Dr. R. Bowen Loftin
Vice President and Chief Executive Officer
Texas A&M University at Galveston

Texas A&M University at Galveston (TAMUG) is the coastal branch campus of Texas A&M University and is statutorily designated as a special-purpose institution dedicated to marine and maritime studies. Instructional, research and service programs focus specifically on the scientific, technical, business, socioeconomic and environmental policy issues concerning the oceans, coastal regions and maritime industries. The mission of TAMUG is accomplished through an integrated program of undergraduate and graduate education; maritime training for professional license programs; scholarly research in the marine sciences, business, engineering and humanities; and outreach programs for the public regarding marine environment, service to the maritime industry and K-12 science education.

TAMUG provides quality undergraduate and graduate education in support of maritime and marine programs and supervises students in selected graduate programs of Texas A&M University. TAMUG serves as one of the six state maritime academies in the United States, is the only maritime academy located on the Gulf Coast and is the only maritime academy that is a composite part of a major American research university. Students graduating from this program are licensed as either Third Mate Deck Officers or Third Assistant Engineering Officers in the United States Merchant Marine or ensigns in the United States Coast Guard or United States Navy. In addition, maritime graduates currently serve as boat captains for inland waterways, pilots for major American and foreign harbors and engineers for offshore energy exploration and development. Other graduates accept positions in government, industry and medical laboratories; government regulatory agencies; educational institutions (including science teaching in public schools); and maritime industry administration. Many others enter medical, law and graduate schools.

Texas is home to thirteen deep-water ports (Houston, Galveston, Texas City, Beaumont, Port Arthur, Orange, Sabine Pass, Corpus Christi, Freeport, Port Aransas, Ingleside, Brownsville and Port Isabel), more than any other state in the nation. The impact of these ports on Texas' economy is staggering. In The Houston Ship Channel and associated port industries support more than 785,000 direct and indirect jobs throughout Texas, generate over \$118 billion in economic impact to the state and provide more than \$3.7 billion in state and local tax revenue. When one adds the impact of the other twelve Texas' ports, the economic consequences of seaborne trade on the state are immense. Moreover, with the likely widening of the Panama Canal and the opening of the Port of Houston's Bayport Container Terminal, Texas will likely

ADMINISTRATOR'S STATEMENT

81st Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

DATE: **8/6/2008**TIME: **9:27:21AM**PAGE: **2 of 4**Agency code: **718**Agency name: **Texas A&M University at Galveston**

experience an order of magnitude increase in international trade over the next decade. Graduates of TAMUG are the catalysts for much of this extraordinary economic impact. We provide the pilots who move ships between the ports and the open Gulf of Mexico, we provide the management of ports throughout the state and we do the cutting-edge research that ensures the safety and environmental friendliness of maritime commerce as well as offshore oil and gas exploration and production.

As we enter this legislative year, we are concerned about many areas and we request funding for the following priority needs for all of higher education:

- **Base Funding:** Fund growth in all higher education formulas and using the Higher Education or another recognized cost index fund the increased cost of doing business for our basic, on-going educational, general and student support operations. This includes providing increased base funding for our Texas A&M System Agencies' core operations.
- **Teaching Excellence:** Using student evaluations, recognize and reward outstanding faculty through the chancellor's Teaching Excellence Awards initiative.
- **Facilities Renewal:** Existing E&G and campus infrastructure have reached the point where the need to invest funds to renew these facilities is critical. This includes such projects as deferred maintenance, modernizing HVAC, plumbing, electrical and other systems, meeting current building, life safety, and energy codes, and others.
- **Student Financial Aid:** Provide increased funds for student financial aid to help make higher education more affordable for more Texas families, however, not at the expense of funding to the universities.
- **Incentive Funding:** We support accountability and performance through incentive funding so long as our base funding needs are covered first.
- **Research:** Increase research funding available to institutions by doubling the funds allocated through the Competitive Knowledge Fund and Research Development Fund.
- **Higher Education Group Health Insurance:** Fund the increases in health care costs and enrollment (employee/retiree) growth.

In preparation of this legislative request, TAMUG has considered issues within the context of its special purpose mission and unique physical location and has requested the following:

Base Funding -

Restoration of the 10% base reduction (approximately \$600K for the biennium) mandated by the Governor. A reduction of this size will require reductions in or elimination of one or more critical programs and a possible reduction in force. Possible program reductions or eliminations are 1) Ship Operations that support cadet licensing requirements 2) Marine Terminal Operations that support teaching, research, and outreach programs, 3) Academic Support programs such as tutoring, mentoring, and assistance services that specifically serve our "at-risk" students, and 4) Strategic Enrollment initiatives that target new recruitment efforts that help us achieve our "closing the gaps" goals.

Tuition Revenue Bond Debt Service -

We are asking for the authorization of Tuition Revenue Bonds to support our enrollment growth by expanding and rehabilitating existing facilities plus the associated debt service on these bonds. The institution cannot meet its "closing the gaps" target of 3,000 students without addressing the space shortage that has ranked TAMUG very high in classroom and laboratory usage in the state and has necessitated converting a leased warehouse into classrooms and administrative space. While the new Science Complex will partially support the growth necessary to meet our "closing the gaps" goals, partially support a new graduate program that has recently been approved by the Texas Higher Education Coordinating Board and to some extent, allow our research programs (now ranked third among public universities in the state in terms of federal expenditures per full-time-equivalent tenure/tenure-track faculty member) to continue their rapid expansion it will not meet all of TAMUG's growth demands. This Tuition Revenue Bond request specifically targets existing facilities that were developed when enrollment was significantly less than it is today and will be over the next decade. Specifically, we seek the necessary funds to rehabilitate the Jack K. Williams Library (over twenty years old), the Physical Education Facility (over fourteen years old) and its associated swimming pool, and the Mitchell Campus' Physical Plant that was built when the campus had less than half its current structures. In addition, proceeds from

ADMINISTRATOR'S STATEMENT

81st Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

 PAGE: **3 of 4**

Agency code: **718** Agency name: **Texas A&M University at Galveston**

these bonds will also be used to expand the dock facilities used by the T/S Texas Clipper—a training ship that is significantly larger than its two predecessors—and to mitigate coastal erosion that is threatening the university's Wetlands Center.

Detailed below are specifics supporting TAMUG's funding requests in addition to the 10% base funding restoration request and our request for authorization of Tuition Revenue Bonds and the associated debt service. We believe these are unique and necessary to the success of TAMUG and have high value for the entire State of Texas.

- **Texas Institute of Oceanography.** TAMUG ranks third among Texas public universities in federal research dollars expended per tenured and tenure-track FTE faculty. State funds appropriated for the Texas Institute of Oceanography (TIO) provide seed funding that leverage grants from federal and private sources at a rate of one state dollar to five federal or private dollars. This seed funding is not limited to TAMUG researchers but is also available to researchers at other state universities to use in leveraging federal and private grants. In addition, the TIO supports the training of a small number of postdoctoral researchers whose research addresses areas that are of high utility to the State of Texas. At this time of skyrocketing energy costs, coastal erosion and seafood safety concerns, it is imperative that Texas continues to target coastal and ocean research. Funding is requested to restore this program to pre-budget cut levels.
- **Coastal Zone Laboratory.** TAMUG is requesting funding for the Coastal Zone Laboratory (CZL). The CZL supports educational and training activities directed at the environment and ecology of Texas' coastal areas. A major role of the CZL is to serve State of Texas agencies that need specific research and expertise on the coast and near-coast areas of Texas. The specific projects it supports are of direct relevance to the maintenance and growth of Texas' fragile wetlands and near-coast environments. Thus, the CZL serves the state by enhancing the ability of the coast to attract tourism and well-designed development. Funding is requested to restore this program to pre-budget cut levels.
- **Center for Texas Beaches and Shores.** The Center for Texas Beaches and Shores is a Legislatively-created organization devoted to research that links science and engineering to policy to address the significant problems in Texas' coastal environments. This center serves as a means of coordinating the efforts of Texas' best researchers (from other Texas A&M University System and University of Texas System members) to do short-term, high-value research of direct relevance to state investments in beach and coastline restoration as well as in supporting environmentally-sound development of the Texas coast. The Center works closely with the Texas General Land Office to assist that office in using best practices in both restoration of the coast and building for resilience to storms and on-going coastal erosion.
- **Coastal Erosion/Shore-side Dock Enhancements.** One-time funds are requested to support a coastal erosion project at TAMUG's Mitchell Campus and shore-side dock enhancements to accommodate the Texas Maritime Academy's new training ship, the T/S Texas Clipper. TAMUG has lost over 40 feet from its bayside shoreline since 1995. Correcting the erosion problem on the west side of the island has the potential of reducing the silting problem at the berthing site of the T/S Texas Clipper, thus reducing dredging costs. The new training ship is over twice the tonnage of the previous training ship and is over 100 feet longer. To accommodate the new ship the dock must be lengthened and strengthened. In addition, we must double the power supply to the dock, given the much larger power requirements of the new ship while it is at the dock.

Among major accomplishments during the current biennium, we wish to call attention to the following:

- 1) Most notable is the enrollment growth we have experienced from 2001 to 2007. During this period, student fall head counts increased from 1,366 to 1,644 and semester credit hours increased from 19,274 to 22,344. African-American enrollment in the fall of 2001 was 15 students and has increased to 36 for fall 2007. During this same period, Hispanic enrollment grew from 128 to 177 students. TAMUG is striving to meet its goals for Closing the Gaps. Accommodating this growth required some remarkable measures at TAMUG in terms of teaching resources, academic support programs and space.

ADMINISTRATOR'S STATEMENT

81st Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

DATE: **8/6/2008**TIME: **9:27:21AM**PAGE: **4 of 4**Agency code: **718**Agency name: **Texas A&M University at Galveston**

2) Construction has begun for a new Science Complex that will contain approximately 100,000 gross square feet of instructional, research and administrative space. This new building is essential to serve the newly-approved graduate programs in Marine Biology and to address continued enrollment growth.

3) The Masters in Marine Resources Management program has already attracted over 32 students, complimenting the 80-student graduate population from Texas A&M University who are in residence in Galveston and taught by TAMUG faculty.

4) The Texas Higher Education Coordinating Board has recently approved a new graduate program (masters and doctoral) in Marine Biology. This will be an Interdisciplinary Program between TAMUG, three colleges at Texas A&M University (Agriculture and Life Sciences, Geosciences and Sciences) and Texas A&M University-Corpus Christi. This program will be the largest (measured by faculty strength) Marine Biology graduate program in the world. Planning is also underway for a Masters of Maritime Administration and Logistics degree that is in high demand by Texas industry.

4) Demand for graduates of the Texas Maritime Academy (licensed deck and engineering officers) has never been greater. In addition, we have seen a record demand for graduates of the other degree programs offered at TAMUG. The current and future growth of Texas' ports and international trade, coupled with the needs of Texas' off-shore energy exploration and production industries, have created an unprecedented market for our graduates in all areas. As the only marine and maritime special-purpose institution in Texas and on the Gulf Coast, TAMUG provides an essential source of highly educated and trained men and women for the state and region.

5) Finally, no status report would be complete without recognizing the tremendous support being provided by TAMUG's educational outreach division in meeting the Texas mandate to improve K-12 science education. Our outreach camp program has welcomed well over 13,000 middle and high school students. With no state support, TAMUG's educational outreach division provides a plethora of science programs to children and teachers. Each summer approximately 900 students attend Sea Camp for a weeklong hands-on science program. Younger children (six years through eleven years of age) attend a day program known as SeaCampus Kids to motivate and prepare them to excel in science and mathematics in their local schools. In conjunction with Sea Camp, approximately 80 volunteer teachers are trained in enhanced science teaching. Every sixth grader in Galveston visits the campus each year for a day of science, and the campus has developed lesson plans and virtual science tours on the internet for use by teachers in their home classrooms. Science workshops were conducted in approximately 140 public and private schools this past year. TAMUG also hosts large numbers of public school field trips, providing science instruction in the marine and coastal environs of Galveston Island and adjacent areas using the wetlands center, campus vessels and graduate student guides.

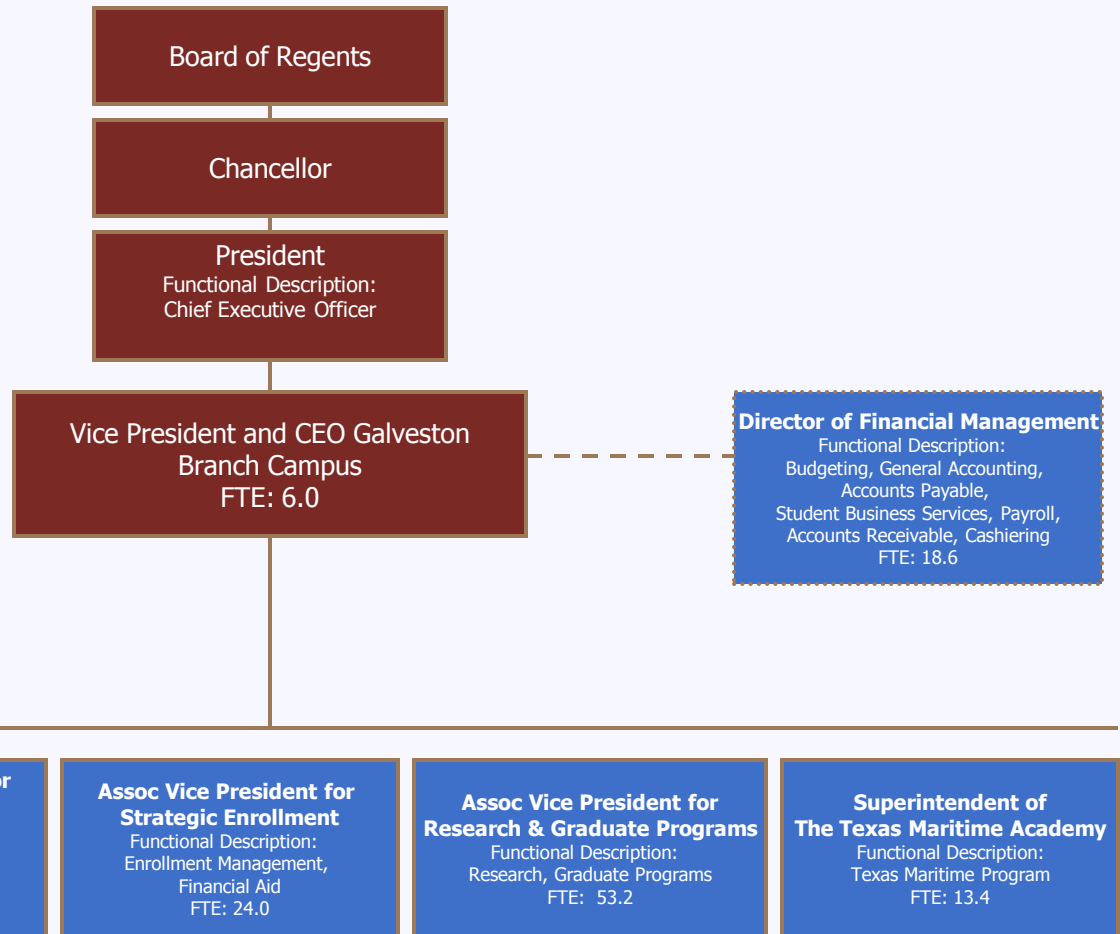

Background Checks –

TAMUG's statutory authority to conduct background checks on employees of the university comes from Texas Government Code Chapter 411 Subchapter (f) and Texas Education Code Section 51.215. It is TAMUG's policy and practice to conduct such checks on all employees being considered for positions at Texas A&M University at Galveston.

TAMUG is a small but very unique institution serving Texas as a marine and maritime educational and research resource for a state with 3,359 miles of coastline and six of the top ten ports for inbound and outbound tonnage in the United States. The faculty, administration and staff of TAMUG are seriously dedicated to giving this great state an excellent return on every dollar invested.

------	-------------	----------	----------	----------	---------	---------

Formula funding received through Operations Support consists of several components, including:
 Faculty Salaries
 Departmental Operating Expenses
 Library
 Instructional Administration
 Research Enhancement
 Student Services
 Institutional support

The Operations Support formula implemented by the 75th legislature combined into one formula the previous strategies listed above. It includes not only salaries and wages of those involved in the teaching functions, but those supporting the instructional program, such as deans, advisors, graduate assistants, and clerical staff. Additionally, salaries and wages to operate the library and purchase library materials such as books, journals, microforms, and computer-based information, plus binding costs, and other library operating costs are funded.

Salaries, wages, and other costs to support the administration of the institution are included in this strategy, including business and fiscal management, executive management, human resources, development efforts, purchasing, and other functions of a general nature, which benefit the institution as a whole. Included are costs associated with providing student services such as admissions, registration, student financial aid, placement services, and counseling.

The expenses in this strategy also include those with funding provided through the Institutional Enhancement (3-4-4) strategy.

*Not included are Designated Tuition expenditures.

STRATEGY:	1	Operations Support	Service:	19	Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2007	Est 2008	Bud 2009	BL 2010	BL 2011
-------------	--------------------	-----------------	-----------------	-----------------	----------------	----------------

Many external factors affect the operations of the campus. Enrollment can increase or decrease based on a multitude of factors including demographics, economics, weather conditions, and legal and political issues. The number of students available for enrolling into college is determined by demographic trends and personal economics. Availability of financial aid through federal and state sources, as well as philanthropic groups is impacted by the economic viability of the nation, state, and local areas. Actions by the legislature, such as the mandated state appropriation reductions of 2004, coupled with continued increases in costs, may result in an increase of Designated Tuition in order to maintain current service levels. These increases impact prospective students ability to afford this institution, especially low-income students which, in turn, effects our ability to "Close the Gaps". Weather conditions, such as a colder than average winter or hotter than average summer may cause utility costs to soar, thus removing funds from the institutional programs. Because the campus is located near the Gulf of Mexico in Galveston, the campus is very vulnerable to a catastrophic hurricane. Pressure from peer universities has a dramatic effect on our ability to attract and retain high quality faculty. In short, our campus can be greatly affected by external factors.

------	-------------	----------	----------	----------	---------	---------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Factors affecting this strategy include the number of research projects funded from the Federal Government and non-state sources. The number of awarded research grants can be impacted by the availability of matching or seed money.

Texas marine industries, the state, and local government utilize the expertise and scientific output provided by this program. State-of-the-art knowledge and insights are communicated via peer-reviewed research publications and via presentations at local, national and international meetings. This knowledge is also communicated to participants in our K-12 outreach programs. CZL is one of a few environmental laboratories specializing in fate of trace metals and toxic contaminants in Texas waters as well as one that provides vital health data, economic data, and coastal expertise to Texas regulatory agencies. Recent grants focused on availability of toxic metals to oysters, plutonium in the subsurface environment, and mobility of radioactive and toxic trace contaminants in surface waters, sediment, ground waters, and living resources.

The entire state benefits from CZL data that is related to seafood safety for its citizens and from those outside of Texas who consume Texas seafood.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the Texas Institute of Oceanography is to facilitate research that attracts federal and non-state support. TIO funds:

- Support the marine sciences/oceanography programs at Texas A&M University, Texas A&M University at Galveston, and the University of Texas
- Are used to leverage research (external grants 7 to 1; state grants 5 to 1)
- Grants have included ocean circulation/weather patterns, nearshore processes and coastal erosion, estuarine and coastal water quality, seafood safety and management of commercial fisheries.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

This strategy is directly impacted by the amount of grant funding available from federal, state, local and private sources. The number of awarded research grants can be impacted by the availability of matching or seed money.

State appropriated funds are leveraged with grants funds from federal, state and private sources. Currently TAMUG realizes \$5 in external funding for each \$1 of appropriated funds. Research supported by TIO addresses issues of concern to the State of Texas. Examples are improved management of marine fisheries, estuarine and coastal water quality, seafood safety and more effective control of coastal erosion.

Legislators from coastal districts are concerned about coastal erosion from natural and man-made causes and about the environmental impacts of hydrocarbon exploration and production in the Gulf of Mexico. The entire state derives significant revenue from marine fisheries (both commercial and recreational). These fisheries are under increasing pressure and research is required in order to more effectively manage these state resources. All citizens of the state benefit from the preservation of unique marine, coastal, and wetland environments that are hosts to thousands of species of both animals and plants.

The Center will operate a “coastal atlas” that can be used by a variety of organizations, including the Texas General Land Office, the Texas Engineering Extension Service’s Urban Search and Rescue, coastal communities, and coastal counties. The University has a memorandum of understanding (MOU) with the National Oceanic and Atmospheric Administration (NOAA) to support a new \$4.5 million research vessel (R/V Manta) for the Flower Garden Banks National Marine Sanctuary. CTBS will be the entity through which the university carries out its responsibilities under this MOU.

It will also develop “coastal resilience indicators” with support from Texas Sea Grant and NOAA. Center scientists will actively assist the Texas General Land Office in identifying sand sources for beach nourishment projects in Texas. It will operate laboratories for sediment analysis, wave and current prediction models, and relevant chemistry and life sciences. The Texas Commission on Environmental Quality and Texas Department of Health will work with the CTBS’s scientists to obtain a variety of coastal measurements to protect the state’s natural resources.

Senators and representatives from coastal districts are supportive of the Center’s role in assisting the state in developing effective policies and in insuring that federal dollars for coastal restoration and preservation are well spent.

STRATEGY DESCRIPTION AND JUSTIFICATION:

To prevent further erosion of Texas A&M at Galveston's bayside shoreline by using, groins, breakwaters, pilings, or bulkheads.

Thirty thousand acres of wetlands in the Galveston Bay ecosystem have been lost in the past 40 years mainly due to shoreline erosion. Texas A&M at Galveston(TAMUG) has lost over 40 feet from its bayside shoreline since 1985. The existing TAMUG Wetland Center and Mariculture building, located on the bayside, needs immediate protection. Additionally, the Wetland Center Site Plan provides for a future development of this area that will also need shoreline protection.

The west Pelican Island area has been identified as a priority restoration site in the Galveston Bay Foundation Habitat Conservation Blueprint. In addition to protecting the university facilities, the requested funds would provide educational benefits to the public, college students, K-12 students, Sea Camp participants, and teachers who utilize the TAMUG Wetland Center.

In addition to protecting state property, the state will directly benefit because this project will provide habitat restoration techniques, in general, and more specifically, will create a salt marsh that can be used for shoreline erosion control and prevent shifting of sand into the docking area of the Texas Clipper thus preventing additional dredging requirements.

------	-------------	----------	----------	----------	---------	---------

TAMUG is the state’s special-purpose marine and maritime institution and hosts one of the nations’ six state-operated maritime academies, producing licensed officers for the U.S. Merchant fleet and educating undergraduates and graduate students for careers in science, engineering, marine and maritime industries, environmental management, and marine policy fields. Our graduates provide leadership to the state.

Our new ship requires additional bollards for storm moorings for the ship and upgrades of shore-side service connections that include relocation and enhancement of electrical, phone/data, natural gas, fresh water and wastewater connections.

The Port of Houston alone spans more the 25 miles with more than 6,000 ships served annually. It ranks first in the U.S. in foreign waterborne commerce, second in the U.S. in total tonnage, and sixth in the world. It also serves the second largest petrochemical complex in the world. Houston Ship Channel and Port industries support more than 785,000 direct and indirect jobs throughout Texas, generate over \$118 Billion per year in economic impact to the state, and provide more than \$3.7 Billion in state and local tax revenues. It is this port and the other twelve Texas deep-water ports that our Maritime Academy graduates directly support. All Legislators in the Houston region and along the Texas coast are vitally concerned about the shortage of available licensed officers and the negative impact this shortage has on payrolls and tax revenues.

1	General Revenue Fund	4,010,490	4,010,490
TOTAL, METHOD OF FINANCING		\$4,010,490	\$4,010,490

DESCRIPTION / JUSTIFICATION:

TRB funding has been requested to replace and repair the original campus infrastructure that has been in operation since the establishment of the TAMUG Mitchell Campus in the early 1970's and to rehabilitate and expand critical instructional facilities. This request is for the Tuition Revenue Bond Retirement portion of the request.

The primary objective for seeking Tuition Revenue Bond funding for expansion and rehabilitation of instructional facilities, infrastructure and the Central Plant is to address major infrastructure deficiencies and deferred maintenance on aging facilities; address coastal erosion that threatens not only the stability of the western side of the campus but continues to create silting problems for the eastern side of the campus; and, above all, to address the infrastructure needs for meeting the campus' Closing the Gaps initiative of 3000 students by 2015.

TAMUG's strategic plan calls for growing the campus to 3000 students by 2015. Our current classroom and teaching laboratory functionality is threatened by inadequate size and by deteriorating and inadequately sized campus infrastructure and Central Plant. TAMUG projects a record enrollment of undergraduate students in Fall 2008 and also needs to accommodate teaching and research space for graduate-level faculty who will teach and lead students who will enroll in masters and doctoral degree programs in marine biology, beginning Fall 2008. Inadequate instructional and support facilities pose a significant threat to TAMUG's ability to fulfill its commitment to the Closing the Gaps initiative and to expanding graduate education.

EXTERNAL/INTERNAL FACTORS:

The economic benefit to the State by the TAMUG campus is primarily realized in the fishing, seafood, coastal and environmental, and maritime industries. TAMUG graduates and researchers are supporting state agencies in the areas of seafood safety, coastal erosion, wetlands ecology, fisheries characterization, and water quality studies. Houston Ship Channel and Port industries support more than 785,000 direct and indirect jobs throughout Texas, generate over \$118 Billion per year in economic impact to the state, and provide more than \$3.7 Billion in state and local tax revenues. These industries depend on TAMUG's production of graduates for their current and future operations.

DESCRIPTION / JUSTIFICATION:

The mission of the Texas Institute of Oceanography (TIO) is to facilitate research that in turn, attracts federal and non-state support. TIO funds support the marine sciences/oceanography programs at Texas A&M University(TAMU), Texas A&M University at Galveston (TAMUG), and the the University of Texas. The objective of this funding request is to:

- Increase the seed funding for ocean- and coastal-related research of importance to the state to enable Texas institutions to attract more federal research support.
- Provide the minimum funding required for the TIO post-doctoral fellowship program that trains new marine scientists and expands existing research expertise in Texas.
- Restore funding to its 1990-1991 biennium level. Funds for this program have been reduced from \$1,300,000 in 1990-1991 to \$938,652 in 2008-2009 or by approximately \$360,000. Restoration will allow the program to expand the number of supported marine researchers and projects, thus enhancing overall research output and potential for additional federal support.

CODE DESCRIPTION

Excp 2010

Excp 2011

State appropriated funds are leveraged with grants funds from federal, state and private sources. Currently TAMUG realizes \$5 in external funding for each \$1 of appropriated funds. Research supported by TIO addresses issues of concern to the State of Texas. Examples are improved management of marine fisheries, estuarine and coastal water quality, seafood safety and more effective control of coastal erosion.

Legislators from coastal districts are concerned about coastal erosion from natural and man-made causes and about the environmental impacts of hydrocarbon exploration and production in the Gulf of Mexico. The entire state derives significant revenue from marine fisheries (both commercial and recreational). These fisheries are under increasing pressure and research is required in order to more effectively manage these state resources. All citizens of the state benefit from the preservation of unique marine, coastal, and wetland environments that are hosts to thousands of species of both animals and plants.

DESCRIPTION / JUSTIFICATION:

The Coastal Zone Laboratory (CZL) manages and coordinates the needs of research advisory, extension, and public service functions performed by the faculty of Texas A&M University at Galveston regarding important issues and problems facing the Texas coast.

The purpose of this request is to provide support for more researchers and students who will address the significant coastal issues of the state. Examples are erosion, sustainability, and preservation.

Basic research will also continue to provide vital health, economic data and coastal expertise to state regulatory agencies.

EXTERNAL/INTERNAL FACTORS:

Texas marine industries, the state, and local government utilize the expertise and scientific output provided by this program.

State-of-the-art knowledge and insights are communicated via peer-reviewed research publications and via presentations at local, national and international meetings.

This knowledge is also communicated to participants in our K-12 outreach programs.

CZL is one of a few environmental laboratories specializing in fate of trace metals and toxic contaminants in Texas waters as well as one that provides vital health data, economic data, and coastal expertise to Texas regulatory agencies.

Recent grants focused on availability of toxic metals to oysters, plutonium in the subsurface environment, and mobility of radioactive and toxic trace contaminants in surface waters, sediment, ground waters, and living resources.

The entire state benefits from CZL data that is related to seafood safety for its citizens and from those outside of Texas who consume Texas seafood.

FULL-TIME EQUIVALENT POSITIONS (FTE):		2.00	2.00

DESCRIPTION / JUSTIFICATION:

The objective of the Center for Texas Beaches and Shores (CTBS-established by the 73rd Texas State Legislature) is to study the effects of nature and humans on coastal areas, avoid ecological damage using innovative technologies, and cooperate and consult with the General Land Office and other state agencies to manage coastal areas.

The Center will 1)develop policy options for sustainable coastal development; 2)develop Geographic Information System (GIS) web-based tools for use by public institutions for coastal management; 3)conduct research in coastal processes leading to improved technologies for erosion control; and 4)establish an advisory board comprised of experts in coastal engineering, marine ecology, biology, and economics for development of coastal policy options.

EXTERNAL/INTERNAL FACTORS:

The Center will operate a "coastal atlas" that can be used by a variety of organizations, including the Texas General Land Office, the Texas Engineering Extension Service's Urban Search and Rescue, coastal communities, and coastal counties. The University has a memorandum of understanding (MOU) with the National Oceanic and Atmospheric Administration (NOAA) to support a new \$4.5 million research vessel (R/V Manta) for the Flower Garden Banks National Marine Sanctuary. CTBS will be the entity through which the university carries out its responsibilities under this MOU.

It will also develop "coastal resilience indicators" with support from Texas Sea Grant and NOAA. Center scientists will actively assist the Texas General Land Office in identifying sand sources for beach nourishment projects in Texas. It will operate laboratories for sediment analysis, wave and current prediction models, and relevant chemistry and life sciences. The Texas Commission on Environmental Quality and Texas Department of Health will work with the CTBS's scientists to obtain a variety of coastal measurements to protect the state's natural resources.

Senators and representatives from coastal districts are supportive of the Center's role in assisting the state in developing effective policies and in insuring that federal dollars for coastal restoration and preservation are well spent.

DESCRIPTION / JUSTIFICATION:

The objective of this one-time funding request is to:

- Provide adequate space and shore-side utilities for the docking and operation of the Texas Maritime Academy training vessel (T/S Texas Clipper) as well as for TAMUG's smaller vessels used for education and research;
- Abate coastal erosion occurring along the bayside shoreline outside the Wetlands Education and Research Center and associated Wetlands Preserve;
- Reduce the silt flowing into the dockside and marine terminal areas that requires additional and more costly dredging each year.

DATE: **8/1/2008**
 TIME: **1:01:56PM**

Agency code: **718**

Agency name:

Texas A&M University at Galveston

CODE DESCRIPTION

Excp 2010

Excp 2011

Texas A&M University at Galveston is the state's special-purpose marine and maritime institution and hosts one of the nations' six state-operated maritime academies, producing licensed officers for the U.S. Merchant fleet and educating undergraduates and graduate students for careers in science, engineering, marine and maritime industries, environmental management, and marine policy fields. Our graduates provide leadership to port operations, offshore and coastal engineering concerns, ship operations and piloting, and the military.

The original dock area which supported the T/S Texas Clipper II is 393 feet in length while our new training vessel is 524 feet in length. The larger ship requires additional bollards for storm moorings for the ship and upgrades of shore-side service connections that include relocation and enhancement of electrical, phone/data, natural gas, fresh water and wastewater connections.

Dredging expense will be reduced by abating the erosion problem on the bayside near the Wetlands Education and Research Center.

The Port of Houston alone spans more the 25 miles with more than 6,000 ships served annually. It ranks first in the U.S. in foreign waterborne commerce, second in the U.S. in total tonnage, and sixth in the world. It also serves the second largest petrochemical complex in the world. Houston Ship Channel and Port industries support more than 785,000 direct and indirect jobs throughout Texas, generate over \$118 Billion per year in economic impact to the state, and provide more than \$3.7 Billion in state and local tax revenues. It is this port and the other twelve Texas deep-water ports that our Maritime Academy graduates directly support. All Legislators in the Houston region and along the Texas coast are vitally concerned about the shortage of available licensed officers and the negative impact this shortage has on payrolls and tax revenues.

	Total Expenditures		26.6%	\$2,054,694	\$7,712,000		16.4%	\$1,082,568	\$6,609,773

B. Assessment of Fiscal Year 2006 - 2007 Efforts to Meet HUB Procurement Goals**Attainment:**

FY2006 - Heavy Construction, Building Construction and Commodities

FY2007 - Commodities

Applicability:**Factors Affecting Attainment:**

In FY2006, Texas A&M University at Galveston's (TAMUG) Physical Plant projects allowed them to exceed established goals in the Heavy Construction, Building Construction and Commodities categories. In FY2007, TAMUG's construction projects were limited and very specialized construction which provided no opportunity for HUB subcontracting.

"Good-Faith" Efforts:

TAMUG will 1) identify more projects that will allow HUB vendor participation; 2) re-train campus buying personnel on locating HUB vendors; 3) provide education to HUB vendors interested in doing business with TAMUG; 4) promote use of contracts and agreements with HUB vendors as the prime vendor; and 5) transmit formal procurement opportunities in excess of \$5,000 to the Houston Miority Business Council and the Women's Business Enterprise Alliance membership.

Agency Biennial Total (GR + GR-D)			\$ 590,717								

Strategy Code / Name
 Explanation of Impact to Programs and Revenue Collections

0 0

A 10% reduction(\$590,717)will require reductions in or elimination of one or more critical programs and a possible reduction in force. Possible program reductions or eliminations are 1) Ship Operations that support cadet licensing requirements 2) Marine Terminal Operations that support teaching, research and outreach programs, and 3) Academic support programs such as tutoring, mentoring, and assistance services that specifically serve our "at-risk" students and 4) Strategic Enrollment Initiatives that target new recruitment efforts that help us to achive our "closing the gaps goals". We have not fully determined the exact reductions because other variables remain uncertain as to their impact to this campus. In addition to program reductions we will not be able to deliver many classes in the manner we proudly advertise as "the small class experience". We are also aware that any increase in Designated Tuition to offset this reduction may negatively impact our ability to attract students.

0 0

We are painfully aware that a reduction of this size may result in a need to look at Designated Tuition again. We are concerned about future impacts of increases in Designated Tuition.

0 0

Gross Square Feet: 0	Net Assignable Square Feet in Project 0			

Project Description

Rehabilitation and Expansion of Mitchell Campus infrastructure needed to address enrollment growth and inadequate facilities. The institution cannot meet its Closing the Gaps target of 3,000 students without addressing the space shortage that has ranked TAMUG very high in classroom and laboratory usage in the state and has necessitated converting a leased warehouse into classrooms and administrative space. While our new Science Complex will partially support the growth necessary to meet our Closing the Gaps goals, it will only partially support a new graduate program that has recently been approved by the Texas Higher Education Coordinating Board and to some extent, allow our research programs (now ranked third among public universities in the state in terms of federal expenditures per full-time-equivalent tenure/tenure-track faculty member) to continue their rapid expansion. It will not however meet all of TAMUG's growth demands.

					Sep 1 2008	\$22,000,000

SCHEDULE 11: SPECIAL ITEM INFORMATION
81ST REGULAR SESSION
Automated Budget and Evaluation System of Texas (ABEST)

Date: **8/1/2008**
Time: **1:10:31PM**
Page: **1 of 2**

Agency Code: **718** Agency: **Texas A&M University at Galveston**

Special Item: 1 **Coastal Zone Laboratory**

(1) Year Special Item: 1973

(2) Mission of Special Item:

The mission of the Coastal Zone Lab(CZL) is to manage and coordinate the needs of research advisory, extension, and public service functions performed by faculty of Texas A&M University at Galveston associated with environmental quality, especially issues and problems facing the Texas coast.

(3) (a) Major Accomplishments to Date:

Basic research has and will continue to provide vital health, economic data and coastal expertise to state regulatory agencies. Examples include health of Galveston Bay shrimp and oyster catches.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Technology transfers continue and include topics such as industrial discharge affects, hazardous waste sites, and the degradation of fish and shrimp nurseries. Recent grants have focused on availability of toxic metals to oysters, plutonium in the subsurface environment, and mobility of radioactive and toxic trace contaminants in surface waters, sediments and ground waters. CZL continues to develop new and maintain relationships with state agencies, other Texas universities, colleges, and private industry.

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Non-general Revenue Sources of Funding:

Matching funds leveraged 5 to 1

(6) Consequences of Not Funding:

The elimination of funding for this special item would result in the abandonment of this center, which in turn, would result in loss of educational and training opportunities for graduate and undergraduate students. The upper Texas coast would lose one of the few environmental laboratories specializing in fate of trace metals and toxic contaminants in Texas waters as well as one that provides vital health, economic data and coastal expertise to Texas regulatory agencies.

SCHEDULE 11: SPECIAL ITEM INFORMATION
81ST REGULAR SESSION
Automated Budget and Evaluation System of Texas (ABEST)

Date: **8/1/2008**
Time: **1:10:31PM**
Page: **2 of 2**

Agency Code: **718** Agency: **Texas A&M University at Galveston**

Special Item: 2 **Texas Institute of Oceanography**

(1) Year Special Item: 1989

(2) Mission of Special Item:

The Texas Institute of Oceanography facilitates marine related research that attracts federal, federal flow-through and private industry support. This research institution supports the marine sciences, marine biology and marine engineering programs at Texas A&M University at Galveston.

(3) (a) Major Accomplishments to Date:

Studies have been conducted in Galveston Bay and the Gulf of Mexico which have led to increased knowledge and predictive capabilities on the effects of natural and man-made episodic events in this vital marine ecosystem. Areas of expertise include marine mammal, seabird, fish, shellfish, algae and sea turtle biology and ecology, toxic containment analysis, erosion processes and control, wetlands management and physical profiling of the coastal regions.

One significant breakthrough was the development of remote sensing technology to aid in tracking the behavioral patterns of marine mammals.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Continue to expand TIO's mission to encompass marine researchers throughout the U.S. and world. Research has expanded to include one post-doctoral position in the area of Geology and one in the area of Maritime Systems Engineering. This work will enhance research quality and increase federal fund support.

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Non-general Revenue Sources of Funding:

Federal, federal flow-through and private grants

(6) Consequences of Not Funding:

Texas A&M University at Galveston would not be able to meet the legislative mandated maritime research mission of the university. There would be a loss of research opportunities for faculty, research staff, and undergraduate and graduate students. Texas A&M University at Galveston would be unable to fulfill multi-year commitments to the exploration, stewardship and management of the Gulf of Mexico. Loss of state funding would result in a significant loss of federal funding.
