83rd Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

718 Texas A&M University at Galveston

The Texas A&M System is governed by a Board of Regents. The current members of the Board of Regents are included in the Organizational Chart.

Robert Smith, III

Vice President, Texas A&M University and President/CEO, Texas A&M University Galveston

Special Purpose Mission

The coastal branch campus of Texas A&M University, Texas A&M University at Galveston (TAMUG), is a special purpose institution of higher education for undergraduate and graduate instruction in marine and maritime studies in science, engineering, and business and for research and public service related to the general field of marine resources. The mission of TAMUG is accomplished through an integrated program of undergraduate and graduate education delivered by world class faculty; maritime education and licensing programs (TAMUG's Texas Maritime Academy); scholarly research throughout all disciplines; and outreach programs for the public and K-12 science education.

As 70 percent of the earth's surface is covered by water, 90 percent of world trade is water borne, and 80 percent of the world's people live near the water, TAMUG graduates are in demand and better prepared to deal with the challenges of today and tomorrow through our specialized degree programs, our world class faculty with a low student to teacher ratio, a hands-on research experience by undergraduates and the rigorous experience of our Texas Maritime cadets. Graduates accept positions in the state's energy, shipping, port, and seafood industries.

There are over 35 TAMUG faculty actively participating in extramural research encompassing the areas of marine biology, marine sciences, marine environmental and conservation studies, marine/maritime engineering, computational chemistry/biochemistry, as well as being involved in maritime business, law, policy and management. Research is focused largely in the areas of bay and estuary ecosystems, coastal and beach processes, geochemical cycling in the marine/aquatic/atmospheric systems, marine life studies, offshore/deep-water environments and urban planning and sustainability. TAMUG's research is a vital component of the Tier I research conducted collaboratively with and independently of Texas A&M University in College Station.

The University's Texas Maritime Academy (TMA) is one of six state maritime academies in the United States and the only maritime academy located on the Gulf Coast. TMA is the only maritime academy that is a component of a major American research university. In addition to a degree from Texas A&M, TMA cadets graduate as licensed officers in the United States Merchant Marine or commissioned ensigns in the United States Coast Guard or United States Navy. Maritime graduates currently serve as boat captains for inland waterways, pilots for major American and foreign harbors, engineers for offshore energy exploration and development, and leadership positions within the maritime industries.

Economic Impact Creates Demand for TAMUG Students

The Houston metropolitan area, just a few miles north of TAMUG, comprises the largest petrochemical manufacturing area in the world. The area is the world's leading center for building oilfield equipment, and home to more than 3,000 energy-related establishments, including many of the top oil and gas exploration and production firms and petroleum pipeline operators. As of 2011, 23 companies on the Fortune 500 list have headquarters in Houston or the surrounding metropolitan region. The Houston Metropolitan Area Gross Metropolitan Product (GMP) ranks 5th in the United States at \$384 billion.

Texas is home to more deep-water ports than any other state in the nation. Included in this number are Houston, Galveston, Texas City, and Beaumont. Texas Ports impact the Texas, US and Global economy by carrying agricultural products from Texas farms and ranches to foreign countries; U.S. petrochemical products in and out of Texas; industrial and agricultural machinery in and out of Texas; shipments of goods for Wal-Mart and other major retailers; Gulf Coast seafood to consumers

83rd Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

718 Texas A&M University at Galveston

throughout Texas and the US; vacationers from Texas and surrounding states on cruise vacations; and foreign manufactured automobiles to dealers all over the country. The impact of these ports on Texas' economy is simply staggering. A 2012 study by Martin Associates states Houston ship channel-related businesses alone contributes 1,026,820 jobs throughout Texas, up from more than 785,000 jobs cited in a 2007 study. This activity helped generate more than \$178.5 billion in statewide economic impact, up from nearly \$118 billion. Additionally, more than \$4.5 billion in state and local tax revenues are generated by business activities related to the port, up from \$3.7 billion. The Houston ship channel alone spans 25 miles and serves more than 7,000 ships annually. It ranks #1 in the US for foreign waterborne tonnage for 14 consecutive years and #2 in US for total tonnage for 19 consecutive years.

Moreover, the scheduled 2014 completion of the Panama Canal Project, anticipates a dramatic increase in demand for our students. The Port of Houston is already experiencing an explosion of terminal, warehouse, and intermodal facility construction (\$1.4 billion Port of Houston terminal at Bayport) which will double its container capacity before the 2014 date.

TAMUG's degree programs, such as the new Master's degree in Maritime Administration and Logistics, are filling the positions that will be needed by this increased demand. The University produces:

- business graduates for port operations and maritime based industries with average starting salaries between \$45K \$55K
- maritime systems engineers with average starting salaries between \$65K \$75K
- licensed officers for the U. S. flag fleet through the Texas Maritime Academy with average starting salaries between \$50K and \$70K per year
- Over 95% of our graduates are placed within 90 days of graduation

Graduates of TAMUG are the catalysts for much of this extraordinary economic impact. We provide the ship's officers, and pilots who move ships on the world's oceans and between the ports and the open Gulf of Mexico. We provide the management professionals for ports throughout the state, and we do the cutting-edge research that ensures the safety and environmental friendliness of maritime commerce, as well as offshore oil and gas exploration and production.

World Class Researchers

During the summer 2010, TAMUG moved into the new gold LEED certified Oceans and Coastal Studies Building. This new state science complex is one of the finest research facilities for marine research in the United States and certainly the best on the Gulf Coast. It houses critical laboratories, such as the state and nationally certified Texas Seafood Safety Laboratory, the Laboratory for Oceanographic and Environmental Research, which has generated \$14.7 million in external funding expenditures, a new Sea Life Center with running seawater, and flex laboratories for visiting researchers from other Texas institutions. Of special interest is the TAMUG Sea Life Facility which is suited for sea-life rescue work. The new state-of-the-art facility serves as a resource for turtles, which need a place to recuperate after hospitalization. It is also a place where TAMUG students can learn about endangered turtles and the general public can view recovering turtles through protective glass, or online at www.galveston.com/turtlevideocam/or www.tamug.edu/sealife/turtlecam.html.

Texas A&M University, one of a few select schools that carries the rare designation of being a land grant, sea grant and space grant institution, has several researchers who have identified new marine species, and thus contributed greatly to advancing our knowledge of the biodiversity of ocean life. The Typhlata iliffei, a type of shrimp found in Bermuda caves, was discovered by and named for Tom Iliffe, a marine biologist at Texas A&M University-Galveston.

Iliffe, a marine biology professor at Texas A&M-Galveston, is known internationally as one of the world's foremost cave divers, and he is an expert on "blue holes," caves so named because from an aerial view, they appear as a blue circle dotting the ocean. Iliffe has explored at least 1,500 underwater caves, more than anyone in the world, and he has done so from the Italian coast to Australia and just about everywhere in between. Along the way, he has discovered more than 300 new marine species and had numerous ones named after him.

83rd Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

718 Texas A&M University at Galveston

The Center for Texas Beaches and Shores (CTBS) within Texas A&M University at Galveston is dedicated to the conservation and protection of the Texas shoreline, bays and waterways through research in cooperation with government and private sector agencies.

We seek to become the gateway for research on coastal sustainability and resiliency. The Texas Sustainable Coast Initiative is an Interdisciplinary Initiative supported by funds from various agencies including NOAA/TX Seagrant, TX General Land Office and Coastal Services Center/NOAA. It brings together partners from various research groups and institutions with the common goal of guiding and managing the growth along the Texas coast in a sustainable and equitable manner. The outcome of this initiative is the Texas Coastal Communities Atlas, an Internet-based spatial decision support system that allow users to identify and visualize critical issues related to numerous dimensions of development including environmental degradation, natural hazard risks, and significant changes in land use patterns. Users will be able to query data and create custom maps based on multiple development scenarios. Communities can use this educational tool to guide future decisions on growth in a sustainable manner such that the need for economic development is balanced with priorities associated with environmental protection and human health, safety, and welfare. The system will also help address important research questions related to where future growth will occur in the Texas coastal zone, the impact of this growth, and the usefulness of Web GIS in facilitating sustainability planning.

The Coastal and Wetlands Ecology Laboratory, examines the community-level interactions and processes that structure coastal ecosystems such as salt marshes, tidal mudflats, seagrass beds, and tidal freshwater wetlands. Particular interest lay in changes in trophic interactions following habitat restoration, nutrient enrichment, or other anthropogenic alterations. In addition, the lab investigates how plant and animal diversity influences wetland functions, such as nutrient cycling, nursery habitat, and water quality. Utilizing field experiments and diverse analytical procedures (stable isotopes, HPLC, stoichiometry), researchers investigate community dynamics in tropical, subtropical, and temperate environments. The ultimate goal is to incorporate our understanding of coastal ecosystem dynamics and processes into the management of restored and impacted habitats and to apply findings to the design and management of restored coastal wetlands, maintenance of water quality standards in local watersheds, and coastal habitat management in the face of near-term climate change and sea level rise.

Legislative Requests

In preparation of this legislative request, TAMUG has considered issues within the context of its special purpose mission and unique physical location and has requested the following:

Tuition Revenue Bond Debt Service

TAMUG is requesting authority to issue Tuition Revenue Bonds for two vital projects. Included in this Legislative Appropriations Request is the debt service required on these projects based on 6% rate for 20 years.

• Rehabilitation/Expansion of Instructional Facilities, Infrastructure, and Central Plant - Debt Service estimated at \$4,184,859

• TRB funding will be used to replace and repair the original campus infrastructure that has been in operation since the establishment of the TAMUG Mitchell Campus in the early 1970's and to expand infrastructure in preparation for additional critical instructional facilities. The Mitchell Campus Central Plant and utilities infrastructure was installed in 1976 and, at the time, was sufficient to accommodate the usage by three buildings. Since that time, minor upgrades have been made to the Central Plant and campus infrastructure, including a wastewater treatment plant, and chilled/hot water and electrical distribution systems, while adding over twelve new facilities. Today, the Central Plant and infrastructure systems provide services for fifteen facilities on campus, a training ship, a small boat basin and three residents halls off-campus resulting in the maximization of service capabilities for a system that is over thirty years old. Any plans for campus expansion will require a new central plant and utility equipment in addition to upgrades to the wastewater treatment plant. To meet TAMUG's Closing the Gaps projection of 3000 students by 2015, new classroom, lab, dining and residence facilities must be built, thus making the construction of a new Central Plant and supporting systems a requirement, not an option.

- Academic Building Debt Service estimated at \$4,010,490
- TRB funding will be used to design and construct a new Academic Building located on the west-end of the TAMUG quadrangle on the Mitchell Campus. The

83rd Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

718 Texas A&M University at Galveston

building is defined by three stories and landscaping. Academic space in the building will include a 1,500 seat theater, classrooms, computer labs and seminar rooms. Administrative spaces will include faculty/grad student offices, conference rooms and department head suites. The exterior of the building will primarily be masonry with punched windows in compliance with the TAMUG Master Plan. The project will close the quadrangle and create a pedestrian mall with a fire lane in its place. A landscaped courtyard will be developed with walkways around the building. The primary objective for seeking Tuition Revenue Bond funding for a new Academic Building is to provide space for the University's growth, particularly in Liberal Arts, Humanities, Maritime Studies and Economics. The facility will also significantly advance the campus' commitment to two new graduate programs, the Masters in Marine Resources Management and Masters in Maritime Administration and Logistics. The facility will enhance the capability of faculty in the Departments of General Academics and Maritime Administration (the primary building occupants), to offer excellent instruction both to majors and to students from other campus majors by fulfilling core curriculum requirements. At the same time, the building will be designed to enhance interdisciplinary faculty scholarship, facilitate creative work and foster excellence in graduate student training, all of which contribute to the University's national profile. This will position the campus to meet the THECB Closing the Gaps initiative of 3,000 students by 2015.

Center for Texas Beaches and Shores -

The Center for Texas Beaches and Shores (established by the 73rd Texas State Legislature) develops innovative technologies and methodologies to sustain and use the Texas Coast. Under the umbrella of the Center for Texas Beaches and Shores is the newly envisioned Texas Window to the Sea program that will provide other institutions in Texas access to, and funding for, research at the new Ocean and Coastal Studies Building (OCSB) at TAMUG – the largest, newest, state of the art coastal research complex on the Gulf Coast.

- Half of this special item's funding will be provided to personnel (faculty and researchers) at Texas institutions and universities (other than TAMUG) to utilize facilities and vessels in Galveston leveraging the states' \$53 million investment in the OCSB statewide.
- With this funding, four completely new research laboratories in the new OCSB in Galveston will be provided to outside investigators for this collaboration.
- The Texas Coastal Atlas developed at CTBS will be distributed statewide through cooperation with the Texas General Land Office.
- Research and logistic support for the recently formed 6-county coalition to study coastal surge barriers (Ike Dike and others) will be provided.
- CTBS continues to work with the Army Corps of Engineers and local Galveston County officials to study methodologies which will stabilize the coast and mitigate coastal erosion

The Center for Texas Beaches and Shores benefits the State /Region in a variety of ways.

- Coastal hazards (hurricanes, subsidence, erosion, wetlands loss, "dead zones", oil spills, and development) are all addressed by CTBS programs.
- A storm surge barrier to protect the enormous (nationally critical) Galveston Bay infrastructure (refineries, Port of Houston, NASA) has been proposed. An example is the Ike Dike. CTBS is already involved in this project and will provide support to the 6-county coalition studying this matter.
- Scientists from throughout Texas will have access to laboratories and vessels in Galveston significantly leveraging state resources and ultimately developing a statewide resource to managers and officials dealing with coastal issues.

Outcomes will be measured by external funding attracted, articles in newspapers and journals, public programs impacted, number of non-TAMUG professionals who participate, and utilization measures for the Texas Coastal Atlas.

Texas Institute of Oceanography-

The Texas Institute of Oceanography (TIO) was created in 1990 by the Texas Legislature to leverage State resources so as to develop technologies, statistical and physical models, and perform basic and applied research into global issues impacting Texas, including global change, fisheries management, deep ocean policy

83rd Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

718 Texas A&M University at Galveston

development for energy resources and engineering approaches to coastal lands, communities and industries. TIO also trains undergraduate, graduate and post-doctoral students in ocean science and engineering research.

• In the past 10 years, TIO has maintained a 7:1 leverage ratio of external to state funding, generating over \$34 million in external dollars. TIO submitted more than 730 proposals to federal, state and other agencies to support its mission.

• In the past 10 years, 55 undergraduate scholars, 30 graduate students and 22 post doctoral research scientists have received TIO funds.

• State funding for TIO is used to leverage funding of external proposals, provide undergraduate, graduate and post-doc support, and provide access to specialized laboratories that support programs of numerous Texas state agencies – such as the Seafood Safety Laboratory of the Texas Dept. of Health.

• This year, with the opening on the TAMUG campus of the largest ocean research facility on the Gulf Coast and the opening of the Powell Engineering Complex, the reach and impact of TIO can expand into new areas where modern science and engineering approaches can be leveraged through this 38% increase in exceptional item funding.

TIO benefits the State and the nation in a variety of ways.

• Hurricane surge mitigation, coastal development, sea level rise, fisheries management, offshore resource development, and endangered species/National Marine Sanctuary research are all addressed by scientists in TIO.

- The recent addition of engineering expertise in TIO has increased the potential for Texas to benefit from new ocean based energy technologies including wind and ocean current turbines, biofuels and offshore oil and gas production. The increased funding requested will add engineering to the list of areas where leverage can be obtained from external sources of state funding.
- Our most important measure of success in TIO is fund leverage and number of students supported however the usual measures of scientific papers, public outreach, and community service are also applied.

In accordance with our special purpose mission illustrated above, TAMUG has excelled this past biennium in educating students and conducting ocean and coastal research in areas critical to the state. While always strong in science research, during this biennium, TAMUG has made great progress in strengthening maritime research in engineering and marine policy areas. Of particular relevance has been the leadership provided by Dr. Bill Merrell, the George P. Mitchell '40 Chair in Marine Sciences, and Dr. Bill Seitz, TAMU System Regents Professor, in the establishment of a consortium of five coastal counties. Governor Perry encouraged the creation of this consortium to address storm surge issues and the protection of life and critical coastal assets, particularly those located on the strategically important Houston ship Channel, from the storm surges of future hurricanes and storms that hit the Texas coast.

The Ike Dike, conceived by Professor Bill Merrell, is a coastal barrier that, when completed, would protect the Houston-Galveston region including Galveston Bay from hurricane storm surge.

The project would extend the protection afforded by the existing Galveston Seawall along the rest of Galveston Island and along the Bolivar Peninsula, with a 17ft high revetment near the beach or raising the coastal highways. The addition of flood gates at Bolivar Roads, the entrance to the Houston, Texas City, and Galveston ship channels, and at San Luis pass would complete a coastal spine that would provide a barrier against all Gulf surges into the Bay. Merrell argues that the Ike Dike could be built using existing, proven technology such as the gates and barriers currently used in the Delta Works project located in the Netherlands.

The Houston/Galveston area is home to the largest and most important concentration of petroleum refining and petrochemical processing plants in the United States and the Port of Houston is the second busiest port in the nation, but the region is hit by a major hurricane about once every 15 years. Hurricane Ike caused about \$30 billion in damages, loss of life and considerable damage to the natural environment, yet it was not nearly as destructive as future hurricanes could be.

The Perryman Report estimates that a "Katrina-like" storm would cause aggregate losses to the Texas economy of \$73 billion in gross product, \$61.3 billion in income and 863,000 jobs. The economic damage to the United States would be nationally impactful. The Governor's Commission on Recovery and Renewal reviewed the Ike Dike concept and recommended that a six county public corporation be formed on the upper Texas coast to deal with storm surge and regional recovery strategies.

83rd Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

718 Texas A&M University at Galveston

Texas A&M University System-wide Funding Issues and Needs

Base Funding – Our highest priority is funding the basic, on-going operations of our institutions and agencies. Given current economic conditions, we request that the Legislature maintain our institutions' and agencies' base funding and put any new funds into the formulas to fund the costs of providing education and support for the additional students enrolled since the last base period, and to fund the facilities costs of our institutions and agencies.

Incentive Funding – We support increased accountability and performance incentives through outcomes-based funding; however, base funding, including enrollment growth through the current formulas, should be funded first.

Higher Education Group Health Insurance – We request funding to cover any increases in employees and retirees enrolled in our group health insurance program and increases in health care costs. Additionally, we request funding to restore some increment of the differential funding level for our employees as compared to the state employees in the ERS group insurance plan.

Student Financial Aid – Increased support for student financial aid is vitally important for our students and families. However, since it is a method of paying for tuition and fees and does not increase much needed funding for the universities, we request any increase in financial aid not be made at the expense of formula funding.

Organizational Changes

During the past biennium TAMUG has made significant organizational progress with the addition of Admiral Robert Smith III, President and CEO of Texas A&M University Galveston Campus and Vice President of Texas A&M University. Under his leadership organizational changes have been made to better align this campus with our parent campus in College Station. Through the elimination of the previous Chief of Staff position, TAMUG has enhanced several positions and hired two additional support positions for the office of the President. Communication channels with peers in College Station are clearer and quicker.

Additionally, we have hired a full-time development officer, financially supported by the Texas A&M Foundation, in support of our goal to garner more development funds.

Educational Outreach Programs

Finally, no status report would be complete without recognizing the tremendous support being provided by TAMUG's educational outreach division in meeting the Texas mandate to improve K-12 science education. Our outreach camp program has welcomed well over 13,000 middle and high school students. With no state support, TAMUG's educational outreach division would not be able to provide the plethora of science programs to children and teachers. Each summer approximately 900 students attend Sea Camp for a weeklong hands-on science program. Younger children (six years through eleven years of age) attend a day program known as SeaCampus Kids to motivate and prepare them to excel in science and mathematics in their local schools. In conjunction with Sea Camp, approximately 80 volunteer teachers are trained in enhanced science teaching. Every sixth grader in Galveston visits the campus each year for a day of science, and the campus has developed lesson plans and virtual science tours on the internet for use by teachers in their home classrooms. Science workshops were conducted in approximately 140 public and private schools this past year. TAMUG also hosts large numbers of public school field trips, providing science instruction in the marine and coastal environments of Galveston Island and adjacent areas using the wetlands center, campus vessels and graduate student guides.

10% General Revenue Reduction Impact

The impact of a 10% General Revenue reduction is especially challenging coming on the heels of the reductions from the previous biennium. The result would be

83rd Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

718 Texas A&M University at Galveston

cancellation of class sections, increased class sizes, and possible reductions in retention programs such as writing, math or academic enhancement services. To address the ten percent general revenue-related base reduction, TAMUG may have to eliminate positions or expand our current limited hiring freeze. Additionally, we continually work to identify efficiencies that reduce operational costs.

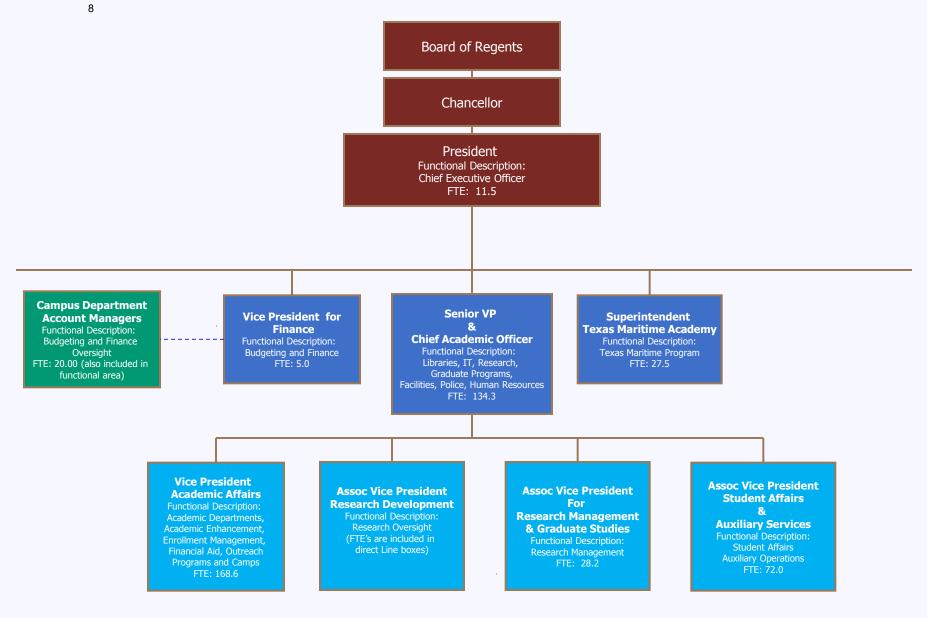

Background Checks

Texas A&M University at Galveston's statutory authority to conduct background checks on employees of the university comes from Texas Government Code Chapter 411 Subchapter (f) and Texas Education Code Section 51.215. It is Texas A&M's policy and practice to conduct such checks on all employees being considered for positions at Texas A&M University.

Summary

TAMUG is a jewel on the Gulf Coast that brings unique and vital contributions to Texas, the nation and the world. Our graduates, staff and world class faculty are a vital marine and maritime educational and research resource for a state with 3,359 miles of coastline, the second largest petrochemical complex in the world, and home to six of the top ten ports for inbound and outbound tonnage in the United States.

Organizational Structure – Texas A&M University at Galveston

CERTIFICATE

Texas A&M University Galveston Agency Name

This is to certify that the information contained in the agency Legislative Appropriations Request filed with the Legislative Budget Board (LBB) and the Governor's Office of Budget, Planning and Policy (GOBPP) is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the GOBPP will be notified in writing in accordance with Article IX, Section 7.01 (2012-13 GAA).

CODE	DESC	RIPTION	Exp 2011	Est 2012	Bud 2013	BL 2014 ⁽¹⁾	(1) BL 2015

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium. The Teaching Experience Supplement formula provides an additional weight of 10 percent to lower and upper division semester credit hours taught by tenured and tenure-track faculty.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2014-15 because amounts are not determined by institutions.

TOTAL, METH	HOD OF FINANCE (EXCLUDING RIDERS)	\$2,542,450	\$2,585,070	\$2,612,320	\$0	\$0
FULL TIME E	QUIVALENT POSITIONS:	62.5	60.4	60.4	60.4	60.4

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model. The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2014-15 because amounts are not determined by institutions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the Texas Institute of Oceanography is to facilitate research that attracts federal and non-state support. TIO funds:

• Support the marine sciences/oceanography programs at Texas A&M University, Texas A&M University at Galveston, and the University of Texas

• Are used to leverage research (external grants 7 to 1; state grants 5 to 1)

• Grants have included ocean circulation/weather patterns, nearshore processes and coastal erosion, estuarine and coastal water quality, seafood safety and management of commercial fisheries.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Additional information for this strategy is available in Schedule 9, Special Item Information.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Institutional Enhancement Funds are a vital funding source for Texas A&M at Galveston. These funds are used to support all appropriately related strategies but mainly supporting salaries in the Operations Support and E&G Space Support strategies. Salaries comprise 90% of the state appropriated budget excluding debt service. The only exceptions are in two special line items where the funding supports other operation expenses. Any reduction in Institutional Enhancement funds would cut at the core of TAMUG's teaching mission and would impact teaching loads, class sizes and possibly reduce some programs and class offerings.

DESCRIPTION / JUSTIFICATION:

1. Major Accomplishmets & Two Year Goals

* Development of Texas Coastal Atlas - The purpose of this web based map is to provide geographic information to municipalities that can be used to help make more informed decisions about development, furture planning, and response to emergency situations such as hurricanes. It is used to get answers to questions for a specific area or topic that involves a geographic dimension.

* Began planning for the Development of Coastal Hurricane Surge Protection Project - Encouraged by Governor Perry in reponse to Hurricane Ike to research hurricane surge protection for Houston, Galveston, the Ports of Houston and Galveston and the communities along Galveston Bay.

*Coastal hazards (hurricanes, subsidence, erosion, wetlands loss, "dead zones", oil spills, development) are all addressed by CTBS

Goals:

(a)complete a recommended proposal for a comprehensive surge protection barrier. This will require

*Engineering design studies

*Environemtal impact studies

*Future coastal development studies

*Travel required to study other barriers already implemented

2. Special Item was established by 73rd Legislature but never funded

3. Not eligible to be funded under formula

CODE DESCRIPTION		Excp 2014	Excp 2015
4. N/A			

5. Never funded - projects under the umbrella of the Center for Texas Beaches and Shores have been started or partially sutained using outside grants and limited other resources.

This funding request is critical to TAMUG's ability to respond to the need for reasearch culminating in a recommendation for a Coastal Hurricane Surge Protection System for the state of Texas. Funding will support the two years goals listed above and provide the ability to leverage state dollars for new grant opportunities.

EXTERNAL/INTERNAL FACTORS:

The Coastal Atlas will provide an easily accessible, graphically represented, interactive database on environmental, hazard, and land use related issues for local communities. Specifically, the project will create an Internet-based spatial decision support system that will allow users to identify and visualize critical hotspots related to environmental degradation, natural hazard risks, and significant changes in land use patterns. In addition, users will be able to query data and create custom maps based on multiple development scenarios. Communities will be able to use this educational tool to guide future decisions on growth in a sustainable manner such that the need for economic development is balanced with priorities associated with environmental protection and human health, safety, and welfare. The system will also help address important research questions related to where future growth will occur in the Texas coastal zone, the impacts of this growth, and the usefulness of WebGIS in facilitating sustainable planning.

The Coastal Hurricane Surge Protection Project can impact the largest petrochemical complex in the world and the one of the largest ports in the world by promising a solution to help mitigate the risk associated with development in storm risk areas.

IETHOD OF FINANCING:			
1 General Reve	nue Fund	300,000	300,000
TOTAL, METHO	D OF FINANCING	\$300,000	\$300,000

DESCRIPTION / JUSTIFICATION:

1. Major Accompishments

The Texas Institute of Oceanography (TIO) was created in 1990 by the Texas Legislature to leverage State resources so as to develop technologies, statistical and physical models, and perform basic and applied research into global issues impacting Texas, including global change, fisheries management, deep ocean policy development for energy resources and engineering approaches to coastal lands, communities and industries. TIO also trains undergraduate, graduate and post-doctoral students in ocean science and engineering research.

• In the past 10 years, TIO has maintained a 7:1 leverage ratio of external to state funding generating over \$34 million in external dollars. TIO submitted more than 730 proposals to federal, state and other agencies to support its mission.

• In the past 10 years, 55 undergraduate scholars, 30 graduate students and 22 post doctoral research scientists have received TIO funds.

2. The Texas Institue for Oceanography was establised in 1990 with initial funding of \$650K per year. Current funding is \$\$352K per year.

3. Not eligible under formula

4. State funding is used to leverage funding of external proposals, provide undergraduate, graduate and post-doc support, and provide access to specialized laboratories such as the Seafood Safety Laboratory of the Texas Dept. of Health.

5. Without continued support we would be unable to meet the legislatively mandated maritime research mission of the university resulting in a loss of research opportunities for faculty, research staff and graduate student assistants. TAMUG would be unable to fulfill commitments to the conservation of the Gulf of Mexico. This would result in the loss of significant amounts of Federal Funds.

EXTERNAL/INTERNAL FACTORS:

83rd Regular Session, Agency Submission, Version 1

Automated Budget and Evaluation System of Texas (ABEST)

Agency code: 718

Agency name:

Texas A&M University at Galveston

CODE DESCRIPTION

Excp 2014 Excp 2015

Hurricane surge mitigation, coastal development, sea level rise, fisheries management, offshore resource development, and endangered species/National Marine Sanctuary research are all addressed by scientists in TIO.

The recent addition of engineering expertise in TIO has increased the potential for Texas to benefit from new ocean based energy technologies including wind and ocean current turbines, biofuels and offshore oil and gas production. The increased funding requested will add engineering to the list of areas where leverage can be obtained from external sources from State funding.

Our most important measure of success in TIO is fund leverage and number of students supported – however the usual measures of scientific papers, public outreach, and community service are also applied.

	Te	xas A&M U	J niversity at G	alveston			
CODE DESCRIPTION						Excp 2014	Excp 2015
	Item Name: Item Priority:	Rehabil 3	itation/Expansi	on of Instructional	Facilities, Infrastructure	and Central Plant	
Includes Funding for the Following	Strategy or Strategies:	02-01-02	Tuition Reve	enue Bond Retirem	ent		
BJECTS OF EXPENSE: 2008 DEBT SERVICE						4,184,859	4,184,859
TOTAL, OBJECT OF	EXPENSE					\$4,184,859	\$4,184,859
IETHOD OF FINANCING:							
1 General Revenue F	Fund					4,184,859	4,184,859
TOTAL, METHOD OF	F FINANCING					\$4,184,859	\$4,184,859

DESCRIPTION / JUSTIFICATION:

Debt Service required on \$48M requested TRB project. Tuition Revenue Bond funding is sought to address major infrastructure deficiencies to a utility system that was constructed as part of the original campus infrastructure in the early to mid 1970's. By doing so will position the campus to meet THECB Closing the Gaps initiative of 3000 students by 2015.

Debt service requested for the 2014-15 biennium for the proposed project(s) is based on an interest rate of six percent for 20 year bonds.

EXTERNAL/INTERNAL FACTORS:

The Mitchell Campus Central Plant and utilities infrastructure was installed in 1976 and, at the time, was sufficient to accommodate the usage by three buildings. Since that time, minor upgrades have been made to the Central Plant and campus infrastructure, including a wastewater treatment plant, and chilled/hot water and electrical distribution systems while adding over twelve new facilities. Today, the Central Plant and infrastructure systems provide services for fifteen facilities on campus, a training ship, a small boat basin and three residents halls off-campus resulting in the maximization of service capabilities for a system that is over thirty years old. Any plans for campus expansion will require a new central plant and utility equipment in addition to upgrades to the wastewater treatment plant. To meet TAMUG's Closing the Gaps projection of 3000 students by 2015, new classroom, lab, dining and residents facilities must be built thus making the construction of a new Central Plant and supporting systems a requirement, not an option.

Through TAMUG's commitment to the State's Closing the Gaps initiative, TAMUG's strategic plan calls for growing the campus to 3000 students by 2015 with particular emphasis on minority student enrollment. However, the current classroom and teaching laboratory functionality of the campus is threatened by inadequate size and the deteriorating and inadequately sized campus infrastructure and Central Plant. TAMUG projects a record enrollment of undergraduate students in Fall 2012 and also needs to accommodate teaching and research space for graduate-level faculty who will teach and lead students in masters and doctoral degree programs in marine biology. Inadequate instructional and support facilities pose a significant threat to TAMUG's ability to fulfill its commitment to the Closing the Gaps initiative and to expanding graduate education.

83rd Regular Session, Agency Submission, Version 1

Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/15/2012** TIME: **10:51:15AM**

1 General Revenue	e Fund	4,010,490	4,010,490
TOTAL, METHOD	OF FINANCING	\$4,010,490	\$4,010,490

DESCRIPTION / JUSTIFICATION:

Debt Service required on \$46M Classroom Building to include a 1500 seat theater, classrooms, computer labs and seminar rooms. Administrative spaces will include faculty/grad student offices, conference rooms and department head suites.

The primary objective for seeking Tuition Revenue Bond funding for a new Academic Building is to provide space for the University's growth, particularly in Liberal Arts, Humanities, Maritime Studies and Economics. The facility will also significantly advance the campus' commitment to two new graduate programs including the Masters in Marine Resources Management and Masters in Maritime Administration and Logistics. The facility will enhance the capability of faculty in the Departments of General Academics and Maritime Administration (the primary building occupants), to offer excellent instruction both to majors and to students from other campus majors by fulfilling core curriculum requirements. At the same time, the building will be designed to enhance interdisciplinary faculty scholarship, facilitate creative work and foster excellence in graduate student training, all of which contribute to the University's national profile. Doing so will position the campus to meet the THECB Closing the Gaps initiative of 3000 students by 2015.

Debt service requested for the 2014-15 biennium for the proposed project(s) is based on an interest rate of six percent for 20 year bonds.

EXTERNAL/INTERNAL FACTORS:

Major accomplishments to date and expected over the next two years: Year established and funding source prior to receiving special item funding: Formula funding: Non-general revenue sources of funding: Consequences of not funding:

B. Assessment of Fiscal Year 2010 - 2011 Efforts to Meet HUB Procurement Goals

Attainment:

Agency 718 exceeded one of three, or 33.3% of the applicable statewide HUB procurement goals in FY 2010 and exceeded three of five, or 60% of the applicable statewide HUB procurement goals in FY 2011.

Applicability:

Due to the nature of procurement needs, Heavy Construction, Building Construction and Special Trade were not applicable to Agency 718 in FY 10. The procurement category Heavy Construction for Agency 718 was not applicable in FY 11 due to a shft in procurement needs for the given year.

Factors Affecting Attainment:

In 2010, due to the nature of the Professional Services required, the goal for this procurement category was not meet. In 2011, the goal of "Building Construction" category was not met due to the limited size and scope of the university's strategic building plan.

"Good-Faith" Efforts:

Agency 718 made the following good faith efforts to comply with statewide HUB procurement goals in FY 2010-2011:

* Agency 718 collaborated with other TAMUS members as well as other state agencies to encourage participation in procurement opportunities through forums and,

* systematically deployed pre-bid/proposal meetings that ensured information dissemination that reflected the university's procurement and HUB requirements.

Agency 718 Texas A&M University at Galveston **Tuition Revenue Cost Per Total Project Code: Project Priority: Bond Request Total Project Cost Gross Square Feet** \$ 1 2 48,000,000 \$ 48,000,000 \$ 0 Name of Proposed Facility: **Project Type:** Rehab/Expansion Expansion **Location of Facility: Type of Facility:** Mitchell Campus Infrastructure **Project Start Date: Project Completion Date:** 09/01/2012 08/31/2014 Net Assignable Square Feet in **Gross Square Feet:** Project 0 0

Project Description

Repair and expand campus infrastructure in operation since establishment of the campus.

Originally installed in 1976, it was sufficient to accommodate 3 buildings. Since that time, upgrades have been made, including a wastewatertreatment plant, chilled/hot water and electrical distribution while adding over 12 new buildings. Today, these same systems are maximized serving 18 buildgs, a training ship, and marina. Campus expansion will require a new central plant and utility equipment in addition to upgrades to the wastewater treatment plant. To meet TAMUG's Closing the Gaps projection of 3000 students by 2015, new classroom, lab, dining and residents facilities must be built.

Schedule 8A: Tuition Revenue Bond Projects

Gross Square Feet: 180,000	Net Assignable Squar Project 112,000	e Feet in				

Project Description

Design and construct a new Academic Building located on the Mitchell Campus. The building is defined by three stories and landscaping. Academic space in the building will include a 1500 seat theater, classrooms, computer labs and seminar rooms. Administrative spaces will include faculty/grad student offices, conference rooms and department head suites.

This Building will provide space for the University's growth, particularly in Liberal Arts, Humanities, Maritime Studies and Economics. The facility will also significantly advance the campus' commitment to two new graduate programs including the Masters in Marine Resources Management and Masters in Maritime Administration and Logistics. Doing so will position the campus to meet the THECB Closing the Gaps initiative of 3000 students by 2015.

Special Item: 1 Coastal Zone Laboratory

(1) Year Special Item: 1973

(2) Mission of Special Item:

The mission of the Coastal Zone Laboratory (CZL), which is associated with the Laboratory of Oceanographic an Environmental Research, is to facilitate and coordinate technical know-how to University faculty, especially those in the Marine Sciences and Marine Biology Departments through laboratory instrumentation support, training and advising, which helps to foster scientific research in the Coastal Zone. The goals and objectives of the CZL are three fold: 1) Provide scientific expertise of faculty and students to respond to important problems primarily facing the Texas Coastal Zone. 2) Educate and train students in solving environmental problems. 3) Provide vital health, economic data and expertise on coastal problems to Texas regulatory agencies.

(3) (a) Major Accomplishments to Date:

This funding has allowed graduate and undergraduate students to conduct research in numerous projects that resulted in approximately 10-12 peer-reviewed publications per year, in which students were co-authors. This is an extraordinary productivity that could not be achieved without the existence of CZL.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The original mission of the CZL was to manage and coordinate research, advisory and public service functions initiated by the faculty of Texas A&M University at Galveston. Due to the relatively small amount of funding and changing needs of modern Texas, the focus of CZL changed to research, teaching, and public service on problems and solutions related to contamination of the marine environment. The unique geographical setting of Texas A&M University at Galveston provides the CZL with unequaled opportunity to carry out its mission. The CZL provides scientific expertise as well as opportunities for specialized training of undergraduate and graduate students in the areas of coastal process, marine seafood safety, and marine environmental risk analysis and contingency planning.

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Formula Funding: N/A

(6) Non-general Revenue Sources of Funding:

0

(7) Consequences of Not Funding:

A reduction or elimination of funding for this special item would result in the loss of educational and training opportunities for many graduate and undergraduate students. The upper Texas coast would see a reduction in the services provided by the only laboratory specializing in the fate of trace metals and toxic contaminants in Texas waters which effect consumable seafood. Examples are statistics on the health of Galveston Bay shrimp and oyster catches.

Special Item: 2 Texas Institute of Oceanography

(1) Year Special Item: 1990

(2) Mission of Special Item:

The mission of the Texas Institute of Oceanography (TIO) is to provide focus for research of the Gulf of Mexico coast, to manage and coordinate the academic marine research programs of the State of Texas, to assure scientists of Texas universities of suitable multi-user facilities, to manage federal programs, and to provide the research and technological base for the development of marine-related businesses in the State of Texas and Gulf of Mexico.

The mission of the Texas Institute of Oceanography (TIO) is to provide focus for research of the Gulf of Mexico coast, to manage and coordinate the academic marine research programs of the State of Texas, to assure scientists of Texas universities of suitable multi-user facilities, to manage federal programs, and to provide the research and technological base for the development of marine-related businesses in the State of Texas and Gulf of Mexico.

(3) (a) Major Accomplishments to Date:

• In the past 10 years, TIO has maintained a 7:1 leverage ratio of external to state funding generating over \$34 million in external dollars. TIO submitted more than 730 proposals to federal, state and other agencies to support its mission.

• In the past 10 years, 55 undergraduate scholars, 30 graduate students and 22

post doctoral research scientists have received TIO funds.

• State funding for TIO is used to leverage funding of external proposals, provide undergraduate, graduate and post-doc support, and provide access to specialized laboratories that support programs of numerous Texas state agencies – such as the Seafood Safety Laboratory of the Texas Dept. of Health.

The Postdoctoral Fellowship program, started in FY99, has successfully supported 22 Fellows since its inception.

The Undergraduate Program, also started in FY99, has allowed almost 60 students to conduct independent research projects. Many of these projects have resulted in publications.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

This year, with the opening in Galveston of the largest ocean research facility on the Gulf Coast and the opening of the Powell Engineering Complex, the reach and impact of TIO can expand into new areas where modern science and engineering approaches can be leveraged through this increase in exceptional item funding.

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Formula Funding: N/A

(6) Non-general Revenue Sources of Funding:

0

(7) Consequences of Not Funding:

Texas A&M University at Galveston would be unable to meet the legislative mandated maritime research mission of the University. There would be a loss of opportunities for faculty, research staff, and undergraduate and graduate students. Loss of state funding would result in a significant loss of federal funding.

Special Item: 3 **Institutional Enhancement**

(1) Year Special Item: 2000

(2) Mission of Special Item:

To supplement an institution's base funding for core academic operations. This funding enables Texas A&M to seek levels of programs and academic excellence beyond that this is provided by our basic formula funding.

(3) (a) Major Accomplishments to Date:

Since receiving institutional enhancements funds in 2000, TAMUG enrollment has increased from 1288 to 2034 in fall of 2011, an increase of 58%. Demographics have changed as well. Black enrollment has increased 200% from 17 to 51; Hispanic enrollment 181% from 107 to 301; and Asian enrollment 100% from 0 to 33 in fall of 2011. Funds have also been used to help expand or add degree programs. Examples of expanded programs are: 1) Maritime Administration Degree, 2) Maritime Transportation Degree, 3) Marine Engineering Degree and 3) Texas Maritime Academy License Option Program. Examples of new programs are 1) Marine Biology Masters and Ph. D. Program, 2) Maritime Administration and Logistics Masters and 3) University Studies – Marine Recreation Management. Funding has also allowed us to design creative partnerships such as 1) Master of Science Education with TAMU, 2) Doctor of Coastal Systems Science with TAMU-Corpus Christi, and 3) the Coastal Bend Initiative with TAMU-Corpus Christi and UT-Brownsville. TAMUG has also added a new freshman year experience, the Maritime Studies Pilot Program which is a partnership with the Tall ship Elissa in Galveston.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Institutional Enhancement funding is especially important to the small institutions such as Texas A&M at Galveston (TAMUG). This funding supports basic academic needs of the university. Folding this funding into the formula would harm TAMUG as it would redistribute this funding at a smaller amount to the smaller institutions. Any reduction of this funding would require reduction in teaching salaries, increase in class size and possible elimination of some course offerings

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Formula Funding: N/A

(6) Non-general Revenue Sources of Funding:

(7) Consequences of Not Funding:

Not funding this special item would severely impact our institution's ability to fund the core academic costs of the university. A reduction to these funds would overall negatively impact access, success, and retention of students.
