Administrator's Statement

10/16/2014 2:04:27PM

84th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

754 Texas State University

Texas State University, “The Rising Star of Texas,” is a leader in helping the State achieve the goals of “Closing the Gaps.” Texas State, the State’s newest Emerging Research University, is now the 33rd largest university in the country and the fifth largest in Texas with a fall 2013 enrollment of 35,568 students on campuses in San Marcos and Round Rock. Contributing to the state’s participation goal, Texas State has grown faster than the State average at 6,443 students or 22.1 percent over the past six years.

Our student body has also become more diverse. Our enrollment is now 40 percent minority, and Texas State became a Hispanic Serving Institution in 2010.

However, our university is not just about enrollment growth. Texas State has the fifth highest six-year graduation rate in Texas. We are quite proud of the fact that our graduation rates are strong for all ethnic groups. Contributing to the Success goal in “Closing the Gaps,” we have increased the number of graduates by 1,354 annually over the past six years.

Additionally, our graduates express great satisfaction with the education they receive at Texas State. According to surveys conducted as a part of the Voluntary System of Accountability, our graduates rank us only behind Texas A&M and UT-Austin in the Percent Who Would Attend the Same Institution if Starting Over Again and Percent Rating Their Entire Educational Experience Good or Excellent.

To be able to continue these trends, however, we require assistance from the Legislature. Texas State has a space deficit of 1.2 million assignable square feet. We also are one of only two universities to receive a perfect score of 100 from the Coordinating Board in both classroom and lab utilization.

To help us continue to grow we are requesting debt service appropriations for two Tuition Revenue Bond projects; an Engineering and Science Building for the San Marcos campus, and a Health Professions Building for the Round Rock campus.

The Engineering and Science Building request is for debt service to support a total project cost of \$107,000,000 for the building and necessary utility extensions to support it. The building of 122,665 gross square feet will house our Materials Science, Engineering, and Commercialization Ph.D. program and other programs in the Ingram School of Engineering and Department of Biology. We are unable to grow our programs in Engineering or to begin a Civil and Environmental Engineering program, the University’s highest priority for new academic programs, without this TRB-funded project.

The Health Professions Building request is for debt service to support a total project cost of \$67,500,000 for a building of 107,564 gross square feet on our Round Rock campus to house the Departments of Communications Disorders, Physical Therapy, and Respiratory Care. Texas State’s long range plan is to relocate the entire College of Health Professions to the Round Rock campus to contribute to the burgeoning health care community in Williamson County. The space currently occupied by these programs on the San Marcos campus would be converted to other academic programs in need of space for growth.

Our impact on the Research goal in “Closing the Gaps” has been perhaps the most dramatic. Texas State has increased its research expenditures from \$10.3 million to \$36.6 million over the past six years and was recognized as the State’s newest Emerging Research University in 2012 by the Coordinating Board. We began receiving matching funds from the Texas Research Incentive Program (TRIP) last year. We urge the Legislature to continue that program and increase it whenever possible to further incentivize private philanthropy to support research.

Texas State’s other Exceptional Item request will further enhance our Research mission and our progress toward becoming a National Research University. Funding will accelerate the growth of our already successful Science, Technology, and Advanced Research (STAR) Park, Texas State’s research commercialization incubator facility, and our unique Ph.D. program in Materials Science, Engineering, and Commercialization. Start-up business tenants with existing research agreements with Texas State

faculty in engineering and the sciences filled up the available lab space within a few months of opening in September 2012. We are currently in the process of building out previously shelled lab space in the original building and designing a 16,000 square feet expansion to be able to accommodate more firms.

The Multifunctional Materials Innovation Institute (M2i2) Exceptional Item request in the amounts of \$2,813,543 in 2016 and \$2,813,543 in 2017 will develop and support a robust environment for the growth of the high technology industry in Central Texas. M2i2 will provide access to equipment necessary for the development of new materials and tools for the creation of manufacturing processes based on advances in nano and bio-technology, prototyping platforms, and pilot scale manufacturing equipment.

The University is also assisting the State in meeting the Excellence goal in "Closing the Gaps." Our Department of Geography has long been recognized as a premier program. The Meadows Center for Water and the Environment, a collaboration between the Departments of Biology and Geography, has become the State's "go to" source for information on water policy and water resources. Students from the McCoy College of Business Administration again won first place in the Entrepreneurial Action Us, formerly the Students in Free Enterprise, national competition. The above mentioned new Ph.D. program in Materials Science, Engineering, and Commercialization has already started attracting scholars from around the world. Texas State is also home to one of only a few programs across the country in Concrete Industry Management, and we recently opened a new Performing Arts Center to showcase our highly competitive and nationally recognized Music, Theatre, and Dance programs. Finally, the Department of Computer Science has received three National Science Foundation CAREER awards in the last three years.

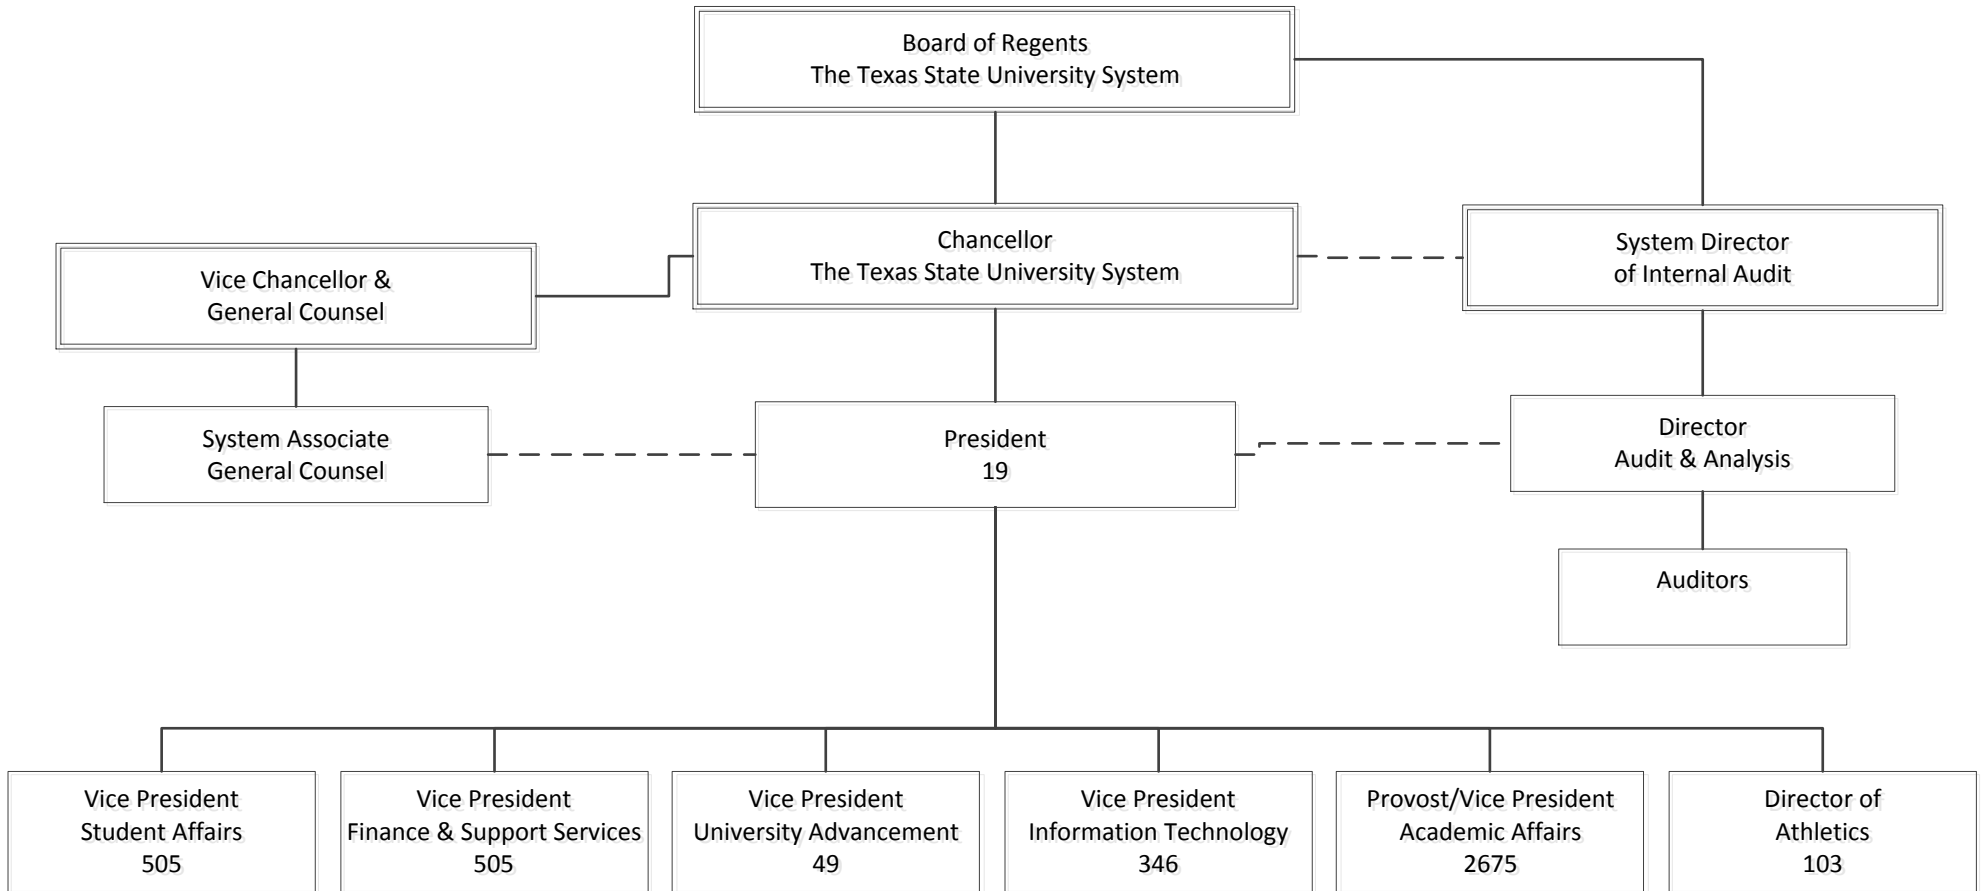

Texas State proposes to absorb the general revenue – related base reduction in existing Special Item Appropriations. The Texas School Safety Center is the least related to our core mission, and we propose to absorb as much of the reduction as possible in its appropriation. Any residual will be absorbed proportionally among remaining Special Items.

I look forward to discussing our request with you.

Denise M. Trauth
President, Texas State University

This strategy provides for the costs of activities or enterprises separately organized and operated in connection with instructional departments primarily for the purpose of giving professional training to students as a necessary part of the educational work of the related departments.
 At Texas State this includes the operations of the Freeman Ranch, the Childhood Development Center, Speech & Hearing Clinic, the Sleep Lab, the Physical Therapy Clinic, and the Clinic for Autism Research, Evaluation, and Support.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The effectiveness of this strategy is affected by a number of internal and external factors such as salaries paid to comparably qualified staff members within the region, the client load of the student clinicians, the availability of comparable services in the surrounding community, market prices that can be charged for services and that are received for goods sold, market prices that must be paid for raw materials, the level of supervision that is provided, and the cost of capital equipment necessary to support the operation.

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model. The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Texas Alliance for Geographic Education supports Texas educators in their efforts to increase geographic literacy. The Texas Alliance develops and hosts professional development, creates quality content materials, and instructional materials for K-12 teachers across Texas. We are charged with increasing geoliteracy through outreach and capacity building, including supporting experienced teachers and collaborative partnerships. The mission of this special item is important to provide knowledge and skills necessary for K-12 educators in teaching the geography strand and standards in the Texas Essential Knowledge and Skills and the Texas College and Career Readiness Standards.

The Texas Alliance for Geographic Education is part of the National Geographic Society's Education Foundation alliance network. The Texas Alliance is a partnership between university faculty and K-12 educators. These state based organizations connect educators, provide world-class professional development, and promote educational innovation at the state, district and local levels. Texas State University is the host university for the NGS Texas Alliance.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the Round Rock Campus is to meet the higher education and workforce training needs of North Austin and Williamson County. Although the RRC started as an evening program and about 90% of the students still continue to enroll on a part time basis in the evenings and work during the daytime, the Nursing students are daytime students and utilize campuses services throughout the daytime. Additionally, because the classrooms in the main building, the Avery Building, are at close to 100% utilization in the evenings, classes are moving into the daytime and will continue to do so over the next two academic years. If Tuition Revenue Bond funding becomes available for the third building, Health Professionals Building #1, those students will also be daytime students. This shift to daytime enrollments will continue to require expansion of student support services and programming and will require very careful scheduling of classrooms. Continued funding of the staff positions is needed in order to meet the growing demand.

The mission of the Texas School Safety Center (TxSSC) is to “serve as: 1) a central location for school safety and security information, including research, training, and technical assistance related to successful school safety and security programs; (2) a central registry of persons providing school safety and security consulting services in the state; and 3) a resource for the prevention of youth violence and the promotion of safety in the state” (TEC 37.201). TxSSC’s goal is to promote a positive and safe learning environment for students and staff through training, technical assistance, and research on key topics pertaining to school safety and security, to offer a model safety and security audit and reporting procedure for districts and community colleges in Texas, and to develop and deploy the tools and resources needed to strengthen school safety in educational institutions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the Special Item is to perform research and disseminate information about the Edwards Aquifer and the regional water resources; to offer laboratory and technical services to public and private entities and support graduate research; to use data created to provide educational services for schools and the public. The Center coordinates its activities with those of other water related centers at Texas State and in Texas. The Center provides opportunities for students to get experience working in the water resources field. We also provide jobs for many students and provide facilities for graduate and undergraduate research. Through our education program of field days and summer camps we expose numerous precollege students to experiences in the water field. The time they spend at our center allows them to get insight into the college experience and may encourage them to seek admission to Texas State in the future. It is important that we have an informed citizenry regarding water resources and we feel our programs aimed specifically at students will promote this. The importance of having a working water laboratory that is always available to support research, classes and educational activities cannot be overemphasized. Few universities have NELAC certified laboratories that can produce data acceptable to state and federal agencies. A better understanding of the activities of the Center can be gained by looking at our website.

The primary mission is to develop the scientists, engineers and other technical/professionals for the Texas workforce to promote economic development. An underlying theme is an increased emphasis on interdisciplinary research, with a strong focus of research training at all levels. We have hired 20 research-intensive faculty in the past four years. The future competitiveness of Texas and the U.S. is tied to technological innovation tightly coupled with commercialization, which will come largely from such scientists using new paradigms of interdisciplinary research and technology transfer. Texas State has positioned itself to be closely aligned with Texas industry by establishing programs to create a cutting-edge materials science, engineering and commercialization infrastructure focused on research, development, and validation of materials for the next generation of electronics, medicines, plastics, sensors, and renewable energy. In addition, these academic and research capabilities are being supported by an institutional ‘top-to bottom’ entrepreneurial and commercialization culture. Our intention is to serve as a launching platform for developing effective entrepreneurial leaders for the advancement of global innovation, including increasing total technical degree holders both enrolled and graduated with an emphasis on outreach to women and minorities.

DESCRIPTION / JUSTIFICATION:

The proposed Multi-functional Materials Innovation Institute (M2i2) will create and support a robust platform for formation and growth of high technology industry in Central Texas focused upon commercialization of new products/processes competitive in the global market. M2i2 will be composed of a unique set of highly sought after facilities and capabilities establishing Central Texas as a magnet for the location of new companies from outside the region. Efforts of M2i2 will be closely coordinated with STAR Park's incubation programs increasing the rate of creation of new innovation focused firms. At a time when industry is reducing its commitment to internal R&D activities, M2i2 will provide access to equipment necessary for the development of novel materials and devices and their production processes based on nano-bio technology. Access to prototyping tools, pilot scale manufacturing, and participation in design studios using faculty advised multidisciplinary student teams will address materials development, prototyping, and process solutions. Target industries will be small to medium size businesses within the region and throughout the US and global markets that typically lack access to sophisticated equipment and technical expertise. Others targeted will include entrepreneur led endeavors and student startups. Product applications include: new electronic materials and devices for the emerging Internet of Things; nanoscale materials for microelectronics, drug delivery or diagnostics; renewable energy devices; advanced polymers; and rapid prototyping of plastics, metals, and composite materials. The Entrepreneur, Innovator, and Scholar in Residence will act as a team to bring their unique perspectives together to create an incomparable environment driving the delivery of commercially relevant R&D with the goal of successful commercialization. Access to R&D/prototyping/pilot production tools will support the continued global competitiveness of Texas firms.

EXTERNAL/INTERNAL FACTORS:

4.A. Exceptional Item Request Schedule
 84th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/16/2014**
 TIME: **2:04:30PM**

Agency code: **754**

Agency name:

Texas State University

CODE	DESCRIPTION	Excp 2016	Excp 2017
-------------	--------------------	------------------	------------------

Major accomplishments to date and expected over the next two years: 14 industry partnerships; 5 startup firms; 22 new jobs; over 100 trained technical industry leaders including those with advanced degrees. FY15/16 projected: 16 industry partnerships; 15 new startups; 40 new jobs; increased output of the skilled workforce and entrepreneurial leaders critical for the region's success.

Year established and funding source prior to receiving special item funding: Initial activities started in FY13/14; self-generated enterprise funds; ETF; University research funds.

Formula funding: None

Non-general revenue sources of funding: Self-generated fees for services: FY13/14 approximately \$402.2K; Projected FY 15/16: \$1,214.2M.

Consequences of not funding: Funding the EIR will have an immediate and fundamental impact on Texas State University's contribution to the economic growth of the Central Texas region. M2i2 will launch Texas State University onto the world stage to benefit the region, state, and nation. Texas State University's unique R&D toolset and policy environment is dedicated to building mutually beneficial, sustainable industry partnerships. The University has committed to a three year startup period. Projected increases in new external R&D funding could reduce by 50% the time necessary for Texas State University to achieve National Research University Fund eligibility status. Without funding a stable environment for success in commercialization, accelerated growth of innovation and commercialization, a robust infrastructure provided by the University with shared expertise and tools, and an overall accelerated growth of innovation and commercialization within the Central Texas will be succinctly diminished.

	Total Expenditures		15.7%		\$30,516,195	\$194,964,166		20.6%		\$34,870,141	\$169,503,933	

B. Assessment of Fiscal Year 2012 - 2013 Efforts to Meet HUB Procurement Goals

Attainment:

The agency attained or exceeded 2 of 6, or 33 % of the applicable statewide HUB procurement goals in Fiscal Year 2013.

Applicability:

Applicable to all procurement categories

Factors Affecting Attainment:

- In FY 2012, the Architect and Engineering (e.g. Professional Services) expenditures were reported under Building Construction category when these services were provided in conjunction with a building construction project. In FY 2013 this problem has been corrected.
- HUB Vendors' difficulty in meeting bonding and insurance requirements as either a prime contractor or a subcontractor in the Building Construction and Special Trade categories.
- HUB Vendors' difficulty in providing required procurement solicitations technical submittals for the Building Construction and Special Trade categories contracts.
- Use of Indefinite delivery/indefinite quantity (IDIQ) contracts for Special Trade categories to leverage spend for smaller remodel and repair projects provides limited bidding opportunities for HUBs.

"Good-Faith" Efforts:

*Economic Opportunity Forums (EOF's) /HUB Outreach Events - Hosted HUB Construction focused EOF's in FY2012 and FY2013. Hosted a HUB EOF during FY 2012 & Fy 2013. Participated in regional and statewide EOF's and other HUB focused outreach events (FY12 - 12 & FY13 - 10):

6.A. Historically Underutilized Business Supporting Schedule

Automated Budget and Evaluation System of Texas (ABEST)

Date: **10/16/2014**Time: **2:04:31PM**

Agency Code: **754** Agency: **Texas State University**

*HUB Certifications - Vendors assisted in obtaining Texas HUB certification (FY12 - 5 & FY13 - 4)

*HUB Mentor-Protégé - M-P relationships sponsored (FY12 - 3 & FY13 - 5)

*HUB Vendor Training - Held 1-on-1 consultations with HUB Vendors to educate them on doing business with Texas State (FY2012 - 20 & FY2013 - 29). In addition, offered educational seminars to HUBs in "Obtaining Bonding" and "How to Respond to Procurement Solicitations".

*HUB "Best Practices" - Actively participated in HUB Discussion Work Group (HDWG) and Texas Universities HUB Coordinators Alliance (TUHCA) to identify HUB outreach best practices and keep abreast of issues regarding the State HUB program.

USE OF HOMELAND SECURITY FUNDS

The following budget is divided into fixed, development, and delivery costs. The development budget will support the development of 1) an awareness-level training tool video documenting law enforcement needs for T-ECC based medical training and, 2.) a 3 day performance-based course built on the ALERRT Level II medical course for law enforcement first responders. The objective of this awareness-level training tool is for police executives, decision makers, and policy makers to recognize the importance and need for this type of training and equipment, as well as, to identify preparedness gaps within their own agencies. The goal of the new performance-based course is to instruct law enforcement, fire and EMS personnel in T-ECC based medical concepts as well as the integration of the three disciplines into a mass shooting response. These concepts include triaging, law enforcement active shooter response tactics to include preparing for/detecting secondary attacks, Rescue Task Force (RTF) concepts for police/fire/EMS, and incident command strategies and best practices. 20% of the budget is directed toward development and 30% is toward delivery.

The video will be mass-produced and distributed on-line (ALERRT.org) as well as at trade shows, through professional organizations, associations, training academies and existing ALERRT course deliveries. The ALERRT website averages more than 6,000 hits per month with more than 30,000 page views. The goal for Phase 1 is the distribution and viewing of the awareness video by 10,000 individuals during the performance period. The goal for the performance-based, hands-on course will be to deliver the course to 520 law enforcement, fire and EMS professionals across the nation.

Through the awareness-level video training tool and the performance-based three day response to mass casualty medical course ALERRT will train and provide outreach to a total of 10,520 students for a cost of \$95 per student.

1 School Safety Center							
Category: Programs - Service Reductions (Other)							
Item Comment: Funding cuts to the Texas School Safety Center would significantly reduce the center's capability to meet the mandates of Chapter 37 of the Texas Education Code as follows:							
Sec. 37.216: Not later than January 1 of each odd-numbered year, the board shall provide a report to the governor, the legislature, the State Board of Education, and the agency.							
The biennial report must include any findings made by the center regarding school safety and security							
Sec. 37.2161: The center shall periodically provide a school safety and security progress report to the governor, the legislature, the State Board of Education, and the agency that contains current information regarding school safety and security in the school districts and public junior college districts of this state.							
Section 37.207a: The center shall incorporate findings of district audits in a statewide report on school safety and security made available by the center to the public. These research reports, the District Audit Report and Junior College Audit Report, contribute to critical ancillary funding decisions throughout the state of Texas, based on research data collected from K-12 and college districts. Findings (attached) are also employed by the governor, legislature, and many state agencies to make programmatic decisions impacting safety and security in educational institutions across Texas.							
Recent legislative requests of the center, including S.B. 407 and H.B. 1942, created an increase in the workload for Center employees, accompanied by reduced appropriations and staffing cuts. Further cuts would create a less robust capability to meet anticipated increases in legislative mandates for the center.							
A \$214,049 cut would result in a decrease in 3 FTEs; a \$428,098 cut would require a 6 FTE decrease, directly impacting the capability of Texas school districts and junior colleges to benefit from research and services offered by the center to assist educational institutions in saving lives and property.

1	Construction of Buildings and Facilities	The Engineering and Sciences Building will provide instructional areas, including general classrooms and teaching labs, research labs and administrative offices for the Ingram School of Engineering, Biology, and Materials Science, Engineering and Commercialization programs. In addition, approximately 5500 assignable square feet has been included for shell space to serve as future general purpose research labs for Biology and the Ingram School of Engineering. In addition to normal access, parking and delivery functions which are to be included in the project design, the project will include a mechanical yard to locate the air-cooled chiller, generators, transformers and other mechanical equipment related to the building operations and an area for use by the Structure Lab for materials lay-down and specimen research. This project includes sitework and campus utility extensions necessary to support the facility.	\$ 107,000,000				\$ 107,000,000		Tuition Revenue Bond	\$ 18,620,139	001	GR
2	Construction of Buildings and Facilities	RR- Health Professions #1 Bldg: Texas State University plans to relocate the entire College of Health Professions to Round Rock. This building will house 3 departments: Communication Disorders (CDIS), Physical Therapy (PT), and Respiratory Care (RC). CDIS will operate a speech pathology clinic where students will work with clients. The PT program, a doctoral granting program, will have clinic space and teaching labs which includes a cadaver lab. Additionally PT and CDIS will share clinic areas (active records area, inactive records area, waiting/reception space, clinic restrooms and office space). RC will have teaching lab space and a sleep center for adults and children. Included in the building will be research lab space, conference room, student group quiet areas, and a shared simulation lab for CDIS, PT, and RC. Also included in the project will be campus infrastructure development including, but not limited to, utilities, sidewalks, landscaping and perimeter roadways.	\$ 67,500,000				\$ 67,500,000		Tuition Revenue Bond	\$ 11,759,550	001	GR

Schedule 8A: Tuition Revenue Bond Projects
 84th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: 10/16/2014
 TIME: 2:04:34PM

Agency 754 Texas State University

Project Priority:	Project Code:	Tuition Revenue Bond Request	Total Project Cost	Cost Per Total Gross Square Feet
1	1	\$ 107,000,000	\$ 107,000,000	\$ 872
Name of Proposed Facility:		Project Type:		
Engineering & Science Building		New Construction		
Location of Facility:		Type of Facility:		
San Marcos		Academic Classroom/Lab		
Project Start Date:		Project Completion Date:		
09/01/2015		08/01/2017		
Gross Square Feet:		Net Assignable Square Feet in Project		
122,665		76,226		

Project Description

The Engineering and Science Building will provide instructional areas, including general classrooms and teaching labs, research labs and administrative offices for the Ingram School of Engineering, Biology, and Materials Science, Engineering and Commercialization programs. In addition, approximately 5500 assignable square feet has been included for shell space to serve as future general purpose research labs for Biology and the Ingram School of Engineering. In addition to normal access, parking and delivery functions which are to be included in the project design, the project will include a mechanical yard to locate the air-cooled chiller, generators, transformers and other mechanical equipment related to the building operations and an area for use by the Structure Lab for materials lay-down and specimen research. This project includes sitework and campus utility extensions necessary to support the facility.

Agency 754 Texas State University

Project Priority:	Project Code:	Tuition Revenue Bond Request	Total Project Cost	Cost Per Total Gross Square Feet
2	2	\$ 67,500,000	\$ 67,500,000	\$ 628
Name of Proposed Facility:	Project Type:			
RR - Health Professions #1	New Construction			
Location of Facility:	Type of Facility:			
Round Rock	Lab-Medical/Healthcare			
Project Start Date:	Project Completion Date:			
09/01/2015	08/01/2017			
Gross Square Feet:	Net Assignable Square Feet in Project			
107,564	64,538			

Project Description

Texas State University plans to relocate the entire College of Health Professions to Round Rock. This building will house 3 departments: Communication Disorders (CDIS), Physical Therapy (PT), and Respiratory Care (RC). CDIS will operate a speech pathology clinic where students will work with clients. The PT program, a doctoral granting program, will have clinic space and teaching labs which includes a cadaver lab. Additionally PT and CDIS will share clinic areas (active records area, inactive records area, waiting/reception space, clinic restrooms and office space). RC will have teaching lab space and a sleep center for adults and children. Included in the building will be research lab space, conference room, student group quiet areas, and a shared simulation lab for CDIS, PT, and RC. Also included in the project will be campus infrastructure development including, but not limited to, utilities, sidewalks, landscaping and perimeter roadways.

Schedule 8B: Tuition Revenue Bond Issuance History

754 Texas State University

Special Item: 1 **Geography Education**

(1) Year Special Item: 1996
Original Appropriations: \$48,400

(2) Mission of Special Item:

The Texas Alliance for Geographic Education supports Texas educators in their efforts to increase geographic literacy. The Texas Alliance develops and hosts professional development, creates quality content materials, and instructional materials for K-12 teachers across Texas. We are charged with increasing geoliteracy through outreach and capacity building, including supporting experienced teachers and collaborative partnerships. The mission of this special item is important to provide knowledge and skills necessary for K-12 educators in teaching the geography strand and standards in the Texas Essential Knowledge and Skills and the Texas College and Career Readiness Standards.

The Texas Alliance for Geographic Education is part of the National Geographic Society's Education Foundation alliance network. The Texas Alliance is a partnership between university faculty and K-12 educators. These state based organizations connect educators, provide world-class professional development, and promote educational innovation at the state, district and local levels. Texas State University is the host university for the NGS Texas Alliance.

(3) (a) Major Accomplishments to Date:

In a visit to the campus of Texas State Mr. Gilbert M. Grosvenor, former Chairman of the National Geographic Society's Board of Trustees, stated publicly that the Texas Alliance for Geographic Education is the flagship Alliance for the 53 state programs supported by the National Geographic Society.

One of the finest accomplishments of the Texas Alliance for Geographic Education is the continued support of a geography track at the annual conferences of the Texas Council for Social Studies (TCSS). Each year The Texas Alliance supports 30 geography-related sessions featuring Texas educators during the Geography Strand of the TCSS conference. The Geography Strand presentations represent approximately 25% of TCSS conference program, providing professional development presentations for thousands of Texas teachers, and is the only single-subject session strand at the conference.

The Texas Alliance is expanding professional development to the Texas State history professional development. We are also utilizing technology to better distribute instructional materials and assistance to teachers by maximizing the use of the website capabilities. More materials are hosted through the first Texas Alliance on-line learning unit, available free, to improve access, including content and instructional strategies, webinars, and videos. The 2013 on-line unit focuses on Southeast Asia geography.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

754 Texas State University

The Texas Alliance will develop in collaboration with K-12 partners, an on-line unit to enhance geographic literacy among grades 4-8 pre-service and existing teachers. The project will develop and disseminate accessible, high-quality, expert-reviewed materials through Texas Essential Knowledge and Skills-based and Texas College and Career Readiness Standards aligned on-line learning modules. The unit will provide easily accessible professional development and instructional resources to assist teachers in engaging students in thinking geographically and applying geographic concepts to their local, state, national, and international communities. A second project is to build a network of K-12 geography partners across Texas to promote and advocate for geographic literacy. These partners will participate in the development, promotion, and demonstration of Texas Alliance resources and serve as Teacher Consultant experts across the state. A third project is identify and promote the tools and techniques geographer's use in their work, and bring awareness to the K-12 audience of the geographic technologies that are increasingly among the most important emerging fields, including online mapping, Geographic Information Systems (GIS), Remote Sensing, and Global Positioning Systems (GPS).

(4) Funding Source Prior to Receiving Special Item Funding:

National Geographic Society and Sid Richardson Foundation

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

National Geographic Education Foundation

(7) Consequences of Not Funding:

The consequences of not receiving the funding for this special item is a potential loss of National Geographic Society (NGS) support and other external funding. We are held in high esteem by National Geographic Society because we are very productive in providing quality training and products to Texas teachers, but also because the State of Texas provides annual financial support. To lose this support would transmit a message to NGS that the State of Texas does not support the work of the Texas Alliance for Geographic Education and might jeopardize the financial support from NGS. This funding strengthens our external funding applications and supports a dedicated staff person to leverage funding for professional development and collaboration to improve geography education.

754 Texas State University

Special Item: 2 **Round Rock Higher Education**

(1) Year Special Item: 1999
 Original Appropriations: \$500,000

(2) Mission of Special Item:

The mission of the Round Rock Campus is to meet the higher education and workforce training needs of North Austin and Williamson County. Although the RRC started as an evening program and about 90% of the students still continue to enroll on a part time basis in the evenings and work during the daytime, the Nursing students are daytime students and utilize campuses services throughout the daytime. Additionally, because the classrooms in the main building, the Avery Building, are at close to 100% utilization in the evenings, classes are moving into the daytime and will continue to do so over the next two academic years. If Tuition Revenue Bond funding becomes available for the third building, Health Professionals Building #1, those students will also be daytime students. This shift to daytime enrollments will continue to require expansion of student support services and programming and will require very careful scheduling of classrooms. Continued funding of the staff positions is needed in order to meet the growing demand.

(3) (a) Major Accomplishments to Date:

The RRC (MITC) started in 1998 in a portable building at a local high school. The campus now has two buildings on 101 acres. Fall 2014 marks the beginning of the 10th year of the RRC at its permanent campus. The number of courses offered continues to rise and the average number of students per class section has risen. Undergraduate programs, in particular, are growing due to the proximity to Austin Community College. Average class size has grown to 18.4 per class. The College of Education continues to comprise the largest portion of the enrollments followed by the College of Business. More on-line and hybrid classes are being offered to Round Rock students. The Nursing Program opened in the Fall of 2010 and the on-line Masters in Nursing Program opened in Fall 2013. A new undergraduate program in General Studies will start in Fall 2014 and this will provide options for Round Rock students who are not interested in enrolling in the existing program offerings.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Students need more options regarding programs offered and the time and day courses are offered. Additional daytime courses need to be added to meet the growing demand for daytime classes. The offering of additional courses and majors will be explored

(4) Funding Source Prior to Receiving Special Item Funding:

The MITC was a new initiative created in 1998 with the Special Item Funding of \$400,000. Prior to that, two staff members were assigned on a part time basis through Texas State University.

(5) Formula Funding:
 N

(6) Non-general Revenue Sources of Funding:

RRHEC generates a small amount of auxiliary revenue from events, workshops, and training. The amount varies and is unpredictable.

Schedule 9: Special Item Information
84th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

754 Texas State University

(7) Consequences of Not Funding:

If funding is not available for the staff positions listed above, current operations including scheduling of courses, advising students, providing financial aid assistance, and updating social media sites would be affected.

754 Texas State University

Special Item: 3 **School Safety Center**

(1) Year Special Item: 2007
 Original Appropriations: \$1,500,000

(2) Mission of Special Item:

The mission of the Texas School Safety Center (TxSSC) is to “serve as: 1) a central location for school safety and security information, including research, training, and technical assistance related to successful school safety and security programs; (2) a central registry of persons providing school safety and security consulting services in the state; and 3) a resource for the prevention of youth violence and the promotion of safety in the state” (TEC 37.201). TxSSC’s goal is to promote a positive and safe learning environment for students and staff through training, technical assistance, and research on key topics pertaining to school safety and security, to offer a model safety and security audit and reporting procedure for districts and community colleges in Texas, and to develop and deploy the tools and resources needed to strengthen school safety in educational institutions.

(3) (a) Major Accomplishments to Date:

- Developed, reviewed, updated and disseminated the Texas Unified School Safety Standards;
- Identified best, “proven” practices in school safety and developed accompanying toolkits for schools to have current, valid, and relevant resources to strengthen safety and security
- Designed, conducted, and published the District Audit Report: 2008-2011, a compilation of safety and security data from Texas public school districts;
- Designed, conducted, and published the Junior College Audit Report: 2009-2012, a compilation of safety and security data from Texas public school districts;
- Re-engineered and deployed a topic-based, interactive, Internet website dedicated to school safety and security and healthy communities;
- Provided public school and junior college districts with comprehensive safety and security-related training, technical assistance, research, information, tools, resources, templates, guides, manuals, best practices, job aids and general support services;
- Developed guidelines and training on safety and security audit procedures for educational institutions;
- Served as a lead agency for statewide youth emergency preparedness and achieved national recognition with White House and FEMA/Homeland Security awards for Individual and Community Preparedness activities;
- Developed and deployed a mandated (Senate Bill 407) Sexting Prevention Education course;
- Identified and compiled resources in comprehensive school-based bully prevention.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

754 Texas State University

- Design, deploy, analyze, compile and disseminate the fourth District Audit Report;
- Design, deploy, analyze, compile and disseminate the second Junior College Audit Report;
- Develop and deploy a school safety certification program;
- Serve as key agency in coordinating special projects between state organizations and educational institutions to address school-based safety and security issues;
- Identify and disseminate best practices in school safety and security;
- Deliver specialized training for school employees in emergency management, including emergency operations planning, training, drilling, and self-auditing;
- Develop and disseminate additional web-based templates, guides, job aids, training, and resources to promote safety and security for schools and community colleges;
- Increase the TxSSC scope of impact to serve more school districts and communities across Texas by developing efficient delivery systems to include online services, regional training summits, community outreach, disaster response and recovery, and strengthening collaborative partnerships among ESCs, state organizations, and other stakeholders;
- Strengthen the TxSSC staff capability to serve as a statewide taskforce for short-term, intensive, focused service to school districts identified as needing special assistance with prevention/mitigation, preparedness, response and/or recovery involving school safety and security.

(4) Funding Source Prior to Receiving Special Item Funding:

FY07 - Office of the Governor, Criminal Justice Division \$450,000

FY07 - Texas Education Agency \$200,000

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

FY14 - Program Income \$200,000

FY13 - Program Income \$223,662

FY12 - Program Income \$197,417

FY11 - Program Income \$207,244

FY10 - Program Income \$215,049

(7) Consequences of Not Funding:

School Districts and Community colleges across Texas would not have:

- A central location or clearinghouse for school safety and security tools and resources mapped to state standards;
 - A District or Junior College Audit Report (DAR), thereby eliminating essential data that portrays the current status of safety and security in Texas educational institutions;
 - A comprehensive, no-cost safety and security training and technical assistance service for schools that addresses critical issues in education today, i.e. emergency operations planning, bullying, youth violence, sexting, drug and alcohol awareness, and emergency preparedness;
 - The capability to deliver a centralized, statewide youth preparedness initiative, resulting in an impoverished level of community-based emergency resilience
 - A service for supporting school-based disaster response and recovery efforts at impacted schools
-

754 Texas State University

Special Item: 4 **Edwards Aquifer Research Center**

(1) Year Special Item: 1980
 Original Appropriations: \$192,000

(2) Mission of Special Item:

The mission of the Special Item is to perform research and disseminate information about the Edwards Aquifer and the regional water resources; to offer laboratory and technical services to public and private entities and support graduate research; to use data created to provide educational services for schools and the public. The Center coordinates its activities with those of other water related centers at Texas State and in Texas. The Center provides opportunities for students to get experience working in the water resources field. We also provide jobs for many students and provide facilities for graduate and undergraduate research. Through our education program of field days and summer camps we expose numerous precollege students to experiences in the water field. The time they spend at our center allows them to get insight into the college experience and may encourage them to seek admission to Texas State in the future. It is important that we have an informed citizenry regarding water resources and we feel our programs aimed specifically at students will promote this. The importance of having a working water laboratory that is always available to support research, classes and educational activities cannot be overemphasized. Few universities have NELAC certified laboratories that can produce data acceptable to state and federal agencies. A better understanding of the activities of the Center can be gained by looking at our website.

(3) (a) Major Accomplishments to Date:

The EARDC has supported many students, at all levels, in studies related to the aquifer and water resources in the region. It has produced numerous publications and reports utilized by officials in and out of the region. EARDC produced an accurate model for predicting spring flows. Our web site is a significant source of information on water and we post data from wells throughout the region, in order to keep the public informed about aquifer conditions. The EARDC has sponsored and cosponsored water related meetings, which have had many attendees. More information about the Center, can be viewed on our web site: <http://www.eardc.txstate.edu>.

We have cosponsored several water meetings with the Edwards Aquifer Authority and others.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

We anticipate making progress in understanding the Aquifer system and how it can be managed to meet Federal and State requirements. In addition the adjacent Trinity Aquifer in the PGMA that includes 10 Central Texas counties is being studied. We are currently providing information that will be useful in refining the Trinity Aquifer Model in the area encompassed by the Hill Country Groundwater Alliance (Composed of county Groundwater Districts in Central Texas over the Trinity Aquifer). We are involved with studies of other aquifers in Texas. We have staff and students working in these areas with external funding. We are using knowledge obtained to assist with planning for proper management in these areas. We have a NELAC certified laboratory that is required for all laboratories supplying information to the TCEQ in Texas. EARDC is a certified Drinking Water Laboratory associated with a University in Texas. We are utilizing students in the new Aquatic Resources PhD program at Texas State in our research programs. We also have monitoring studies with the Texas Commission for Environmental Quality (TCEQ) and internships with Texas Parks and Wildlife (TPWD). These internships help students gain practical experience in real work situations and provide for future employment with these agencies. We are providing information for the Science Committee of the EAA that is reviewing the Habitat Conservation Plan submitted to the USFWS.

754 Texas State University

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

Water Quality Studies, Educational Outreach, Research & Lab Services

FY 05 Funding	\$ 539,727
FY 06 Funding	\$ 710,848
FY 07 Funding	\$ 678,983
FY 08 Funding	\$ 624,485
FY 09 Funding	\$ 740,150
FY 10 Funding	\$ 858,362
FY 11 Funding	\$ 724,960
FY 12 Funding	\$ 539,328
FY 13 Funding	\$ 512,245
FY 14 Funding	\$ 363,628
FY 15 Funding	\$ 375,000

The Special Item funding is used to leverage this funding.

(7) Consequences of Not Funding:

Loss of funding would result in our being unable to maintain the level of services, educational outreach and support of student research activities. This is already demonstrated by decreased external funding. This occurs at a time when the demand is increasing. We would have fewer funds to leverage for match with external funding. We try to increase our outside funding ever year and the funding would help us to continue that. Conditions in the region have made our services, information and activities in great demand and we need the requested funds to meet that demand. Our center is a main supporter of the new Aquatic Resources PhD program at Texas State.

We provide an opportunity for education of public & private school students in the area of water. This is important for the future decision makers in the region.

Inflation and automatic salary increases have decreased our available funding most years. The University has had to supplement our basic funding to keep us functional.

754 Texas State University

Special Item: 5 **Semiconductor Initiative**

(1) Year Special Item: 2000
 Original Appropriations: \$100,000

(2) Mission of Special Item:

The primary mission is to develop the scientists, engineers and other technical/professionals for the Texas workforce to promote economic development. An underlying theme is an increased emphasis on interdisciplinary research, with a strong focus of research training at all levels. We have hired 20 research-intensive faculty in the past four years. The future competitiveness of Texas and the U.S. is tied to technological innovation tightly coupled with commercialization, which will come largely from such scientists using new paradigms of interdisciplinary research and technology transfer. Texas State has positioned itself to be closely aligned with Texas industry by establishing programs to create a cutting-edge materials science, engineering and commercialization infrastructure focused on research, development, and validation of materials for the next generation of electronics, medicines, plastics, sensors, and renewable energy. In addition, these academic and research capabilities are being supported by an institutional 'top-to bottom' entrepreneurial and commercialization culture. Our intention is to serve as a launching platform for developing effective entrepreneurial leaders for the advancement of global innovation, including increasing total technical degree holders both enrolled and graduated with an emphasis on outreach to women and minorities.

(3) (a) Major Accomplishments to Date:

This Initiative has impacted the education of nearly 1200 graduates with technical/professional/engineering degrees, including 30 graduate research projects and 50 undergraduate research projects. External funding associated for research activities enabled by the Special Item is now over \$26M, Gifts in Kind over \$8M. The research facilities supported allow us to attract both quality students and quality faculty. We have engaged with numerous large and small local industries for research and development, stimulating economic development in Central Texas. Our approach has been validated as attested by many factors - we have tripled research expenditures and doubled PhD output since FY2007 allowing the attainment of Emerging Research Status; we have established a research park with a \$1.85M contribution from the EDA; and enrollment in our science, technology and engineering programs continues to grow. The facilities supported by this special item also aid in economic development - we have attracted two start-up companies to Central Texas and engaged with 12 other industry components.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

We expect to impact the education of over 400 more professionals for the high-tech, semiconductor, and nanobiotechnology industries; engage 100 high school students to tour our facility for outreach, continue workshops for teachers & Technical/Community College teachers; and enable at least 25 graduate projects and 50 undergraduate projects. We plan to maintain our upward trajectory in obtaining research funding and establishing industrial relationships.

(4) Funding Source Prior to Receiving Special Item Funding:

Building and equipment funds – University E&G & HEAF – \$1.6 million
 Ingram Family - \$5.0 million toward establishment of a School of Engineering

(5) Formula Funding:

N

754 Texas State University

(6) Non-general Revenue Sources of Funding:

We have been successful at obtaining over \$26M in funding for projects related to the Semiconductor Initiative. Some of the major sources of funding are listed:

Texas Emerging Technology Fund \$4.0M

U.S. Congressional funds \$2.9M

National Science Foundation \$5.0M

U.S. Department of Defense \$2.0M

Air Force Office of Scientific Research \$0.7M

Taiwan Semiconductor Manufacturing Center \$0.6 M

SEMATECH \$0.9M

Private Industry \$2.0M

(7) Consequences of Not Funding:

Not funding this special item would seriously impede the progress being made to create engineering/technical professionals for the Texas workforce and harm our developing programs in Engineering and Materials Science, Engineering and Commercialization. It would reduce our ability to provide outreach to high school and two-year college students to expose them to science/engineering/ technical careers. It would result in a reduction of output of technical/professional minorities and women.

754 Texas State University

Special Item: 6 Small Business Development Center

(1) Year Special Item: 2004
Original Appropriations: \$108,696

(2) Mission of Special Item:

The mission of the Small Business Development Center is to promote Small business and community economic development through extension services covering 79-county South-West Texas Border Region, in cooperation with U.S. Small Business Administration and UTSA as regional administrator of the SBDC program. Also to promote the growth, expansion, innovation, increased productivity, and improved management for small business, through activities of individual business counseling and technical assistance, group training seminars and workshops, advocacy, and research information. The SBDC involves students and faculty through structured service-learning and applied research activities to benefit small businesses through our public service mission. Requesting 10% increase over current funding to expand SBDC services to small businesses with the technology commercialization path utilizing university students and technology programs. The SBDC is tax revenue-neutral certified by the Texas Comptroller and is accredited by the Association of Small Business Development Centers

(3) (a) Major Accomplishments to Date:

During the previous Biennium, the Texas State SBDC generated 796 new jobs and assisted small businesses in retaining 534 jobs. In addition, the Texas State SBDC provided business assistance and business training to 1,298 small business clients with over 9,249 hours dedicated to this effort. These efforts resulted in starting 97 new businesses and expanding 79 existing businesses with capital investments of \$38,638,717.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The Texas State SBDC projects the creation of 1000 new jobs over the next two years. Additionally, the Texas State SBDC projects assisting the development of 110 small businesses and expanding 140 businesses.

(4) Funding Source Prior to Receiving Special Item Funding:

2002 Austin Community College

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

2013 U. S. Small Business Sdministration \$286,304

(7) Consequences of Not Funding:

The consequences of not funding this program would be increases in unemployment in this region of Texas, reduced small business formations and subsequent economic downturns which would lead to reduced tax revenue at all levels of government and increases in the business failure rate. With the current emphasis on job creation and small business formation and expansion, it would be counter intuitive to discontinue support for programs of this kind.

754 Texas State University

Special Item: 7 Institutional Enhancement

(1) Year Special Item: 2006
Original Appropriations: \$1,543,773

(2) Mission of Special Item:

To support our core strategy, namely instruction and operations by providing funding for new academic program start-up and faculty salaries.

(3) (a) Major Accomplishments to Date:

See our key performance indicators.
