**744 The University of Texas Health Science Center at Houston**

---

The University of Texas Health Science Center at Houston (UTHealth) submits the following Legislative Appropriations Request for fiscal years 2016 and 2017 to the Governor's Office of Budget Policy and Planning and the Legislative Budget Board. Giuseppe N. Colasurdo, MD is the president of UTHealth.

**OVERVIEW**

UTHealth is the state's most comprehensive academic health center and is charting a course for Texas to become the premier choice for innovative, transformative health solutions. We provide top-quality medical and bioscience education, health care, research and community service. UTHealth is headquartered in the Texas Medical Center, the world's largest medical center with 7.2 million patient visits annually. We also have regional School of Public Health campuses in Brownsville, El Paso, San Antonio, Austin, and Dallas.

Our mission is to educate health science professionals, make discoveries, translate biomedical and public health advances into patient care, and model the best practices in clinical care and patient health. Annually, we train and educate more than 5,000 future physicians, nurses, biomedical researchers, dentists, dental hygienists, public health specialists and informaticians through our six schools: Medical School, School of Nursing, Graduate School of Biomedical Sciences, School of Dentistry, School of Public Health and School of Biomedical Informatics.

We deliver best-practice clinical care during more than one million patient visits annually. Faculty, residents and students practice in a comprehensive patient care network that includes: UT Physicians, UT Dentists, UT Health Services (School of Nursing), and the UT Harris County Psychiatric Center (UTHCPC). We also provide care in collaboration with our partners and teaching institutions: Memorial Hermann - Texas Medical Center (home to the nation's busiest Level 1 trauma center); Children's Memorial Hermann Hospital, Memorial Hermann/The Institute for Rehabilitation and Research (TIIR), Harris Health System's Lyndon B. Johnson Hospital, and other hospitals and community clinics across the region.

UTHealth is leading the charge to improve the health of Texans through cutting-edge research in our schools and in specialized institutes and centers, such as: the Children's Learning Institute, the Center for Healthcare Quality and Safety, the Consortium on Aging, The Brown Foundation Institute of Molecular Medicine for the Prevention of Human Diseases (IMM), the Center for Clinical and Translational Sciences, the John Ritter Research Program in Aortic and Vascular Diseases, the Neuroscience Research Center, the Maternal/Fetal Medicine Network and the Center for Translational Injury Research.

**SIGNIFICANT CHANGES IN POLICY**

UTHealth and the State of Texas are facing significant challenges given the reductions in federal budgets, the implementation of federal health care reform, and the decreasing portion of health professional education covered by state budgets – a portion much smaller than that in previous decades.

The fiscal impact of these challenges is difficult to measure given that 2014 is the commencement year for many of the major federal reforms in the Affordable Care Act. Those items that likely will have the most significant impact on UTHealth are: the challenge to meet increased demand for health care workers, including physicians, nurses, dentists, public health professionals and biomedical informatics professionals; UTHealth's ability to fund ongoing education and other operations given the uncertainty in health care reform at both the state and national levels; and the ability to maintain successful research programs given decreasing National Institutes of Health (NIH) funding levels and lowered nationwide success rates on grant applications.

An additional concern for UTHealth is the future of the 1115 transformation waiver. If the waiver is not extended or renewed, then UTHealth will likely close some of its innovative programs designed to improve health outcomes for Texans while reducing costs. These programs, including imbedding behavioral health providers in the

---

**744 The University of Texas Health Science Center at Houston**

---

primary care setting to increase access to mental health care, are not sustainable at this time outside of the waiver.

UTHealth, as Texas' largest health care workforce educator, is at the forefront of developing the next generation of physicians, nurses and other essential members of the health care team and strives to provide state-of-the-art education during a time of remarkable knowledge and technology expansion. Texas has increased its physician population by 12 percent since 2009, but Texas' booming population keeps Texas ranked low – 41 in the nation – for the number of active, patient care physicians per 100,000 population. Active, patient care, primary care physicians per 100,000 shows the same trend; Texas still ranks 47 despite increasing primary care physicians by 11 percent since 2009. These numbers are even more disturbing when you consider one quarter of all physicians in Texas are over the age of 60 years and potentially nearing retirement and less than one in five is under the age of 40 years.

Interestingly, Texas is the second best state at retaining our medical school graduates and third best at retaining those who also complete their Graduate Medical Education (GME) training in state. For out-of-state medical school graduates who complete their GME in Texas, the state is the fifth best in retaining those physicians to practice.

These same workforce trends can be applied throughout the health care team, including nursing where Texas is currently short by 22,000 nurses and, due to population growth, that shortage is expected to grow to 70,000 by 2020. Texas ranks 43 in the number of registered nurses per 100,000 population and 44 in the nation for dentists per 100,000 population. These strains on the Texas health care workforce make UTHealth a critical investment of the state's resources.

Bucking the national trends, UTHealth has had steady growth in sponsored research over the last several years but now faces challenges due to decreasing national NIH funding success rates. As a result of the federal funding sequestration, UTHealth has needed to bridge research support for extended periods. Similarly, senior faculty with strong track records are having difficulty obtaining funding despite excellent reviews of research proposals. State funding support is necessary if UTHealth is to build on recent successes and grow quality programs aimed at improving outcomes for costly diseases and conditions.

Finally, the state is funding Health Related Institutions at a significantly lower rate than in previous decades. While we appreciate that overall funding has increased for HRIs, the actual rates per unit have not kept pace with HRI growth. For instance, the instruction and operations funding formula provides only about 60 cents on the dollar compared to what it did in 2001 when including inflationary pressures. As stated in the THECB's Formula Funding Recommendation Report:

“Given the cuts in per unit formula funding in recent biennia, institutions face the difficult task of maintaining quality programs and expanding to address these critical shortages and limitations. It is imperative for Texas to embark on an effort to restore per-unit funding, back to the original formula funding rates of the 2000-01 biennium.”

#### FUNDING PRIORITIES AND LEGISLATIVE APPROPRIATIONS REQUEST FOR FY 2016 AND FY 2017

The UTHealth FY 2016/2017 Legislative Appropriations Request was developed to maintain and enhance our ability to lead the state in educating an increasingly sophisticated and integrated health care workforce to meet the demand of its rapidly growing patient population. These requests also reflect opportunities to improve Texas' health care infrastructure in order to reduce costs, educate more students efficiently, and advance biomedical discoveries. The tangential return on this investment would be the lure of companies and jobs to Texas, making our State an even more attractive with an educated workforce, biomedical research infrastructure and talent, and clinical care second to none.

The following are the funding priorities for the FY 2016/2017 biennium:

---

**744 The University of Texas Health Science Center at Houston**

---

UTHealth Appropriations, Article III

1. Formula Funding

Formula funding remains the state's basic investment in the education, research support and operations of UTHealth and is our top appropriations priority. The Health Related Institutions (HRI) Formula Advisory Committee recommendations contained in the report "Formula Funding Recommendations 2014" (Texas Higher Education Coordinating Board (THECB) HRI Formula Advisory Committee) include discussion of each formula's per unit funding rate. The HRI Committee also recognized that the formulas are a key component of increasing the number of health care providers in Texas and therefore recommended increases to put HRIs on a path to the 2000-2001 biennium level of funding within two biennia. The report was unanimously approved by the state's nine health science centers. UTHealth requests the formula funding rates for fiscal years 2016-2017 consistent with the THECB HRI FAC:

I&O Funding Rate:	\$ 10,545
Infrastructure Rate	
-All Other HRIs:	\$ 9.64
-UTMDACC/UTHSCT:	\$ 9.20
Research:	2.26%
GME:	\$ 6,577

**Biomedical Informatics Weight:** The THECB Formula Advisory Committee requested that the THECB consider proposing a new biomedical informatics weight for instruction and operations formula funding. Currently, biomedical informatics is set at the lowest rate (1.0) for the Instruction and Operations formula rate. The institutions's request is to add a new, separate weight of 1.700 to 1.800 to be in line with Schools of Public Health at 1.721. The low formula funding weight puts Texas at a disadvantage in the international competition for biomedical informatics faculty and students. With existing programs and burgeoning ones starting up at Texas' HRIs, Texas has an opportunity to be an international leader in the field of biomedical informatics education and research and attractive to the "Big Data" companies both existing and future start-ups. A weight above 1.700 would only add approximately \$600,000 to UTHealth's appropriations for the biennium.

**Dental Clinical Operations Formula Funding:** UTHealth also requests a new formula be included for HRIs with Schools of Dentistry by converting the Dental Clinical Operations non-formula funding item to formula funding. Currently, the line item is a random funding amount assigned to that school. We propose converting the Dental Clinical Operations line item to a formula funding item based on patient visits to undergraduate dental students only (no faculty or graduate-level care) at a School of Dentistry-owned clinic. There are three Schools of Dentistry in Texas: UTHealth (Houston) (current Dental Clinical Operations: \$1.33 million/biennium), UTHSC-San Antonio (\$3.45 million/biennium) and A&M-Baylor Dallas (\$78,096/biennium).

To cover the full cost of each student-treated patient visit at a dental school's educational clinic, the formula would provide \$45 per visit. Covering the cost of each patient visit would minimize the need to increase charges to patients or fees required from students. This would increase state funding to the three Schools of Dentistry by \$8.9 million for the biennium.

**Small Class Supplement:** Currently UTHealth's small class supplement for the School of Biomedical Informatics and School of Dentistry's Dental Hygiene program are lumped together in one supplement. UTHealth requests that these two small class supplemental programs – in two different schools, on two different campuses – be split into two separate small class supplements consistent with other HRI small class supplements.

84th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**744 The University of Texas Health Science Center at Houston**

---

2. Exceptional Item Request for Capital Funding, Tuition Revenue Bonds for Renovation and Modernization of Educational and Research Facilities.

UTHealth completed a comprehensive facilities audit that revealed more than 1.4 million square feet in the Medical School, University Center Tower and the School of Public Health buildings were in urgent need of renovation and modernization. UTHealth requests a TRB for \$123.9 million of the total construction cost of \$177 million. The TRB will address significant restoration and functional issues of three almost 40-year-old buildings operating at full capacity in the Texas Medical Center: Medical School Building, the School of Public Health Reuel A. Stallones Building, and the University Center Tower (home of the School of Biomedical Informatics). The project will replace infrastructure that is fully at the end of its useful service life. Projects included are HVAC systems, elevators, and the restructuring of educational and research spaces to meet current technology and modern specifications.

3. Exceptional Item Request for Biomedical Informatics Research and Education Expansion.

Today, the total data created worldwide every 10 minutes is more than all of the data created in human history prior to 2003. The next big economic revolution will be the Big Data revolution. Much like the Internet revolution that began in the 1990s, this new economic cycle has tremendous potential to transform many aspects of our lives. From health records to genomic discoveries to inventions yet to be imagined by informaticians (informatics scientists), the Big Data revolution offers Texas the rare opportunity to enter the market at its inception. To make Texas the hub for informatics nationally, the informatics workforce and research infrastructure must already be in place. UTHealth is requesting \$6 million per year to establish the UT System Biomedical Informatics Collaborative with a focus on expanding the biomedical informatics education programs at the UTHealth School of Biomedical Informatics (SBMI) to the rest of the UT campuses and developing UT System-wide informatics research infrastructure, including recruiting the nation's top informatics faculty and researchers. This effort will increase informaticians in the Texas workforce, which will make Texas more attractive to the Big Data companies and start-ups.

4. Exceptional Item Request for New Regional UTHealth Campus.

The Greater Houston Area is spread over 10,000 square miles, nine counties and has a population of 6.3 million people. If this were a state, it would be larger than New Jersey, nearly the same size as Massachusetts in area, and be ranked the 14th most populous state. The unincorporated areas of the Harris County alone are predicted to have a larger population than even the City of Houston in the next decade. To serve the rapidly growing suburbs of Houston, UTHealth is requesting \$15.8 million per year to fund a new regional UTHealth Campus. All six UTHealth Schools will have a presence at this regional campus, allowing them to expand their reach and capacity for educating the next generation of health care workforce and incorporate a new model of education and practice with interprofessional teams, instead of educating students in disciplinary silos. This interprofessional collaboration would incorporate education, practice and research, and include both primary and acute care clinical experiences with a medical home approach for patients.

5. Exceptional Item Request for the Center for Healthcare Quality and Safety

UTHealth holds a unique national leadership position in health care quality and safety due to the high standards for quality patient care demanded in UTHealth's educational, clinical and hospital settings.

UTHealth requests \$4.9 million per year to expand current Center for Healthcare Quality and Safety programs and to develop additional model education and patient care programs for adult and pediatric care research and education in all six schools of UTHealth. The Center was established to conduct research that generates new knowledge on how to improve patient safety and quality; disseminate findings to health care providers and hospital administrators in Texas and in the U.S.; and educate health care professionals on how to improve patient outcomes.

**Administrator's Statement**

10/13/2014 2:50:46PM

84th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**744 The University of Texas Health Science Center at Houston**

---

The new appropriation will provide essential funding to expand the enormously successful comprehensive care program from the current chronically ill pediatrics model to an adult model serving chronically ill patients in general medicine, cardiology, nephrology, among others.

**6. Exceptional Item Request for Capital Funding, Tuition Revenue Bonds for an Academic and Research Building**

UTHealth requests tuition revenue bond funding of \$91 million as part of a \$130 million total project construction for a new 260,000 square-foot building to house expanding academic and research programs. Growing programs within the School of Public Health, School of Biomedical Informatics and the Medical School have space requirements that cannot be met in the existing university inventory. This new building would meet these emerging challenges.

**Article II, Department of State Health Services Appropriation - The University of Texas Harris County Psychiatric Center**

The mission of the UT Harris County Psychiatric Center (UTHCPC) is to provide inpatient care for major psychiatric disorders, workforce education, research, and community service. UTHCPC is funded in Article II, of the Department of State Health Services budget under the Community Mental Health Hospitals strategy. Current base biennial state funding totals \$47 million. UTHealth requests this funding again.

In addition to the baseline appropriation for FY 2014/2015, the Department of State Health Services via the Harris County Mental Health and Mental Retardation Authority has contracted with UTHCPC for additional services. The hospital was appropriated \$2.4 million/biennium for six beds to pilot a longer length of stay which would permit additional services beyond the usual acute stabilization and determine if this type of programming would improve outcomes and reduce care costs for some patients. UTHCPC is currently undergoing physical renovations that will result in the availability of 20 additional beds. When these beds become available it is recommended that the number of longer term civil beds be increased from six to 12 to give a larger sample from which to study the outcome improvements.

UTHCPC also contracts some of its beds for competency restoration. The contract for \$8.9 million/biennium has the goal of expanded, cost-effective services, which are delivered locally to alleviate pressures on state mental health hospitals and county jails. UTHealth, on behalf of UTHCPC, believes that these programs are beneficial to the state and county and would like to continue contracting for these programs in the FY 2016/2017 biennium.

The hospital continues to make progress to replace significant infrastructure, including portions of the heating, ventilation, and air conditioning (HVAC) system. The facility has completed \$4.2 million in HVAC replacements and upgrades using internally generated funds and \$1.68 million funded by DSHS. The hospital continues to seek funding sources for unfunded HVAC needs of up to \$6.1 million. Timely completion of HVAC upgrades is imperative for ongoing patient safety, accreditation and full operation of UTHCPC to meet both the state and county needs.

**Article III Texas Education Agency and Article VII Texas Workforce Commission - Early Childhood Development Programs at UTHealth**

As a leading component of UTHealth Medical School, the Children's Learning Institute (CLI) directs numerous nationally recognized research and clinical programs, including the Texas School Ready! Project, as well as multidisciplinary programs ranging from the science of neurodevelopment to research for the best therapies to treat children with autism. The Texas School Ready! Project is an early education approach that serves at-risk preschool-aged children through shared resources between public and private early childhood education programs. The project increases children's school readiness through five evidence-driven components: research-based

---

**744 The University of Texas Health Science Center at Houston**

---

curriculum, technology-driven child progress monitoring, facilitated teacher professional development, ongoing teacher mentoring, and sustainability. Funding for the program has been appropriated by the Texas Legislature through the Texas Education Agency (TEA) since the program was first authorized by the legislature in 2003 and through the Texas Workforce Commission since 2005.

The Texas School Ready! Project together with its coordinating programs remains the only research-proven model in use statewide that requires partnerships across local, state and federal providers to the benefit of at-risk children. In addition to the core preschool program, the project has expanded service to support infants and toddlers through statewide early learning guidelines training for practitioners and administrators, and ongoing hosting and technical assistance for the research-proven Beginning Education Early Childcare at Home (BEECH) program. At the request of the Texas Workforce Commission we are preparing for an expansion in service in 2014 that will align Texas School Ready! resources and tools with the Texas Rising Star (TRS) program, a statewide quality rating and improvement system aimed at increasing child care quality. This partnership builds state capacity by allowing CLI to develop and support a web-based TRS data collection and reporting system, and provide Texas School Ready! professional development and remote coaching to TRS providers.

Texas School Ready! continues to leverage the dollars it receives to maximize the participation of diverse early childhood programs that serve approximately 47,000 at-risk children; 2,541 teachers; 1,621 facilities (public school, federal Head Start, and subsidized center and family child care); and 2,476 classrooms.

UTHealth requests the continuation of current level funding of \$3.5 million/year from TEA and \$11.7 million/year through the Texas Workforce Commission (TWC), plus the Texas Rising Star funding. UTHealth also requests the continuation of the UTHealth Early Childhood School Readiness Program Rider which mirrors the TEA rider providing state appropriations to facilitate the efficient continuation of the Texas School Ready! Program and services to the local communities.

#### Required Base Reduction Options

The 10 percent Biennial Base Reduction Options schedules reflect across the board 10 percent total reductions for non-formula general revenue items. Reductions will affect progress made in previous years to enhance research capacity, transform mental health, improve public health across the state, improve trauma services, and may impact our ability to provide support for the educational and research missions critical to a trained medical workforce in Texas. Recruitment and retention of the nation's best medical and scientific minds to Texas will be impacted as well. Reductions to baseline funding will seriously hamper the ability of UTHealth to fulfill its missions.

#### Required Statement on Criminal History

UTHealth's policy is to obtain state criminal history information on any candidate offered an appointment to a security sensitive position. All positions at UTHealth are designated as security sensitive. National data is also obtained for all non-faculty candidates for whom a social security number trace reveals out-of-state records and for all faculty candidates, as allowed by Government Code Sec. 411.094 and Education Code Sec 51.215. Criminal background information may not be released or disclosed to any unauthorized person except on court order.

#### CONCLUSION

UTHealth faces myriad critical challenges to maintaining and improving on UTHealth's high quality in education, research and patient care: the uncertainty surrounding federal health care reform, recruiting and retaining high-performing faculty in a global market, shrinking federal and state funding, and infrastructure that is reaching – or has reached – an age that major replacements, renovations and other improvements are imperative.

**Administrator's Statement**

10/13/2014 2:50:46PM

84th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**744 The University of Texas Health Science Center at Houston**

---

The requests in this LAR represent opportunities not to just overcome the challenges facing UTHealth, but to position the State of Texas as an unequivocal leader on the national health care stage. An investment by the Texas Legislature in UTHealth will allow us to educate the health care workforce and future scientists, provide the necessary tools and space to make new discoveries that will transform human health, bolster economic development and bring jobs to Texas, and continue to provide the best patient-centered care for our fellow Texans.

The University of Texas Health Science Center at Houston  
Executive Organization

## **The University of Texas Health Science Center at Houston Executive Organization Descriptions**

### **Office of the President**

**President** – Giuseppe N. Colasurdo, M.D., holds primary responsibility for the health science center's success in educating students, conducting groundbreaking research, and maintaining a reputable and financially secure clinical practice.

### **Senior Executive Vice President**

**Chief Operating and Financial Officer** – Kevin Dillon, M.B.A. C.P.A., provides financial oversight to each of the health science center's six schools, the Harris County Psychiatric Center and the Brown Foundation Institute of Molecular Medicine as well as the medical practice plan. Mr. Dillon is also responsible for the health science center's central financial and administrative services and campus-wide strategic planning efforts.

### **Executive Vice President**

**Academic and Research Affairs** – George M. Stancel, Ph.D., oversees academic program development and student services for the health science center's six schools. He also provides oversight of the health science center's research enterprise including the Committee for the Protection of Human Subjects, the Center for Clinical and Translational Sciences, and various faculty research support functions.

### **Deans**

**Medical School** – Giuseppe N. Colasurdo, M.D., directs the school's academic, research, clinical, and outreach activities.

**School of Dentistry** – John A. Valenza, D.D.S. directs the school's academic, research, clinical, and outreach activities.

**School of Public Health** – Roberta Ness, M.D., M.P.H., directs the school's academic, research, and outreach activities.

**School of Biomedical Informatics** – Jiajie Zhang Ph.D., directs the school's academic, research, and outreach activities.

**Graduate School of Biomedical Sciences** – Michael Blackburn, Ph.D., co-directs the school's academic, research, and outreach activities.

**Graduate School of Biomedical Sciences** – Shelley Barton, Ph.D., co-directs the school's academic, research, and outreach activities.

**School of Nursing** – Patricia L. Starck, D.S.N., R.N., F.A.A.N., directs the school's academic, research, clinical, and outreach activities.

## **Vice Presidents**

**Special Advisor to the President** – Carlos R. Hamilton, M.D., advises the President on policies and activities to further the university's goals.

**Governmental Relations** – Scott Forbes is the health science center's liaison to local, state, and federal government entities. He also advises Executive Leadership on issues of interest to elected officials.

**Institutional Compliance** – William LeMaistre, JD, MPH, is responsible for promoting compliance with all applicable legal and regulatory requirements.

**Internal Audit** – Dan Sherman, M.B.A., C.P.A., is responsible for ensuring that all academic and business operations comply with university policies and applicable regulations.

**Legal** – Arlene D. Staller, J.D., serves as an on-campus resource for general legal counsel, coordinates legal action either in defense of or on behalf of the health science center.

**Development** – Kevin Foyle, CFRE coordinates the development program including principal, planned, major and annual gifts, corporate and foundation relations and administrative and information services.

**Planning** – Karen Parsons, JD assist in long-term and strategic planning for the university.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, student services and institutional support. The formula for this strategy is based on weighted medical student headcounts. The rate per weighted student headcount or full time equivalent is established by the Legislature each biennium.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

(1) - Formula funded strategies are not requested in 2016-17 because amounts are not determined by institutions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, student services and institutional support. The formula for this strategy is based on weighted nursing student full time equivalent. The rate per weighted student headcount or full time equivalent is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2016-17 because amounts are not determined by institutions.

CODE	DESCRIPTION	Exp 2013	Est 2014	Bud 2015	BL 2016	BL 2017
------	-------------	----------	----------	----------	---------	---------

This special item expands statewide public health educational, research, and community service activities to address rising public health issues such as diabetes, obesity, and disaster preparedness. The UT School of Public Health (UTSPH) campuses in Houston, Brownsville, El Paso, San Antonio, Austin, and Dallas and their numerous collaborative academic and health science center partners benefit from the expansion through increased enrollment to address projected public health workforce shortages in Texas, capacity for new research, and ability to address local public health issues.

This special item is directed at addressing today’s critical health issues – prevention saves the state of Texas future health care costs. According to the Department of State Health Services, the health care cost of the obesity epidemic will be \$39 billion by 2040 – quadruple the current cost of \$10.5 billion/year. If the current trends continue, 75% of Texas adults might be overweight or obese by the year 2040. The UTSPH has several programs targeted at this epidemic, including the internationally recognized Coordinated Approach to Child Health (CATCH) which is currently used in 2,500 schools in Texas and more than 8,500 schools here and abroad. A sophisticated economic analysis suggests that implementing CATCH statewide could save approximately \$60 million over time in averted obesity and productivity costs in Texas.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

------	-------------	----------	----------	----------	---------	---------

The Public Health Division of the Lower Rio Grande Valley Regional Academic Health Center (RAHC), which also functions as the UT School of Public Health Brownsville Regional Campus, brings much-needed resources to the Lower Rio Grande Valley. Not only does the campus offer a graduate public health education program to the local community, it also provides an academic base where faculty and students conduct in-depth research into the causes of high rates of numerous diseases in Valley residents. This region of Texas has higher disease rates, is more economically depressed, has fewer health care providers, and has fewer people trained to research and address the causes for disease.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The goal of the heart and stroke research special item is to apply the powerful new techniques of genomic and proteomic research to advance understanding of the causes, treatments and cure of major diseases, including cardiovascular diseases, neuro-degenerative diseases and metabolic disorders. The funds are used to recruit and retain outstanding scientists and to expand the research capacity of UTHealth, including the Institute of Molecular Medicine (IMM). Funding is targeted to improve Texas' position as a national leader in biomedical research and to build upon superb infrastructure and academic research programs by improving UTHealth's position in the market place to retain the very best of our scientists and to attract new talent. Funding also will allow Texas to invest in new research programs that can make a real difference to health care by supporting the most innovative and most rewarding new programs.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Biotechnology Program promotes the formation of cross-disciplinary programs and special projects related to biotechnology innovation and the creation of public-private partnerships to promote the commercialization of UTHealth biotechnology. The overall program fosters environments in which researchers, clinicians, and staff manage programs and projects widely beneficial to UTHealth, the Texas Medical Center, and the State of Texas. The Biotechnology Program has been designed to promote commercialization of discoveries and inventions that improve medical care and public health.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The goal of the World's Greatest Scientists special item is to build the capacity for application of the powerful new techniques of genomic and proteomic research, combined with expertise in bioinformatics, to advance the understanding of the causes, treatments and cure of major disease, including cardiovascular disease and stroke, neuro-degenerative diseases, lung disease, cancer, autoimmune diseases and metabolic disorders. This special item is an enhancement to the "Heart Disease and Stroke" special item.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The UT Health Medical School's Department of Psychiatry and Behavioral Sciences and the UT Harris County Psychiatric Center are the primary leadership in the region for clinical training, research and patient care for persons with mental illness. Through its inpatient and outpatient services, UT Psychiatry sees more than 18,000 patients every year. The patient population includes a broad range of behavioral disorders and illnesses.

This new special item has allowed the Department to begin the process of new clinical research and intervention to further generate knowledge to identify persons with mental illness and treatment, evidence-based research to allow for long-term follow-up with validation of treatment and its effect on productivity, educational outcomes and overall well-being; and the evaluation of the effectiveness of treatment protocols.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

This item provides much needed health care to indigent patients and supports graduate medical education efforts at LBJ General Hospital (LBJGH), which is part of the Harris County Hospital District. Harris County has an estimated 1 million residents with no health insurance and an additional 500,000 residents are underinsured. Also important is the opportunity for UTHealth faculty to promote understanding of cultural mores and their impact on health care delivery to faculty colleagues, residents and students. Funds allow UTHealth to maintain the appropriate level of expertise, staffing, and clinical instructional programs (including residents and students) in selected medical disciplines at the Lyndon B Johnson General Hospital and maintain primary care services at the Harris County Hospital District neighborhood health clinics.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

UTHealth maintains successful education and research-based programs for the Lower Rio Grande Valley/Border Region of Texas to improve health care services for the Valley's under-served population. Funds from this special item allow UTHealth to assist the Valley area in developing its own resources, both human and material, to achieve long-range goals of self-sufficiency of health care manpower and delivery of services. The institutional presence also allows UTHealth the opportunity to recruit talented students from the South Texas region into its academic programs.

------	-------------	----------	----------	----------	---------	---------

UTHealth physicians staff the busiest trauma center in the nation at Memorial Hermann-TMC and have seen an unprecedented 30 percent increase in trauma volume over the last five years. UTHealth’s Center for Translational Injury Research (CeTIR) is one of the leading trauma care research centers in the nation. Funding for this exceptional item will assist UTHealth in developing and moving its life saving research to a large and diverse patient population and sustain proper staff levels in the trauma center and research labs. Trauma is the leading cause of death for persons aged 1 to 44 years, leading to a greater loss of lifetime income. Trauma will be the leading cause of death worldwide by 2020. Injury-related research funding lags far behind other diseases such as cancer and heart disease, despite the greater lifetime economic impact and youthful age of trauma’s victims. The best practices and treatments established at UTHealth can be replicated statewide and could also be implemented in the military to care for injured soldiers. Additionally, a trauma patient returned to the workforce will pay greater dividends to the state than a trauma patient left unable to work and on governmental assistance due to injury.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

Institutional Enhancement funding plays a significant role in financing the core mission of our institution by providing a base level of funding for our institution's services and programs. Institutional Enhancement funding helps support leading edge and innovative programs in education not otherwise supported by formula funding. Specifically, institutional enhancement allows UTHealth to preserve existing academic and research programs in pursuit of the overall mission of instruction, research, and patient care.

	<b>TOTAL, METHOD OF FINANCING</b>	<b>\$10,800,000</b>	<b>\$10,800,000</b>

**DESCRIPTION / JUSTIFICATION:**

UTHealth completed a comprehensive facilities audit that noted that over 1.4 million square feet in the Medical School, University Center Tower and the School of Public Health buildings were in urgent need of recapitalization, renovation, and modernization. UTHealth requests a TRB for \$123.9 million of the total construction cost of \$177 million. The TRB will address significant restoration and functional issues of three almost 40-year-old buildings operating at full capacity in the Texas Medical Center: Medical School Building, the School of Public Health Reuel A. Stallones building, and the University Center Tower (home of the School of Biomedical Informatics). The project will replace infrastructure that is fully at the end of its useful service life. Systems included are HVAC systems and restructure educational and research spaces to meet current technology and modern needs.

The debt service requested assumes a 20-year level term debt at 6% consistent with the assumptions of the Texas Public Finance Authority for FY 2016 and FY 2017.

**DESCRIPTION / JUSTIFICATION:**

UTHealth is requesting \$6 million/year to establish the UT System Biomedical Informatics Collaborative with focus on expanding the biomedical informatics training programs at SBMI to the rest of UT campuses and developing UT System-wide informatics research infrastructure, including recruiting the nation's top informatics faculty and researchers. This effort will increase informaticians to the Texas workforce that will make Texas more attractive to the big data companies and startups. Texas can be the national center for developing the informatics infrastructure and tools to support big health data that will be used to revolutionize healthcare and make new kinds of biomedical discoveries.

Health data has exploded over the past decade: 80% of medical records are electronic in 2014 vs. 20% in 2004. The amount of health data in US is many times the data created by the entire human civilization up to 2003. In order to convert these big health data into meaningful information and knowledge to support health care and biomedical discoveries, new researchers and educators, new informatics tools and infrastructures, and new workforce trained in informatics are urgently needed.

To meet these critical needs for training and the concurrent needs of informatics tools and data sharing infrastructures in Texas, we propose the development of a UT System Biomedical Informatics Collaborative to (1) expand formal degree and certificate granting programs of SBMI to meet the immediate needs for a large number of biomedical informaticians and health IT professionals at UT campuses and other biomedical and healthcare institutions in the state and (2) build a data sharing infrastructure across UT health components and develop informatics tools to accelerate the use of big data for patient care, clinical research, biomedical discoveries, and technology transfer.

**EXTERNAL/INTERNAL FACTORS:**

Agency name:

**The University of Texas Health Science Center at Houston**

CODE	DESCRIPTION	Excp 2016	Excp 2017
------	-------------	-----------	-----------

Major accomplishments to date and expected over the next two years:

Over the next two years, the UT System Biomedical Informatics Collaborative will be established. SBMI's education programs will be made available through online courses, interactive videos, and in-person instructions to other participating UT campuses in the forms of elective courses, "4+1" integrated BS/MS programs, and joint graduate courses. Six FTE teaching faculty will be hired, with 2 at SBMI and 4 divided among the other participating campuses. Thirteen FTE staff (6.5 at SBMI and 6.5 at other campuses) will be hired to coordinate the education programs at all campuses and support the increasing technology needs and new content development. On the research side, The University of Texas Center for Big Health Data will be established, with the aims of developing a clinical data sharing infrastructure across UT health campuses to facilitate clinical and translational research and developing new tools and products for making full use of big health data tools in healthcare delivery, biomedical discovery, and technology transfer. Six top scientists in big health data area will be recruited, along with five big data analysts/developers and four postdoctoral fellows.

Year established and funding source prior to receiving special item funding: N/A

Formula funding:

Future formula funding will apply to the increase in new students above current levels.

Non-general revenue sources of funding: N/A

Consequences of not funding:

The Big Data Revolution is no less profound than the Internet Revolution in the 1990s. Texas needs to be a leader in this revolution for continued economic viability when other states are making major investment in big data (e.g., Columbia's \$100M Institute of Data Science & Engineering and U of Colorado's \$63M Center for Personalized Medicine and Biomedical Informatics).

**DESCRIPTION / JUSTIFICATION:**

The University of Texas Health Science Center at Houston (UTHealth) has provided Texas with an excellent healthcare workforce, cutting edge research, and lifesaving clinical care since the 1970s with the School of Dentistry tracing its roots more than 100 years ago. UTHealth has been open to expanding its educational opportunities outside of Texas Medical Center. An example of this is the highly regarded UTHealth School of Public Health with its six campuses in Houston, Austin, Brownsville, Dallas, El Paso, and San Antonio making all of Texas its research and education cohort.

To continue UTHealth's efforts to provide access to healthcare education to more Texans, a new campus is being considered in one of the fast-growth areas that surround Houston proper. The campus will be a laboratory for collaborative education of students from many healthcare fields. Breaking the old model of educating healthcare professionals in silos, this new campus will recognize the new reality of healthcare teams and will teach students to utilize each other's strengths in the care of patients and interprofessional collaboration.

A small portion of this funding will assist UTHealth in completing the determination on the location for the new campus, weighing the population base, healthcare workforce needs, large hospitals and primary care clinics (including teaching partners of UTHealth), easy access to numerous other communities, and an expanding job base. The majority of the funding will allow UTHealth to establish the new regional campus and offset some of the cost to hire faculty and staff, supply and equip the campus, facility rent, and other necessary expenses.

Major accomplishments to date and expected over the next two years:

The Center for Interprofessional Collaboration has been organized and made operational, including vision, mission, organizational structure, bylaws, and strategic plan. A very successful course (Dean's Honors Colloquium) has been held and others are planned (Teams of students from each school). A feasibility study of clinical resources for an outreach campus is underway.

Facilities located, and prepared, clinical agreement contracts signed, faculty and staff recruited, curriculum and clinical rotations planned and initiated, faculty and clinical preceptor training, development and public relations initiated.

Year established and funding source prior to receiving special item funding: N/A

Formula funding:

Future formula funding will apply to any increases in new students above current levels.

Non-general revenue sources of funding: N/A

Consequences of not funding:

If this proposal is not funded, the full potential of the Greater Houston Region will not be tapped to add to the healthcare workforce and reduce some of the healthcare workforce shortages. The possible interprofessional collaboration model will not be tested on this new campus and the exciting possibilities of this model being a standard of education will be further set back.

**DESCRIPTION / JUSTIFICATION:**

UTHealth holds a unique national leadership position in health care quality and safety due to the high standards for quality patient care demanded in UTHealth's educational, clinical and hospital settings.

UTHealth requests \$4.9 million/year to expand current Center for Healthcare Quality and Safety to develop additional model education and patient care programs for adult and pediatric care research and education in all six schools of UTHealth Houston. The Center was established to conduct research that generates new knowledge about how to improve patient safety and quality; disseminate findings to health care providers and hospital administrators in Texas and in the US; and educate caregivers on how to improve patient outcomes.

The new appropriation will provide essential funding to expand the enormously successful comprehensive care program from the current chronically ill pediatrics model to an adult model serving chronically ill patients in general medicine, cardiology, nephrology, among others.

Agency code: 744

Agency name:

**The University of Texas Health Science Center at Houston**

**CODE DESCRIPTION**

**Excp 2016**

**Excp 2017**

Major accomplishments to date and expected over the next two years:

UTHealth quality faculty have been sourced in numerous national journals and by recognized quality related entities including: The Journal of the American Medical Association; the national Institute of Medicine, the federal Health and Human Services Department; and the Agency for Healthcare Research and Quality.

The model Comprehensive Care Program for High Risk Chronically Ill Children has shown remarkable results in cost reduction, admissions reduction and improved life outcomes for the children participating in the program. This program recently received a Health Care Innovation Award grant from HHS.

The Center continues to have strong relationships and leadership positions on quality issues with the UT System health related institutions; the Health and Human Services Commission and the State Health Services Department, the Texas Hospital Association, local hospital partners and federal agencies.

Major accomplishments expected will include: development and implementation of adult comprehensive care program and dissemination of this care model for use by other health care providers in Texas and nationally; distribution of quality findings through national publications and conferences; recruitment of leading faculty and, most importantly, higher levels of quality patient care for Texans.

Year established and funding source prior to receiving special item funding: N/A

Formula funding: N/A

Non-general revenue sources of funding:

N/A

Consequences of not funding:

Because health care providers today are paid on fee for service basis and not for quality outcomes, funding for start-up of quality programs is limited. Lack of funding will limit the development of new and expanded models and will ultimately prevent patients from benefitting from this work.

**DESCRIPTION / JUSTIFICATION:**

The University of Texas Health Science Center at Houston requests tuition revenue bond funding of \$91,000,000 as part of a \$130,000,000 total for a new 260,000 sq ft, building to house expanding academic and research programs. Growing programs within the School of Public Health, School of Biomedical Informatics and the Medical School have space needs that cannot be met in the existing university inventory.

Construction would begin on September 1, 2016. The debt service requested assumes a 20-year level term debt at 6% consistent with the assumptions of the Texas Public Finance Authority for FY 2016 and FY 2017.

**B. Assessment of Fiscal Year 2012 - 2013 Efforts to Meet HUB Procurement Goals**

**Attainment:**

The agency attained or exceeded one of five, or 20% of the applicable statewide HUB procurement goals in FY 2012.  
 The agency attained or exceeded one of five, or 20% of the applicable statewide HUB procurement goals in FY 2013.

**Applicability:**

The "Heavy Construction" category is not applicable to agency operations in fiscal years 2012 and 2013 since the agency did not have any strategies or programs related to heavy construction.

**Factors Affecting Attainment:**

As a healthcare and research institution, each fiscal year there are sole source, and proprietary requirements, as well as existing contracts and conditions within the agency which preclude awards to other than the existing or specified contractors. We continue to research HUB potential; however, some non-availability continues in the areas of medical/research products, chemicals, blood and blood products. These types of purchases cross all purchasing categories for goods and services.

**"Good-Faith" Efforts:**

The institution participated in the following efforts: 1.) identified HUB contracting and subcontracting opportunities through one-on-one communication with buyers; 2.) met monthly with our HUB Advisory Group to communicate HUB Program information throughout the UTHSC-H community; 3.) organized annual HUB Vendor Fair featuring 18 HUB vendors; 4.) participation at the monthly Greater Houston Business Procurement Forum meetings; 5.) participation at the Small Business Administration's Matchmaking Event; 6.) participation in the Houston Minority Supplier Diversity Council's Annual EXPO; 7.) hosted Lunch-N-Learn's for our top HUB vendors as well as end users; 8.) attendance at SBA Quarterly meetings; 9.) sponsoring one mentor protégé relationships while working towards sponsoring a second mentor protégé relationship; 10.) participation in the Women's Business Enterprise Alliance Annual Expo

1 5% General Revenue Reduction to Special Items

Category: Across the Board Reductions

**Item Comment:** UTHealth has reduced each of its 2016 and 2017 special items by 5% to lessen the fiscal impact on individual strategies. The resulting reductions translate into operational and service delivery constraints in many programs supported by these special items. Dental Clinic Operations will potentially need to reduce its support staff; funding reductions will reduce support levels for dental and dental hygiene students who are gaining experience in a clinical setting. Regional Academic Health Center-Public Health (RACH) and Service Delivery in the Valley Border Region programs will need to reduce FTEs given the high percentage of salaries budgeted in these strategies. Funding decreases will reduce administrative support and service delivery at the School of Public Health's Regional campus and in the Valley Border educational and research based programs which are improving health care services for the Valley's under-served population.

The Harris County Hospital District's LBJ hospital provides the setting for the clinical rotation of medical students, residents and fellows. The Hospital District's special item funding provides UTHealth with funding to support these medical student and residency programs. Reduction in funding will likely lead to erosion of the clinical spectrum that Medical School trainees experience, fewer trainees and a subsequent loss of physicians in Texas.

World's Greatest Scientist and Heart and Stroke programs funding reductions will impede recruitment efforts for outstanding scientists. Institutional Enhancement funding plays a significant role in financing our institution's core educational mission by providing funding for innovative programs in education not otherwise supported by formula funding. Coupled with previously absorbed reductions, an additional 5% cut in this strategy will negatively impact the level of programs and service we are able to deliver to our students.

**FTE Reductions (From FY 2016 and FY 2017 Base Request)**

**2 5% General Revenue Reduction to Special Items**

**Category:** Across the Board Reductions

**Item Comment:** Implementation of the 2nd 5% increment of the 10% reduction will result in substantial reductions in our core missions of education, public service and research. While reductions outlined in Section 1 comments will begin to impact administrative service levels and delivery of educational and research programs, an additional 5% cut will likely require downsizing of existing special item programs. Previous cuts, to the extent possible, preserved the faculty and staff critical to delivery of quality education and health care services in UTHealth's Dental Clinic Operation, RAHC and Harris County Hospital District endeavors. The 2nd 5% increment reduction will directly impact these critical staff as cuts must be absorbed in salaries. Biotechnology Program efforts, which include the formation of cross-disciplinary programs and projects related to biotechnology innovation, will be negatively impacted by an additional 5% funding reduction. Faculty recruitments funded by Heart and Stroke and World's Greatest Scientist items will be curtailed, limiting the addition of outstanding scientists to those previously recruited faculty members who have been integral to recent clinical/translational research advancements.

HR 3590 PPACA (PL 111-148); HR 4872 Reconciliation Act (PL 111-152); and HR 1 ARRA (PL 111-5)

**DESCRIPTION/KEY ASSUMPTIONS:**

The fiscal impact on UTHealth is difficult to measure as many of the reforms of the ACA did not begin until 2014 and the regulations and assumptions are changing rapidly during the rollout period.

**CONCERNS:**

The top concern for UTHealth is the impact of the Affordable Care Act on the health care workforce. The health care reform bill projects a greater number of insured patients. However, with an estimated national shortfall in physicians of at least 90,000 by 2020, these newly insured patients will find that access to health care will be limited and difficult. Additionally, Texas already ranks 47th among the states in primary physicians per 100,000 population and 41st in total active practicing physicians per 100,000. As the population ages, the lack of specialty care will impact the newly insured's access to a specialist. Texas ranks high compared to other states in its ability to retain medical students and residents (third best in the nation), but there are not enough resident positions available in Texas to keep all of the best and brightest from Texas medical schools.

Additionally, the nursing shortage in Texas continues to be an issue. The nursing shortage reduction efforts by the Legislature in the last two sessions have assisted nursing schools, including UTHealth's, by increasing their enrollment. However, Texas will still need 70,000 more nurses by 2020. Texas, according to the CDC, ranks 44th in the number of dentist per 100,000. Approximately 85% of Texas' public health workforce has no formal public health education.

**Exp 2013**

**Est 2014**

**Bud 2015**

**BL 2016**

**BL 2017**

### **Impact on Program**

Unknown impact on State General Revenue Research Formula from sequestration.

### **Assumptions and Methodology**

The success rate of highly scored federal grant applications to the National Institutes of Health (NIH), the Centers for Disease Control and Prevention (CDC), and other federal research grant agencies has continued to drop, even for experienced faculty. It is unknown how many of these projects would have been funded, but for the sequestration. These additional grants could have increased the state's general revenue research formula funding to UTHHealth, but it is not possible to measure.

**Project Description**

The University of Texas Health Science Center at Houston requests tuition revenue bond funding of \$123,900,000 as part of \$177,000,000 total for renovation and modernization of educational and research facilities. In addition to the TRB funding, funding is proposed from other university sources to complete the total need.

The following buildings are included in this request:

Medical School Building, 882,000 GSF

School of Public Health Reuel A. Stallones Building, 232,000 GSF

University Center Tower (School of Biomedical Informatics), 345,000 GSF

The proposed upgrades are important elements in the university's master plan, and will ensure efficient functionality in their crucial roles of supporting teaching and research.

260,000	169,000			

**Project Description**

The University of Texas Health Science Center at Houston requests tuition revenue bond funding of \$91,000,000 as part of a \$130,000,000 total for a new 260,000 sq ft, building to house expanding academic programs and to allow strategic redeployment of administrative functions. Growing programs within the School of Public Health, School of Biomedical Informatics and the Medical School have space needs that cannot be met in the existing university inventory. Additionally, administrative functions now occupy space in Main TMC Campus locations that could be repurposed for key medical / research / academic needs.

---

**Special Item: 1 Improving Public Health in Texas Communities**

**(1) Year Special Item:** 2010  
Original Appropriations: \$4,750,000

**(2) Mission of Special Item:**

This special item expands statewide public health educational, research, and community service activities to address rising public health issues such as diabetes, obesity, and disaster preparedness. The UT School of Public Health (UTSPH) campuses in Houston, Brownsville, El Paso, San Antonio, Austin, and Dallas and their numerous collaborative academic and health science center partners benefit from the expansion through increased enrollment to address projected public health workforce shortages in Texas, capacity for new research, and ability to address local public health issues.

This special item is directed at addressing today's critical health issues – prevention saves the state of Texas future health care costs. According to the Department of State Health Services, the health care cost of the obesity epidemic will be \$39 billion by 2040 – quadruple the current cost of \$10.5 billion/year. If the current trends continue, 75% of Texas adults might be overweight or obese by the year 2040. The UTSPH has several programs targeted at this epidemic, including the internationally recognized Coordinated Approach to Child Health (CATCH) which is currently used in 2,500 schools in Texas and more than 8,500 schools here and abroad. A sophisticated economic analysis suggests that implementing CATCH statewide could save approximately \$60 million over time in averted obesity and productivity costs in Texas.

**(3) (a) Major Accomplishments to Date:**

A major goal of this Special Item is to increase enrollment by at least 25% over the level prior to initial funding of the Special Item and to maintain that increased student body size. In fact, the UTSPH has accomplished that goal, with enrollment increasing from 1025 in fall 2009 to nearly 1300 Fall 2013.

The number of degrees conferred increased from 210 in academic year 2008-09 to 385 in academic year 2012-13, a 33% increase.

The UTSPH has succeeded in the recruitment of ten additional faculty members with outstanding public health expertise to the Austin, Brownsville, Dallas, El Paso, and San Antonio regional campuses, and has made several key faculty hires for the main campus in Houston. Recruitments enable increased student enrollment, community service activities and future sponsored research funding.

A major investment has been made to upgrade and expand the School's interactive television infrastructure which is used to link classes across all campuses. This new investment has been necessary to assure ITV support for the additional classes resulting from the growth in enrollment.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

With these funds, UHealth is committed to 1) maintaining the enrollment at 1,300 from fall 2013 which will produce more graduates to enter the public health workforce; 2) deliver a certificate program of targeted, on-line, core public health education to train the untrained public health workforce in Texas; 3) develop model programs to extend prevention practice to underserved, rural, and Hispanic communities in Texas; 4) continue to increase applied research and service capacity.

---

744 The University of Texas Health Science Center at Houston

---

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

Y

**(6) Non-general Revenue Sources of Funding:**

N/A

**(7) Consequences of Not Funding:**

Without this funding, the UT School of Public Health will not be able to maintain the increased enrollment and graduation of trained public health specialists to help fill the large projected shortfall in the Texas workforce, nor will it be able to bring to bear the expertise of additional faculty on public health issues in the local communities. In Texas, 85 percent of the Texas public health workforce does not have professional preparation in public health.

Obesity and diabetes are on the rise in Texas with dramatic costs associated with these public health issues. According to the Texas Department of State Health Services, in 2010 more than 66 percent of Texas adults were overweight or obese and if current trends continue, this number could rise to 75 percent by 2040. According to the CDC, Texas has the 7th highest childhood obesity rate in the country, 20.4% in 2011 compared to 16.9% nationally. The health care cost to Texas of the obesity epidemic is estimated to quadruple from \$10.5 billion today to as much \$39 billion by 2040, according to the DSHS. UTSPH has several programs targeted at this epidemic, including the internationally recognized Coordinated Approach to Child Health (CATCH) which is currently used in more than 2,500 schools in Texas and 8,500 schools nationally and abroad. An economic analysis suggests that implementing CATCH statewide could save approximately \$60 million over time in averted obesity and productivity costs in Texas.

---

**744 The University of Texas Health Science Center at Houston**

---

**Special Item: 2      Regional Academic Health Center - Public Health**

**(1) Year Special Item:**                    2006  
Original Appropriations:    \$750,000

**(2) Mission of Special Item:**

The Public Health Division of the Lower Rio Grande Valley Regional Academic Health Center (RAHC), which also functions as the UT School of Public Health's Brownsville Regional Campus, brings much-needed resources to the Lower Rio Grande Valley. Not only does the campus offer a graduate public health education program to the local community, it also provides an academic base where faculty and students conduct in-depth research into the causes of high rates of numerous diseases in Valley residents. This region of Texas has higher disease rates, is more economically depressed, has fewer health care providers, and has fewer people trained to research and address the causes for disease.

**(3) (a) Major Accomplishments to Date:**

The Brownsville Campus and its Hispanic Health Research Center has brought in more than \$20 Million in research funds over the past 10 years, more than the State's investment in the Campus. The Campus was an original partner in the UTHealth Clinical and Translational Sciences Award that established the Clinical Research Unit of Brownsville, the first NIH-supported CRU in South Texas. The Campus continues to participate in the CTSA program.

The program has published over 100 peer reviewed articles, many characterizing the dire level of health disparities in this region. The UT System Board of Regents has now funded a program to expand many elements of the Brownsville program across the region and the Regional Dean at Brownsville is responsible for that program.

The Brownsville Regional Campus has partnered with the City of Brownsville to garner \$1.2 million in grants including the Transforming Texas Grant recently awarded from CDC and the State.

To address childhood obesity, the SPH Brownsville Campus implemented the Coordinated Approach to Child Health program in most of the ISDs of the area. A 4+1 program has been created to provide opportunities for undergraduates at UT Brownsville to pursue careers in public health by completing an MPH in 1 year after undergraduate courses in public health.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

The Campus will continue to expand the program to other cities in the region, to conduct more population-based and basic research into the nature of health disparities in our population, and to expand interventions in the community to address obesity and diabetes. The SPH Brownsville Campus is a key regional leader in the 1115 waiver to transform health delivery in Texas.

**(4) Funding Source Prior to Receiving Special Item Funding:**

Previous funding transfers from UT System Administration per GAA 2002, 2003, 2004, 2005.

---

744 The University of Texas Health Science Center at Houston

---

**(5) Formula Funding:**

N

**(6) Non-general Revenue Sources of Funding:**

Designated and externally-funded research funds.

**(7) Consequences of Not Funding:**

Loss of funding would diminish this well-established graduate public health training and research program in the Lower Rio Grande Valley, and would jeopardize the important intervention programs being developed in cooperation with a variety of organizations across the region for obesity, diabetes, certain cancers, and tuberculosis. Furthermore, the campus has trained a number of students from the LRGV who now occupy key public health posts in city, county and state public health departments and who, in their current positions, work closely with the RAHC-Public Health campus. The loss would be especially harmful because this region of the state has perhaps the most health disparities in Texas, including higher disease rates and little access to health institutions, particularly in the areas of diabetes and obesity. It would jeopardize the extension of this program to other similar health disparity populations in the region.

---

---

744 The University of Texas Health Science Center at Houston

---

**Special Item:** 3 Heart Disease and Stroke

**(1) Year Special Item:** 2002  
**Original Appropriations:** \$3,000,000

**(2) Mission of Special Item:**

The goal of the heart and stroke research special item is to apply the powerful new techniques of genomic and proteomic research to advance understanding of the causes, treatments and cure of major diseases, including cardiovascular diseases, neuro-degenerative diseases, cancer and metabolic disorders. The funds are used to recruit and retain outstanding scientists and to expand the research capacity of UTHealth, including the Institute of Molecular Medicine (IMM). Funding is targeted to improve Texas' position as a national leader in biomedical research and to build upon superb infrastructure and academic research programs by improving UTHealth's position in the market place to retain the very best of our scientists and to attract new talent. Funding also will allow Texas to invest in new research programs that can make a real difference to health care by supporting the most innovative and most rewarding new programs.

**(3) (a) Major Accomplishments to Date:**

Researchers have identified genes that alter the response to anti-hypertensive therapy and anti-cholesterol medications and genes in which the mutation predisposes patients to the development of stroke. Supported by additional funds from Senator Lloyd and B.A. Bentsen Center for Stroke Research, we have leveraged a significant new initiative in developing novel therapies for stroke patients. Over fifty faculty and their supporting teams have been either retained or recruited with expertise in molecular imaging, exon capture/next generation sequencing and bioinformatics analysis, proteomics, metabolic diseases, nanomedicine, therapeutics and drug discovery, providing a comprehensive set of expertise, resources and new technologies for active multidisciplinary research being conducted into complex cardiovascular disorders and stroke. Recently developed research centers include programs at the IMM: Center for Molecular Imaging, Centers for Proteomics and Systems Biology, the Texas Therapeutics Institute, the Senator Lloyd and B.A. Bentsen Center for Stroke Research, and the Center for Metabolic and Degenerative diseases, concentrating on diabetes and obesity. Strengthened existing research centers include: Center for Cardiovascular Genetic Research, Center for Regenerative Medicine and the Center for Human Genetics. Funds also provide research support to several faculty members in the Medical School, specifically in Neurology and Neurosurgery.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

In addition to recruiting key research faculty, UTHealth expects to continue cutting-edge translational research on life-saving treatments for those suffering from heart disease or stroke as well as prevention programs to promote longer, healthier lives. Scientists also will focus on new functional territories of the application of metabolic research as applied to heart, stroke, metabolic, and neurological diseases.

**(4) Funding Source Prior to Receiving Special Item Funding:**

**(5) Formula Funding:**

N

---

**744 The University of Texas Health Science Center at Houston**

---

**(6) Non-general Revenue Sources of Funding:**

Federal and Other Peer-Reviewed/Competitive Grants, Philanthropy and Private Industry support.

**(7) Consequences of Not Funding:**

Lack of funding will severely limit UTHHealth's ability to compete nationally for recognized scientific expertise; will limit the ability to provide adequate support to existing researchers and programs; and will impede the ability to capitalize on recent strides in clinical/translation efforts. Further, Texas will lose ground in these cutting-edge areas of research focus.

A 2007 THECB Research Assessment Program Report stated in its recommendations that, "The wisdom of the state program which has helped to support the development of the IMM has had an extraordinary return on investment and is to be highly commended." It also stated, "Special item funding the Heart Disease and Stroke Research Program at The University of Texas Health Science Center at Houston should be continued."

---

Special Item: 4 Biotechnology Program

(1) Year Special Item: 2002  
Original Appropriations: \$1,000,000

**(2) Mission of Special Item:**

The Biotechnology Program promotes the formation of cross-disciplinary programs and special projects related to biotechnology innovation and the creation of public-private partnerships to promote the commercialization of UTHealth biotechnology. The overall program fosters environments in which researchers, clinicians, and staff manage programs and projects widely beneficial to UTHealth, the Texas Medical Center, and the State of Texas. The Biotechnology Program has been designed to promote commercialization of discoveries and inventions that improve medical care and public health.

**(3) (a) Major Accomplishments to Date:**

Assisted in the development of the following clinical and translational research programs:

- Recent renewal of Clinical and Translational Science Award (CTSA) from NIH for five more years. In 2006, UTHealth was one of the first in the nation to receive this award to accelerate the translation of laboratory discoveries into patient treatments.
- Center for Translational Injury Research.
- Center for Clinical and Translation Sciences (CCTS) High-Throughput Screening Laboratory –stage proof of concept studies and new company formation.
- Creation of the 20,000 sq. ft. UTHSC-H Biotechnology Commercialization Center incubator to provide laboratory, office and conferencing facilities; currently nine tenant companies.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

Assisted in the development of the following clinical and translational research programs:

- Recent renewal of Clinical and Translational Science Award (CTSA) from NIH for five more years. In 2006, UTHealth was one of the first in the nation to receive this award to accelerate the translation of laboratory discoveries into patient treatments.
- Center for Translational Injury Research.
- Center for Clinical and Translation Sciences (CCTS) High-Throughput Screening Laboratory –stage proof of concept studies and new company formation.
- Creation of the 20,000 sq. ft. UTHSC-H Biotechnology Commercialization Center incubator to provide laboratory, office and conferencing facilities; currently nine tenant companies.

**Schedule 9: Special Item Information**  
84th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**744 The University of Texas Health Science Center at Houston**

---

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

**(6) Non-general Revenue Sources of Funding:**

N/A

**(7) Consequences of Not Funding:**

Investment in the development of biotechnology through the UTHealth Biotechnology Program is critical to the successful commercialization of research being conducted within the University. Investment in new R & D programs, the cultivation of new technologies and their transfer through licensing agreements, partnerships with the private sector and new ventures will be used to create new opportunities for economic development in Houston and in Texas. Failure to do so will result in the loss of a competitive advantage and new opportunities to compete with academic technology centers like those associated with Harvard and MIT, Stanford and University of California, University of North Carolina, NC State and Duke University. Texas would lose its ability to attract and retain world-renowned experts, discover, develop and commercialize needed products that improve medical care and public health in Texas.

---

744 The University of Texas Health Science Center at Houston

---

**Special Item:** 5      **World's Greatest Scientists**

**(1) Year Special Item:** 2008  
Original Appropriations: \$2,500,000

**(2) Mission of Special Item:**

The goal of the World's Greatest Scientists special item is to build the capacity for application of the powerful new techniques of genomic and proteomic research, combined with expertise in bioinformatics, to advance the understanding of the causes, treatments and cure of major disease, including cardiovascular disease and stroke, neuro-degenerative diseases, lung disease, cancer, autoimmune diseases and metabolic disorders. This special item is an enhancement to the "Heart Disease and Stroke" special item.

**(3) (a) Major Accomplishments to Date:**

UTHealth has been successful in the recruitment of top faculty to the Medical School and the Brown Foundation Institute of Molecular Medicine. Three top faculty in metabolic diseases with particular focus on diabetes was recently completed (IMM Center for Metabolic and Degenerative Diseases); a joint recruitment with Medical School and School of Biomedical Informatics of five talented faculty has resulted in establishment of the Centers for Proteomics and Systems Biology; recruitment of one faculty in bioinformatics completed (Center for Cardiovascular Genetic Research); two new faculty with expertise in drug discovery and development also recently recruited (IMM Texas Therapeutics Institute); recruitment of star faculty in molecular imaging completed (Center for Molecular Imaging); recruitment of an expert in Alzheimer's disease is continuing (Center for Neurodegenerative Diseases); substantial expansion of the Center for Regenerative Medicine with five new faculty, several of whom have cross appointments in departments of Neurology and Neurosurgery.

Specific scientific accomplishments include: discovery of a common gene variant associated with aortic dissection; the discovery of a set of protein biomarkers that can identify pre-term false labor; completion of the world's first genome-wide analyses of diabetes, coronary artery disease and hypertension.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

Funds will be targeted to continue to improve Texas' position as a national leader in biomedical research and to build upon our superb infrastructure and academic research programs by improving our position in the marketplace to retain the very best of our scientists and to attract new talent. Funding will allow Texas to invest in new research and new research programs that can make a real difference to health care by supporting the most innovative and potentially most rewarding new research programs.

Special focus will include new recruitments to strengthen and expand our basic and applied research, plus drug discovery efforts in metabolic disorders, heart, stroke and neurological diseases.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

---

744 The University of Texas Health Science Center at Houston

---

**(6) Non-general Revenue Sources of Funding:**

N/A

**(7) Consequences of Not Funding:**

Personalized molecular medicine and the ability to accelerate the translation of scientific discovery require expertise in the high-throughput technologies of genomics and proteomics. The greater the quality of researchers, the greater the likelihood UTHHealth and Texas will succeed as leaders in the area of clinical/translational research. By supporting the recruitment and retention of key scientific leaders to UTHHealth and the Texas Medical Center, the State will directly assist (and benefit from) UTHHealth's ability to uncover fundamental disease mechanisms and develop new therapies for some of the most debilitating diseases.

A 2007 THECB Research Assessment Program Report stated in its recommendations that, "The wisdom of the state program which has helped to support the development of the IMM has had an extraordinary return on investment and is to be highly commended." It also stated, "Special item funding the Heart Disease and Stroke Research Program at The University of Texas Health Science Center at Houston should be continued."

---

---

744 The University of Texas Health Science Center at Houston

---

Special Item: 7 Psychiatric Sciences

(1) Year Special Item: 2014  
Original Appropriations: \$6,000,000

**(2) Mission of Special Item:**

The UT Health Medical School's Department of Psychiatry and Behavioral Sciences and the UT Harris County Psychiatric Center are the primary leadership in the region for clinical training, research and patient care for persons with mental illness. Through its inpatient and outpatient services, UT Psychiatry sees more than 18,000 patients every year. The patient population includes a broad range of behavioral disorders and illnesses.

This new special item has allowed the Department to begin the process of new clinical research and intervention to further generate knowledge to identify persons with mental illness and treatment, evidence-based research to allow for long-term follow-up with validation of treatment and its effect on productivity, educational outcomes and overall well-being; and the evaluation of the effectiveness of treatment protocols.

**(3) (a) Major Accomplishments to Date:**

- Recruited 14 new clinician/scientist faculty members (3 full professors, 4 Associate Professor, 7 Assistant Professors)
- Recruited 15 post docs
- Transferred 5 grants to UT Psychiatry
- Established Center for Experimental Models in Psychiatry
- Established Center for Molecular Psychiatry
- Established Early Psychosis Clinical Service and Research
- Expanded Mood Disorder Clinical Services and Research
- Established fMRI Laboratory
- Established Post Traumatic Stress Disorder Program
- Developed Psychological Intervention Research Program for Mood Spectrum Disorders
- Psychiatry Faculty published 127 articles in Peer Reviewed Journals in FY 2013-2014
- Faculty Submitted 40 Grant proposals in FY 2013-2014
- Developed Psychology Intern Training Program Established C.L.A.S.S. Clinic (Changing Lives Through Autism Spectrum Services)
- Established Trauma and Grief Youth Center
- Enhanced clinical research on substance use disorders

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

---

**744 The University of Texas Health Science Center at Houston**

---

During the next two years the Department of Psychiatry will expand the programs and services listed above fully utilizing the cohesive team of leading clinician/scientists recently recruited. It is our expectation that NIH funding to UT Psychiatry will dramatically increase as well as peer reviewed articles. In the next two years UT Psychiatry will expand our efforts to focus on early identification and intervention in children with mental illness. The goal is to identify those at the onset of a disorder to treat at a young age, examples of area would be early pediatric psychosis and pediatric mood disorder clinic. An additional area also would be Eating Disorder. Researchers are finding that eating disorders are caused by a complex interaction of genetic, biological, behavioral, psychological, and social factors. Neuroimaging studies will provide a better understanding of eating disorders and possible treatments. The geriatric population will be an area of further clinical and research expansion. As the geriatric population increases the need continues to be unmet to address the complex treatment. Elderly often underreport psychiatric symptoms and also have significant comorbid conditions. These new programs will greatly increase our potential to develop new treatments and understand the cause of many of the severe mental illnesses.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

**(6) Non-general Revenue Sources of Funding:**

N/A

**(7) Consequences of Not Funding:**

Continuation of funding is critical to maintain the researchers and programs started during the last two years. Without continued funding, the programs would quite possibly not continue. The care of persons with mental health disorders and illnesses will not improve without new knowledge and treatments determined through effective research protocols. Funding sources for mental health research is limited and given the State's mounting costs in mental health hospitals and community care, research is necessary to contribute to change in the current cost dynamic.

---

---

744 The University of Texas Health Science Center at Houston

---

Special Item: 8 Harris County Hospital District

(1) Year Special Item: 1990  
Original Appropriations: \$1,000,000

**(2) Mission of Special Item:**

This item provides much needed health care to indigent patients and supports graduate medical education efforts at LBJ General Hospital (LBJGH), which is part of the Harris County Hospital District. Harris County has an estimated 1 million residents with no health insurance and an additional 500,000 residents are underinsured. Also important is the opportunity for UTHealth faculty to promote understanding of cultural mores and their impact on health care delivery to faculty colleagues, residents and students. Funds allow UTHealth to maintain the appropriate level of expertise, staffing, and clinical instructional programs (including residents and students) in selected medical disciplines at the Lyndon B Johnson General Hospital and maintain primary care services at the Harris County Hospital District neighborhood health clinics.

**(3) (a) Major Accomplishments to Date:**

During FY 2013, UTHealth faculty along with undergraduate and graduate medical education trainees provided care to 412,828 patients at HCHD settings while providing clinical inpatient and outpatient experiences to augment the academic training for medical students, residents and fellows. Residents in clinical rotations increased from 220 to 226 between FY2012 and FY2013. In HCHD facilities, faculty participated in more than 50 research studies, and improved care according to Joint Commission core quality indicators. Per the Thompson-Reuters Soluicent database, LBJ operates with lower mortality, fewer complications, and lower cost than comparative hospitals while operating at the expected length of stay.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

A new Ambulatory Care Building completed construction in Fall 2013 and will enable our faculty, residents, and students to continue providing quality health care.

A Quality Program will be created at LBJGH. UTHealth will incorporate Resident Quality Training that will include new curriculum and trainee involved quality projects that will include faculty and Harris County Hospital District employee participation. A major goal of this Quality Program is to create a Quality Fellowship to help further the program.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

**(6) Non-general Revenue Sources of Funding:**

Contracts for medical direction and patient care/productivity with Harris County Hospital District.

---

**744 The University of Texas Health Science Center at Houston**

---

**(7) Consequences of Not Funding:**

Loss of these funds will severely hamper UTHealth's ability to provide quality care to indigent Texans in Harris County who cannot otherwise afford care. Further, medical student and resident rotations critically needed would be severely reduced or eliminated. The Harris County Hospital District through LBJ Hospital and its associated clinics provides an important contrast of experience and clinical pathology compared to other Medical School associated hospitals and provides significant service to the community. Not funding would likely lead to an erosion of the clinical spectrum that Medical School's trainees experience, and to fewer trainees and subsequent loss of physicians in Texas.

LBJ Hospital provides the setting for the clinical rotation of 460 medical students and 226 residents and fellows. The item is critical to recruiting to and retaining physicians in Texas and providing quality medical care to local communities. We would be unable to support medical student and residency programs without this funding given the cost of extensive external regulatory body requirements related to these programs. Importantly, our relationship with the Harris County Hospital District and provision of patient care supports our core mission of education, community serve and research.

---

744 The University of Texas Health Science Center at Houston

---

**Special Item: 9 Service Delivery in the Valley/Border Region**

**(1) Year Special Item:** 1986  
**Original Appropriations:** \$216,816

**(2) Mission of Special Item:**

UTHealth maintains successful education and research-based programs for the Lower Rio Grande Valley/Border Region of Texas to improve health care services for the Valley's under-served population. Funds from this special item allow UTHealth to assist the Valley area in developing its own resources, both human and material, to achieve long-range goals of self-sufficiency of health care manpower and delivery of services. The institutional presence also allows UTHealth the opportunity to recruit talented students from the South Texas region into its academic programs.

**(3) (a) Major Accomplishments to Date:**

Over the past 24 years, the Mobile Health Clinic project has provided services and education in both Hidalgo and Cameron Counties. In 2007, UTHealth entered into an agreement with Cameron County to exclusively partner with them in delivery of services to their underserved residents. It received a "Texas County Award" for outstanding health care services to the border residents in Cameron County. It provides health care services to colonia patients, including Pap smears, immunizations, and lipid and glucose screenings. In the summer, the Mobile Health Clinic staff set up immunization clinics at local schools to ensure that entering school children have all their required immunizations. It also has provided clinical rotations for UTHealth 4th-year medical students. In 2010, a group of medical students in Frontera de Salud began partnering with the mobile clinic in quarterly outreach trips to communities in Cameron County. During these visits the students do health screenings and also provide educational sessions in healthy cooking and lifestyle changes. Telemedicine services are provided to the mobile health clinic in the colonias from UTHealth physicians in Houston. In 2011-2012 our mobile clinic partnered with the UTHealth School of Public Health in Brownsville in expanding clinical research to the patients that the mobile clinic serves to include them in important areas of research that are specific to the Hispanic community.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

We hope to expand our services to other location sites in Health Professions Shortage Areas in Cameron County to catch even more patients that might be lacking healthcare services. It is also our intent to continue to provide screenings for hypertension, diabetes and obesity which are all more prevalent in the Lower Rio Grande Valley. We want to continue to serve as a teaching site for our medical students with the hopes that exposure to this patient population will encourage them to eventually practice in this community or a similar underserved community in Texas.

We also hope to expand our research to include more patients from the colonias that we serve. Due to the rural locations of the colonias these patients are often not included in important studies that directly affect their community which can contribute to health care disparities. We hope to expand our cardiovascular disease and Diabetes research. In addition we are exploring opportunities with our UTHealth School of Dentistry about expanding our coverage to provide dental services as well.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

---

**744 The University of Texas Health Science Center at Houston**

---

**(6) Non-general Revenue Sources of Funding:**

N/A

**(7) Consequences of Not Funding:**

If funds are not provided, UTHealth will be unable to meet the legislative intent of this special item. The Texas-Mexico border will lose critically needed medical services for the medically underserved as well as education opportunities for our students. The Mobile Health Clinic would cease to function in the colonias along the Border. In addition we will not be able to continue our important education, outreach and research in these colonias that we serve.

---

---

744 The University of Texas Health Science Center at Houston

---

Special Item: 10 Trauma Care

(1) Year Special Item: 2012  
Original Appropriations: \$500,000

**(2) Mission of Special Item:**

UTHealth physicians staff the busiest trauma center in the nation at Memorial Hermann-TMC and have seen an unprecedented 30 percent increase in trauma volume over last several years. UTHealth's Center for Translational Injury Research (CeTIR) is one of the leading trauma care research centers in the nation. Funding for this exceptional item will assist UTHealth in developing and moving its life saving research to a large and diverse patient population and sustain proper staff levels in the trauma center and research labs. Trauma is the leading cause of death for persons aged 1 to 44 years, leading to a greater loss of lifetime income. Trauma will be the leading cause of death worldwide by 2020. Injury-related research funding lags far behind other diseases such as cancer and heart disease, despite the greater lifetime economic impact and youthful age of trauma's victims. The best practices and treatments established at UTHealth can be replicated statewide and could also be implemented in the military to care for injured soldiers. Additionally, a trauma patient returned to the workforce will pay greater dividends to the state than a trauma patient left unable to work and on governmental assistance due to injury.

**(3) (a) Major Accomplishments to Date:**

The post Hurricane Ike emergency supplemental appropriation of \$6 million received in 2009 after the temporary closure of UTMB allowed UTHealth to: hire five additional physician faculty; incorporate existing faculty into trauma care; hire necessary support staff to provide exceptional care to additional trauma patients; and decrease the diversion rate to 5% from more than 40%. The additional staff, plus the implementation of CeTIR research at Memorial Hermann Hospital-TMC, caused a 20% decrease in overall trauma mortality and a 62% decrease in laparotomy patient mortality since 2008.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

The funding is key to pushing CeTIR discoveries from the lab to the patient. UTHealth, with its successful trauma research program CeTIR and its partnership with Memorial Hermann-TMC, the largest trauma volume hospital in the nation, has a unique opportunity to combine these two strengths to discover and test novel treatments, devices and protocols to save lives and return Texans to their quality of life before the injury, including full employment. Additional programs to be considered over the next two years could include a focus on pre-hospital interventions and treatments, to not only improve overall patient outcomes, but also improve triage processes upon arrival to the emergency department. This could potentially result in decreased costs and accurate allocation of hospital resources. In addition to this pre-hospital initiative, other potential programs to be considered could include ramping up a behavioral health team in the trauma center to intervene with trauma patients with mental health disorders to reduce hospital readmissions or using physical therapy/occupational therapy teams to begin the rehab process earlier in the patient's recovery to test the results. These models of care could prove to save money, return patients back to productive lives sooner and with fewer restrictions, and be replicated statewide in trauma centers. The funding will also help sustain proper staffing levels for both the trauma center and CeTIR.

**(4) Funding Source Prior to Receiving Special Item Funding:**

UTHealth received a post-Hurricane Ike emergency supplemental appropriation in 2009 of \$6 million and \$1 million in this exceptional item for FY 2012/2013.

**(5) Formula Funding:**

N

---

**744 The University of Texas Health Science Center at Houston**

---

**(6) Non-general Revenue Sources of Funding:**

N/A

**(7) Consequences of Not Funding:**

UTHealth is in a distinctive position to lead the nation in trauma research, discovery and care. This funding will help push translational research from labs to the patient and help maintain the staffing levels to handle increases in trauma volume as the population in the region increases. The trauma volume at UTHealth's partner hospital has increased by five percent annually over the past two years and is up 30 percent in the last five years. Without this funding, Texas will miss out on an excellent opportunity to be the hub of trauma research nationally, provide life-saving therapeutics to Texans that maintain their quality of life and contribution to society, and maintain the proper staff levels to prevent temporary closures of the trauma center to new patients when the trauma center's capacity exceeds safe levels. This funding could help push discoveries into military trauma care as well.

---

---

744 The University of Texas Health Science Center at Houston

---

**Special Item:** 11 Institutional Enhancement

**(1) Year Special Item:** 2000  
Original Appropriations: \$1,000,000

**(2) Mission of Special Item:**

Institutional Enhancement funding plays a significant role in financing the core mission of our institution by providing a base level of funding for our institution's services and programs. Institutional Enhancement funding helps support leading edge and innovative programs in education not otherwise supported by formula funding. Specifically, institutional enhancement allows UTHealth to preserve existing academic and research programs in pursuit of the overall mission of instruction, research, and patient care.

**(3) (a) Major Accomplishments to Date:**

UTHealth was able to allocate these funds to augment formula and non-formula sources. Activities included student services and academic programs, investments in technology and other infrastructure needs including research infrastructure support.

UTHealth has improved on its overall mission as noted by the following:

Full-time student equivalent (FTSE) growth from FY 2000-01 to FY 2014-15 of 46.6% over this time period.

Projected square footage as calculated by the Texas Higher Education Coordinating Board has grown 81.3% from FY 2000-01 to FY 2014-15.

External research expenditures have increased 121.4% from FY 2000 to FY 2013.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

UTHealth will continue to supplement funding for its academic, research and infrastructure activities.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

**(6) Non-general Revenue Sources of Funding:**

N/A

---

**744 The University of Texas Health Science Center at Houston**

---

**(7) Consequences of Not Funding:**

In order to provide the State of Texas with a critical mass of health professionals and bench scientists, it is important to ensure the quality and reputation of the State's health-related institutions. Without sufficient investment in higher education, Texas stands to lose exceptional students and faculty to neighboring states. Additionally, recent efforts to strengthen core services will cease if funding levels are reduced. Without this funding, UTHealth will be unable to preserve existing academic and research programs in pursuit of the overall mission of instruction, research, and patient care.

---
