriatrics, musculoskeletal care, pediatrics and vascular surgery.

Primary Care and Prevention

Among all Texas medical schools, we have the highest percentage of medical students entering primary care (66 percent). Our Rural Osteopathic Medical Education of Texas (ROME) offers innovative medical education programs that prepare students for life and medical practice in rural environments. Our students train in more than 40 clinical sites across the state, from Dalhart in the northwest corner of the Panhandle to LaFeria on the border in the Rio Grande Valley – and dozens of sites in between.

The Institute for Patient Safety was newly funded by the 84th Legislature with the purpose to improve the quality and safety of health care in our region and throughout the State. The Institute hosts annual national-level Patient Safety Summits attended by hundreds of health care providers, leaders, and patient advocates. It also funds academic and industry studies focused on improving quality and safety in hospital and ambulatory care settings.

Our Pediatric Mobile Clinic is a creative solution for bringing much-needed primary care services to kids in under-served areas of Tarrant County. We bring an experienced team of bilingual UNTHSC clinical professionals to schools, community centers, churches, and community organizations throughout Fort Worth, helping families overcome barriers to health care resources. Providing this service is critical to the wellbeing and resources of our community, as Tarrant County has 75,000 uninsured children.

A similar program, the Mobile Vision Screening Program, provides no-cost screenings to Fort Worth preschoolers. The program identifies and corrects vision problems at an early age, so children can have greater success in the classroom as they grow older.

763 University of North Texas Health Science Center at Fort Worth

Healthy Aging

We were the only site in Texas selected for a federal grant from the Department of Health and Human Services to improve health care for older adults. The goals of the Tarrant County project – called WE HAIL, or Workforce Enhancement Healthy Aging and Independent Living – are to increase the number of health care providers trained to meet the needs of older adults and to integrate geriatric training into academic programs for doctors, nurses, pharmacists, physical therapists and other health care professionals.

Our Institute for Healthy Aging integrates state-of-the-art clinical care, groundbreaking research, innovative education and training, and extensive community engagement to create solutions for a new era of enduring quality of life. We are a statewide leader in both aging and Alzheimer's research, making significant advances in prevention, treatment and care. One of our most innovative programs, known as HABLE, or Health and Aging Brain among Latino Elders, examines how factors such as diabetes, physical condition and lifestyle contribute to cognitive problems among Mexican-American seniors.

We are also a participant in the Texas Alzheimer's Research and Care Consortium (TARCC), a collaboration among seven of the State's leading medical research institutions to improve early diagnosis, treatment, and prevention of Alzheimer's disease by collaborating on State-funded Alzheimer's research and contributing genetic and blood biomarker data to a shared Texas Alzheimer's DataBank.

Applied Genetics

The UNT Center for Human Identification is recognized globally as a premier institution for human identification. Comprised of world-class experts in forensic genetics, forensic anthropology, database development and management, and information technology, the UNTCHI team performs forensic DNA casework, identifies human remains, manages missing persons programs, fights human trafficking and trains students, scientists, law enforcement personnel and the legal community.

The Texas Missing Persons lab is the only one in the nation set at an academic center that is approved to upload genetic data for unidentified remains to the FBI's Combined DNA Index System, a criminal justice database and software better known as CODIS. We are CODIS' largest contributor of genetic information on unidentified remains. Sixty percent of the DNA profiles in the FBI's missing persons databases are generated by UNTCHI.

Since 2003, the Health Science Center has assisted in more than 29,000 forensic and missing person cases, contributed to more than 2,200 successful identifications, processed more than 15,000 DNA samples and completed nearly 4,000 sexual assault cases.

Our team of forensic experts assists law enforcement agencies throughout Texas – in 210 counties to date. Agencies from across the nation – nearly 4,800 so far – seek out our expertise in hopes of using DNA technologies to identify the dead. Additionally, we have managed NamUs – the National Missing and Unidentified Persons System – for the US Department of Justice since 2011. The NamUs database is a national clearinghouse for missing person cases, unidentified victims, unidentified living individuals and unclaimed bodies. This free online system can be queried by medical examiners, coroners, law enforcement officials and the public from all over the country in hopes of resolving cases.

Creating Solutions for a Healthier Community:

Our mission to create solutions for a healthier community includes numerous collaborations across our region. Here are just a few examples:

- GME partnerships –an agreement with health care systems in North Texas to create more residency positions, addressing the statewide physician shortage and ensuring we keep more Texas-trained doctors here at home.
- North Texas Regional Institutional Review Board – a community-wide panel that cuts through red tape requiring every clinical study involving humans to go through multiple approval processes at different institutions. It streamlines a complicated process, making it possible to take research from bench to bedside faster and giving more Tarrant County residents access to the newest treatments.
- Institute for Patient Safety – a collaborative institute focused on patient safety problems and preventable medical errors through professional and community education, research, and quality improvement projects. Founding members of the institute include Texas Christian University, JPS Health Network and Cook Children’s Medical Center.
- Regional Medical Library – one of eight libraries nationwide in the newly grant-funded National Network of Libraries of Medicine working to improve access to authoritative health information for the 40 million Americans who live in Texas, Arkansas, Louisiana, Oklahoma and New Mexico.
- Joint Admissions Medical Program (JAMP) – a program aimed at helping undergraduate students from economically-disadvantaged backgrounds access opportunities in health care.
- Primary Care Pathway Program – an innovative partnership among UNTHSC, Midland College and the University of North Texas that streamlines the admissions process and medical school education so that participants can become physicians in seven years rather than the traditional eight.
- North Texas Eye Research Institute – a team of over a dozen UNTHSC scientists that work together toward developing new and effective treatments for common ocular diseases such as glaucoma, macular degeneration and diabetic retinopathy.
- Asthma 411 – a collaboration between the Health Science Center and Fort Worth ISD that allows school nurses to keep breathing-treatment equipment in their offices and use them to treat children experiencing asthma attacks, which reduces emergency room visits and student absences.
- Mosquito monitoring – a partnership with the City of Fort Worth for testing and analyzing mosquitos , which serves as an early warning system for West Nile Virus and other insect-borne diseases.

KEY FUNDING ISSUES:

Formula Funding

The UNTHSC continues to experience a full complement of student enrollment. Thus, we support the Health Related Institutions (HRI) Formula Advisory Committee's formula funding recommendations to the 86th Legislature. In order to maintain and support current enrollments, sufficient formula funding would be needed to sustain enrollment growth at current rates, along with funding to restore the rates as recommended.

86th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

763 University of North Texas Health Science Center at Fort Worth

Exceptional Item

TRB Debt Service: Academic Building– FY 2020 \$9,947,320 & FY 2021 \$9,949,000

This project consists of the construction of a new building of approximately 180,000 gross square feet for the UNTHSC campus. This new facility will be student-centric and support the current and future academic needs of the campus. Academic space is currently in a deficit and this new facility will provide much needed academic and support space while contending with projected enrollment growth. It will also provide the space necessary to relocate academic programs and administrative support areas currently housed in other buildings, thus allowing more efficient and effective utilization of existing space and infrastructure.

10% Biennial Base Reduction Option Exercise

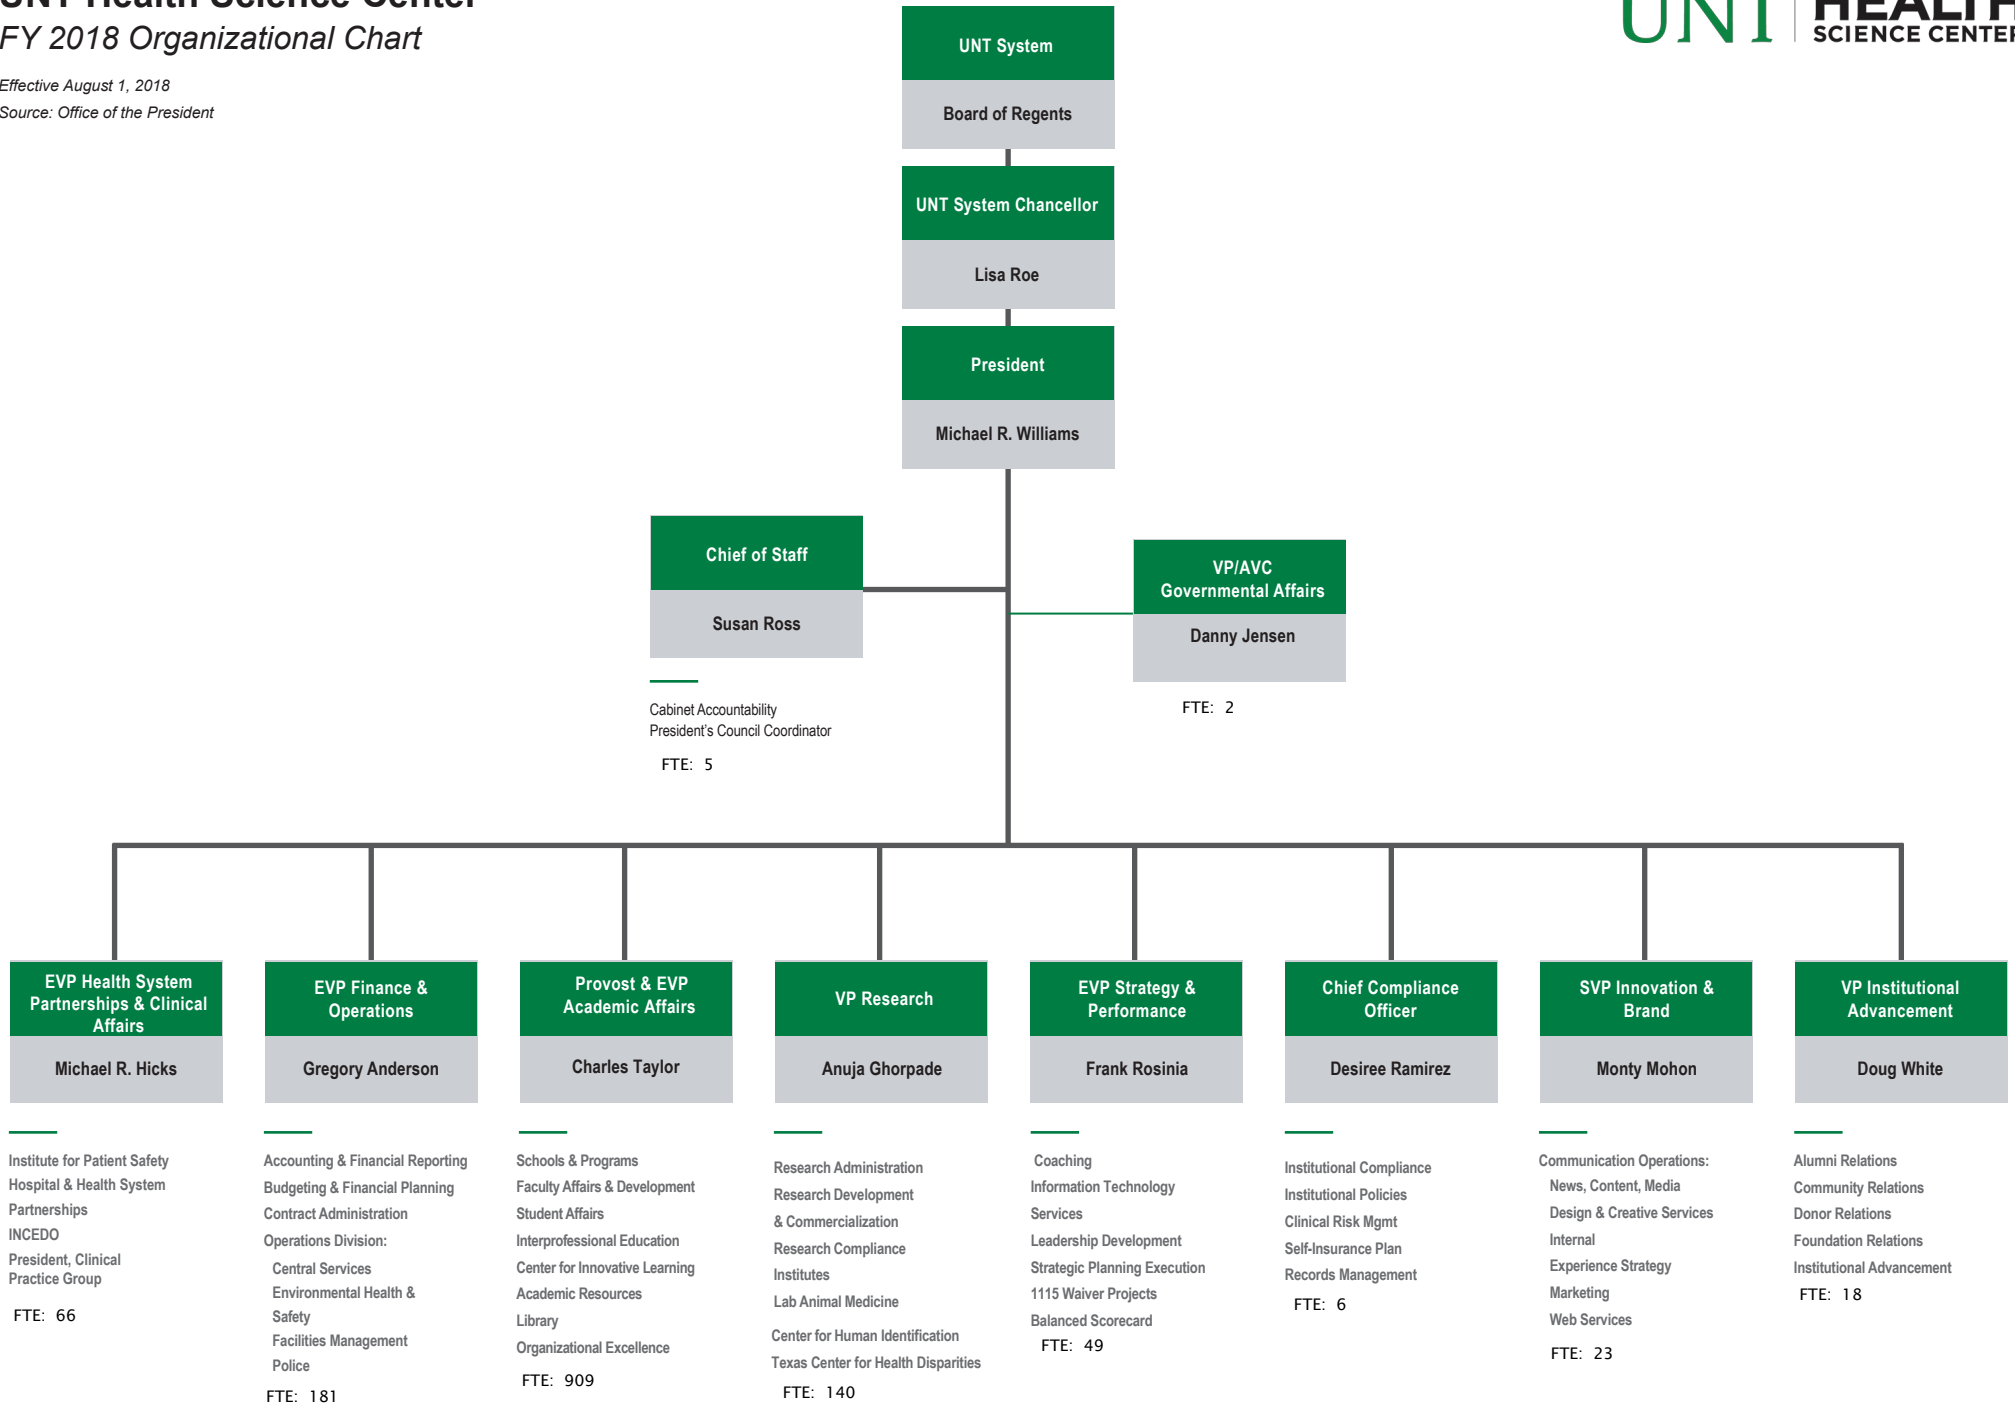

In preparation of the 10 percent General Revenue reduction schedule, we evaluated all non-formula General Revenue funding. However, due to the limited number of strategies to which we can apply our 10% reduction, we chose to reduce all non-formula strategies, which were funded directly by the appropriations provided by the Legislature, by an equal amount of 10 percent. We believe applying a significant cut to any particular strategy would jeopardize the operational effectiveness of each specific need.

Background Checks

UNT System's Office of Human Resources will provide background checks on all new employees, as well as student employees, as allowed by the Texas Education Code, Section 51.215 and the Texas Government Code, Section 411.094.

The mission of the Alzheimer’s Diagnostic and Treatment Center is threefold: (1) to expand education of and clinical identification, treatment and care of persons with Alzheimer’s and related memory disorders through the Department of Internal Medicine and Geriatrics, Center for Geriatrics - Geriatric Assessment and Planning Program (GAPP); (2) to facilitate basic science and translational research through the Institute for Healthy Aging into the origins and treatment of Alzheimer’s; and (3) to establish productive links between Alzheimer’s work in geriatrics clinical care, pharmaceutical clinical trials, translational science, in basic science laboratories, and in public health.

UNT Health Science Center holds two NIH program project grant awards in aging, a HRSA Geriatric Workforce Enhancement Program and participates in several clinical trials in aging and Alzheimer’s Disease.

According to the US Census Bureau, in 2010 there were 3.8 million people in Texas aged 60 and older, with total growth expected to over 9.7 million by 2040. The number of people with dementia will increase with the aging of the population. Geriatrics is a Center of Excellence at UNTHSC and works with the Institute for Healthy Aging. The institution is well-equipped to expand its work in Alzheimer’s.

|------|-------------|----------|----------|----------|---------|---------|

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Institute for Patient Safety and Preventable Harm at the University of North Texas Health Science Center (UNTHSC), also known as SaferCare Texas, is positioned to improve the practice of patient safety in Texas. More than 250,000 Americans die annually from preventable medical errors, making medical errors the third leading cause of death in the United States. The number of Americans experiencing serious, non-lethal, injury from preventable errors may be 10 to 20 times that number. Medical errors lead to an estimated \$50 billion in added U.S. health care costs, and up to \$1 trillion in lost human potential and contributions. These alarming statistics emphasize the urgent need for safer care, particularly in care delivery settings from home to and from the hospital, and transitions in between. Too little attention, casual habits, limited accountability, poor methods, and unmet expectations are factors when patients are harmed in health care.

SaferCare Texas provides leadership and guidance on free-from-harm and patient safety strategies. The Institute challenges traditional thinking, methodology, and habits. The Institute is positioned to convene, guide, and work across multiple professional boundaries, cultures, and experiences with a neutral perspective. Continued funding of the Institute will foster continued growth of collaborative, patient-centered, interprofessional initiatives across Texas that will directly impact health care delivery and patient outcomes.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Application of DNA technology at the UNT Health Science Center’s Center for Human Identification (UNTCHI) includes forensic DNA analyses and the identification of missing persons and unidentified human remains. The DNA Identity Laboratory was first funded by the State in 1989. Additional funding was appropriated in 2001 by the 77th Texas Legislature to establish the TX Missing Persons DNA Database, which is connected to the FBI’s CODIS database. Subsequent legislative changes have defined the TX Missing Persons DNA Database in the TX Code of Criminal Procedure and established UNTCHI as a criminal justice agency, expanding the scope of forensic casework services.

Currently, the UNTCHI is a resource for state and local law enforcement, medical examiners, justices of the peace, and TX courts; providing forensic DNA casework, backlog reduction of sexual assault evidence, identification of missing persons and unidentified remains, and forensic anthropological analysis at no cost. UNTCHI is committed to training doctoral and professional master’s students in forensic genetics, becoming the primary source of new DNA forensic scientists and analysts for crime laboratories within Texas. UNTCHI maintains an active, innovative research program to improve forensic identification capabilities.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The University of North Texas Health Science Center’s Center for Human Identification (UNTCHI) provides highly-specialized forensic analyses to Texas agencies. The UNTCHI combines capabilities of a forensic anthropology lab with those of a DNA lab, creating a unique resource for the investigation of missing persons and unidentified remains, which is provided to law enforcement, Texas Rangers, Medical Examiners, Justices of the Peace, and the TX courts at no cost to the requesting agencies. The forensic anthropology unit also supports the State’s medicolegal entities by providing a critical basis for determinations of cause and manner of death. UNTCHI provides expert witness testimony to support human identifications and the analysis of traumatic injuries in homicide cases. All services are provided to agencies at no cost.

With increases in unidentified bodies near the border, a priority effort has been dedicated to assisting these overwhelmed counties. In addition to the services above, UNTCHI supports border agencies with outreach, education, and assistance to ensure thorough analyses and investigations. UNTCHI strives to expand the submission of reference samples needed to identify decedents via DNA and to provide complete dental records for future comparisons.

| 1 | General Revenue Fund | 9,947,320 | 9,949,000 |
| TOTAL, METHOD OF FINANCING | | \$9,947,320 | \$9,949,000 |

DESCRIPTION / JUSTIFICATION:

This project consists of the construction of a new building of approximately 180,000 gross square feet for the UNTHSC campus. This new facility will be student-centric and support the current and future academic needs of the campus. Academic space is currently in a deficit and this new facility will provide much needed academic and support space while contending with projected enrollment growth. It will also provide the space necessary to relocate academic programs and administrative support areas currently housed in other buildings, thus allowing more efficient and effective utilization of existing space and infrastructure.

Assumed to receive project funds of \$115.5 million for the project. Assumed to be issued in the public markets with a delivery date of 9/1/2019, the first payment on 10/15/2019 and the final ending payment on 4/15/2039.

EXTERNAL/INTERNAL FACTORS:

Major accomplishments to date and expected over the next two years: See Justification

Year established and funding source prior to receiving special item funding: N/A

Formula funding: None

Non-general revenue sources of funding: None

Consequences of not funding: As UNTHSC's campus continues to evolve and grow, the need for optimization and alignment of new and existing facilities has become necessary in order to maximize the overall efficiency of the institution's space. Thus, the failure to fund this project would not provide an opportunity to optimally utilize the space currently available, as well as improve the academic experience.

B. Assessment of Fiscal Year 2016 - 2017 Efforts to Meet HUB Procurement Goals

Attainment:

The University of North Texas Health Science Center (UNTHSC) attained or exceeded 2 of 5 of the applicable statewide HUB procurement goals in fiscal year 2016. UNT attained or exceeded 2 of 5 of the applicable statewide HUB procurement goals in fiscal year 2017.

Applicability:

The category of Heavy Construction is not applicable to the agency's operations because we do not have programs or projects related to this field. Any spending in this category represents a miscoding during the procurement phase. This has been corrected in our processes while upgrading to PeopleSoft 9.2.

Factors Affecting Attainment:

UNTHSC makes many specialized purchases throughout the fiscal year of scientific equipment for various labs and research on campus. Professional services and other services often require specialized knowledge, skills and experience. Due to the specialization required, there are few, if any, HUB vendors in these fields.

"Good-Faith" Efforts:

The agency made the following good faith efforts to comply with statewide HUB procurement goals:

Hosted or participated in more than 430 outreach events, more than 230 events educating internal departments, and more than 500 informal bid assistance projects. Additionally:

Made appropriate updates to HUB website; Continued in-reach program meeting with departments to discuss HUB program and vendors; Shared HUB information with campus departments in regards to HUB vendors and the goods/services they sell; Published expenditure reports for all departments that provide detailed data by university system account number, department or administrative reporting area related to purchases made to HUB Certified Vendors, Minority Vendors and Other Vendors for all HUB procurement categories recognized by the State; Ensured contract specifications, terms, and conditions reflected the agency's actual

6.A. Historically Underutilized Business Supporting Schedule

1 Workers' Compensation Insurance - 2.5% Reduction

Category: Across the Board Reductions

Item Comment: Due to the limited number of strategies in which we can apply our "targeted" reduction, we chose to reduce all non-formula strategies, which were funded directly by the appropriations provided by the Legislature, by an equal amount of 10%. We believe applying a significant cut to any particular strategy would jeopardize the operational effectiveness of each specific need and would have an adverse impact on the services, advancements and outcomes of these significant programs.

Strategy: 1-2-2 Workers' Compensation Insurance

FTE Reductions (From FY 2020 and FY 2021 Base Request)

9 Institutional Enhancement - 2.5% Reduction

Category: Across the Board Reductions

Item Comment: Due to the limited number of strategies in which we can apply our "targeted" reduction, we chose to reduce all non-formula strategies, which were funded directly by the appropriations provided by the Legislature, by an equal amount of 10%. We believe applying a significant cut to any particular strategy would jeopardize the operational effectiveness of each specific need and would have an adverse impact on the services, advancements and outcomes of these significant programs.

FTE Reductions (From FY 2020 and FY 2021 Base Request)

24 DNA Laboratory - 7.5% Reduction

Category: Across the Board Reductions

Item Comment: Due to the limited number of strategies in which we can apply our "targeted" reduction, we chose to reduce all non-formula strategies, which were funded directly by the appropriations provided by the Legislature, by an equal amount of 10%. We believe applying a significant cut to any particular strategy would jeopardize the operational effectiveness of each specific need and would have an adverse impact on the services, advancements and outcomes of these significant programs.

Project Description

This project consists of the construction of a new building of approximately 180,000 gross square feet for the UNTHSC campus. This new facility will be student-centric and support the current and future academic needs of the campus. Academic space is currently in a deficit and this new facility will provide much needed academic and support space while contending with projected enrollment growth. It will also provide the space necessary to relocate academic programs and administrative support areas currently housed in other buildings, thus allowing more efficient and effective utilization of existing space and infrastructure.

Special Item: 1 Economic Development and Commercialization

| | |
|--|-------------|
| (1) Year Non-Formula Support Item First Funded: | 2006 |
| Year Non-Formula Support Item Established: | 2006 |
| Original Appropriation: | \$1,550,000 |

(2) Mission:

The mission of Economic Development and Commercialization is to facilitate the development of Biotechnology and Translational Research at UNT Health Science Center. This funding enables the accomplishments of the goals set forth in Texas' Biotechnology Roadmap, which is to move biomedical research from bench to bedside, as well as to the community, along with the translation of new biotechnology discoveries into patents, commercial licenses, startup companies and jobs.

(3) (a) Major Accomplishments to Date:

Activities for economic growth in the Fort Worth community include:

- UNTHSC community partnership with TECH Fort Worth and the City of Fort Worth and its Economic Development Office
- UNTHSC Acceleration client companies (28+) and Labs (6) for life science companies and entrepreneurial support
- UNTHSC Discovery Center labs (2), serving an additional 12+ companies
- ZS Pharma, which raised \$112M in an IPO (acquired by AstraZeneca for \$2.7B)
- Cx Precision Medicine, a UNTHSC spinout company for Alzheimer's Disease
- TECH Fort Worth companies, which raised \$400+M in direct capital (excludes ZS Pharma & economic impact multiplier)
- Established Innovation Ecosystems Unit for growing relationships with local entrepreneurs & community partners (including TECH Fort Worth, City of Fort Worth, Fort Worth Chamber of Commerce, AccelerateDFW, Texas Christian University, and WeWork) to strategically impact economic development
- Launched new startups to fight cancer (Qana Therapeutics) and ophthalmic diseases (CIRC Therapeutics), plus a collaborative partnership with Cerenis Therapeutics to develop new pharmaceutical technologies
- Launched new startup in collaboration with MD Anderson (Fannin Partners) based on co-owned UNTHSC technology to fight cancer
- Held events that resulted in the formation of 16 new companies in just 108 hours
- Launched research projects to determine the impact of job creation by entrepreneurship in Fort Worth and assess the Fort Worth Dealmakers Network

(3) (b) Major Accomplishments Expected During the Next 2 Years:

763 University of North Texas Health Science Center at Fort Worth

Efforts by UNTHSC and its collaborative partners over the next two years will continue to develop a more robust innovation ecosystem in Fort Worth that will in part be based on the formation of new startups, the outlicensing of inventions from UNTHSC, the support of regional startups by leveraged resources and personnel at UNTHSC and collaborations with industry partners. Fort Worth will also be equipped with more relevant data to expand economic development activities based on technology and innovation. Expected major accomplishments will include:

- A scorecard to track entrepreneurship and its impact on Fort Worth
- An annual Fort Worth State of Entrepreneurship event
- An increased number of Startup Weekend events
- Campus programming to solve specific identified healthcare challenges (Data-thons, Hack-a-thons, etc.)
- Community-wide entrepreneurial ecosystem programming (Launch DFW, Global Entrepreneurship Week, Startup Crawl, etc.)
- Expanded research development activities and investments at UNTHSC
- An increase in the number of technology licenses
- An increase in the number of startup formations
- Benchmarking and best-practice sharing activities
- Launch of select dedicated initiatives like accelerators, maker spaces, story-telling or a digital sandbox to raise ecosystem awareness and provide new resources to innovators

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

The Economic Development and Tech Commercialization did not receive funding until 2006.

(5) Formula Funding:

N/A

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

N/A

(9) Impact of Not Funding:

Failure to fund this program will thwart continuing efforts by UNTHSC to commercialize new technologies, build research partnerships based on biotechnology, sustain the establishment and growth of startup companies, leverage state resources to support entrepreneurship and impact the North Texas economy with job creation and capital infusion. Cumulative progress toward building a more robust and diverse innovation ecosystem will largely be negated if UNTHSC can no longer support its programs and partners that are dedicated to this effort. The impact will be a setback for UNTHSC and Fort Worth. More than ever before, momentum exists in the community for growing the innovation ecosystem. The cost of not funding will be a loss of this momentum.

763 University of North Texas Health Science Center at Fort Worth

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Funding is needed on a permanent basis in order to sustain efforts to leverage state resources and personnel to impact economic development.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

UNTHSC has internal metrics to evaluate the impact of leveraging State funds to the Economic Development and Commercialization program through measures such as

- creating new companies
 - promoting entrepreneurship
 - promoting businesses and partnerships
 - developing research
-

763 University of North Texas Health Science Center at Fort Worth

Special Item: 2 Texas Missing Persons and Human Identification Program

| | |
|--|-------------|
| (1) Year Non-Formula Support Item First Funded: | 2016 |
| Year Non-Formula Support Item Established: | 2016 |
| Original Appropriation: | \$1,298,000 |

(2) Mission:

The University of North Texas Health Science Center's Center for Human Identification (UNTCHI) provides highly-specialized forensic analyses to Texas agencies. The UNTCHI combines capabilities of a forensic anthropology lab with those of a DNA lab, creating a unique resource for the investigation of missing persons and unidentified remains, which is provided to law enforcement, Texas Rangers, Medical Examiners, Justices of the Peace, and the TX courts at no cost to the requesting agencies. The forensic anthropology unit also supports the State's medicolegal entities by providing a critical basis for determinations of cause and manner of death. UNTCHI provides expert witness testimony to support human identifications and the analysis of traumatic injuries in homicide cases. All services are provided to agencies at no cost.

With increases in unidentified bodies near the border, a priority effort has been dedicated to assisting these overwhelmed counties. In addition to the services above, UNTCHI supports border agencies with outreach, education, and assistance to ensure thorough analyses and investigations. UNTCHI strives to expand the submission of reference samples needed to identify decedents via DNA and to provide complete dental records for future comparisons.

(3) (a) Major Accomplishments to Date:

UNTCHI is the single largest contributor of DNA profiles to the Federal CODIS missing and unidentified persons database. Since 2010, DNA profiles for 14,094 missing persons and 6036 unidentified remains cases have been uploaded to CODIS. 2097 identifications have been made, resolving 654 unidentified remains and 556 missing persons cases for TX agencies. In addition, the Laboratory of Forensic Anthropology has analyzed over 1,300 remains cases, assisting law enforcement agencies and medicolegal entities in 151 Texas Counties with skeletal remains location, recovery, and analysis.

UNTCHI provides DNA and anthropological assistance to agencies in the defined TX border region. In 2017 alone, this support has included: forensic anthropological analyses of 80 skeletal remains cases, DNA analysis of 131 samples from unidentified remains, and 52 DNA associations leading to identifications of missing persons. These border deaths require a death investigation and a legal identification. This assistance is particularly important to border counties faced with an immediate and urgent need to identify human remains and missing persons.

UNTCHI works closely with the Texas Forensic Science Commission in its efforts to ensure that best practices for border death investigations are developed.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

763 University of North Texas Health Science Center at Fort Worth

UNTCHI will continue to provide timely and specialized forensic DNA and anthropology services to law enforcement, medical examiners, justices of the peace, and the courts throughout Texas. UNTCHI works closely with the Texas Rangers to provide services to rural Texas Counties which may not be aware of the resources that are available. Working with agencies in the defined border region, as well as all of Texas, to analyze and identify victims of migration, violent crime, and drug trafficking will continue to be a priority.

Agreements with foreign consulate offices in TX to provide family reference samples related to individuals missing near the border are underway. This increase in reference samples, which cannot be collected by traditional law enforcement, will require UNTCHI to increase processing, analyses, and evaluating identifications associated with these cases. These efforts are expected to identify more of the unknown human remains that have, or will be, recovered in the border region.

UNTCHI will continue to work with the Forensic Science Commission to develop best practices required to effectively investigate deaths along the Texas border, reunite families of the missing with their loved ones, and support TX law enforcement agencies and the judicial system.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Supplemental funding for the Missing Persons DNA Program and funding for the Laboratory of Forensic Anthropology has in the past been provided by soft money grants from the National Institute of Justice.

(5) Formula Funding:

N/A

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Supplemental funding for the Missing Persons DNA Program and funding for the Laboratory of Forensic Anthropology has in the past been provided by federal grants from the National Institute of Justice.

(9) Impact of Not Funding:

With ongoing reductions in Federal grant funding for missing persons investigations, no anticipation of restoration of such funds, and no federal grants targeted at border specific investigations, legislative funds are critical for the continuation of the work that UNTCHI provides to Texas law enforcement, medicolegal entities, the courts, and the citizens of Texas. Texas is the leader in the analysis and resolution of missing persons cases and unidentified remains and a pioneer in providing these services to investigative agencies who would otherwise not have the resources to access them. Without the State's ongoing funding, UNTCHI would not be able to support the initiatives described above, and Texas would be without this essential capability.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

763 University of North Texas Health Science Center at Fort Worth

We request that the non-formula funding support for this item be made permanent and increased. This work provides a public service to Texas criminal justice and medicolegal entities. The identification of missing persons, the analysis of unidentified human remains statewide, and assistance specific to remains recovered near the Texas-Mexico border are ongoing needs for the State of Texas and require permanent funding.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

UNTHSC evaluates the effectiveness of the Texas Missing Persons and Human Identification Program through its efforts in assisting the Department of Public Safety and the Department of Justice, as well as other agencies, through measures such as

- number of cases reviewed or processed
 - number of CODIS associations and identifications
 - number of Border Crossing Cases
 - number of testimonies supported
-

763 University of North Texas Health Science Center at Fort Worth

Special Item: 3 DNA Laboratory

| | |
|--|-----------|
| (1) Year Non-Formula Support Item First Funded: | 2000 |
| Year Non-Formula Support Item Established: | 2000 |
| Original Appropriation: | \$217,428 |

(2) Mission:

Application of DNA technology at the UNT Health Science Center's Center for Human Identification (UNTCHI) includes forensic DNA analyses and the identification of missing persons and unidentified human remains. The DNA Identity Laboratory was first funded by the State in 1989. Additional funding was appropriated in 2001 by the 77th Texas Legislature to establish the TX Missing Persons DNA Database, which is connected to the FBI's CODIS database. Subsequent legislative changes have defined the TX Missing Persons DNA Database in the TX Code of Criminal Procedure and established UNTCHI as a criminal justice agency, expanding the scope of forensic casework services.

Currently, the UNTCHI is a resource for state and local law enforcement, medical examiners, justices of the peace, and TX courts; providing forensic DNA casework, backlog reduction of sexual assault evidence, identification of missing persons and unidentified remains, and forensic anthropological analysis at no cost. UNTCHI is committed to training doctoral and professional master's students in forensic genetics, becoming the primary source of new DNA forensic scientists and analysts for crime laboratories within Texas. UNTCHI maintains an active, innovative research program to improve forensic identification capabilities.

(3) (a) Major Accomplishments to Date:

The UNTCHI DNA and forensic anthropology laboratories work in close collaboration with the Texas Department of Public Safety, the Texas Rangers, and the legal community.

UNTCHI is the single largest contributor of DNA profiles to the Federal CODIS missing and unidentified remains database. Since 2010, DNA profiles for 14,094 missing persons and 6036 unidentified remains cases have been uploaded to CODIS. 2097 identifications have been made, resolving 654 unidentified remains and 556 missing persons cases for TX agencies. In 2017, 254 human remains were identified, many of whom are likely murder victims.

The Forensic DNA Laboratory has analyzed 9464 cases since 2010, and 1475 in 2017 alone, supporting TX criminal investigations. While the majority are sexual assault cases, other case types are well-represented: forensic paternity, homicide, aggravated assault, robbery, and property crimes.

Analysts from UNTCHI provide expert testimony for TX criminal courts at no cost and provide guidance and testimony for both prosecution and defense. UNTCHI also supports the Texas Forensic Science Commission including proper interpretation of DNA mixture evidence and development of licensing procedures. Over 200 mixture cases from forensic labs in TX have been reviewed by UNTCHI.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

763 University of North Texas Health Science Center at Fort Worth

UNTCHI will continue to analyze DNA profiles and identify missing persons and human decedents found throughout the State of Texas. Many of these identifications represent victims of violent crime, and, in a number of these cases, the identification will lead to the apprehension and conviction of the perpetrator.

UNTCHI continues to receive Federal Backlog Reduction funds from the National Institute of Justice to provide forensic DNA backlog testing for law enforcement agencies, primarily in the North TX region. Funds from the Governor's Office will result in a backlog reduction of sexual assault kits. The CODIS entry and resulting matches contribute to the identification and convictions of perpetrators. Specialized forensic DNA analyses, not available through DPS laboratories, will continue to be provided. Additional State funding will allow these services to be provided more broadly.

Research and development of advanced methods of human identification by the Forensic Genetics Research Laboratory will ensure UNTCHI is a state-of-the-art facility and remains a recognized leader in forensic genetics. Support of the TX Forensic Science Commission will continue to address problems in DNA mixture interpretation, laboratory protocols, quality assurance, certification, and border deaths.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

The UNTCHI Forensic DNA Laboratory, Missing Persons DNA Laboratory, and the Forensic Anthropology Laboratory were not funded prior to receiving Special Item funding for FY 2002 & 2003.

(5) Formula Funding:

N/A

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The UNTCHI has been funded from appropriated General Revenue since FY's 2002 & 2003. The UNTCHI currently receives additional grant support from the National Institute of Justice, distributed by the TX Department of Safety, for the backlog reduction of forensic DNA casework. The Governor's Office provided additional funds for the testing of backlogged sexual assault kits in FY 2018.

(9) Impact of Not Funding:

763 University of North Texas Health Science Center at Fort Worth

Without legislative funding a substantial number of cases will not be analyzed. First, missing persons and unidentified remains would not be serviced as UNTCHI is the sole laboratory in the State with this expertise. In addition, the missing persons database would no longer be supported. The database provides a very powerful tool for investigators who are trying to locate missing persons or identify human remains by allowing federal, state, and local crime laboratories to electronically exchange and compare DNA profiles.

UNTCHI provides support to the DPS Crime Laboratory system regarding backlog reduction of sexual assault cases which would be hampered without sufficient funding. In addition, specialized DNA typing procedures, such as mitochondrial DNA, will not be available in the State for forensic casework analysis. Advanced technologies to support development of investigative leads would be compromised without UNTCHI's dedicated efforts.

UNTHSC's renowned faculty, DNA analysts, and forensic anthropologists would not be able to provide support to the Attorney General's Office and District Attorney's offices throughout the State. Without ongoing funding, UNTHSC's Center for Human Identification would not be able to support the initiatives described above.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

We request that the non-formula funding support be made permanent and increased. This work provides a public service to Texas criminal justice agencies, medicolegal entities, and Texas courts. Sexual assaults, other criminal acts, and identification of human decedents are ongoing and increasing problems, and the State needs additional support. Backlogs are increasing and no longer manageable without permanent support.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

UNTHSC evaluates the effectiveness of the DNA Laboratory by leveraging State funds through its efforts in assisting the Department of Public Safety and the Department of Justice, as well as other agencies, through measures such as

- number of cases reviewed or processed
 - number of CODIS associations and identifications
 - number of special requests of casework
 - number of testimonies supported
-

763 University of North Texas Health Science Center at Fort Worth

Special Item: 4 Institute for Patient Safety and Preventable Harm

| | |
|--|-------------|
| (1) Year Non-Formula Support Item First Funded: | 2016 |
| Year Non-Formula Support Item Established: | 2016 |
| Original Appropriation: | \$2,000,000 |

(2) Mission:

The Institute for Patient Safety and Preventable Harm at the University of North Texas Health Science Center (UNTHSC), also known as SaferCare Texas, is positioned to improve the practice of patient safety in Texas. More than 250,000 Americans die annually from preventable medical errors, making medical errors the third leading cause of death in the United States. The number of Americans experiencing serious, non-lethal, injury from preventable errors may be 10 to 20 times that number. Medical errors lead to an estimated \$50 billion in added U.S. health care costs, and up to \$1 trillion in lost human potential and contributions. These alarming statistics emphasize the urgent need for safer care, particularly in care delivery settings from home to and from the hospital, and transitions in between. Too little attention, casual habits, limited accountability, poor methods, and unmet expectations are factors when patients are harmed in health care.

SaferCare Texas provides leadership and guidance on free-from-harm and patient safety strategies. The Institute challenges traditional thinking, methodology, and habits. The Institute is positioned to convene, guide, and work across multiple professional boundaries, cultures, and experiences with a neutral perspective. Continued funding of the Institute will foster continued growth of collaborative, patient-centered, interprofessional initiatives across Texas that will directly impact health care delivery and patient outcomes.

(3) (a) Major Accomplishments to Date:

- Refined services to improve health care within the state, focusing on rural health, children/pediatrics, and ambulatory & home care
- Collaborated with Texas Hospital Association Foundation to provide patient safety expertise and coaching to 88 hospitals
- Expanded primary care health network via partnership between UNTHSC and Catalyst Health Network, a clinically-integrated network with 515 primary care providers, 140 office locations, 750,000 patients, and 70 care teams, to jointly train students in innovative, primary care clinical settings
- Sponsored 12 research projects involving over 10,000 participants and 30 scientific collaborators, such as the Asthma 211 program, which reduced asthma-related emergencies and absenteeism at school
- Influenced patient safety policy nationally by having a senior fellow within the Institute who was appointed for a 3-year term to the National Quality Forum Patient Safety Steering Committee
- Accelerated the utilization of innovative SaferCare strategies across the U.S. by analyzing standards of care in standardized clinical software programs for a pharmacy systems software & technology company (PDX, Inc.), with a network of pharmacies covering 90+ million lives and 20% of the nation's prescriptions
- Partnered with the Texas Interprofessional Education Practice Consortium representing 27 Texas institutions of higher learning to implement TeamSTEPPS (Team Strategies and Tools to Enhance Performance and Patient Safety)

(3) (b) Major Accomplishments Expected During the Next 2 Years:

763 University of North Texas Health Science Center at Fort Worth

1. Connect people and interest groups across Texas together around SaferCare. This includes enhancing the SaferCare Texas web and social media presence, as well as developing a searchable directory of patient safety expertise from across the state.
2. Conduct research and implement SaferCare solutions that will measurably improve SaferCare, particularly in the areas of rural health and ambulatory care, as well as medical conditions pertaining to the health and wellbeing of children and the elderly.
3. Develop and implement SaferCare education strategies to community members, health professionals, and students. In particular, SaferCare Texas will collaborate with the Texas IPE Consortium to further expand TeamSTEPPS education to more than 7,000 health care graduates by 2020.
4. Develop and implement SaferCare innovation, particularly in the ambulatory care delivery settings. This includes disseminating lessons learned from the UNT Health model to other ambulatory care delivery settings.
5. Communicate SaferCare innovation and research broadly across Texas. This includes launching a searchable platform for hosting best practices in patient safety and communicating awareness regarding health literacy.
6. Deploy and analyze strategies to transition SaferCare Texas from its reliance on state non-formula funding mechanisms.

(6) Category:

Healthcare Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

N/A

(9) Impact of Not Funding:

The loss of funding support from the state would be devastating to the ongoing and emerging programs of SaferCare Texas. Significant improvements in patient safety have been achieved by fully-leveraging our resources and establishing a ubiquitous and transparent culture of patient safety throughout Texas. The Institute has implemented novel programs and developed partnerships that will further impact safety and quality in Texas. Without state funding, the Institute will have no resources to test and implement new programs, processes, and technologies that will decrease the unacceptable high mortality and suffering caused by medical errors and poor quality of care and prepare the leaders of the future.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

763 University of North Texas Health Science Center at Fort Worth

To continue the positive momentum of the SaferCare transformation across Texas, the Institute requests its current level of non-formula support be continued over the duration of the next biennium. The next two years is a critical stage for statewide impact of the Institute's key initiatives. This "tipping point" is projected as the Institute emerges from its initial phase of environmental scanning and proof of concept evaluations to its current focus on full scale implementation of best practices in SaferCare across Texas. The potential impact on health and wellbeing of Texans is tremendous.

SaferCare will always remain a core directive at the University of North Texas Health Science Center and we are committed to championing SaferCare statewide. SaferCare Texas is a by-product of our core values at UNTHSC of serving others first and treating everyone with dignity and compassion.

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

UNTHSC has internal metrics to evaluate the impact of leveraging State funds to the Institute for Patient Safety and Preventable Harm (SaferCare) through measures such as

- providing expertise to individuals, businesses, and organizations
 - promoting partnerships with health-related entities
 - facilitating best practices in various settings
 - quantifying the number of students, health professionals, and community members trained
-

763 University of North Texas Health Science Center at Fort Worth

Special Item: 5 Alzheimer's Diagnostic & Treatment Center

| | |
|--|-----------|
| (1) Year Non-Formula Support Item First Funded: | 2002 |
| Year Non-Formula Support Item Established: | 2002 |
| Original Appropriation: | \$500,000 |

(2) Mission:

The mission of the Alzheimer's Diagnostic and Treatment Center is threefold: (1) to expand education of and clinical identification, treatment and care of persons with Alzheimer's and related memory disorders through the Department of Internal Medicine and Geriatrics, Center for Geriatrics - Geriatric Assessment and Planning Program (GAPP); (2) to facilitate basic science and translational research through the Institute for Healthy Aging – comprised of Center for Geriatrics, Center for Alzheimer's & Neurodegenerative Disease Research and Center for Neuroscience Discovery – into the origins and treatment of Alzheimer's; and (3) to establish productive links between Alzheimer's work in geriatrics clinical care, pharmaceutical clinical trials, translational science, basic science laboratories, and public health. UNT Health Science Center holds two NIH program project grant awards in aging, a HRSA Geriatric Workforce Enhancement Program and participates in several clinical trials in aging and Alzheimer's Disease.

According to the US Census Bureau, in 2010 there were 3.8 million people in Texas aged 60 and older, with total growth expected to over 9.7 million by 2040. The number of people with dementia will increase with the aging of the population. Geriatrics is a Center of Excellence at UNTHSC and works with the Institute for Healthy Aging. The institution is well-equipped to expand its work in Alzheimer's.

(3) (a) Major Accomplishments to Date:

- Transforming the clinical care environment for older adults in North TX to improve the care provided by future healthcare professionals
- Expanded Geropsychiatry and Geriatrics Neuropsychology's "Memory Disorders" Program
- Neurology services for older adults, providing brain health evaluation, memory loss, dementia and movement disorder consultations
- Expanded interprofessional clinical services, student education and clinical research
- Expanded patient and caregiver support and educational opportunities within the GAPP Clinic
- Awarded \$3.3M Health Resources and Administration (HRSA) grant for Geriatric Workforce Enhancement Program (GWEP) over 3 years with a 4th year extension, which supports the Workforce Enhancement Healthy Aging and Independent Living (WE HAIL) program
- Impacted over 2500 Interprofessional healthcare students each year through programs and course development focused on the older adult and Alzheimer's and related diagnoses
- Prepared and developed the existing healthcare workforce
- Local, state and national recognition for the impact to older adult care delivery, medical students and graduate medical education, and interprofessional education
- Developed a Translational Science Team for Alzheimer's Disease and Age Related Problems
- Integrated the Translational Aging and Alzheimer's Team, which established the HABLE (Healthy Aging Brain in Latino Elders) program
- Expanded Healthy Brain Aging in Mexican Americans

(3) (b) Major Accomplishments Expected During the Next 2 Years:

763 University of North Texas Health Science Center at Fort Worth

- Continue educational program development and enhancement for interprofessional students, care delivery to patients and caregivers, patient safety of older adults in various care settings (outpatient, long term care & home) and other emerging and aligned topics, such as the geriatric opioid crisis
- Address and meet the needs of older adults and their caregivers in nearby rural counties at individual, community, and population levels
- Create & deliver quality educational training and utilize Home and Community Based Services (HCBS) programs to meet the demands of the increasing aging populations
- The translational research team will increase the enrollment of older adults in research studies that may include pharmaceutical clinical trials and collaborate with the basic and public health scientists
- Focus on early detection of Alzheimer's, estrogen's role in Alzheimer's and Parkinson's, stroke therapy and identification of oxidation processes to measure brain aging
- Bench to bedside research will be increased
- Results from clinical trials for several drugs for the treatment of Alzheimer's disease, Parkinson's disease and stroke are expected
- Partnerships with private-sector biotechnology and pharmaceutical companies in the development of treatments for neurological disorders will continue, along with participation in pharmaceutical clinical trials with faculty from the new UNT System College of Pharmacy

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

The Alzheimer's Diagnostic and Treatment Center was not funded prior to receiving special item funding for FY2002 & 2003.

(5) Formula Funding:

N/A

(6) Category:

Healthcare Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The Alzheimer's Diagnostic and Treatment Center has been funded from appropriated General Revenue since FY 2002 & 2003.

(9) Impact of Not Funding:

Not funding this program will reduce the Center for Geriatrics ability to reach and impact the education and training of future health care professionals (multiple disciplines) in the care and treatment of the older adult, thus reducing the ability for Texas to provide age-appropriate care to this rapidly growing population. The Institute for Aging and Alzheimer's Disease Research (IAADR) has focused on early detection of Alzheimer's, as well as estrogen's role in Alzheimer's and Parkinson's; stroke therapy; and identification of oxidation processes to measure brain aging. Furthermore, the IAADR is leading the development of preclinical trials in Aging and Alzheimer's Disease. However, without ongoing funding, the UNT Health Science Center would not be able to support these initiatives.

763 University of North Texas Health Science Center at Fort Worth

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

The US Census report in 2010 predicts the group of Texan over 60 years old is expected to grow to 12 million by 2050. Continued support will be necessary to conduct clinical research and sustain development of healthcare professional to care, management and treat this growing segment of the population. The number of Texas aged 85 years and older also continues to increase.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

UNTHSC evaluates the effectiveness of the Alzheimer's Diagnostic & Treatment Center through efforts to improve the healthcare of older adults by measures such as

- quantifying the number of interprofessional students, healthcare providers, and community members trained
 - expanding research
 - expanding educational program development
 - promoting partnerships with health-related entities for older adults
-

763 University of North Texas Health Science Center at Fort Worth

Special Item: 6 Institutional Enhancement(Academic & Student Support)

| | |
|--|-------------|
| (1) Year Non-Formula Support Item First Funded: | 2000 |
| Year Non-Formula Support Item Established: | 2000 |
| Original Appropriation: | \$1,000,000 |

(2) Mission:

Institutional Enhancement funds are used for salary support throughout the UNT Health Science Center to help support the growth in medical education , research, and public health.

(3) (a) Major Accomplishments to Date:

Core institutional functions have been preserved with these funds.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Continue to help preserve core institutional functions.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Institutional Enhancement was not funded prior to receiving special item funding in FY 2002.

(5) Formula Funding:

N/A

(6) Category:

Institutional Enhancement

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

N/A

(9) Impact of Not Funding:

Since General Revenue plays a significant role in financing the core operations of our institution, it is important that it be maintained and not reduced. The consequences of not funding Institutional Enhancement would result in the loss of key faculty positions in our medical school, graduate school of biomedical sciences, school of public health, school of health professions, and pharmacy school.

763 University of North Texas Health Science Center at Fort Worth

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Funding is needed on a permanent basis in order to maintain the high quality of educational programs.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

UNTHSC evaluates the effectiveness of funding provided through the Institutional Enhancement strategy (academic and student support) by the ability to maintain the high quality of educational programs such as

- Percent of D.O. students passing Part 1 or Part 2 of the COMLEX on the first attempt
 - Percent of PA/PT graduates passing the certification/licensure exam on the first attempt
 - Percent of Pharmacy School graduates passing national licensing exam first try
-

763 University of North Texas Health Science Center at Fort Worth

Special Item: 7 TRB Debt Service: Academic Building

| | |
|--|---------------|
| (1) Year Non-Formula Support Item First Funded: | 2020 |
| Year Non-Formula Support Item Established: | 2020 |
| Original Appropriation: | \$115,500,000 |

(2) Mission:

This project consists of the construction of a new building of approximately 180,000 gross square feet for the UNTHSC campus. This new facility will be student-centric and support the current and future academic needs of the campus. Academic space is currently in a deficit and this new facility will provide much needed academic and support space while contending with projected enrollment growth. It will also provide the space necessary to relocate academic programs and administrative support areas currently housed in other buildings, thus allowing more efficient and effective utilization of existing space and infrastructure.

(3) (a) Major Accomplishments to Date:

N/A

(3) (b) Major Accomplishments Expected During the Next 2 Years:

See Mission Statement

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

N/A

(5) Formula Funding:

N/A

(6) Category:

Instructional Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

N/A

(9) Impact of Not Funding:

763 University of North Texas Health Science Center at Fort Worth

As UNTHSC's campus continues to evolve and grow, the need for optimization and alignment of new and existing facilities has become necessary in order to maximize the overall efficiency of the institution's space. Thus, the failure to fund this project would prevent the opportunity to optimally utilize the space currently available, as well as improve the academic experience.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Yes. Continued support will be needed to fund the debt service for the building.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

The success of this project will be evaluated by the ability to maintain the high quality of educational programs.
