

LEGISLATIVE APPROPRIATIONS REQUEST

For Fiscal Years 2014 and 2015

*Submitted to the
Governor's Office of Budget and Planning
and the Legislative Budget Board*

by

TEXAS A&M FOREST SERVICE

August 16, 2012

CERTIFICATE

Agency Name TEXAS A&M FOREST SERVICE

This is to certify that the information contained in the agency Legislative Appropriations Request filed with the Legislative Budget Board (LBB) and the Governor's Office of Budget, Planning and Policy (GOBPP) is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the GOBPP will be notified in writing in accordance with Article IX, Section 7.01 (2012-13 GAA).

576 Texas A&M Forest Service

TEXAS LEADERSHIP

One of the primary roles of all branches of government is to help ensure the safety of its citizens. Nowhere is that dedication more evident than in the Texas Legislature and state leadership's support and direction to the Texas A&M Forest Service (TFS).

- The 81st Legislature provided an additional \$8.5 million per year and 52 firefighters to TFS to fund a portion of the Texas Wildfire Protection Plan.
- The 82nd Legislature provided \$121 million in supplemental funding to TFS during the regular and special sessions to cover the existing and on-going wildfire response costs related to the historic drought and wildfire season.
- The 82nd Legislature further clarified the wildfire and all-hazard emergency response authority of the Texas A&M Forest Service.
- In September of 2011, Gov. Rick Perry, Lt. Gov. David Dewhurst and Texas House Speaker Joe Straus made \$5 million available to TFS for the purpose of providing emergency grants to volunteer fire departments for protective gear, firefighting equipment repairs and operating expenses resulting from the unprecedented wildfire season.

As the state endured the worst wildfire season in Texas history -- Texas leadership, legislators and elected officials have been there to support this agency, the firefighters and citizens of Texas.

Thank you.

WILDFIRES

Wildfire activity in Texas has continued to increase over the past two decades with significant fire seasons occurring in 10 of the last 15 years, requiring the extended mobilization of fire suppression resources into high risk areas. According to agency weather and fuel experts, the state can expect this trend to continue for a number of years to come. Continuing population growth and development, as cities and towns expand into previously rural areas, places more Texas citizens at risk every year. Wildfire occurrence statistics in Texas show that over 90 percent of all the wildfires are caused by human activity and that over 80% of all Texas wildfires occur within two miles of a community. This drastically changes the way Texas must respond.

The 2011 Fire Season was the worst in Texas history. It was fueled by the hottest summer on record and a prolonged, historic drought. More than 31,000 wildfires burned 4 million acres of land, destroyed 2,947 Texas homes and claimed 10 lives. Records set in 2011 include:

- Ten of the 14 largest documented wildfires in state history
- The most homes destroyed by a single wildfire – Bastrop Complex
- The largest wildfire to ever burn in East Texas – Bear Creek Complex
- Nine Southern Plains Wildfire Outbreaks – Texas Firestorms
- The most acres burned in a single season

But the record to be the most proud of:

- The most homes saved by firefighters in a single fire season – 38,962

In order to sustain such a prolonged and active response, local, state and national fire communities worked together. Under the leadership of TFS, tens of thousands of firefighters created a network of protection across Texas in the complex response. In total, 16,690 responders were mobilized by TFS to help protect Texas and Texans.

Administrator's Statement

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

576 Texas A&M Forest Service

Responders from every state in the nation stood shoulder-to-shoulder with local firefighters and Texas A&M Forest Service personnel.

WILDFIRE RESPONSE – TIERED APPROACH

Texas uses a tiered approach to wildfire response and suppression, relying on strong interagency partnerships and working relationships. Local fire departments and counties are the first responders, with state response being activated as fires or conditions exceed the local capacity to control. TFS is the lead state agency for wildfire response in Texas, with strategically placed resources across the state. TFS Predictive Services and Planning & Preparedness departments monitor wildfire occurrence and weather conditions statewide. As fire activity increases, resources from state agencies, such as the Texas Department of Public Safety, the Texas Department of Transportation and Texas Military Forces are mobilized through the Texas Division of Emergency Management. As the capacity of state resources is exceeded, out-of-state resources are brought in to meet essential needs.

One recent innovation to the state's response has been the increased use of local resources. Over the last five years, TFS and the Texas Division of Emergency Management have been working to make statewide use of local fire and emergency management resources. Utilizing Texas emergency responders and equipment from unaffected areas of the state, TDEM and TFS are creating the capacity to meet essential emergency response needs while reducing the state's reliance on out-of-state resources. The Texas Intrastate Fire Mutual Aid System (TIFMAS) and the Regional Incident Management Team (RIMT) programs are clear examples of Texans helping Texans.

TEXAS WILDFIRE PROTECTION PLAN

TFS delivers wildfire response and protection through the Texas Wildfire Protection Plan (TWPP). TFS first launched TWPP as a pilot program more than a decade ago and it is now a national model for state wildfire protection. TWPP is a tested and proven emergency response model emphasizing ongoing analysis, mitigation, prevention and preparation, followed by a coordinated and rapid response. In 2009, state lawmakers took the first step in a multi-staged expansion of the state's wildfire protection capabilities by funding an additional \$8.5 million per year for the TFS Texas Wildfire Protection Plan.

There is no question the additional 52 TFS firefighters and equipment, provided by the 81st Legislature and sustained by the 82nd Legislature, helped meet the tremendous wildfire response demands in 2011. However, of the 16,690 firefighters mobilized by the state of Texas last year, 13,570 were brought in from out of state. The time has come to move forward with the next step in increasing the state's wildfire response capabilities to provide more timely and effective wildfire response and to further reduce the state's reliance on costly out-of-state resources.

LOCAL RESPONDERS

Local fire departments are the first line of defense against wildfires across the state. Currently there are 1,928 fire departments in Texas - 1,497 of these are fully volunteer. Of the 60,000 local firefighters in the state, nearly 40,000 are volunteers; dedicated men and women who serve their state and communities, but have other jobs. Many departments operate with aged, battle-worn equipment and very limited funding.

TFS administers a number of fire department assistance programs that provide training, equipment and grants to help build their capacity to respond.

Rural VFD Assistance Program:

The Rural Volunteer Fire Department Assistance Program, one of the largest TFS-administered programs, was created in 2001 by the 77th Legislature. This program provides pass-through grants and is funded through a special assessment to the insurance industry. Since 2002, grants for more than 1,400 fire trucks, 59,536 sets of protective gear (structural and wildland) and 44,288 training tuitions have been awarded to volunteer fire departments across the state. The needs are great as evidenced by the \$131 million in unfunded requests. The 2012 – 13 budget reduction to grants was \$32.5 million – limiting grants to volunteer fire departments to \$7 million per

Administrator's Statement

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

576 Texas A&M Forest Service

year. In distributing these funds to VFDs, TFS has placed a priority keeping firefighters safe by focusing on training, protective equipment and clothing. During two of the three FY2011 funding meetings, TFS approved ALL personal protective equipment requests on file. Grants for much needed large equipment and vehicles have been put on hold until funding is restored.

Rural VFD Insurance Program:

The 77th Legislature also created the Rural VFD Insurance Program, which provides pass-through grants to volunteer fire departments for workers compensation and disability insurance. Program funds are provided by a 2% fireworks sales tax. This program helps provide workers compensation insurance coverage for approximately 10,000 volunteer firefighters each year. The 2012-13 budget reduction in program grants was \$100,000.

VFD Emergency Assistance Grants – State:

In September of 2011, Gov. Rick Perry, Lt. Gov. David Dewhurst and Texas House Speaker Joe Straus made \$5 million available to help volunteer fire departments pay for protective gear, repairs to firefighting equipment and increased operating expenses resulting from the unprecedented wildfire season. The funds were administered by TFS and distributed as grants to volunteer fire departments. Grant applications were prioritized for volunteer fire departments most impacted by the 2011 wildfires. In all, 712 departments received assistance. Thank you.

VFD Emergency Assistance Grants – Private:

At the request of a state legislator, TFS also established the VFD Emergency Assistance Fund to help volunteer fire departments. Tax deductible donations from private sources were collected and allocated to donor-specified departments, counties or regions. All proceeds are distributed as VFD grants for firefighting expenses. To date, \$1,312,549 in private donations have been received from donors including Chevron, Shell, State Farm and the Meadows Foundation.

REGIONAL RESPONDERS

Texas Intrastate Fire Mutual Aid System (TIFMAS):

Enacted in 2007 by the 80th Legislature, TIFMAS was developed in coordination with the Texas Division of Emergency Management and the Texas Fire Chief's Association. Maintained by TFS, the program includes training, qualification and mobilization systems to make statewide use of local resources. The program was first used during Hurricane Ike, and has since been used in response to the Presidio flooding, the April 9, 2009 wildfire outbreak in North Texas and Hurricane Alex. The system saw extensive use during the 2011 Wildfire Season, involving 13 mobilizations, 205 fire departments, 432 engines, and 1,538 firefighters. As high impact wind events or large fire outbreaks are forecast, TIFMAS allows the state to mobilize large groups of firefighters from within the state to rapidly meet these short-term events. By mobilizing local resources from unaffected areas, TIFMAS fills a critical response need that cannot be met using out-of-state resources.

Through legislation enacted by the 81st Legislature, TFS also administers a grant program to assist participating TIFMAS fire departments with training and equipment. Developed with support from Texas Commission on Fire Protection, Texas Fire Chiefs Association, State Firemen's and Fire Marshals' Association and the Texas Association of State Firefighters, this program directly benefits both local and statewide response capabilities. Since the program's inception, TFS has awarded grants to place 21 engines with fire departments for a total value of more than \$2 million.

Regional Incident Management Teams (RIMTs):

The Texas RIMT program is built upon the neighbor-helping-neighbor model. The RIMT program maintains a network of trained incident management teams and personnel from local and municipal entities within Texas. Initiated in 2006 by Governor Rick Perry's executive order, these personnel are utilized to supplement state and regional emergency response operations. The program is maintained by TFS using homeland security funds from TDEM. The Texas RIMT program currently has 17 standing teams with 792 responders. During the 2011 wildfire season, TFS mobilized 180 responders from 12 RIMT's to support wildfire operations, helping fill the

576 Texas A&M Forest Service

state response needs.

Through TIFMAS and RIMT, local responders across the state stand ready to assist other communities in times of need.

AFTER THE WILDFIRES - ASSESSMENT, RECOVERY AND MITIGATION

When disasters happen and the first-responders have gone, citizens are left to rebuild their damaged homes, businesses and landscapes. TFS is still there working with communities and homeowners to help assess damages and future risk, assist with the recovery process, and help prevent recurrence. TFS continues to build the capacity of Texas and Texans.

Assessment:

In addition to weather events and vegetative fuel loading across the state, the historic year-long drought of 2011 was a contributing factor to the severity of the wildfire season. The drought directly impacted many of the state's trees and forests. This year TFS estimates 100 to 500 million trees were killed by the drought, and another 5.6 million trees in urban areas that once shaded homes, streets and parks in communities across Texas are now dead. The Forest Inventory and Analysis program (a federal/state forest agency partnership) is currently working on a more detailed, statewide tree mortality study to provide a more accurate impact assessment prior to the 2013 legislative session.

As a result of this drought episode, TFS recognizes the need to more assertively monitor and assess the trees and forests where people live, work and play. Urban forests provide significant benefits to the 83% of Texans that live in urban areas, and an expanded forest health monitoring program will vastly improve the state's ability to respond to threats facing the urban forests of Texas. This could be accomplished through the Forest Inventory and Analysis program and would entail field data collection, analysis, mapping and reporting, and TFS would integrate this data with urban tree canopy assessments. This model supports timely reporting on the structural, economic and environmental value of trees in urban areas and would round-out the forest inventory program for the state.

Agency foresters and mitigation specialists are also working to identify high risk areas before future disasters strike. Through the Texas Wildfire Risk Assessment Portal (TxWRAP), a GIS-based, risk assessment tool – local community groups, government officials and the public can identify and manage wildfire risk. Launched in April of 2012, TxWRAP is available online, easy to use and prepared to instantly provide risk assessments at the homeowner, community, city or county level to guide risk-reduction efforts. Developed by the TFS Predictive Services Department, TxWRAP serves as a model for the nation and is currently being adopted by 30 other states.

Mitigation and Recovery:

Knowing is not enough. TFS must take action. When disaster strikes, the agency works with communities and homeowners to help speed recovery and prevent reoccurrence. It also works with communities across the state on activities such as home loss assessments, post-fire recovery meetings, Firewise homeowner education and landowner restoration plans. As a part of these efforts, TFS was able to obtain \$8 million in federal funds to assist landowners with tree planting recovery and restoration projects in 16 counties affected by the Bastrop and East Texas fires of 2011.

TFS works with private foundations, non-governmental organization (NGO) partners and volunteers to distribute and plant trees for homeowners and small-acreage landowners to bring communities together following a disaster. The TFS West Texas Nursery produces native species for tree programs and other environmental restoration projects around the state. TFS will continue to assist Texans long after disaster strikes.

EXCEPTIONAL ITEMS

Administrator's Statement

8/9/2012 12:03:41PM

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

576 Texas A&M Forest Service

Increased Local Response Capacity – VFD Grants:

During the 82nd Legislative Session state appropriations for the Rural VFD Assistance program were reduced by \$32.5 million; however, the assessment to the insurance industry is still being collected. TFS requests reinstatement of the \$32.5 million appropriation. This would greatly increase the state's ability to assist volunteer fire departments with essential equipment and training needs, building their capacity to respond locally.

During the 82nd Legislative Session, state appropriations for the Rural VFD Insurance program were reduced by \$100,000; however, the 2% fireworks sales tax is still being collected. TFS requests reinstatement of the \$100,000 appropriation. This would provide coverage for approximately 1,400 more firefighters.

Increased State Response Capacity – TFS Operations:

The Texas Wildfire Protection Plan has been proven and is a national model. The first phase succeeded in strengthening Texas and preparing the state to face the worst wildfire season on record. It is time to build on that success. TFS requests an additional appropriation of \$27.2 million from Insurance Companies Maintenance Tax and Insurance Department Fees (Fund 8042), the same source as the current TWPP funding. This would allow the addition of 100 new positions, including 90 firefighters, and a substantial investment in firefighting equipment strategically located across the state to provide quicker response by fire suppression resources and thereby reduce losses to the state and its citizens.

Increased Regional Response Capacity – TIFMAS Grants:

TFS requests an additional \$2 million for TIFMAS grants from Insurance Companies Maintenance Tax and Insurance Department Fees (Fund 8042), the same source as the current TIFMAS grants funding. This additional funding would provide 5-7 fire engines per year in strategic locations across the state. Texans helping Texans!

SUPPLEMENTAL APPROPRIATIONS REQUEST

In 2011 record drought, available fuels and significant weather events combined to produce one of the most active wildfire seasons in Texas history, as well as some of the most dramatic high impact fire days. State and local resources responded to over 30,000 fires that burned nearly 4 million acres. No area of the state was excluded. As part of the state response, Texas A&M Forest Service mobilized 16,690 personnel, 244 bulldozers, 986 engines and 255 aircraft in regional, state and national resources.

The 2011 fire season officially ended on November 30, with the wildfire response costs totaling an estimated \$337.2 million for federal, state and local resources. As a result, the \$121 million in emergency funding appropriated to TFS by the 82nd Legislature has been fully committed and TFS will have to seek additional emergency funding during the 83rd Legislative session.

CHANGING LANDSCAPE ON FUNDING OF OUT-OF-STATE RESOURCES FOR WILDFIRE SUPPRESSION

State agencies are budgeted to perform planned levels of activity each year. Certain agencies, because of their expertise and resources, are regularly called upon to respond to emergency response incidents. Incidents of limited cost and duration can normally be handled within the base appropriations received by these agencies from the Legislature. However, catastrophic emergencies (e.g. tornadoes, floods, hurricanes, and extreme wildfires) can quickly exceed base funding. These events often result in significant outlays for overtime, travel, fuel, supplies, as well as resources provided by other states or the federal government.

The current approach in dealing with catastrophic events is for the agencies to respond to the immediate need and work out the funding issues later. While this approach has generally been successful in dealing with the crisis at hand, addressing the bills at a later date (sometimes a much later date) can be somewhat problematic. In recent years it has basically eliminated the ability to mobilize Southern Compact (state-to-state assistance) or private contract resources, because of the requirement for prompt payment.

Administrator's Statement

8/9/2012 12:03:41PM

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

576 Texas A&M Forest Service

Recently this process has begun to change for federal and other-state resources as well. Historically, billing for these resources was collected by the U.S. Forest Service, submitted to Texas through TFS and paid through supplemental appropriations during the following legislative session. The U.S. Forest Service did not apply late charges, penalties or interest related to delayed payment. Changes are taking place nationally that will require individual billings to TFS by each federal agency with late fees, penalties and interest being applied unless waivers/extensions are specifically requested and then approved by the billing agency. These additional charges could result in several million dollars in additional cost to the state and the withholding of federal grant reimbursements for delinquent bills.

Another change that has begun to occur with certain federal contracts used for wildfire suppression efforts. Historically, the federal contracts related to wildfire suppression were paid directly by the U.S. Forest Service and then included in the reimbursement billing submitted to Texas through TFS. Beginning in 2007, the U.S. Forest Service changed its procedures to require some of these contracts to be paid directly by the state. This means the bills have to be paid promptly after the services are received, as opposed to the delayed billing and payment process allowed by the U.S. Forest Service for other costs.

The resulting impact of these changes requires the state to re-examine the current model for funding catastrophic wildfire suppression costs.

ADDITIONAL FUNDING FOR AGENCIES

The Texas A&M University System agencies conduct critical higher education functions such as research, extension, service, and engagement of graduate students, and they have strong programmatic linkages with general academic institutions. However, these agencies are currently the only institutions of higher education in Article III whose operations are not formula funded, and, thus have fewer options to adjust agency funding. The Legislature already allocates facility infrastructure funding to these agencies using the same formula as general academics. Adopting a mechanism for agency funding, indexed to an appropriate metric (e.g. GR funding for general academic institutions; population and inflation; or state economic impact), would provide a single budgetary decision point. This would simplify budgeting for the Legislature and agencies and would provide a predictable agency funding method.

THE TEXAS A&M UNIVERSITY SYSTEM FUNDING INITIATIVES

We request funding for the following priority needs for all of higher education.

Base Funding – Our highest priority is funding the basic, on-going operations of our institutions and agencies. Given current economic conditions, we request the Legislature maintain our institutions' and agencies' base funding and put any new funds into the formulas to fund the costs of providing education and support for the additional students enrolled since the last base period, and into additional base funding for our institutions and agencies.

Higher Education Group Health Insurance – We request funding to cover any increases in employees and retirees enrolled in our group health insurance program and increases in health care costs. Additionally, we request funding to restore some increment of the differential funding level for our employees as compared to the state employees in the ERS group insurance plan.

The Texas A&M University System is governed by a Board of Regents. The current members of the Board of Regents are included in the organizational chart.

Automated Budget and Evaluation System of Texas (ABEST)

Agency code: 576		Agency name: Texas A&M Forest Service			
METHOD OF FINANCING	Exp 2011	Est 2012	Bud 2013	Req 2014	Req 2015
<u>GENERAL REVENUE</u>					
	\$(1,032,378)	\$0	\$0	\$0	\$0
HB 4, 82nd Leg, Regular Session, Sec 15	\$0	\$81,000,000	\$0	\$0	\$0
SB 2, 82nd Leg, 1st Called Session, Sec 29	\$0	\$40,000,000	\$0	\$0	\$0
Supplemental Appropriation	\$0	\$0	\$0	\$6,050,000	\$6,050,000
<p>Comments: The agency will request additional funding for wildfire costs during the 83rd session separately. However, because HB4 and SB2 of the 82nd Legislature were included in the GAA, the LBB included them in the base figures for the 2014-15 biennium. Their inclusion in the base made them subject to the 10% reduction schedule, which is the reason for including this amount in the Summary of Base Request by Method of Finance.</p>

STRATEGY DESCRIPTION AND JUSTIFICATION:

Texas A&M Forest Service provides leadership and wildfire protection on 156 million acres across Texas. In addition, the agency provides the only major source of support to our valuable fire department partners. Texas A&M Forest Service assistance and support includes training, equipment, coordination and cost-sharing for needed equipment and supplies. Texas A&M Forest Service actively cooperates with the Texas Division of Emergency Management to respond to any emergency when we are needed.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

3.A. STRATEGY REQUEST

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

576 Texas A&M Forest Service

GOAL:	1	Develop Forest/Tree Resources to Protect Life, Environment & Property	Statewide Goal/Benchmark:	5	0
OBJECTIVE:	1	Reduce Forest & Land Resource Losses from Wildfire, Insects, & Disease	Service Categories:		
STRATEGY:	1	Wildfire Prevention, Detection, and Suppression and Emergency Response	Service: 33	Income: A.2	Age: B.3

CODE	DESCRIPTION	Exp 2011	Est 2012	Bud 2013	BL 2014	BL 2015
-------------	--------------------	-----------------	-----------------	-----------------	----------------	----------------

Many changes in recent years impact the wildfire prevention and suppression program of the Texas A&M Forest Service. Below are listed only a few for emphasis:

1. Population/Demographics: Currently at 26.4 million and growing rapidly, every part of the state is impacted by the sheer number of people. With over 90% of wildfires started by man, increased population means increased dangers of wildfire.
2. Wildland Urban Interface: Where the country meets the city, there is a significant increase in the risk of disaster due to wildfire. A short drive in the hills west of Austin graphically demonstrates this danger. Spatial analysis of Texas wildfires show that, for the last five years, over 80% of wildfires occur within 2 miles of a community.
3. Expanding Demands: Wildfires, hurricanes, floods and occurrences make Texas one of the three leading natural disaster states in the nation. This places a significant additional burden on Texas fire departments and the Texas A&M Forest Service for all-hazard incident response. New, innovative approaches must be used to meet the expanding demands and to protect the citizens we serve.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Destruction and damage to Texas forest and tree resource by insect and disease pests exceeds actual losses by wildfire. The Texas A&M Forest Service forest health program is primarily concerned with providing technical assistance to Texas landowners regarding southern pine beetle, oak wilt, and a host of other forest and tree pests.

3.A. STRATEGY REQUEST

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

576 Texas A&M Forest Service

GOAL:	1	Develop Forest/Tree Resources to Protect Life, Environment & Property	Statewide Goal/Benchmark:	6	0
OBJECTIVE:	1	Reduce Forest & Land Resource Losses from Wildfire, Insects, & Disease	Service Categories:		
STRATEGY:	2	Provide Detection/Notification/Control of Forest/Tree Insect & Disease	Service: 37	Income: A.2	Age: B.3

-------------	--------------------	-----------------	-----------------	-----------------	----------------	----------------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Southern pine beetle activity is cyclical, and Texas should see a significant upswing in this destructive pest's activity over the next few years. Oak Wilt continues to threaten metropolitan areas of Houston, San Antonio and Fort Worth as well as Austin and the Hill Country area. State funds are needed to help reduce the impact of this disease. Miscellaneous pest problems are addressed as they occur.

CODE	DESCRIPTION	Exp 2011	Est 2012	Bud 2013	BL 2014	BL 2015
-------------	--------------------	-----------------	-----------------	-----------------	----------------	----------------

STRATEGY DESCRIPTION AND JUSTIFICATION:

Very high demand by private forest landowners for professional forestry guidance and forestry services causes the Texas A&M Forest Service to place high priority emphasis on this strategy. This is accomplished by a strong technical assistance program where professional foresters provide timely, science-based information to Texas landowners. Major efforts are also directed to attracting new forest industry to Texas through resource assessments, evaluation of new products, and use of alternative species.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Texas' demand for forest resources continues to increase. We currently supply less than 25% of our own wood needs and must rely on imports from other states and Canada. Texas A&M Forest Service will lead a coordinated effort, joining all aspects of the forestry community, to meet these challenges and prepare Texas forest landowners for the future. Fragmentation of the forest land base, tax disincentives and increased demands are but a few factors emphasizing the critical need for leadership, technical assistance and accurate resource information if non-industrial private owners are to meet the future forest needs of Texas.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Urban and community forestry programs have been expanded into every major population center of Texas because of tremendous public demand and the availability of federal funds for this purpose. In addition, across the non-forested portion of the state, numerous farmers and ranchers annually benefit from professional assistance, continuing education and windbreak tree seedlings. All of these forestry practices enhance air quality, wildlife habitat and overall quality of living.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Environmental concerns are dominant among most Texans, and it is imperative that Texas A&M Forest Service take a positive leadership role in dealing with stewardship of urban and other tree resources. Eighty-four percent of Texans live on three percent of the land. As our population continues to grow beyond 26 million, Texas A&M Forest Service must take an increased leadership role in building community capacity within these urban/wildland interface areas to sustain the environmental quality and protect the lives and property of our urban citizens.

5066	Rural Volunteer Fire Dept Ins	50,000	50,000
TOTAL, METHOD OF FINANCING		\$16,300,000	\$16,300,000

DESCRIPTION / JUSTIFICATION:

Restore spending authority for the Rural Volunteer Fire Department Assistance Program and the Rural Volunteer Fire Department Insurance Program.

The Rural VFD Assistance Program is a pass-through grants program funded through a special assessment to the insurance industry and administered by the Texas A&M Forest Service (TFS). The program assists volunteer fire departments in acquiring equipment and training. Initiated by the 77th State Legislature, this program has provided over 1,400 fire trucks, 58,000 sets of protective gear and 41,645 training tuitions to volunteer fire departments across the state. Currently the program has \$131 million in unfunded requests.

The 77th Legislature also initiated the Rural VFD Insurance Program that provides pass-through grants to volunteer fire departments for workers comp and disability insurance. This program helps provide workers comp insurance coverage for approximately 10,000 volunteer firefighters each year.

During the 82nd Legislative Session state appropriations for the Rural VFD Assistance Program were reduced by \$32.5 million per biennium; however, the assessment to the insurance industry was still collected. Restoration of spending authority for the \$32.5 million reduction would greatly increase the state's ability to assist volunteer fire departments with essential equipment and training needs.

State Appropriations for the Rural VFD Insurance Program were also reduced during the 82nd Legislative Session. Program funds are provided by a 2% tax on firework sales, which is still being collected. Reinstatement of the \$100,000 in program funds would provide coverage for approximately 700 more firefighters per year.

DESCRIPTION / JUSTIFICATION:

Enhance TWPP to provide additional firefighting task forces around the state.

For the past decade, Texas A&M Forest Service has been developing, using, and refining its operations under the Texas Wildfire Protection Plan (TWPP), a coordinated, interactive approach utilizing multiple components to guide the agency's efforts:

- Predictive Services/Assessment and Monitoring
- Mitigation, Prevention, and Reduction of Risk
- Planning and Preparedness
- Local Capacity Building
- Rapid Initial Response and Suppression of Wildfires

TWPP is a proven emergency response model emphasizing ongoing analysis and aggressive response based on the identified risk factors.

Expanding populations, vegetative growth and changing weather patterns continue to bring catastrophic wildfire seasons to Texas, with 2011 marking a record year. In 2009,

CODE DESCRIPTION

Excp 2014

Excp 2015

the State Legislature began expanding the state's ability to respond to and suppress wildfires through increased funding and firefighters to the TFS under the Texas Wildfire Protection Plan. The increased funding and positions provided by the 81st Legislature was the first step in a multi-stage expansion of the state's wildfire suppression capabilities.

Our request for FY 2014-15 is for an additional \$13.6 million per year in Fund 036 (Dept. of Insurance Fund), the same source as the current TWPP funding for TFS operations. This would allow the addition of 100 new positions, including 90 firefighters, and firefighting equipment (e.g. dozers and graders), strategically located across the state to provide quicker response of fire suppression resources and thereby reduce losses to the state and its citizens.

EXTERNAL/INTERNAL FACTORS:

Expanding populations, vegetative growth and changing weather patterns continue to bring catastrophic wildfire seasons to Texas.

Increased funding of TWPP to support TFS operations will allow the addition of 100 new positions, including 90 firefighters, and firefighting equipment (e.g. dozers and graders), strategically located across the state to provide quicker response of fire suppression resources and thereby reduce losses to the state and its citizens.

TOTAL, METHOD OF FINANCING		\$1,000,000	\$1,000,000

DESCRIPTION / JUSTIFICATION:

Enhance wildfire fighting capability through equipment grants to municipal fire departments.

The 81st Legislature transferred to the Texas A&M Forest Service (TFS) a fire department grants program formerly administered by the Texas Commission on Fire Protection. The legislation, codified in Section 614.105 of the Government Code, placed the funding for this program in a separate account under the volunteer fire department assistance fund. New guidelines and procedures were developed with the involvement and support of the Texas Commission on Fire Protection, Texas Fire Chiefs Association, State Firemen's and Fire Marshals' Association and the Texas Association of State Firefighters. The grants are designated for fire departments participating in the Texas Intrastate Fire Mutual Aid System (TIFMAS), which was developed in coordination with the Texas Division of Emergency Management and is managed by TFS. TIFMAS includes training, qualification and mobilization systems to make statewide use of local resources. It has been used in response to Hurricane Ike, the Presidio flooding, the April 9, 2009, wildfire outbreak in North Texas and Hurricane Alex. It was also used extensively during the 2011 Wildfire Season, providing 329 engines and 1,274 firefighters in response to critical state needs.

TFS administers the \$1 million a year TIFMAS grants, which assist participating fire departments in acquiring fire engines, protective gear and training. This program directly benefits both local and statewide response capabilities, reducing the reliance on out-of-state resources during periods of high fire danger. Under the current funding level the TIFMAS grants program can provide 5-7 fire engines per year. Additional funding would increase the effectiveness of the program. Program funds are provided from the Insurance Companies Maintenance Tax and Insurance Department Fees (Fund 8042).

EXTERNAL/INTERNAL FACTORS:

This program directly benefits both local and statewide wildfire and emergency response capabilities, reducing the reliance on out-of-state resources during periods of high fire danger.

B. Assessment of Fiscal Year 2010 - 2011 Efforts to Meet HUB Procurement Goals

Attainment:

The agency attained or exceeded one of four, or 25% of the applicable agency HUB procurement goals in FY 2010.
The agency attained or exceeded one of four, or 25% of the applicable agency HUB procurement goals in FY 2011.

Applicability:

The "Heavy Construction" and "Building Construction" categories are not applicable to agency operations in either fiscal year 2010 or 2011, since the agency did not have any purchases related to these categories.

Factors Affecting Attainment:

As an Emergency Response Agency, a substantial amount of purchases are for highly specialized equipment and services required to support agency operations in wildfire suppression/prevention, forest development, and other forestry related operations. TFS continues to experience a challenge in locating the HUB vendors that can actually bid on and supply these specialized items. Additionally, emergency purchases that occur in remote areas of the state, continue to create situations where (a) the available HUB vendor base is very limited or non-existent, or (b) there is inadequate time to locate HUBs. In FY 10, the State of Texas Retail Fuel Purchase Contract was not issued as a term contract, it remains identified only as a CCG Contract. All state agencies and institutions of higher education are required by law to utilize the State's fuel contract. In FY 10 this was a \$763,798.51 impediment against our HUB efforts and in FY 11 this was a \$1,679,170.07. Additionally, FY2011 was one of the highest years on record for fires and acreage lost to fires for the state of Texas.

"Good-Faith" Efforts:

FY 2010-11 the agency made the following good faith efforts to comply with statewide HUB procurement goals per 1 TAC Section 111.13(c): 1) Insured that all delegated purchases were in accordance with adopted CPA rules and procedures in regard to HUB programs; 2) Identified potential HUB subcontracting opportunities

SUMMARY OF SPECIAL CONCERNS/ISSUES

Agency code: 576	Agency name Texas A&M Forest Service					
CFDA NUMBER/ STRATEGY	Exp 2011	Est 2012	Bud 2013	BL 2014	BL 2015	

Assumptions and Methodology:

Most federal funds come to the Texas A&M Forest Service through the USDA Forest Service as cooperative on-going base program support on a 50-50 matching basis. While the source of funding had been relatively stable in the past, the US Forest Service implemented a redesign of the State and Private Forestry Program in 2008, which resulted in reduced formula-type / allocation funding and a shift to increasingly competitive funding for all states, including Texas.

Potential Loss:

Further reductions in Federal funding from the US Forest Service are not known at this time, but are possible for the 2014-2015 biennium.

6I. PERCENT BIENNIAL BASE REDUCTION OPTIONS

10 % REDUCTION

83rd Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: 8/15/2012
Time: 6:07:55PM

Agency code: **576** Agency name: **Texas A&M Forest Service**

Item Priority and Name/ Method of Financing	REVENUE LOSS			REDUCTION AMOUNT			TARGET
	2014	2015	Biennial Total	2014	2015	Biennial Total	

1 Reduce TWPP Equipment Purchases

Category: Programs - Delayed or Deferred Capital Projects

Item Comment: The Insurance Companies Maintenance Tax and Insurance Department Fees is a self-leveling fund; a reduction in the appropriation will be offset by a corresponding reduction in revenue. The Volunteer Fire Department Assistance Fund is statutorily restricted; reductions in appropriations will be added to the fund's unappropriated reserves. We request that these Funds be exempted from the 10% reduction.

A 5% reduction in General Revenue, Insurance Companies Maintenance Tax and Insurance Department Fees, and Volunteer Fire Department Assistance Program funds without significantly impacting services to the citizens of Texas and the emergency response capabilities of the agency will require the agency to reduce capital equipment purchases. However, the agency's dozers and transport trucks in East Texas are undersized and aging, which impacts the emergency response capabilities of the agency and the safety of our firefighters.

Strategy: 1-1-1 Wildfire Prevention, Detection, and Suppression and Emergency Response

General Revenue Funds

2 Reduce Grants							
Category: Programs - Grant/Loan/Pass-through Reductions							
Item Comment: The Volunteer Fire Department Assistance Fund, Rural Volunteer Fire Department Insurance Fund, and Urban Forestry License Plate Fund are statutorily restricted; reductions in appropriations will be added to each fund's unappropriated reserves. We request that these Funds be exempted from the 10% reduction.							
A 5% reduction in appropriations from the Volunteer Fire Department Assistance Fund, Rural Volunteer Fire Department Insurance Fund, and Urban Forestry License Plate Fund will result in a reduction in grants awarded. The ultimate impact is a reduction in the amount of training and personal protective equipment that Volunteer Fire Departments are able to purchase for their volunteers, which can have an impact on firefighter safety. It would also result in a reduction of \$535,000 per year in the Key Performance Measure: Market Value of Assistance Provided to Fire Departments.							
Strategy: 1-1-1 Wildfire Prevention, Detection, and Suppression and Emergency Response

FTE Reductions (From FY 2014 and FY 2015 Base Request)

3 Reduce Supplemental Appropriation

Category: Programs - Service Reductions (Other)

Item Comment: The supplemental appropriations appropriated by HB4 and SB2 of the 82nd Legislature provided \$121 million for payment of wildfire suppression costs. These supplemental appropriations were presented in the TFS bill pattern in the General Appropriations Act for the 2012-13 Biennium with a footnote referencing the enabling legislation. Based upon the historical approach to supplemental appropriations by the legislature, the Texas A&M Forest Service does not expect these funds to be included in the agency's base funding. The agency will submit a separate request for additional funds for wildfire costs during the 83rd session. However, because of their inclusion in the GAA, the LBB included them in the base figures for the 2014-15 biennium, which then required inclusion in the agency's LAR.

Strategy: 1-1-1 Wildfire Prevention, Detection, and Suppression and Emergency Response

General Revenue Funds

1 General Revenue Fund	\$0	\$0	\$0	\$3,025,000	\$3,025,000	\$6,050,000
General Revenue Funds Total	\$0	\$0	\$0	\$3,025,000	\$3,025,000	\$6,050,000
Item Total	\$0	\$0	\$0	\$3,025,000	\$3,025,000	\$6,050,000

FTE Reductions (From FY 2014 and FY 2015 Base Request)

4 Reduce TWPP Equipment Purchases

Category: Programs - Delayed or Deferred Capital Projects

Item Comment: The Insurance Companies Maintenance Tax and Insurance Department Fees is a self-leveling fund; a reduction in the appropriation will be offset by a corresponding reduction in revenue. The Volunteer Fire Department Assistance Fund is statutorily restricted; reductions in appropriations will be added to the fund's unappropriated reserves. We request that these Funds be exempted from the 10% reduction.

A 10% reduction in General Revenue, Insurance Companies Maintenance Tax and Insurance Department Fees, and Volunteer Fire Department Assistance Program funds without significantly impacting services to the citizens of Texas and the emergency response capabilities of the agency will require the agency to reduce capital equipment purchases. However, the agency's dozers and transport trucks in East Texas are undersized and aging, which impacts the emergency response capabilities of the agency and the safety of our firefighters.
