ADMINISTRATOR'S STATEMENT

10/15/2012 8:37:18AM

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

711 Texas A&M University

Two years ago, Texas A&M University presented an appropriations request built on the university's unique land-grant mission and supported by its culture of effectiveness and efficiency in achieving its goals. Texas A&M also met state goals by serving as an efficient steward of state resources, all while proactively addressing economic realities.

Today, Texas A&M is even more efficient and effective, despite the reductions the legislature had to make during the previous session. Moreover, it has maintained its contribution to the economic strength and social vitality of Texas. While the current request reflects the university's strong commitment to Texas, significant challenges loom. Texas A&M's ability to help maintain the state's robust economic and social climate will continue in proportion to any additional investment the state is able to make in the university.

Texas A&M is increasingly efficient and effective in its mission of preparing the next generation of leaders and generating research discoveries. Texas A&M was the sixth-largest university in the nation in fall 2011 with an enrollment of 49,861 (including the largest undergraduate population in the state). Between 2001 and 2011, enrollment increased 11.8 percent and the number of degrees awarded increased 21.6 percent. Texas A&M is helping address the state goal of Closing the Gaps. Despite this growth, tuition remains at 2010 levels, well below that of the university's national research institution peers. When considering tuition and required fees for 15 semester credit hours, Texas's A&M costs are less than four other Texas public universities.

More than one in four members of each fall's freshman class of over 8,000 is the first in their family to go to college. The average SAT scores of freshmen are significantly above the national average at 1206, and once on campus, freshmen are more likely than their counterparts at other public Texas institutions to stay in school and graduate within six years (84 percent). More than 80 percent of students receive federal and/or state financial aid, totaling \$522 million yearly. Texas A&M graduates have a very low federal loan cohort default rate, 3.4 percent—well below the statewide average of 10.1 percent.

While much progress remains in the broad area of diversity, dramatic gains have been made and significant efforts are underway to address this situation. The University Diversity Plan, adopted in 2010 for implementation by all academic and non-academic units on campus, holds units accountable for benchmarking their efforts with national peers and for focusing on diversity in all its many dimensions. Aggressive and strategic student recruiting efforts are paying off; for example, 28 percent of the fall 2012 freshman class in the College of Geosciences identify as African American or Hispanic. This is but one example of the university's efforts to increase diversity across campus.

Furthermore, the Texas A&M collegiate experience emphasizes development of leadership and personal responsibility skills. Texas A&M has nearly 900 student-run clubs and organizations, including one in which more than 16,000 student volunteers conduct the largest one-day community service project of its kind in the country. Washington Monthly consistently ranks Texas A&M among the top universities in service to the nation.

In addition, Texas A&M's rich military history and designation as a "Military Friendly" institution attract many students who plan to serve in the military or who continue their education following military service. Texas A&M is one of only eight universities nationwide to partner with the Pat Tillman Foundation to offer Tillman Military Scholarships to qualified students.

One of the chief characteristics of most Texas A&M students—one reinforced throughout their education, regardless of major—is their strong work ethic. This is reflected in the 11 percent increase in the number of on-campus interviews by employers since 2010, and in the fact that in 2011, 2,900 companies posted more than 7,600 jobs at Texas A&M, representing more than 34,000 unique positions. New Texas A&M graduates were ranked second nationally in a 2010 Wall Street Journal survey of employers for being best prepared and most able to succeed in the workforce.

ADMINISTRATOR'S STATEMENT

10/15/2012 8:37:18AM

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

711 Texas A&M University

Texas A&M is increasingly efficient and effective in its stewardship of the financial and other resources provided by the state, and students and their families. For example, the university proactively adjusted to financial realities in the following ways: the strategic reallocation of \$7.25 million to support high-impact learning under the "Aggies Commit to Learning for a Lifetime" initiative (a broad program involving numerous campus activities centered on the university's core values and student learning outcomes specified in the Academic Master Plan, to ensure that students, faculty and staff make and keep commitments regarding their growth as educated citizens who fulfill both professional and societal needs with excellence and integrity); eliminating 40 low-producing degree programs; establishing a voluntary retirement program for 113 qualified faculty that saved \$13.9 million in 2011; and increasing semester credit hour production per full-time-equivalent faculty member by 11.3 percent from 2009-10 to 2011-12.

On the administrative side, at 4 percent, Texas A&M has the lowest administrative cost ratio in the state and one of the lowest among national peers. Also, the university's workers' compensation assessment rates have decreased from \$.50 per \$100 salary in 2004 to \$.10 per \$100 salary in 2012.

In addition, in 2011, Texas A&M ranked in the top five Texas colleges and universities in terms of space use efficiency, including during weekday evening hours, with about 7,000 students in class at 5 p.m. and 4,000 between 6 p.m. and 8 p.m. While campus gross square footage has grown from 18.5 million in FY02 to 22.5 million in FY12, energy consumption has been reduced by 40 percent per gross square foot (between FY02 and FY12), resulting in \$140 million in energy cost avoidance. A new combined heat and power generation system saved the university more than \$250,000 in utilities costs during its first week of operation in August 2011, and continues to save thousands of dollars per day, placing Texas A&M among the top tier of universities nationwide in terms of energy efficiency. Annual water consumption also has been reduced 20 percent (from 2.1 billion to 1.67 billion gallons) since 2002, especially important during the recent drought.

Texas A&M has an increasingly significant impact on the state's economic and social vitality. Texas A&M had an estimated total economic impact in the local Bryan-College Station area of more than \$3.7 billion in 2011 (an increase of \$1.7 billion, or more than 85 percent, from 2001), and the university undoubtedly contributed to College Station's number-one ranking in Texas (and sixth-place ranking nationally) in the July 2012 Forbes list of "Best Small Places for Business and Careers." (No other Texas city ranks in the top 30.) The addition of the National Center for Innovation in Advanced Development and Manufacturing, a \$285.6 million public-private partnership to enhance the nation's biosecurity preparedness awarded by the federal Biomedical Advanced Research and Development Authority (BARDA), in June 2012, will dramatically increase the Texas A&M System's positive impact in the region and across the state and nation.

Texas A&M is among the top twenty universities in research expenditures with over \$705 million in FY11 as reported to the National Science Foundation. Many of the university's academic departments are among the top ten in their respective categories.

Texas A&M not only produces a large number of graduates, more than 380,000 to date, most of whom reside and work in Texas, but according to PayScale, Inc., these graduates hold jobs that pay significantly more at mid-career than those held by graduates of other public universities in Texas. In addition, Texas A&M produces graduates who fill many of the highest-need positions in the state. For example, Texas A&M produces more bachelor's-level engineers than any university in Texas, and more teachers in the areas of STEM, ESL and special education. As one would expect, most of the veterinarians in Texas are Texas A&M graduates, but perhaps less well known is that more than 1 in 10 veterinarians nationwide are graduates of Texas A&M.

Texas A&M is beginning to show more positive results from its campus-wide commitment to greater diversity and now ranks tenth nationally in doctoral degrees and 20th in all degrees awarded to Hispanics. In addition, Texas A&M ranks 14th in measures taken to help African American and Hispanic students pursue and succeed in STEM disciplines. One new program to attract the best and brightest historically underserved students is the university's partnership with the Posse Foundation, which helps prepare outstanding urban high school students for success at top universities. Texas A&M and the University of Texas at Austin are the first Texas universities to

ADMINISTRATOR'S STATEMENT

10/15/2012 8:37:18AM

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

711 Texas A&M University

participate in this effort, with the first cohort of Posse Scholars coming to College Station in fall 2013.

The university has increased its outreach across the state significantly since 2010. To cite just two examples, the Mays Business School, (ranked first in the nation and fourth in the world by Financial Times for best value for money, and 22nd among public business schools by U.S. News & World Report), launched a professional MBA program in the Houston area in fall 2012. Texas A&M has also expanded its partnerships with community colleges beyond the co-enrollment program with Blinn College, widely recognized as the state's model for such partnerships.

Utilizing a methodology developed by the American Council on Education, every state tax dollar invested in Texas A&M returns \$18 to the Texas economy. Texas A&M remains committed to helping ensure that the State of Texas remains vibrant, strong and prosperous.

Today, Texas A&M is more efficient. Texas A&M is more effective. Texas A&M enhances the vitality of Texas.

Request:

Base Funding. During a challenging economic period, Texas A&M has exercised spending discipline across all functional areas in order to direct those funds to preserve and improve teaching, support student academic and career success, pursue external funding and conduct priority research. What is clear is that other than tuition and fees, which have been held to minimal increases, the primary source of support for the most important functions, teaching and supporting student success, is state formula dollars. External funds, whether competitive research or philanthropic, are simply not found for this most fundamental of all purposes.

Formula dollars are the foundation funds for students' instruction and academic support. Over the past three biennia, formula funds constituted 72-75 percent of appropriated general revenue at Texas A&M. Last session, the legislature had to reduce the formula rate per weighted semester credit hour from \$62.16 per weighted SCH to \$53.71 per weighted SCH, a 13 percent reduction. The university essentially had only two choices to make ends meet: raise tuition and fees or reduce expenditures; Texas A&M did the latter. However, the university cannot continue to do so and remain nationally competitive, hold and attract top faculty, and offer high-impact learning experiences for Texas A&M students if base funding is not enhanced.

Competitive Knowledge Fund. The Competitive Knowledge Fund is a key performance-based formula initiative that helps Texas A&M hire and retain high-achieving faculty for teaching and research. The fund helps provide excellent support and facilities for Texas A&M faculty. Last session, the legislature was able to fund the formula so that eligible institutions received \$700,000 per \$10 million in total research expenditures—a reduction from \$1 million for every \$10 million in total research expenditures. Texas A&M requests that the Competitive Knowledge Fund formula be funded at a level to provide \$1 million for every \$10 million in total research expenditures for each qualified institution. This performance-based incentive will allow research universities like Texas A&M and UT Austin to compete nationally in recruiting and retaining the highest-performing faculty for our students. It will also enhance the learning environment for students.

Cost shifting. At Texas A&M, students pay approximately \$9-\$10 per SCH in additional tuition and fees to compensate for the educational costs of other students who qualify for important and worthwhile state-mandated, but unfunded, tuition and fee exemptions from the state. That is an additional \$1,080-\$1,200 in tuition and fees paid by some students to pay for other student costs. The concern is that, unlike discretionary exemptions, these mandates are ongoing costs of which the university cannot control or manage except by charging other students more. The largest two programs are the Hazlewood exemption and The Texas Tomorrow Fund program.

Granting tuition waivers via the Hazlewood Act for veterans and their dependents is a noble act rewarding those who serve our country and the families that support that effort. With hundreds of commissioned officers and seven Congressional Medal of Honor recipients, no university in the nation outside of the service academies has

ADMINISTRATOR'S STATEMENT

10/15/2012 8:37:18AM

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

711 Texas A&M University

contributed more to military service than Texas A&M. Texas A&M is very veteran and dependent friendly, hence the large number of active duty personnel, veterans and dependents on campus. However, the growth in this program has exploded in the past several years. In 2007 the program included 148 students at a cost of \$678,746. In the spring of 2012, the number rose to 1,148 students and \$7,748,074; a 1,042 percent increase. The projections are to reach \$14.7 million in FY13 and over \$20 million the following fiscal year. It is essential in respect to this issue to emphatically state that the issue is NOT the worthiness of the students who qualify for these exemptions; Texas A&M wholeheartedly supports the exemptions and the students who qualify for them. Rather, the issue is: who pays?

The Texas Tomorrow Fund costs increased 22 percent from 2007 to spring 2012. Currently, over \$4 million in costs are borne with an estimated increase expected to top \$5 million in FY14. Collectively between Hazlewood and the Texas Tomorrow Fund, costs are expected to rise from a projected \$15 million in FY12 to \$25.6 million in FY14. The rate of growth in each program has outpaced projections and the concern is not just in total costs but in the unknown increases as more students become eligible for the benefits of each program.

Texas A&M respectfully requests that in partnership with the State of Texas, funds be appropriated to pay the usual and reasonable costs that are exempted from collection.

Special Items:

Thanks to the Special Items that the legislature has approved and funded for Texas A&M, the university is able to make positive contributions to the state through new research discoveries, community service and other means that enhance overall well-being. The following current and new special items, if funded, will allow Texas A&M to continue to add value. The below items are listed in the order they appear in the appropriations bill pattern.

The Cyclotron Institute (\$98,880 exceptional item request) has served as the core support of the university's nuclear physics and nuclear chemistry programs, educating thousands of students in accelerator-based science. As one of only four university-based particle accelerators funded by the Department of Energy (DOE), it is unmatched in its capabilities for nuclear research. State funding is leveraged nearly 10 to 1 in federal support funding for the program in nuclear science. The facilities at the Institute have been undergoing an upgrade that will provide new capabilities for particle beams and the possibility of more time for training students in nuclear science. Nearly 30 staff members and countless teams of graduate students alternate around-the-clock shifts to oversee the facility and meet the needs of the campus research community as well as those of the roughly 50 major companies and agencies—from Boeing and Lockheed-Martin to NASA and the Naval Surface Warfare Center—that rent experimentation time on the equipment for their own research projects. All of this is possible because of the special item support.

The Sea Grant Program (\$200,000 exceptional item request) at Texas A&M was one of the first Sea Grant Institutions established through the federal Sea Grant Act. This joint National Oceanic and Atmospheric Administration (NOAA)-State of Texas partnership seeks to improve the understanding, wise use and stewardship of the state's coastal and marine resources. Texas Sea Grant yields a 6:1 return on investment for every state dollar invested in Texas Sea Grant, it returns more than \$6 to the Texas economy. With numerous and significant accomplishments throughout its history, Sea Grant plans to award \$2 million in competitive grants to Texas state universities to fund research that solves real-world problems and to support educational programs and curriculum development in STEM fields for K-16 students. It will also continue outreach to the commercial fishing industry and shrimp/fish farming industry to help them increase their profitability and sustainability.

The Energy Resources Program (ERP) (\$149,390 exceptional item request) supports Texas A&M's goal of promoting the State of Texas as a world leader in all areas of energy research. Its mission is to nurture a creative and productive collaborative environment to advance sustainable energy technologies and systems. The ERP is helping to fund the Texas A&M Energy Institute (EI) which provides a programmatic umbrella for faculty, staff, students, and other associates from Texas A&M University System members, government entities, energy companies, energy-related industries, non-profit organizations, and other partners across the United States and

ADMINISTRATOR'S STATEMENT

10/15/2012 8:37:18AM

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

711 Texas A&M University

globally.

Texas A&M is not requesting any funding for the Public Policy Resource Center.

The Real Estate Research Center (method of finance Other Funds) is the nation's largest publicly funded organization devoted to real estate research. Most of the \$2 million in annual funding comes from real estate license fees paid by more than 140,000 professionals. A nine-member advisory committee appointed by the governor provides research guidance and approves the budget.

The College of Architecture's Colonias Program (\$160,000 exceptional item request) has made a difference in the colonias through the 64 Community Resource Centers that are located throughout the designated colonias areas. Recently, the geographic definition of colonias was expanded. The additional funds requested will address these areas. Aiming to reduce isolation, increase self-sufficiency and enhance the quality of life in these communities, the Colonias Program has also partnered with more than 400 agencies to provide educational services, GED instruction, economic and community development assistance, and programs addressing literacy, job training, dropout prevention, job referral, and health education. The centers connect the colonia residents with available services with more than 80 promotoras, the outreach arm of the Colonias Program. These neighborhood advocates undergo a six-month training program certified by the Texas Department of State Health Services that sharpens their skills in interpersonal communications, capacity building, service coordination, advocacy, organization and teaching. Because they are also colonia residents, they have a unique ability to quickly gain the trust of their client neighbors and connect them with services aimed at elevating their condition.

The Office of the State Climatologist (\$284,000 exceptional item request) is a new special item request and would fund the regular and proposed expanded operations of Office of the State Climatologist (OSC). The OSC, designated by the governor, serves Texas and its economy by:

- Serving as the "go-to person" statewide for climate data and information needed by state and federal agencies, companies, the news media and ordinary citizens;
- Maximizing the value of accurate climate information in the policy-making process;
- Generating and providing accurate sub-county-scale drought severity information to the U.S. Drought Monitor, which is in turn used by the USDA to determine eligibility for billions of dollars of drought relief;
- Providing timely information on drought status and outlooks to state agencies through the Texas Drought Preparedness Council;
- Preparing and delivering educational seminars to trade groups, industry conventions, state agencies, local and regional government entities, and other groups throughout the state on drought status, outlooks, and longer-range forecasts (presently at the rate of ten presentations per month and constrained by time availability).

The requested funds would partially support a full-time State Climatologist; a full-time Research and Outreach Coordinator; partially support a Research Associate and two Undergraduate Assistants; and provide support for travel, outreach, publications and equipment.

Another new request is One Health Plus (\$15 million exceptional item request). "One Health" recognizes the inextricable link among human health, animal health, and ecosystem health—while the "Plus" underscores the importance of safe food and water supplies within any One Health initiative. Few institutions in the nation have the capabilities of Texas A&M to create synergistic benefits across many human, animal, plant and ecosystem academic disciplines devoted to solving problems and opening discoveries that transcend all these content areas.

In the past 25 years, 38 new pathogens have emerged, 75 percent of which originated as animal diseases. During that time we have experienced entirely new zoonotic diseases and new variants of old species or jumping diseases such as the global H1N1 influenza pandemic (swine). Today, with 75 percent of emerging pathogens being zoonotic, disease transmission can outpace our capabilities to detect it, placing almost the entire globe one airplane flight away from vulnerability to new pandemic

ADMINISTRATOR'S STATEMENT

10/15/2012 8:37:18AM

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

711 Texas A&M University

threats. In addition, people, animals, the environment and the food supply are vulnerable to bioterrorism agents, 85 percent of which are zoonotic. Recent studies have demonstrated that zoonotic diseases travel between animals and people, not just from animals to people, and from the environment to both.

Opportunities for leveraged research support for this area are vast. The National Institutes of Health funded 44,000 research grants for a total of \$21.3 billion in FY11. These grants supported biomedical and behavioral research, including many areas that the interdisciplinary teams at Texas A&M have the demonstrated expertise to address. These include, for example, remote medicine and medical technology, infectious and neurological disease, vaccine development and drug delivery and genomics. Since 2001, the federal agencies including the Departments of Agriculture, Commerce, Defense, Health and Human Services, Homeland Security, and State, and the National Science Foundation, have used considerable resources to prepare the nation against a bioterrorist attack. In FY2011, \$562 million was spent on programs that specifically focused on biodefense.

This initiative seeks to increase capacity by building upon existing initiatives or units across Texas A&M that already are aligned with One Health Plus. Specific examples of the allocation of funds include, but are not limited to: (a) investing in equipment or facilities that increase Texas A&M's ability to leverage existing and attract new resources; (b) increasing startup funding for strategic hires; (c) launching new initiatives with internal planning or seed grants; (d) providing matching funds for proposals to external funding sources; and (e) supplementing existing funded programs or projects.

Capital Needs: Biosafety Level 3 (BSL-3) facility (\$80 million facility cost; \$6,974,765 exceptional item debt service request)

One of the highest levels of containment for biomedical research is a Biosafety Level 3 (BSL-3) facility. Many infectious diseases in plants, animals and humans can only be studied under this rigorous biological containment and safety levels. A biocontainment facility of approximately 100,000 gross square feet would provide containment for research in basic microbiology studies, expanding current capacity on campus and replacing outdated biocontainment space. Research space would also be built to BL3-Ag standards, allowing studies on large animals such as cattle. This level of biosafety allows research into agents that may be indigenous or exotic with the potential for aerosol transmission with serious or even lethal consequences.

As a public health concern, there are hundreds of infectious diseases that cause illness and death in both people and animals. There are currently no BSL-3/BL3-Ag facilities in Texas that can be used to study the infectious agents in large animals and this proposed facility would be one of only four in the nation. The opportunities to the State of Texas and nation are innumerable, while the devastation of continued lack of protection by inadequate facilities is unimaginable.

Together for Texans Partnership with the University of Texas at Austin

As the state's only public tier one research universities, Texas A&M joins with UT Austin in requesting enhanced support for their respective teaching and research missions. A robust Texas A&M and UT Austin signify a robust Texas—in terms of the economy, discovery and society overall. In no other place in the world will one find the robust quality of research, expertise and alumni in these complex disciplines than at UT Austin and Texas A&M.

Recently, UT Austin and Texas A&M were two of 13 entities (and two of just three universities) awarded a DOE Advanced Research Projects Agency grant to develop new ways of harnessing America's abundant natural gas supplies and expanding the use of natural gas as a vehicle fuel. With separate funding of \$4.3 million and \$3 million, respectively, both universities will develop technologies that will make natural gas technologically and economically feasible as a fuel for cars and trucks.

This is just one of hundreds of research and academic disciplines in which the state's two flagship institutions have made significant contributions. With additional state support, Texas A&M and UT Austin pledge to further enrich the state by graduating students who are proficient in tackling real-world problems, engaging faculty who blaze new trails in research, and improving the lives of people in Texas and beyond.

ADMINISTRATOR'S STATEMENT

10/15/2012 8:37:18AM

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

711 Texas A&M University

Texas A&M and UT Austin jointly request support for key programs such as the Texas Competitive Knowledge Fund and capital projects that enhance our shared ability to prepare young people to enter the Texas workforce, to create jobs and spur economic growth in the state. We make new research discoveries and enrich the overall well-being of Texans. Whether it is tackling global competitiveness and economic pressures for job growth or the benefits that come from a society enriched through the arts and humanities, UT Austin and Texas A&M are poised to lead Texas.

Texas A&M University System-wide Funding Issues and Needs:

Base Funding – Our highest priority is funding the basic, on-going operations of our institutions and agencies. Given current economic conditions, we request that the Legislature maintain our institutions' and agencies' base funding and put any new funds into the formulas to fund the costs of providing education and support for the additional students enrolled since the last base period, and to fund the facilities costs of our institutions and agencies.

Incentive Funding – We support increased accountability and performance incentives through outcomes-based funding; however, base funding, including enrollment growth through the current formulas, should be funded first.

Higher Education Group Health Insurance – We request funding to cover any increases in employees and retirees enrolled in our group health insurance program and increases in health care costs. Additionally, we request funding to restore some increment of the differential funding level for our employees as compared to the state employees in the ERS group insurance plan.

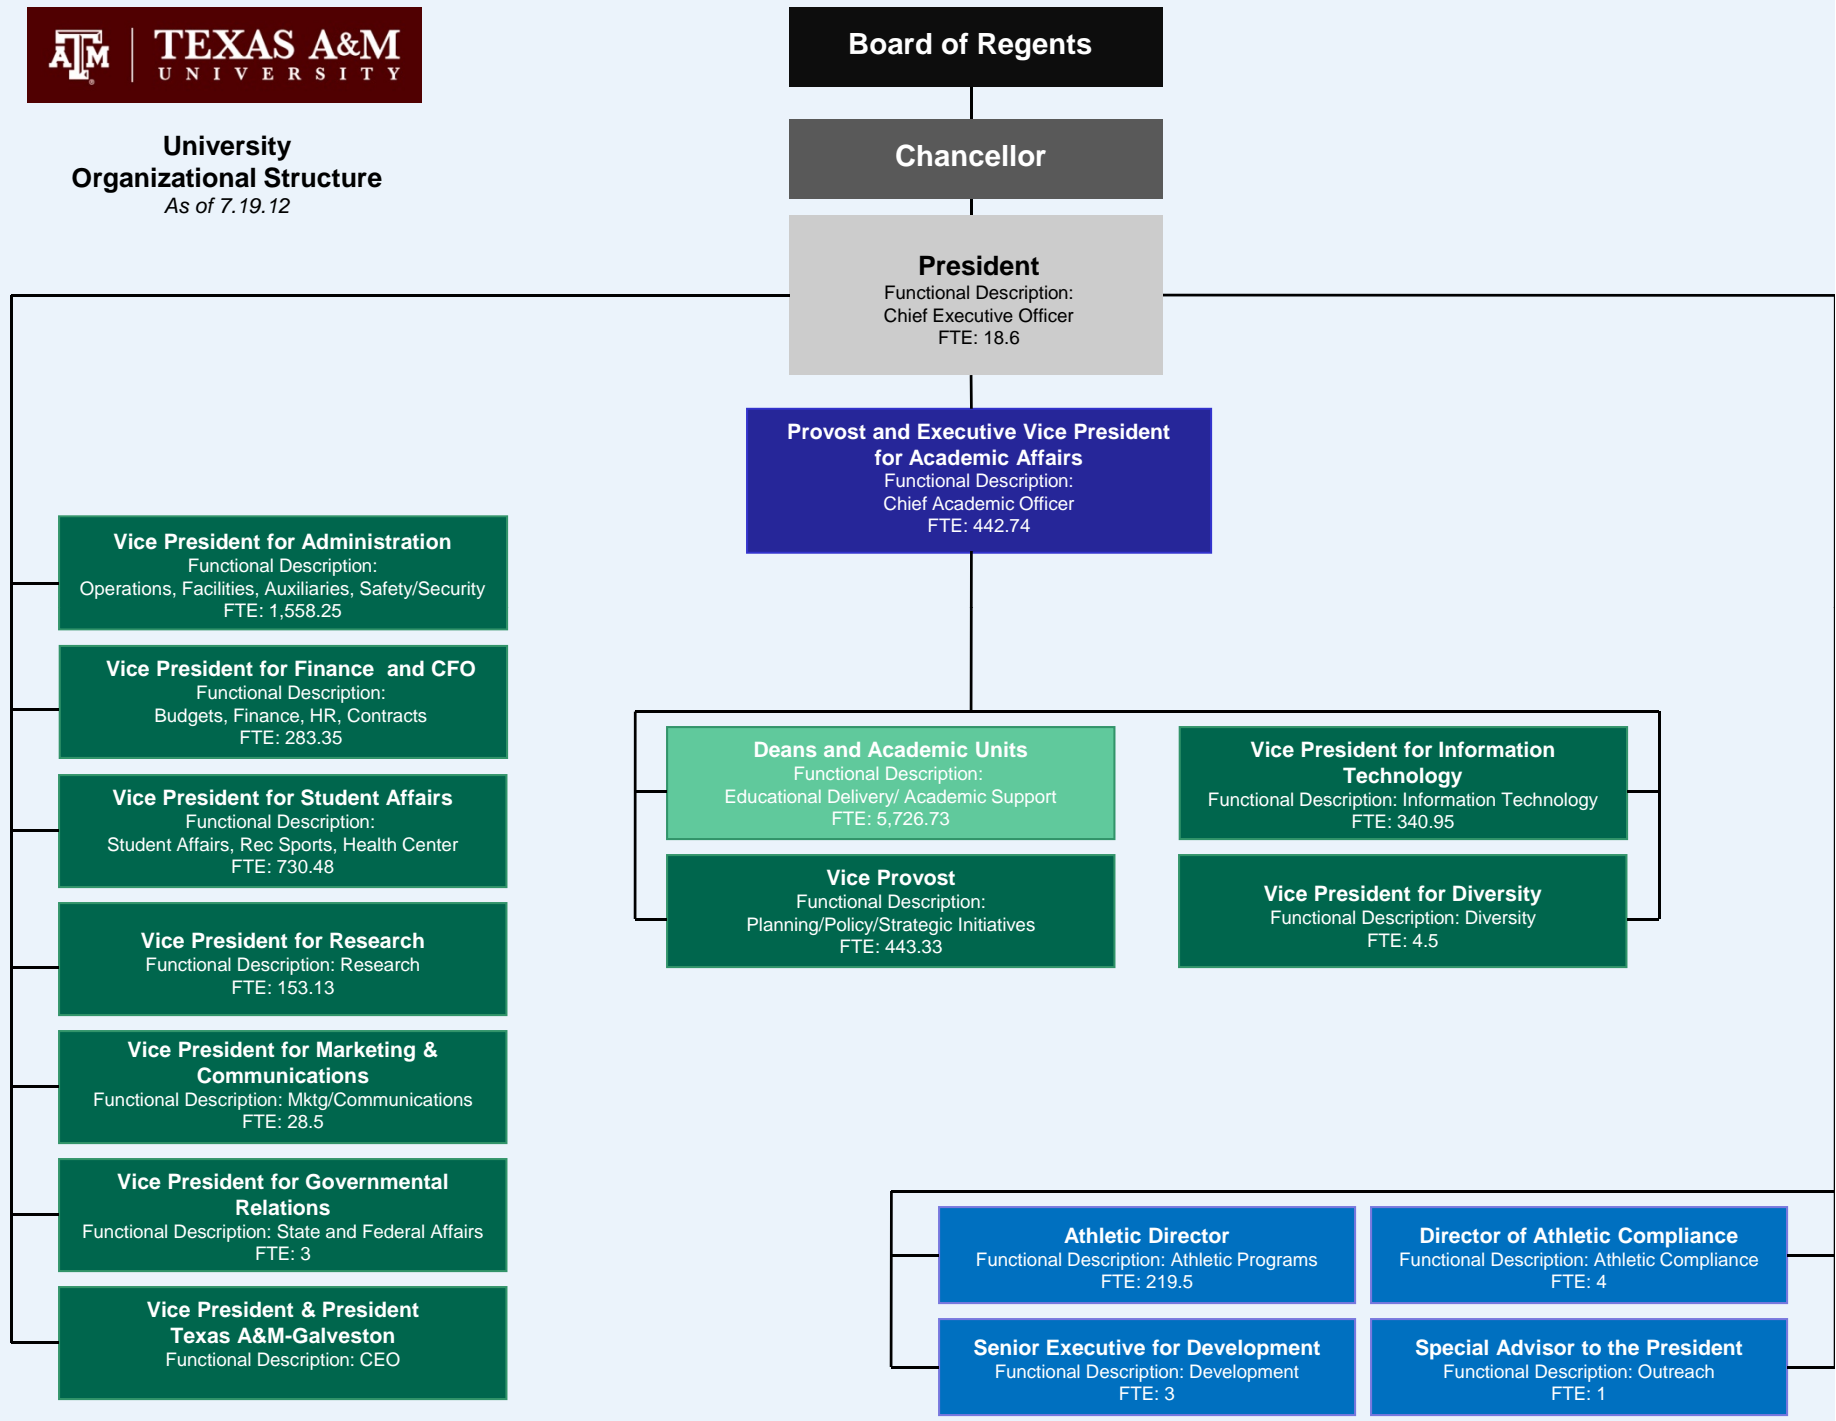

Student Financial Aid – Increased support for student financial aid is vitally important for our students and families. However, since it is a method of paying for tuition and fees and does not increase much-needed funding for the universities, we request any increase in financial aid not be made at the expense of formula funding.

Background Checks – Texas A&M's statutory authority to conduct background checks on employees of the university comes from Texas Government Code Chapter 411 Subchapter (f) and Texas Education Code Section 51.215. It is Texas A&M's policy and practice to conduct such checks on all employees being considered for positions at Texas A&M University.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium. The Teaching Experience Supplement formula provides an additional weight of 10 percent to lower and upper division semester credit hours taught by tenured and tenure-track faculty.

(1) - Formula funded strategies are not requested in 2014-15 because amounts are not determined by institutions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model. The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of Texas Sea Grant is to improve the understanding, wise use and stewardship of the state’s coastal and marine resources. To achieve this, it directs education programs, applied research and outreach to benefit the citizens, businesses and communities of Texas – from providing grants and scholarships that benefit students and workforce development, funding Texas’ innovative researchers to solve real-world problems, to deploying extension staff to help small businesses be more competitive and coastal communities to grow sustainably and build resilience to impacts from storms and other hazards.

This unique partnership unites the resources of the federal government, the State of Texas, industry and universities across the state to create knowledge, innovative tools, products and services that benefit the Texas economy, environment and citizens. Texas Sea Grant yields a 6:1 return on investment – for every state dollar invested, it returns more than \$6 to the Texas economy.

The program is part of a national network of Sea Grant programs in coastal and Great Lakes states. The network is funded by the National Oceanic and Atmospheric Administration (NOAA) in partnership with the states to help connect the research conducted at Sea Grant Institutions with the public. Sea Grant is NOAA’s primary university-based program, dedicated to helping citizens utilize scientific information to support a vibrant economy while ensuring ecological sustainability.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Clean, affordable, and sustainable energy is critical to the State of Texas, not only to Texas consumers, but also as a major economic engine that affects the global competitiveness of the United States. For many decades, Texas has been a leader in providing solutions to the energy challenges facing the nation and the world. The Energy Resources Program (ERP) at Texas A&M University was created to provide the State of Texas with a concentration of expertise in research, teaching, and public service directed at continuously developing solutions to Texas' and the nation's changing energy and environmental challenges. Texas A&M's ERP maintains programs and provides overarching coordination among multiple colleges, departments, and disciplines that address both immediate and long-term needs in an area of major importance to our state and national economy. This ERP accelerates advanced and emerging technologies in both renewable and traditional sources of energy by cultivating innovative strategies to maintain the state's leadership in wind power, in natural gas production and distribution, and in addressing critical issues associated with water use and energy production.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Real Estate Research Center was created in 1971 by Senate Bill 338, 62nd Legislature and is the Nation's largest publicly funded real estate research organization. The center is funded primarily through fees collected from Texas real estate licensees (Brokers, \$20/year), (Salespersons, \$17.50/year) through which are collected by Texas Real Estate Commission and disbursed to the Real Estate Center. Additional funds are generated through seminars and sales of publications. A nine-person advisory committee appointed by the Governor oversees the center.

As defined by statute, the Center's objectives include:

- Conducting studies in areas related to real estate, publishing and disseminating the findings and results
- Preparing information of consumer interest describing Center functions and making the information available to the public and appropriate state agencies
- Assisting the real estate teaching programs offered by Texas colleges and universities
- Developing, revising and updating materials for real estate extension courses offered by Texas universities and colleges
- Managing the Center's web site with over 28,000 pages of information
- Publishing and distributing Tierra Grande magazine on a quarterly basis to 150,000 people
- Other publications include "Home Buyer's Guide," "Home Seller's Guide," "Landlord & Tenant Guide" and English-Spanish Real Estate Glossary
- On-line newsletter, RECON (Real Estate Center Online News), distributed twice weekly to over 31,000 subscribers

The Colonias Program (COLN) is enhancing the quality of life for people and the place in which they live in the colonias and beyond, through:

- An integrated approach to practice, outreach, service, education, and research
- A continuum of research, development, demonstration, deployment, evaluation, and dissemination
- The application of principles of sustainability, lean project delivery, and fully integrated and advanced technologies, in defining what COLN does (i.e. products), how it does it (i.e., processes followed), and with what (i.e., resources used)
- Partnerships with other organizations.

COLN's mission is to conceive, develop, and deliver solutions to fulfill its vision, alone or with its partners. To enhance the quality of life, COLN delivers:

- Health and human services focused on the well being of individuals, families, and communities
- Education and workforce development programs for young women and men, adult women and men, and the elderly
- Economic development programs.

To enhance the quality of the built environment, COLN assists in the delivery of:

- Planning and design of urban, semi-urban/semi-rural, and rural environments
- Critical civil infrastructure systems, with an emphasis on water, energy, transportation/mobility, sewage and storm water, and communications systems
- Housing and critical community facilities, with an emphasis on affordable housing and community resource/service/self help centers.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Additional information for this strategy is available in Schedule 9, Special Item Information.

 83rd Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/14/2012**
 TIME: **6:05:00PM**

Agency code: **711**

Agency name:
Texas A&M University

CODE	DESCRIPTION	Excp 2014	Excp 2015
	Item Name: Debt Service on Tuition Revenue Bond Request for the 83rd Legislative session.		
	Item Priority: 1		
	Includes Funding for the Following Strategy or Strategies: 02-01-02 Tuition Revenue Bond Retirement		
OBJECTS OF EXPENSE:			
2008	DEBT SERVICE	6,974,765	6,974,765
	TOTAL, OBJECT OF EXPENSE	6,974,765	6,974,765
METHOD OF FINANCING:			
1	General Revenue Fund	6,974,765	6,974,765
	TOTAL, METHOD OF FINANCING	6,974,765	6,974,765

DESCRIPTION / JUSTIFICATION:

Tuition Revenue Bond service on the requested Biocontainment facility (BSL-3). See Tuition Revenue Bond Request for more information.

Debt service requested for the 2014-15 biennium for the proposed project(s) is based on an interest rate of six percent for 20 year bonds.

EXTERNAL/INTERNAL FACTORS:

There are hundreds of infectious diseases that cause illness and death in both people and animals. Many of these diseases can only be studied under rigorous biological containment and safety levels. One of the highest levels of containment for biomedical research is called a Biosafety Level 3 (BSL-3). This level of biosafety allows research into agents that may be indigenous or exotic with the potential for aerosol transmission with serious or even lethal consequences. There are currently no BSL-3 facilities in Texas that can be used to study the infectious agents in large animals, like cattle and a very limited number throughout the country.

Together, the cooperative components within the Texas A&M System and their associated agencies have major strengths in an array of related sciences that position it to be a national leader in the research on human, animal, plant, and food-borne diseases. The combination of discovery level and applied sciences and directly related to education, outreach, and service provide a continuum of capacity to create and deliver vitally important products to the state, region, and nation. The opportunities to the System, the State of Texas, and the region are innumerable, while the devastation of continued lack of protection by inadequate facilities will be unimaginable.

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE
 83rd Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/14/2012**
 TIME: **6:05:00PM**

Agency code: **711** Agency name: **Texas A&M University**

CODE	DESCRIPTION	Excp 2014	Excp 2015
	Item Name: One Health Plus Item Priority: 2 Includes Funding for the Following Strategy or Strategies: 03-05-01 Exceptional Item Request		
OBJECTS OF EXPENSE:			
2009	OTHER OPERATING EXPENSE	7,500,000	7,500,000
TOTAL, OBJECT OF EXPENSE		7,500,000	7,500,000
METHOD OF FINANCING:			
1	General Revenue Fund	7,500,000	7,500,000
TOTAL, METHOD OF FINANCING		7,500,000	7,500,000

DESCRIPTION / JUSTIFICATION:

"One Health" recognizes the inextricable link among human health, animal health, and ecosystem health by combining plant, animal and human breakthroughs providing speed-to-market connections between research, commercialization and business success. The One Health Plus resources and world-class facilities provide integrated and comprehensive speed-to-market services to support medical device and drug development – from product inception, to biomedical imaging, performing preclinical and human clinical testing, to utilizing flexible, scalable and flexible-by-design GMP biopharmaceutical manufacturing and production.

One example is the creation of One Health Plus entities in communities throughout Texas, both rural and urban. There could be teams created which include physicians, veterinarians, related specialists, and extension faculty, perhaps in a single building. Remote medicine technology and expertise would allow connection to Texas A&M for a variety of functions, such as collection and interpretation of physical parameters, diagnostic tests, and more. The data collected could be mined in a variety of ways to benefit Texans. Physicians, veterinarians, animal scientists, other specialists, and constituents could work together to serve a sentinel function in early detection and reporting of diseases, including emerging disease, infectious disease, disease outbreaks, and bioterrorism threats. Many partnerships would be formed, such as with the Texas Animal Health Commission, Departments of Public Health, etc.

Related examples include, but are not limited to, building design to enhance health, information technology, distance education, psychological and sociological factors, socioeconomic factors, local education programs for youth and adults, and epidemiology.

EXTERNAL/INTERNAL FACTORS:

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE
 83rd Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/14/2012**
 TIME: **6:05:00PM**

Agency code: **711**

Agency name:
Texas A&M University

CODE	DESCRIPTION	Excp 2014	Excp 2015
	<p>One Health Plus issues are particularly relevant in Texas, where animal populations rank number 1 in the nation in several categories, including cattle, horses, sheep, and goats and over 62% of U.S households own a pet. Agriculture in Texas ranks 3rd in the nation in economic impact and its many commodity groups feed Texans with over 1/3 of the nation's beef being fed in the Panhandle area. Texas is a border state, constantly threatened by security failures in movement of people, animals, and products. Further research and education of the public are essential.</p> <p>The synergism achieved would help protect and save untold millions of lives in our present and future generations in Texas, our nation, and our world. One Health Plus would bring together and build upon a multitude of strengths across the university. Furthermore, the possibility of federal funding exists.</p> <p>1) Major accomplishments: TAMU has always been engaged in health in relation to animals, plants and humans, but One Health Plus is a new, coordinated effort only in the beginning stages. Expectations are to enhance synergies.</p> <p>2) Special Item has never existed before</p> <p>3) Formula Funding is not applicable</p> <p>4) Non General Revenue Sources of Funding: Increased AUF payout of \$3.75M in each biennium for a total of \$7.5M</p> <p>5) Consequences of Not Funding: Not funding One Health Plus would limit our ability to maximize potential in this area. TAMU is providing the initial investment and hope is that State funding will further advance One Health Plus with enhanced research discovery, faculty and student opportunities and increased commercialization.</p>		

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE
 83rd Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/14/2012**
 TIME: **6:05:00PM**

Agency code: **711**

Agency name:
Texas A&M University

CODE	DESCRIPTION	Excp 2014	Excp 2015
	Item Name: Office of the State Climatologist		
	Item Priority: 3		
	Includes Funding for the Following Strategy or Strategies: 03-05-01 Exceptional Item Request		
OBJECTS OF EXPENSE:			
1001	SALARIES AND WAGES	71,000	71,000
1005	FACULTY SALARIES	71,000	71,000
TOTAL, OBJECT OF EXPENSE		\$142,000	\$142,000
METHOD OF FINANCING:			
1	General Revenue Fund	142,000	142,000
TOTAL, METHOD OF FINANCING		\$142,000	\$142,000
FULL-TIME EQUIVALENT POSITIONS (FTE):		1.80	1.80

DESCRIPTION / JUSTIFICATION:

This item would fund the regular operations of the Office of the State Climatologist (OSC). The OSC, located at Texas A&M University since its inception in 1973, serves the government, citizens, businesses, and organizations within Texas by:

- Identifying and providing weather and climate information to most effectively meet specific needs;
- Summarizing and disseminating weather and climate information to those who need it;
- Maximizing the value of climate information in the decision-making process;
- Performing weather and climate event impact evaluations and assessments;
- Serving as the primary point of contact for the National Oceanic and Atmospheric Administration and other federal agencies
- Conducting applied climate research of particular value to Texans.

The duties of the office have expanded over the past year to fulfill the acute need in Texas for comprehensive and accurate drought monitoring, assessment, prediction, and understanding.

The requested state funding would lift the burden of funding the OSC from the Department of Atmospheric Sciences, the College of Geosciences, and the Vice President for Research, allowing those units to reallocate funds directly toward teaching and research purposes. The requested funds would support a full-time State Climatologist (through summer salary) and a full-time Research and Outreach Coordinator, partially support a Research Associate and two Undergraduate Assistants, and provide support for travel, outreach, publications, and equipment.

These funds would be complemented by research grants from state and federal levels for climate services or applied climate research. Presently the State Climatologist is involved in ongoing federal grant projects totaling over \$1M and federal proposals totaling over \$1.2M. Additional funding is presently limited by the lack of research and support staff.

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE
 83rd Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/14/2012**
 TIME: **6:05:00PM**

Agency code: **711**

Agency name:
Texas A&M University

CODE	DESCRIPTION	Excp 2014	Excp 2015
-------------	--------------------	------------------	------------------

EXTERNAL/INTERNAL FACTORS:

With drought costing Texas many billions of dollars, the high-quality monitoring and planning tools and advice have likely saved individuals, groups, and industries within the state tens of millions of dollars during the past two years alone.

1) Major Accomplishments to Date:

- Distribute reports on climate and weather events
- Briefings on the statewide status of weather and climate events to the Legislature
- Speaking engagements for trade groups, citizen groups, etc.
- Provide input on disaster declarations
- Developed a high-resolution drought monitoring tool
- Recipient of a grant to improve accuracy of the drought measuring tool and make the product available on a regional or national basis

Major Accomplishments Expected During the next 2 years:

- Improved, more accurate drought monitoring technology deployed and being utilized
- Produce soil and crop models as specific decision making tools
- Double or triple federal grant levels

2) The OSC was established in 1973, funded by Texas A&M with occasional external funding for specific research projects.

3) Formula Funding is not applicable

4) Non-General Revenue Sources of Funding (not including funding requested for 2014-15)

2012 - \$224,985

2013 - \$265,700

2014 - \$232,000

2015 - \$308,000

5) Consequences of Not Funding:

The OSC has been operating in “emergency mode” since the intensification of the Texas drought in early 2011. Without the additional personnel enabled by the special item, the OSC would drastically reduce the various ways by which it provides essential weather and climate information. The OSC would be unable to actively pursue external funding that requires the presence of full-time researchers. Texas A&M would be able to provide some funding, similar to what has been available in the past, but such funding only allows for bare-bones operations and falls short of the level at which many other states fund their active state climate offices.

DESCRIPTION / JUSTIFICATION:

The Cyclotron Institute requests an increase of \$49,440 over the present level of support. The line-item funding is leveraged at about 10 to 1 in our federal funding for the program in nuclear science at TAMU. The facilities at the Institute have been undergoing an upgrade that will provide new capabilities for particle beams and the possibility of more time for training students in nuclear science. The requested increase in the state support will provide a way for us to request, and likely obtain an increase of about \$500,000 in federal support for the program.

EXTERNAL/INTERNAL FACTORS:

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE
 83rd Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/14/2012**
 TIME: **6:05:00PM**

Agency code: **711**

Agency name:
Texas A&M University

CODE	DESCRIPTION	Excp 2014	Excp 2015
1)	Major Accomplishments to Date: Constructed 2 cyclotrons, the 2nd a superconducting machine making TAMU 1 of only 2 labs in the US and 1 of only 5 in the world to have such a facility.		
	Major Accomplishments During the Next 2 Years: Begin providing accelerated radioactive beams at energies that will not be available elsewhere in the world, extending research capabilities in nuclear astrophysics, nuclear structure, and nuclear reactions and dynamics. With the high-intensity beams from the upgraded facility, a research program will be started to develop new radioisotopes for medical imaging.		
2)	Funding Source Prior to Special Item Funding: Funding by the U.S. Department of Energy, The Robert A. Welch Foundation and the State were started simultaneously in the mid 1960's		
3)	Formula Funding is not applicable		
4)	Non-General Revenue Sources of Funding:		
	2012		
	\$3.6M Department of Energy		
	\$0.3M National Science Foundation		
	\$0.2M Robert A. Welch Foundation		
	\$1.8M Industry Sources		
	2013		
	\$3.7M Department of Energy		
	\$0.3M National Science Foundation		
	\$0.2M Robert A. Welch Foundation		
	\$1.9M Industry Sources		
	2014		
	\$3.8M Department of Energy		
	\$0.4M National Science Foundation		
	\$0.3M Robert A. Welch Foundation		
	\$2.0M Industry Sources		
	2015		
	\$3.9M Department of Energy		

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE
 83rd Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/14/2012**
 TIME: **6:05:00PM**

Agency code: **711**

Agency name:

Texas A&M University

CODE	DESCRIPTION	Excp 2014	Excp 2015
	\$0.4M National Science Foundation		
	\$0.3M Robert A. Welch Foundation		
	\$2.1M Industry Sources		

5) Consequences of Not Funding:

The University has had to provide an increasing supplement and the Institute has had to direct an increasingly larger fraction of the federal support to facility operations rather than use it for the research program. The special item support is insufficient to meet needs for repair and replacement of key facility mechanical and electronic components. Loss of funding would lead to severely curtailed operations and almost certain loss of the federal support for research and operations.

See Schedule 9 for additional information.

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE
 83rd Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

 TIME: **6:05:00PM**

Agency code: **711** Agency name: **Texas A&M University**

CODE	DESCRIPTION	Excp 2014	Excp 2015
	Item Name: Increase Sea Grant Program Fund		
	Item Priority: 5		
	Includes Funding for the Following Strategy or Strategies: 03-02-02 Sea Grant Program		
OBJECTS OF EXPENSE:			
1001	SALARIES AND WAGES	96,390	96,390
1002	OTHER PERSONNEL COSTS	3,610	3,610
TOTAL, OBJECT OF EXPENSE		\$100,000	\$100,000
METHOD OF FINANCING:			
1	General Revenue Fund	100,000	100,000
TOTAL, METHOD OF FINANCING		\$100,000	\$100,000
FULL-TIME EQUIVALENT POSITIONS (FTE):		2.00	2.00

DESCRIPTION / JUSTIFICATION:

The overall objective of this request is to increase capacity within the Texas Sea Grant College Program and within the state of Texas to increase coastal resilience and adaptation to natural hazards such as hurricanes, storm surges and sea level rise. Texas Sea Grant has been at the forefront of addressing economic opportunities and environmental issues facing coastal communities through its research and outreach efforts. Sea Grant’s proactive and highly praised role in addressing community and research concerns associated with the Deepwater Horizon oil spill in the Gulf of Mexico clearly demonstrated the program’s capacity to be a key and highly effective partner in helping to solve many coastal resource problems.

- Texas Sea Grant will commit \$50,000 annually in federal funding to support 2 FTEs to conduct outreach in Texas and engage coastal communities.
- Sea level and coastal hazards are on the rise, placing natural and human communities at great risk.
- Adapting to these risks and mitigating risk to the built, natural and economic environments is critical.
- Coastal communities and local decision-makers have little access to the information needed to protect our natural and human resources from natural hazards.
- Texas Sea Grant is currently conducting this work on a small-scale with select Texas coastal communities to help them understand the risks and to help them develop and implement solutions.

Benefits to the State include:

- Building resiliency in Texas coastal communities is critical to their economic sustainability.
- Reduce socio-economic risks of natural coastal hazards.
- Support growth and development of vibrant healthy coastal communities (smart growth).

The economic impacts of sustainable coastal communities are of broad interest to the Texas legislature. There are several specific interests including those related to water legislation and endangered species.

EXTERNAL/INTERNAL FACTORS:

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE
 83rd Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/14/2012**
 TIME: **6:05:00PM**

Agency code: **711**

Agency name:
Texas A&M University

CODE	DESCRIPTION	Excp 2014	Excp 2015
1)	Major Accomplishments to Date: - Supported workforce development - Awarded over \$50M in competitive grants to State universities - Introduced fuel-efficient fishing gear - Reduced by-catch of important fish and endangered sea turtles - Helped sustain the shrimp and fish farming businesses - Made Texas coastal waters cleaner through several programs		
	Major Accomplishments During the next 2 years: - Expand funding to undergraduate and graduate student scholarships and fellowships - Award \$2M in competitive grants to Texas state universities - Develop new tools, products and services to keep Texans safe and beaches and waters clean - Increase capacity to build Texas coastal resilience		
2)	Funding Source Prior to Special Item: None. Funded by the Texas Legislature more than 40 years ago		
3)	Formula funding is not applicable		
4)	Non General Revenue Sources of Funding: 2012-13: \$3.4M from NOAA's National Sea Grant College Program \$1.4M in grants and contracts \$0.8M in matching funds from Agrilife Extension 2014-15: \$3.4M from NOAA's National Sea Grant College Program \$1-3M in grants and contracts \$0.8M in matching funds from Agrilife Extension		
5)	Consequences of not funding: Decreased federal funds received by the State of Texas to support education, applied research and outreach and capacity to increase coastal resilience will be limited.		
	See Schedule 9 for Additional Information		

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE

FULL-TIME EQUIVALENT POSITIONS (FTE):		1.00	1.00

DESCRIPTION / JUSTIFICATION:

The Energy Resources Program (ERP) supports Texas A&M University's goal of promoting the State of Texas as a world leader in all areas of energy research. The scholarship, and creative work resulting from the program have and will continue to contribute to cutting-edge solutions for grand scientific, engineering, and societal challenges. Its mission is to nurture a creative and productive collaborative environment to advance sustainable energy technologies and systems. The ERP is helping to fund the Texas A&M Energy Institute (EI) which provides a programmatic umbrella for faculty, staff, students, and other associates from Texas A&M University System members, government entities, energy companies, energy-related industries, non-profit organizations, and other partners across the United States and globally. It brings potential to Texas A&M and the State for great success in energy research including nationally competitive teams for grants and commercialization of technologies, development of wide-ranging research programs, and multi- and inter-disciplinary collaborations and advancements that benefit society.

EXTERNAL/INTERNAL FACTORS:

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE
 83rd Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/14/2012**
 TIME: **6:05:00PM**

Agency code: **711**

Agency name:
Texas A&M University

CODE	DESCRIPTION	Excp 2014	Excp 2015
1)	Major Accomplishments to Date: - Leveraged State money producing a 12.8:1 return - Received a \$3M grant to ignite natural gas energy research - Pending application to the DOE to create the 1st offshore wind farm in the US - Immersive Visualization Center Major Accomplishments Expected During the next 2 years: - Promote research initiatives - Serve as a strategic partner for faculty - Serve as a resource for principal investigators - Generate advances for collaborations of competitive proposals - Foster student research and positively impact the next generation of energy experts		
2)	Funding Source Prior to Special Item: None		
3)	Formula Funding is not applicable		
4)	Non-General Revenue sources of Funding Federal and private sources: 2012 \$36.7M 2013 \$37.4M 2014 \$38.1M 2015 \$38.8M		
5)	Consequences of Not Funding: Loss of funding will have a major impact on ongoing energy research at Texas A&M and capacity to bring together collaborative efforts between Texas A&M, Texas Engineering Experiment Station, Texas AgriLife Research, and the Texas Transportation Institute. Funding provides the state and university with a critical allocation of funds to support R&D on energy issues vital to Texas and the nation. Funding allows energy experts to develop multidisciplinary initiatives that address critical problems facing the state in oil and gas, bioenergy, electric power, and wind, solar, and nuclear energy. The ERP has had tremendous success in funding advanced and emerging technologies in energy and environmental issues and has assisted Texas A&M as it continues to occupy a leadership position in the energy research arena.		
	For more information see Schedule 9		

4.A. EXCEPTIONAL ITEM REQUEST SCHEDULE
 83rd Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/14/2012**
 TIME: **6:05:00PM**

Agency code: **711**Agency name:
Texas A&M University

CODE	DESCRIPTION	Excp 2014	Excp 2015
	Item Name: Increase School of Architecture Fund		
	Item Priority: 7		
	Includes Funding for the Following Strategy or Strategies: 03-03-01 School of Architecture		
OBJECTS OF EXPENSE:			
1001	SALARIES AND WAGES	60,869	60,869
2009	OTHER OPERATING EXPENSE	19,131	19,131
TOTAL, OBJECT OF EXPENSE		\$80,000	\$80,000
METHOD OF FINANCING:			
1	General Revenue Fund	80,000	80,000
TOTAL, METHOD OF FINANCING		\$80,000	\$80,000
FULL-TIME EQUIVALENT POSITIONS (FTE):		3.50	3.50

DESCRIPTION / JUSTIFICATION:

Government & State Agencies have expanded the definition of a Colonia to seven and the definition of border to five. This dictates the A&M Colonias Program (COLN) to expand into the newer areas with a projected growth of at least 24 additional sites in Bexar, Travis and Nueces counties. The Colonias Program will have oversight of a total of 64 Community Resource Centers. Additional funding will facilitate the growth into the non border areas.

State policy issues to be addressed:

- Health disparity issues—data collection in the Colonias is now available to address specific health issues as it relates to specific nontraditional areas.
- The Colonias program continues to gather information – that may be used by agencies in housing, or by rural service providers.
- The Colonias Program has enough data to provide longitudinal data that may be invaluable to Texas Department of Health and Human Services, Texas Department of State Health Services, Texas Department of Housing and Community Affairs related to health delivery issues, health issues, Medicare, Medicaid and C.H.I.P as it relates to Colonia residents.

The Colonias Program not only accomplishes the state mandate of providing service to the Colonias, it also meets the University's land grant mandate by facilitating the service learning activity of the university in rural areas.

The Colonias Program has generated interest in the private sector for service outreach, service delivery and in assisting health providers with educational classes in non traditional settings.

Data generated specific to border, Colonias, health disparities and rural communities may be of interest to the legislative work groups.

	Total Expenditures		25.7%		\$48,166,135	\$187,630,318		28.0%		\$42,898,350	\$153,338,770

B. Assessment of Fiscal Year 2010 - 2011 Efforts to Meet HUB Procurement Goals

Attainment:

Texas A&M University exceeded five of six , or 83.3% of the applicable statewide HUB procurement goals in FY 2010 and exceeded three of six, or 50% of the applicable statewide HUB procurement goals in FY 2011.

Applicability:

All procurement categories are applicable to this agency's operations.

Factors Affecting Attainment:

In 2011, the goal of "Building Construction" category was not met due to the limited size and scope of the university's strategic building plan and the goal of "Other Services" and "Professional Services" categories were not met in both 2010 and 2011 due to the lack of available HUB vendors within these categories in this geographical area.

"Good-Faith" Efforts:

Texas A&M University made the following good faith efforts to comply with statewide HUB procurement goals in FY 2010-2011:

- * Texas A&M University collaborated with other Texas A&M University System members as well as other state agencies to encourage participation in procurement opportunities through forums and,
- * Systematically deployed pre-bid/proposal meetings that ensured information dissemination that reflected the university's procurement and HUB requirements.

FTE Reductions (From FY 2014 and FY 2015 Base Request)							
2 Cyclotron							
Category: Programs - Service Reductions (Other)							
Item Comment: The Cyclotron Institute has recently completed an upgrade project that has been supported by the U.S. Department of Energy (DOE), the R.A. Welch Foundation, and TAMU, with over 1/2 of the support for capital equipment being provided by DOE. The research program at the Cyclotron Institute is at a critical time when it needs to begin using the upgraded facility. Continuing state support, which provides a small fraction (less than 8%) of the total budget, is very important in order to request increases in DOE support. If the state support continues to erode with further reductions, it will almost surely lead to reduced DOE support. A 10% reduction in the present budget would lead to at least 1 FTE being cut from state support. With the budget reductions that have already taken place, we have reduced the state supported staff by more than 1 FTE since 2010. All remaining staff are critical to maintaining a strong research program that is competitive with other programs seeking funding from DOE.							
Strategy: 3-2-1 Cyclotron Institute							
<u>General Revenue Funds</u>

FTE Reductions (From FY 2014 and FY 2015 Base Request)				1.0	1.0		
3 Sea Grant Program							
Category: Programs - Service Reductions (FTEs-Layoffs)							
Item Comment: Continuing support from the State of Texas is critical to the Texas Sea Grant College Program obtaining funding from the National Oceanic and Atmospheric Administration (NOAA), which requires a one dollar state match for every two federal dollars allocated to the Program. Special Item funding from the Texas legislature historically has provided the vast majority of the match for this program, with the remainder coming from Texas universities that receive research grants from the Program. A reduction in state support would reduce the amount of federal funding received, the amount of leveraged funding generated by the Program (Program received \$5.6 million dollars in leveraged funding during 2012-13 biennium), and the Program's beneficial impact on the Texas economy, environment and citizens. One FTE would be cut if these reductions were to happen.							
Strategy: 3-2-2 Sea Grant Program

	2014	2015	Biennial Total	2014	2015	Biennial Total	

Item Comment: Loss of Energy Resources Program (ERP) funding will have a major impact on ongoing energy research at Texas A&M and on our capacity to bring together collaborative efforts between Texas A&M, Texas Engineering Experiment Station, Texas AgriLife Research, and the Texas Transportation Institute. ERP funding provides the state and university with a critical allocation of funds to support R&D on energy issues vital to Texas and the nation. Funding is used to provide administrative and development support allowing energy experts to develop multidisciplinary initiatives that address critical problems facing the state in oil and gas, bioenergy, electric power, and wind, solar, and nuclear energy. The ERP has had tremendous success in funding advanced and emerging technologies in energy and environmental issues and has assisted Texas A&M as it continues to occupy a leadership position in the energy research arena. Energy research will be one of the continuing major research strengths of Texas A&M and will be a major focus of further institutional investment. Texas A&M University has committed funds over the next five years to combine with ERP monies to synergize and leverage resources and to focus on one of the most important multidisciplinary initiatives in the state – energy. As part of this initiative, Texas A&M University is pursuing the hiring of uniquely qualified senior faculty with national/international expertise in energy R&D to enhance and bolster current faculty capabilities in this area.

Strategy: 3-2-3 Energy Resources Program

Item Priority and Name/ Method of Financing	REVENUE LOSS			REDUCTION AMOUNT			TARGET
	2014	2015	Biennial Total	2014	2015	Biennial Total	
<p>Item Comment: A budget reduction will impact Colonias (COLN) operations in two ways. It will reduce the levels of effectiveness and efficiency of the program to fully execute its legislative mandate and reduce the amount of time currently devoted to locating external funding to work with partners in bringing needed programs to the regions. A budget reduction will also create impacts to COLN customers, since additional reduction in staff would mean reductions in the geographic areas and number of people served, the time spent working directly with the communities, with imposed new limits on where to go and who to work with, and measures of performance, as a smaller staff, already extended as far as they can go, would limit how much can be produced, no matter how strong their desire, commitment, and dedication are to maintain current levels and standards of services.</p> <p>Finally, if these budget reductions were to happen, a total of 2-3 FTE positions (additional to the scheduled reductions for the current biennium) would have to be eliminated. Since COLN cannot reduce personnel in the regions that already have reduced their staff to a minimum, to absorb this additional reduction in FTE's, COLN would have to either close one of its regional offices (the least desirable option) or to keep it open with only one staff member, who would continue to work with COLN's current partners, and seek additional sources of funding to hire personnel only on a project-by-project basis.</p> <p>Strategy: 3-3-1 School of Architecture</p>

Project Description

Texas A&M proposes building a facility that will allow research on cures for emerging and infectious diseases that threaten people, animals and food supply. A biocontainment facility on the Texas A&M University campus will allow A&M System scientists to meet the current and future needs of the State in dealing with emerging and infectious diseases. Coordination with Texas A&M System and associated agencies will allow access to major strengths in an array of related sciences that position Texas A&M as a national leader in the research on human, animal, plant and food borne diseases.

The proposed facility will allow research on agents in a safe and secure environment and the controls in the building are designed to provide the required safety for the people working in the lab and the community surrounding the faculty. These kinds of specialized facilities are called Biocontainment facilities and must be capable of housing both the workers and the animals used in the studies.

711 Texas A&M University

Special Item: 1 **Cyclotron Institute**

(1) Year Special Item: 1965

(2) Mission of Special Item:

The Cyclotron Institute is a Department of Energy (DOE) Supported Center of Excellence, jointly supported by DOE and the State of Texas. It is a major technical and educational resource for the State and the nation. The primary functions of the Institute are to conduct basic research, to educate students in accelerator based science and technology, and to provide accelerator capabilities for a wide variety of applications in materials science, nuclear medicine, space science, and analytical procedures.

(3) (a) Major Accomplishments to Date:

The Institute is internationally recognized for its many important contributions to basic science. The Institute has developed unique technological capabilities in the state and has constructed two cyclotrons, the second a superconducting machine making Texas A&M one of only two laboratories in the United States and one of only five in the world to have such a facility. It has become a major resource for development of important applied programs in the state. In nuclear medicine this has included both diagnostic and therapy programs. The facility radiation effects line supports testing of aircraft, spacecraft, and satellite electronic parts for NASA and a number of aerospace contractors and semiconductor chip manufacturers(Boeing, McDonnell Douglas, Motorola, Lockheed, Loral Aerospace, Honeywell etc.). In late 2009, the Institute began working with faculty members in the Nuclear Engineering department to develop new isotopes for cancer therapy. Funding has been obtained to begin producing alpha emitting isotope production for testing new cancer therapy modalities.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

During the next two years, our upgraded facility will begin providing accelerated radioactive beams at energies that will not be available elsewhere in the world. The new beams will extend our research capabilities in nuclear astrophysics, nuclear structure, and nuclear reactions and dynamics. With the high-intensity beams from the upgraded facility, a research program will be started to develop new radioisotopes for medical imaging. This new program will be carried out in cooperation with the Texas Institute for Preclinical Studies and the Nuclear Engineering Department through the Nuclear Solutions Institute.

(4) Funding Source Prior to Receiving Special Item Funding:

Funding by the U.S. Department of Energy, The Robert A. Welch Foundation and the State were started simultaneously in the mid 1960's.

(5) Formula Funding:

N/A

(6) Non-general Revenue Sources of Funding:

2011

\$3,300,000 Department of Energy

\$350,000 National Science Foundation

\$350,000 Robert A. Welch Foundation

\$1,700,000 Industrial and Private Sources

711 Texas A&M University

\$504,999 Texas A&M University

2012

\$3,600,000 Department of Energy
\$350,000 National Science Foundation
\$250,000 Robert A. Welch Foundation
\$1,800,000 Industrial and Private Sources

2013

\$3,700,000 Department of Energy
\$350,000 National Science Foundation
\$250,000 Robert A. Welch Foundation
\$1,900,000 Industrial and Private Sources

2014

\$3,800,000 Department of Energy
\$370,000 National Science Foundation
\$270,000 Robert A. Welch Foundation
\$2,000,000 Industrial and Private Sources

2015

\$3,900,000 Department of Energy
\$370,000 National Science Foundation
\$270,000 Robert A. Welch Foundation
\$2,100,000 Industrial and Private Sources

(7) Consequences of Not Funding:

The special item support of the Cyclotron Institute currently provides approximately 8% of the facility funding. The remaining 92% is obtained from external grants and support from Texas A&M. The special item support leverages over a 9-to-1 return in institute funding. It provides part of the continuing baseline support for this Department Of Energy (DOE) Supported Center of Excellence. Since the state special item support has not increased in nearly twenty years, the University has had to provide an increasing operations supplement and the Institute has had to direct an increasingly larger fraction of the federal support to facility operations rather than research programs. The annual special item support is currently insufficient to meet needs for repair and replacement of key mechanical and electronic components of the facility. Continuing support from the State of Texas was critical to the Institute obtaining funding from DOE and the Welch Foundation for completing an upgrade and then operating the upgraded facility. The upgrade will assure competitive state-of-the art capabilities for at least the next 15 years. With these capabilities, external funding over the next 15 years should be more than \$ 100,000,000 (in current dollars). Loss of the state line item support without a commitment of replacement funds from the University would lead to severely curtailed operations and almost certain loss of the federal support for research and operations.

711 Texas A&M University

Special Item: 2 Sea Grant College Program

(1) Year Special Item: 1969

(2) Mission of Special Item:

The mission of Texas Sea Grant is to improve the understanding, wise use and stewardship of the state's coastal and marine resources. To achieve this, it directs education programs, applied research and outreach to benefit the citizens, businesses and communities of Texas – from providing grants and scholarships that benefit students and workforce development, funding Texas' innovative researchers to solve real-world problems, to deploying extension staff to help small businesses be more competitive and coastal communities to grow sustainably and build resilience to impacts from storms and other hazards.

This unique partnership unites the resources of the federal government, the State of Texas, industry and universities across the state to create knowledge, innovative tools, products and services that benefit the Texas economy, environment and citizens. Texas Sea Grant yields a 6:1 return on investment – for every state dollar invested, it returns more than \$6 to the Texas economy.

The program is part of a national network of Sea Grant programs in coastal and Great Lakes states. The network is funded by the National Oceanic and Atmospheric Administration (NOAA) in partnership with the states to help connect the research conducted at Sea Grant Institutions with the public. Sea Grant is NOAA's primary university-based program, dedicated to helping citizens utilize scientific information to support a vibrant economy while ensuring ecological sustainability.

(3) (a) Major Accomplishments to Date:

- Supported workforce development by funding curriculum development for university-level programs.
- Awarded over \$50 million in competitive grants to Texas state universities.
- Introduced fuel-efficient fishing gear, saving fishermen between 20 to 39 percent in fuel costs.
- Reduced by-catch of important fish and endangered sea turtles.
- Led efforts that won a \$9 million USDA Trade Adjustment Assistance grant to provide training and economic recovery assistance to the shrimp fishery.
- Helped sustain the shrimp and fish farming businesses, an industry with an estimated \$360 million/year impact on the economy.
- Established the Texas Coastal Watershed Program to assist in planning for future development.
- Made Texas coastal waters cleaner by promoting "clean boating best practices".
- Developed a Monofilament Recovery and Recycling Program to educate about dangers of leaving used fishing line in the environment.
- Trained and maintained more than 400 Texas citizens who have restored thousands of acres of degraded Texas coastal habitat.
- Launched a statewide beach cleanup program to keep Texas beaches clean and safe. Since 1986, more than 8,300 tons of trash has been removed.
- Spearheaded efforts to attain protective status for the Flower Garden Banks.
- Created the "Floating Classroom Program," a teaching vessel that educates students and teachers about marine science and our coastal ecosystem.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

711 Texas A&M University

- Continue to support workforce development in Texas by expanding funding to undergraduate and graduate student scholarships and fellowships.
- Award \$2 million in competitive grants to Texas state universities to fund research that solves real-world problems and to support educational programs and curriculum development for K-16 students.
- Develop new and improved tools, products and services to keep Texans safe and Texas beaches and waters clean.
- Launch a new educational and outreach effort inland to educate Texans about the economic and environmental importance of our coastal and marine resources.
- Identify candidate hydrological restoration sites along the Texas coast to receive federal funding directed toward restoring areas where freshwater once flowed into Texas bays and estuaries.
- Increase capacity to build Texas coastal resilience and adaptation to natural hazards such as hurricanes, storm surges and sea level rise. These coastal hazards are increasing, placing natural and human communities at great risk. Adapting to these risks and mitigating risk to the built, natural, and economic environments is critical. Texas Sea Grant is working with Texas coastal communities to help them understand the risks and to help them develop and implement solutions.
- Texas Sea Grant expects to play a key role in efforts to help recover and restore the Gulf of Mexico as provided in the RESTORE Act Bill passed on June 29, 2012.

(4) Funding Source Prior to Receiving Special Item Funding:

None. It has been funded by the Texas Legislature since Congress established NOAA's National Sea Grant Program more than 40 years ago to parallel the Land Grant concept of agricultural development and outreach.

(5) Formula Funding:

N/A

(6) Non-general Revenue Sources of Funding:

The primary source of funding for Texas Sea Grant is through NOAA's National Sea Grant College Program. Core federal funding provides the program with \$3.4 million for the current 2012-13 biennium. Core funding is supplemented through special NOAA competitions, funds which are available only to state Sea Grant programs. As much as \$1 million is awarded annually through these competitions. Texas Sea Grant personnel also win grants and contracts from state, federal, corporate and not-for-profit sponsors. During the current 2012-2013 biennium, Texas Sea Grant received over \$1.4 million from these additional funding sources in the form of grants and contracts that required matching funds and leveraged the program's core federal and state funding. Texas Sea Grant also received \$800,000 in matching funds through its partnership with Texas Agrilife Extension and Texas coastal counties during the current 2012-2013 biennium to support outreach. The total funding from all non-state sources for the current 2012-13 biennium was \$5.6 million.

If this special item is funded during the 2014-15 biennium, Texas Sea Grant will receive \$3.4 million in core federal funding, an additional \$1 to \$3 million in funding from other sources, and an additional \$800,000 in matching funds through its partnership with Texas Agrilife Extension and Texas coastal counties. The projected total funding from all non-state sources for the 2014-15 biennium is \$5.2 to \$7.2 million.

(7) Consequences of Not Funding:

The consequences of not funding this special item are (1) the federal funds discussed above will not be received by the State of Texas to support education, applied research and outreach, (2) the Texas Sea Grant College Program will end, and (3) Texas A&M University will no longer be a Sea Grant Institution. Texas Sea Grant receives its federal funding in the form of a grant from NOAA and this grant requires a match of one state dollar for every two federal dollars. There are no other sources of state funds available to continue the program.

711 Texas A&M University

Special Item: 3 Energy Resources Program

(1) Year Special Item: 1976

(2) Mission of Special Item:

Clean, affordable, and sustainable energy is critical to the State of Texas. It serves as a major economic engine that affects the global competitiveness of the United States and is vital to consumers. For many decades, Texas has been a leader in providing solutions to the energy challenges facing the nation and the world. The Energy Resources Program (ERP) at Texas A&M University was created to provide the State of Texas with a concentration of expertise in research, teaching, and public service directed at continuously developing solutions to Texas' and the nation's changing energy and environmental challenges. Texas A&M's ERP maintains programs and provides overarching coordination among multiple colleges, departments, and disciplines that address both immediate and long-term needs in an area of major importance to our state and national economy. This ERP accelerates advanced and emerging technologies in both renewable and traditional sources of energy by cultivating innovative strategies to maintain the state's leadership in wind power, natural gas production and distribution, and in addressing critical issues associated with water use and energy production.

(3) (a) Major Accomplishments to Date:

ERP has allowed Texas A&M to leverage state money, producing a 12.8:1 return. Initiatives currently supported by the ERP:

- Research in hydrogen production; hydraulic fracturing and new technologies in drilling tool research and demonstration; expanding/transforming biofuel production; applying nanotechnology to solar photovoltaic energy production; analyzing the interdependence of water and energy production and the treatment of produced water.
- Researchers received a \$3M U.S. Department of Energy Advanced Research Projects Agency-Energy program grant to ignite American natural gas energy research and identify new ways to capitalize on the country's vast related reserves.
- Research programs in wind power technology and a pending application to the Department of Energy to create the first offshore wind farm in the U.S.
- Current Energy Institute initiatives include air emission studies associated with hydraulic fracturing; innovations in cultivation and use of guar in oil and gas production; studies of liquefied natural gas vehicles and associated infrastructure challenges; and investigations of water use and wastewater production associated with production of biofuels and other energy forms.
- The Immersive Visualization Center provides advanced imaging capabilities to researchers.
- Proposal writing for the Integrated Ocean Drilling Program, research providers on deep ocean energy resources resulted in a \$540M contract over 10 years.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

ERP funding at Texas A&M will continue to promote research initiatives in advanced and emerging energy technologies to foster interdisciplinary and multidisciplinary research programs that will address immediate and future energy and water needs of the State of Texas and its growing population. The Energy Institute (EI) serves as a strategic partner for faculty from all colleges and disciplines at the university and is a portal for public and private partners to establish linkages with individual investigators and advanced research programs that align with their research and development interests. EI also serves as a resource for principal investigators to identify and secure major external research funding and partnerships. Funds awarded through the ERP will generate advances and other resources necessary for collaborations and submission of competitive proposals. As energy research programs expand, so will opportunities to foster student research and positively impact the next generation of energy experts in Texas.

711 Texas A&M University

(4) Funding Source Prior to Receiving Special Item Funding:

None.

(5) Formula Funding:

N/A

(6) Non-general Revenue Sources of Funding:

The ERP funds were used to leverage the following funds for energy R&D at Texas A&M University:

2007 – \$5.2M Federal and Private Sources

2008 – \$5.6M Federal and Private Sources

2009 – \$7.1M Federal and Private Sources

2010 – \$34.5M Federal and Private Sources

2011 – \$36.0M Federal and Private Sources

(7) Consequences of Not Funding:

Loss of ERP funding will have a major impact on ongoing energy research at Texas A&M and on our capacity to bring together collaborative efforts between Texas A&M, Texas Engineering Experiment Station, Texas AgriLife Research, and the Texas Transportation Institute. ERP funding provides the state and university with a critical allocation of funds to support R&D on energy issues vital to Texas and the nation. Funding is used to provide administrative and development support allowing energy experts to develop multidisciplinary initiatives that address critical problems facing the state in oil and gas, bioenergy, electric power, and wind, solar, and nuclear energy. The ERP has had tremendous success in funding advanced and emerging technologies in energy and environmental issues and has assisted Texas A&M as it continues to occupy a leadership position in the energy research arena. Energy research will be one of the continuing major research strengths of Texas A&M and will be a major focus of further institutional investment. Texas A&M University has committed funds over the next five years to combine with ERP monies to synergize and leverage resources and to focus on one of the most important multidisciplinary initiatives in the state – energy. As part of this initiative, Texas A&M University is pursuing the hiring of uniquely qualified senior faculty with national and international expertise to enhance and bolster current faculty capabilities in this area.

711 Texas A&M University

Special Item: 4 **Real Estate Research Center**

(1) Year Special Item: 1971

(2) Mission of Special Item:

By statute, the Real Estate Center's mission is to conduct studies in all areas related to real estate or urban/rural economics and to publish and disseminate the findings and results. In practice, the Center strives to provide useful and actionable information to help Texans make good business and investment decisions.

(3) (a) Major Accomplishments to Date:

- Center data, research, and analysis are widely used by the Texas Legislature, governor, comptroller and local governments
- Market reports on 25 Metropolitan Statistical Areas are used by councils of governments, businesses, global investors, investment advisors, and economic development agencies to identify/create job opportunities and make better decisions
- Upgraded website that allows easier access to information
- Preparation of courses and instructor training for Texas Real Estate Commission promulgated courses
- Upgraded knowledge base in international finance to better interpret impact on Texas economy and markets
- Successfully monitored the actions of US Federal Reserve to help Texans make better business and consumer decisions
- Initiated a blog to get time-sensitive information out quicker.
- Outlets: 27,000-page website; Tierra Grande magazine, circulation 137,000; RECON, online newsletter, 38,000 subscribers; technical reports on broad spectrum of real estate topics, including Hints on Negotiating an Oil and Gas Lease; English Spanish Glossary of Real Estate Terms, Real Estate Red Zone, weekly podcast for real estate professionals and consumers, and hundreds of presentations annually by Center staff all across Texas to business groups.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

- Expand variety of topics researched with a focus on helping markets recover
- Add the FW Dodge construction data for better analysis of commercial and residential markets
- Use Real Capital Analytics data to analyze price trends for all property types in Texas
- Add GIS capabilities to Center databases; allowing for "data mapping" and customized user generated reports
- Develop a better early indicator of housing market conditions
- Quantify "shadow inventory" of housing in Texas to help predict recovery of the Texas housing market—all of which will help business owners and consumers make better decisions
- Will continue to do the things outlined in (3)(a).

(4) Funding Source Prior to Receiving Special Item Funding:

No general revenue; created by statute not by special item funding source.

(5) Formula Funding:

N/A

711 Texas A&M University

(6) Non-general Revenue Sources of Funding:

Section 86.51 Texas Education Code. A dedicated special fund for the sole and exclusive use of the Center was created at Texas A&M by statute. No general revenues ever received.

(7) Consequences of Not Funding:

The Center would cease to exist; a resource that key members of the Legislature have said is indispensable to Texas would disappear.

711 Texas A&M University

Special Item: 5 **School of Architecture - Colonias Program**

(1) Year Special Item: 1992

(2) Mission of Special Item:

The Colonias Program (COLN) is enhancing the quality of life for people and the place in which they live in the colonias and beyond, through:

- An integrated approach to practice, outreach, service, education, and research
- A continuum of research, development, demonstration, deployment, evaluation, and dissemination
- The application of principles of sustainability, lean project delivery, and fully integrated and advanced technologies, in defining what COLN does (i.e. products), how it does it (i.e., processes followed), and with what (i.e., resources used)
- Partnerships with other organizations

COLN's mission is to conceive, develop, and deliver solutions to fulfill its vision, alone or with its partners. To enhance the quality of life, COLN delivers:

- Health and human services focused on the well being of individuals, families, and communities
- Education and workforce development programs for young women and men, adult women and men, and the elderly
- Economic development programs

To enhance the quality of the built environment, COLN assists in the delivery of:

- Planning and design of urban, semi-urban/semi-rural, and rural environments
- Critical civil infrastructure systems, with an emphasis on water, energy, transportation/mobility, sewage and storm water, and communications systems
- Housing and critical community facilities, with an emphasis on affordable housing and community resource/service/self help centers

(3) (a) Major Accomplishments to Date:

Both alone, and with strategic allies and partners, COLN has served children, youth, adult women and men, and the elderly in the Colonias (almost 3.1 million participants in 2007–2011 programs), through the establishment and maintenance of a robust and cohesive infrastructure that:

- Has assisted in planning, funding, design, construction, and operations of 40 Community Resource/Service/Self-Help Centers across 14 counties to date (with an additional 6 under negotiation), which serve as hubs for dissemination of information on COLN programs, and as a vehicle through which a diverse range of service providers works with COLN to strengthen, enhance, complement, supplement, and expand their capacity and their ability to deliver services
- Through the Texas A&M Promotora Training Academy, has recruited, hired, trained, certified, developed, and deployed selected Colonia residents to work as Promotoras, or Outreach Workers (over 500 promotoras from 2007–2011), who disseminate information on services and programs, through friendly, door-to-door, and face-to-face contact
- Has consolidated a strong focus on the quality of life of colonia residents through preventive and self managed health programs, and pilot initiatives in water filtration/purification, green energy (solar, wind, and smart grids), and housing improvements (weatherization).

(3) (b) Major Accomplishments Expected During the Next 2 Years:

711 Texas A&M University

In the next two years, COLN anticipates to:

- Continue securing funding for COLN initiatives, programs, projects, activities, and events from local government, state and federal agencies, and profit and nonprofit organizations
- Protect and strengthen current programs and services along the Texas/Mexico Border, and expand into 14 additional non-border rural communities and economically disadvantaged urban areas, which qualify under one or more of the definitions for “Colonia” or “Border” sites, including the San Antonio/Austin Corridor (Bexar and Travis Counties), and Corpus Christi (Nueces County)
- Strengthen the current role of COLN within the land grant status of Texas A&M University, and continue to actively participate in, and support statewide initiatives aligned with the scope of its legislative mandate within the State’s legislative and executive branches
- Work closer with Colonia residents, faculty, researchers, students, service partners, and funding agencies to (1) strengthen and expand current preventive and self managed health programs, and water filtration/purification, green energy (solar, wind, and smart grids), and housing improvements (weatherization) initiatives; and (2) start new initiatives focused on urban development, civil infrastructure systems, and housing, with a special emphasis on health and human services, education and workforce development, and economic planning and development as integral elements.

(4) Funding Source Prior to Receiving Special Item Funding:

None.

(5) Formula Funding:

N/A

(6) Non-general Revenue Sources of Funding:

State funding for COLN has been critical for the ability of the program to leverage existing, and seek and secure additional, funding for its initiatives, programs, projects, activities, and events. The amount secured since COLN's inception 20 years ago through grant, contracts, and contributions from multiple and diverse funding sources from the private sector and the public sector (at federal, state, and local levels), has been approximately \$35.7 Million. Specifically in the last five years, COLN has secured funding from non-general revenue sources in the amount of:

- 2007 – \$1,876,010
- 2008 – \$2,097,924
- 2009 – \$1,906,873
- 2010 – \$2,585,513
- 2011 – \$1,692,062

These amounts do not reflect direct in-kind (e.g., office space, employees on loan, supplies, transportation, and others), or philanthropic financial contributions to COLN’s programs, and also, by association, the indirect funding of COLN’s partners own programs and projects. In addition, they do not reflect the countless hours devoted by volunteers within the communities served in support of programs, projects, events, and activities. Finally, they also do not reflect the funding provided by the College of Architecture in support of specific faculty and student activities.

(7) Consequences of Not Funding:

711 Texas A&M University

Loss of funding for COLN will result in inability to meet its original legislative intent. More specifically, a loss of funding would pose significant negative systemic impacts in the program's ability to:

- Continuously seek and acquire external funding for, and to provide management and oversight to, a wide range of initiatives, programs, projects, activities, and events aimed at Colonia individuals, families, and communities throughout the region served
 - Maintain the extensive network of strategic alliances and partnerships with local government, state, and federal agencies, and with profit and nonprofit organizations
 - Serve as a catalyst that promotes and facilitates the active involvement of Colonia residents in strengthening the social, economic, and environmental infrastructure of their communities
 - Maintain Texas A&M University's visible, active, respected, and cohesive institutional presence across the border as a land grant institution, which currently provides a portal of access and a bridge of connectivity to its entire education, research, service, and outreach resource base for Colonia residents and service providers
 - Deliver the curricula of the Texas A&M Promotora Training Academy (24 courses) in health prevention, self-improvement, workforce development and home improvements
 - Continue the development of the Water Filtration Pilot program, and its replication currently scheduled for Bexar, Travis, Webb, El Paso, Nueces and Hidalgo counties.
-

Schedule 10A: Reconciliation of Formula Strategies to NACUBO Functions of Cost
