745 The University of Texas Health Science Center at San Antonio

The University of Texas Health Science Center at San Antonio (UTHSCSA), one of six health-related components of The University of Texas System, submits the following Legislative Appropriations Request (LAR) for fiscal years 2016 and 2017 to the Governor's Office of Budget, Planning and Policy and the Legislative Budget Board.

1. Historical Overview

The UTHSCSA was legislatively approved in 1959 as the South Texas Medical School and graduated its first class of medical students in 1970. In the 1970s, our institution evolved into a comprehensive academic health center with schools of Medicine, Dentistry, Health Professions, Nursing and Biomedical Sciences. To date, we have graduated 28,000 students. Our current student body of 3,150 is served by a faculty and staff of 5,500. We are the only research intensive university in South Texas and are ranked in the top 16% of all research universities in the nation and ranked in the top 3% of all institutions nationwide receiving National Institutes of Health (NIH) funding. In 2013, we had a \$192.6 million portfolio in research and other sponsored programs. We have earned an international reputation in Longevity and Aging Studies and, since December 2007, manage a National Cancer Institute (NCI) designated Cancer Center, The Cancer Therapy & Research Center (CTRC), where we conduct clinical research trials, foster drug development and provide patient health care. At our Greehey Children's Cancer Research Institute, we specialize in children's cancer research. Each year, we provide in excess of \$17.7M of uncompensated health care to uninsured and underinsured populations of San Antonio and the South Texas Border Region. We are the leading economic generator (\$2.7B) in our city's \$29.2 billion a year in the biosciences and health care industry. Two of our leading discoveries that changed the world were the Palmaz Stent, used to treat over 2 million patients per year worldwide, and the Titanium Rib, an FDA-approved lung sparing device for children with chest wall deformities. In July of 2012, our clinical programs (diabetes, endocrinology, geriatrics, nephrology, orthopedics, urology) were cited as among the best according to the U.S. News & World Report. We have also offered joint degree programs with University Texas at San Antonio (UTSA) and with University of Texas at Austin, and continue to explore joint degree programs with Texas A&M International University (TAMIU), as well as offer collaborative programs with UT Health Science Center Houston's School of Public Health.

In the late 1990s, the Texas Legislature charged us with the responsibility to serve the South Texas Border Region. Beginning with the 75th Legislature, SB 606 (Lucio/Hinojosa) authorized the creation of the Regional Academic Health Center (RAHC) in the Rio Grande Valley (RGV) with the purpose to expand professional health education under the auspices of our School of Medicine. In 1999, the 76th Legislature expanded our responsibilities to Laredo, by authorizing (SB 1288, Zaffirini/Cuellar) the creation of the Regional Campus Extension, renamed by our Board of Regents to the Regional Campus Laredo (RCL), for the purpose of providing professional health education opportunities and perform health related scientific research in Laredo and surrounding communities. In June 2002, we opened the initial RAHC education building in Harlingen, Texas. In 2006, we opened the RAHC's basic research building in Edinburg, Texas, adjacent to the UT Pan American campus. In 2007, we opened the second building in Harlingen for Academic & Clinical Research. Most recently, in May 2014, we opened a new 15,000 sf state-of-the-art simulation teaching hospital in Harlingen to serve the RGV's undergraduate and graduate students in health professions. In addition, SB98 of the 81st Legislature authorized the establishment of a medical school and health science center in the Lower Rio Grande Valley. The 83rd Legislature enacted SB24 (Hinojosa/Oliveira, et al) and authorized the creation of the new University of Texas Rio Grande Valley (UTRGV) by merging UT Brownsville and UT Pan American, to include the eventual full integration of the RAHC into the UTRGV as its School of Medicine.

2. Key Funding Issues

Our five schools depend on the General Revenue (GR) investments of the Texas Legislature's formula-driven appropriations to Texas' health related institutions (HRIs), selected special items, and the related debt service associated with periodically authorized tuition revenue bonds to educate and train over 3,200 students annually who join Texas' health care workforce, to support our faculty's biomedical research, and to provide health care to thousands of Texans. The formula-driven recommendations,

Administrator's Statement

10/13/2014 11:16:12AM

84th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

745 The University of Texas Health Science Center at San Antonio

developed and submitted to the Legislature by the Texas Higher Education Coordinating Board (THECB) in collaboration with Texas' HRIs through its Formula Advisory Committee (FAC), designed to support our missions specifically by funding a) instruction and operations (I&O), b) infrastructure, c) research, and d) graduate medical education (GME) associated with residency programs enable us to sustain and/or increase student enrollment levels, recruit quality faculty, and deliver services in adequately equipped facilities within our five schools. State appropriations also help us secure extramural funding from multiple sources, helping us improve our research and clinical enterprises for sponsored research targeting the medically underserved. Success in meeting our various legislative missions and attaining performance measure targets is dependent on adequate formula funding allocations each session. Furthermore, our university greatly needs capital support through Tuition Revenue Bond (TRB) authorization to help renovate approximately 1.3 million square feet of 40 year old space in our medical, dental, and nursing schools.

In response to Legislative Budget Board (LBB) instructions, GR reductions to our base budget of \$13.3 million for each 5% increment will impact our faculty and staff workforce capacity in terms of retaining and recruiting trained health care professionals associated with academic programs and research activities, resulting in a potential reduction of our student body and closure of programs. The investment of State resources in HRIs will result in an exponential economic return to the State through increased extramural funding, improved clinical care and health outcomes. General Revenue provides us with the ability to acquire extramural funding that sponsors clinical and research activities targeting the medically underserved. The 10% reduction exercise in our base LAR required for FY 2016-2017 was applied across the board to all special item programs, including the regional campuses in Harlingen, Edinburg and Laredo, which will potentially impede the growth in health professions in South Texas and delay progress towards establishing the independent School of Medicine at the UTRGV.

The Patient Protection and Affordable Care Act (ACA) has its challenges in our efforts to produce Texas' healthcare workforce. GR supporting GME and residency programs are important to meet this need and grow the medical student body. Given the impact of lower Medicaid reimbursement rates, our faculty physicians will likely continue to serve a disproportionate share of uninsured and underinsured patients. It is important that Texas Health and Human Services Commission continue the 1115 waiver program such that our physicians practice plan resources can draw and match federal funds to improve patient care and health outcomes for the communities we serve.

With the passage of SB98, the 81st legislature authorized the creation of a new medical school in South Texas. Amendments made in HB100/SB24 from the 83rd established this new medical school under the newly created University of Texas Rio Grande Valley (UTRGV). The intention of these bills sought to transition the funding and facilities of the existing Regional Academic Health Center (RAHC), for which the UTHSCSA has management oversight at both the Harlingen and Edinburg campuses, from UTHSCSA to UTRGV. Leadership at UT System and both campus are in full agreement of the fund transition and respectfully request that \$31,397,900 of existing direct base line Special Item General Revenue appropriations (E.1.1-RAHC \$30,592,522 and E.2.1-Family Practice Residency Training Program \$805,378) be moved from the UTHSCSA bill pattern and added to UTRGV to more appropriately align funding streams with operations beginning with the 2016-2017 biennium. In addition, tobacco endowment funding appropriated to UT System and designated for the RAHC in the amount of \$1,175,000 will be redirected from UTHSCSA to UTRGV such that base line General Revenue appropriations in the amount of \$32,572,900 will be made available to UTRGV to support existing operations as the new medical school during the 2016-17 biennium. Enhanced GR appropriations to the UTRGV for 2016-17 for the RAHC operations will be necessary as it develops into a School of Medicine and to ensure the UTRGV School of Medicine is properly accredited pursuant to Liaison Committee on Medical Education (LCME) policies, procedures, and deadlines.

UTHSCSA also supports a new formula for HRIs with dental schools that converts the Dental Clinical Operations non-formula funding to formula funding. The current funding methodology associated with this line item is based on random, historical assignment to the schools. We propose converting the Dental Clinical Operations line item to a formula-funded item based on patient visits provided by undergraduate dental students only (no faculty or graduate level care) at a dental-school owned clinic. There are three dental schools in Texas: UTHealth Houston (current Dental Clinical Operations: \$1.3M/biennium), UTHSC-San Antonio (\$3.5M/biennium) and Texas A&M-Baylor Dallas (\$78,096/biennium). The proposed formula would provide \$45 per visit to cover the full cost of each student-treated patient visit at a dental school's

745 The University of Texas Health Science Center at San Antonio

educational clinic. Covering the cost of each patient visit would minimize the need to increase fee structures charged to patients or required from students.

3. Faculty & Staff

Attracting and retaining outstanding faculty and staff depends on three key factors: the opportunity to advance professionally, competitive compensation, and first rate facilities. Our solid, well-respected reputation in academia supports our national searches to fill faculty and staff vacancies by continuing to draw large numbers of national applicants. Operating with less General Revenues makes it more challenging to retain and recruit top notch faculty and staff. UTHSCSA's turnover rate for faculty positions has increased from 7.98% in 2013 to 9.96% in 2014. The loss of competent and experienced professionals and a corresponding erosion of the funding that support these employees make it challenging to accomplish our goals. Formula funding helps us retain, recruit, and support faculty and staff salaries to maintain our current momentum in order to contribute to the healthcare workforce in Texas.

4. Facilities

As referenced above, we face significant financial challenges as it relates to capital investments with a current deferred maintenance back log of \$35 million and a space deficit of 224,440 square feet, as reported to the THECB. We have improved our financial condition overall, but we are unable to sufficiently address deferred maintenance and technology infrastructure needs associated with educational programs and research activities due to limited and restricted resources. The two buildings that house our medical and dental schools are the two oldest buildings on our main campus and are in dire need of major renovations. Built in 1968 and 1978, respectively, these two buildings total 1.3 million square feet and comprise almost 30% of our space. Our nursing school is over 40 years old. Although it was expanded in 1996, it has quickly become obsolete due to increased student enrollments levels and changing curriculum delivery methods. In order to continue fulfilling our missions, we have identified \$130 million of necessary repairs and renovations to these buildings, of which we are requesting \$114 million to be paid through an authorized tuition revenue bond issuance with GR appropriations to cover the \$9.9 million in related annual debt service. We will invest \$16 million of our institutional funds to support this effort.

5. Education

The School of Medicine (SOM) curriculum is designed to improve the clinical competency of students and introduces such topics as medical ethics, preventive medicine, health disparities, and an MD/PhD track to educate future medical school faculty. Course materials are enhanced with computer based instruction, patient simulations, use of standardized patient models, and small group discussions. A new curriculum was implemented for the 2013 entering class that promotes integrated, active and engaged learning in accordance with the LCME accreditation standards. Our SOM's planned enrollment level for AY2014-15, 2015-16, and 2016-17 will be at 225 students, with 15 students committed to completing their 3rd and 4th years at the RAHC/UT Rio Grande Valley campus and matched for residency purposes as the South Texas Clinical Track. Enhancing GME formula funding will also be important in enhancing the number of physicians ultimately practicing in South Texas and around the State.

The School of Dentistry (SOD), one of the top ten in the nation, has fully implemented a new curriculum which emphasizes lifelong learning. Clinical management systems are utilized in the dental outpatient clinic to meet student educational needs. A new Center for Oral Healthcare and Research (COHR) adjacent to the Medical Ambulatory Research Center (MARC) is being constructed with Permanent University Fund (PUF) distributions and will serve as the clinical home for our dental

745 The University of Texas Health Science Center at San Antonio

practice beginning in 2015. This 198,000 square foot building will include state-of-the art dental equipment and streamlined clinical practices that will enhance the efficiency and delivery of oral health care and the education of our dental students. The SOD addresses the critical need for clinicians/scientists pursuing academic careers through a DDS/PhD program and is developing a community-based clinical dentistry training program for undergraduate and graduate dental students through a Dental Regional Program housed at our Regional Campus in Laredo.

The School of Nursing (SON) continues to respond to the critical need for nurses and faculty by increasing both undergraduate and graduate enrollment. In the last six years, our SON has grown undergraduate and graduate enrollment by approximately 65%. State General Revenue will continue to sustain nursing enrollment growth throughout the 2016-2017 biennium by adopting the Texas Higher Education Coordinating Board (THECB) Formula Funding recommendations for health-related institutions (HRIs) to increase formula funding in support of nursing education. The SON is actively addressing the decline in Nursing Faculty by expanding enrollment in both MSN and PhD programs and the doctorate of nursing practice program that began in the fall 2012. In 2011, U.S. News and World Report ranked our School of Nursing master's degree program as one of top 50 programs (tied for 36th). If General Revenue funding is not increased through formula allocations, enrollment in our nursing programs will be reduced by necessity.

The Graduate School of Biomedical Sciences (GSBS) provides an excellent opportunity to train young scientists to address the health care needs within the San Antonio and South Texas Border Region. The school has made major efforts to increase the number of young people from South Texas entering into careers in biomedical research. Enhanced research funding will facilitate the continued development of joint master's and doctoral degree programs with UTSA in the areas of bioinformatics, clinical bioengineering, neurosciences, and communication hearing disorders. In 2014, the U.S. New and World Report ranked the UTSA-UTHSCSA joint Graduate Programs in Biomedical Engineering at 55 out of 107 biomedical engineering programs.

The School of Health Professions (SHP) offers bachelor's degrees in Clinical Laboratory Sciences, Cytogenetic, Emergency Health Science, and Respiratory Care. Our graduate programs include master's degrees in Clinical Laboratory Sciences/Forensic Toxicology, Occupational Therapy, and Physician Assistant Studies, as well as a doctorate in Physical Therapy. Additional programs include post baccalaureate certificates in Clinical Laboratory Sciences (Hematology, Immunohematology, Clinical Chemistry, Microbiology, Generalist, and Cytogenetic) and certificates in Basic EMT and Paramedic.

6. Research

In FY13, we had a \$192.6M portfolio in research and other sponsored research programs. Our mission commits the institution to a major role in the discovery of new biomedical knowledge and the search for answers to health care needs. To that end, we have set strategic objectives to establish new and strengthen ongoing research initiatives in aging, cancer, neurosciences and stem cell research. General Revenue will continue to help the UTHSCSA maximize research productivity by updating our space, technology, databases, and other resources. This includes concentration on diseases that have a disproportionately high incidence in the San Antonio and the South Texas Border Region. CPRIT grant awards to the UTHSCSA continue to sustain and further the progress of the Cancer Therapy and Research Center (CTRC) at the UTHSCSA, our NCI designated cancer center, to support the enhancement of these programs for our clinical, translational and basic research activities. The UTHSCSA supports the continued funding of CPRIT by the 84th Legislature. The landscape of our campus and the South Texas Medical Center is quickly evolving into a dynamic panorama of unparalleled scientific discovery. At the center of this transformation is the South Texas Research Facility (STRF). The impressive three story, 190,000-square-foot building opened in 2011 and houses the UTHSCSA's growing research enterprise that will accelerate the translation of basic research discoveries into new treatments and cures that will save lives. With the addition of the STRF, our impact on the future of health will be more powerful and far reaching than ever before. The robust research environment at the STRF will complement our nearby patient-centered facilities including the Medical Arts & Research Center (MARC), the home for the School of Medicine's clinical outpatient practice (UT Medicine San Antonio), the Center for Oral Healthcare and Research (COHR), the new clinical home

745 The University of Texas Health Science Center at San Antonio

for our dental practice beginning in 2015, as well as the CTRC. Core research programs housed in the STRF include: Adult Cancer, Neurosciences, Molecular Medicine, Microbiology, I-CAIR, and the Center for Healthy Aging and Institute for Integration of Medicine and Science.

Continued Special Item funding for the Barshop Institute for Longevity and Aging Studies is critically important. Over the past 25 years, UTHSCSA has developed an internationally recognized research program in basic biomedical research on aging. In 1998, UTHSCSA created the Barshop Institute for Longevity and Aging Studies, which has recruited scientific leaders in aging research from all over the world. The Institute received \$4 million in Special Item funding from the 83rd Texas Legislature beginning in the 2014-15 biennium to continue our aging research and develop a Translational Aging Research Program, taking scientific discoveries made in the laboratory to patients. Health problems of aging Americans will dominate the exploding medical costs in the 21st century. Aging is, overwhelmingly, the #1 risk factor for our top causes of death (heart disease, cancer, stroke, respiratory disease, diabetes and Alzheimer's disease), disability, and loss of the capacity for independent living. Treating the underlying causes of aging offers the prospect of a cost effective approach to significantly extending the disease free period of human health. Continued state funding in the amount of \$4M over the 2016-17 biennium for this initiative ensures we remain in the forefront of discoveries which could save billions of dollars in healthcare expenses and improve the quality of life.

7. Partnerships

Our institution has excelled at fostering collaborative resourcing through innovative partnerships with business, industry, education, government, and the military. The 77th Legislature (HB 1716, Van de Putte/Puente) created the San Antonio Life Sciences Institute (SALSI) to facilitate collaboration and joint research and degree programs between the UTHSCSA and UTSA. The program is designed to build on the scientific interactions and cooperation between our biomedical engineering and clinical scientists and UTSA's engineering and basic science faculty. The newly created Translational Science PhD program with UTSA, UT Health Science Center at Houston, and UT Austin is one example of a joint degree program. UTSA and UTHSCSA have also worked together to consolidate the degree program in Nutrition with the program moving to UTSA in September 2012. Examples of synergy in joint research include areas in neurosciences, computational biology and metabolic biology including the study of diabetes, which is so prevalent in the South Texas Border Region. Recognizing the importance of SALSI, in 2003 the University of Texas System, UTHSCSA, and UTSA invested \$4.5 million in the SALSI, thereby initiating several joint research and educational programs between these two institutions. Our \$4 million exceptional item request for SALSI will help us continue our momentum and successful collaborative efforts.

8. Exceptional Items Requests

*Regional Campus Laredo (RCL) – \$2.8 million

The 76th Legislature (SB1288, Zaffirini/Cuellar) established the RCL as a beacon for health professional education, research, and service for Laredo and surrounding communities in the areas of undergraduate, graduate, and research to meet the educational and health care needs of the medically underserved Texans in this area of the state. RCL received Special Item funding from the 83rd Texas Legislature to support dental and allied health programs, which include bilingual, dual, and joint degree programs with TAMU in professional health, as well as other community programs that promote awareness and increase access to health care to the citizens of Laredo and the surrounding communities. Continued state funding in the 2016-17 biennium ensures basic health care needs are addressed in this region of the state. Enhanced funding in the amount of \$2.8M is being requested to provide targeted "pipeline" activities that will increase diversity in the dental and allied dental professions, grow student enrichment programs that promote an interest in health careers, develop professional health degree programs geared towards nontraditional students and/or post graduate students, to expand the existing Pediatric Dentistry residency training program and to reestablish the Physician's Assistant clinical training program in Laredo.

745 The University of Texas Health Science Center at San Antonio

***San Antonio Life Sciences Institute (SALSI) – \$4 million**

SALSI's mission is to bring together expertise to collaborate on solutions for challenges facing healthcare in Texas and around the nation, as well as to create a long-standing, co-operative structure between UTHSCSA and UTSA that will have multiple points for collaborations and interactions for joint research projects, research infrastructure, and research education. Several new joint initiatives will be launched to enhance interdisciplinary research collaborations, significantly raise our international research profile and competitiveness, and foster excellence and innovation for both institutions. These are challenging times in research education that can be met via strong collaborative efforts that bring multiple factions and viewpoints to a common cause. Past SALSI efforts have helped both UTHSCSA and UTSA make great strides in their missions and has benefited San Antonio, South TX, and beyond. Past legislative funds, as well as internal and philanthropic contributions provided to the joint efforts have created multiple pillars upon which we will continue to build. Based upon previous successes, we are requesting \$4M over the 2016-17 biennium to continue to evolve our SALSI Academy as the permanent ongoing entity that will develop and facilitate joint interactions between UTHSCSA, UTSA and their partners. These funds will be used primarily to increase the institutions' research funding base through support of the development of inter-institutional programmatic/thematic as well as translational research and educational efforts. Furthermore, the requested funds would also be used to support academic development crucial for the furthering of programmatic goals between the partner institutions. There are new educational programs that have been established, the impact of which will be substantial to our growing the biomedical community. With restored legislative funding, the SALSI program will continue to catalyze the highly successful collaborative research and education programs between UTSA and UTHSCSA.

*In anticipation of the 84th Legislature authorizing debt service for TRBs, the UTHSCSA would be able to renew and modernize 1.3 million s.f. of original building space that is over 40 years old which has become inadequate in its current state due to increased student enrollments levels and changes in the delivery of instructional curriculum, and requires the institution to address current fire and life safety code compliancy issues. We have identified \$130 million of necessary repairs and renovations to these buildings for which we are seeking TRB authorization in the amount of \$114 million, resulting in \$9.9 million in related annual debt service. We will invest \$16 million of institutional funding to support this effort.

***Regional Academic Health Center (RAHC) and UTRGV School of Medicine**

The 75th Texas Legislature (SB 606, Lucio/Hinojosa) authorized the creation of the RAHC, with the UT System Board of Regents placing management responsibility of the regional campuses in Harlingen and Edinburg to the UTHSCSA. The medical student educational programs began in July 2002 with the opening of the Medical Education Division in Harlingen. The Medical Research Division (MRD) in Edinburg at the UT Pan American campus opened in April 2006 and is undertaking research on diseases prevalent in the South Texas Border Region. With the passage of SB98, the 81st legislature authorized the creation of a new medical school in South Texas with the expectation that the RAHC would evolve into the new medical school. Amendments made in HB100/SB24 from the 83rd established the new medical school under the newly created University of Texas Rio Grande Valley (UTRGV). General Revenue totaling \$72.6 million is needed to maintain current operations at the RAHC (\$32.6M base appropriations with tobacco allocations from UT System) and to further develop the RAHC as the new medical school in South Texas (\$40M incremental exceptional item request) in a phased-in approach that provides the programmatic and infrastructure support as outlined in the UT System's road map to expand undergraduate medical education (UME), graduate medical education (GME), and research. The combined funding request will begin to establish the UTRGV School of Medicine with an entering class of 50 students leading to a full complement of 200 students and over 150 residency slots when all four classes are enrolled that meet the Liaison Committee on Medical Education (LCME) Accreditation Guidelines for New and Developing Medical Schools. Although support from the UTHSCSA campus will be necessary for a temporary period to ensure LCME accreditation is obtained and to appropriately matriculate existing RAHC students, leadership from UT System, UTHSCSA and UTRGV are requesting the existing General Revenue funds be transferred from UTHSCSA to UTRGV and that any enhanced funding be appropriated directly to UTRGV to more appropriately align funding streams with operations beginning with the 2016-2017 biennium. LCME accreditation will require solid evidence of firm financial support for the new medical school such that secured funding from the State of Texas for this purpose is essential at this time.

Administrator's Statement

10/13/2014 11:16:12AM

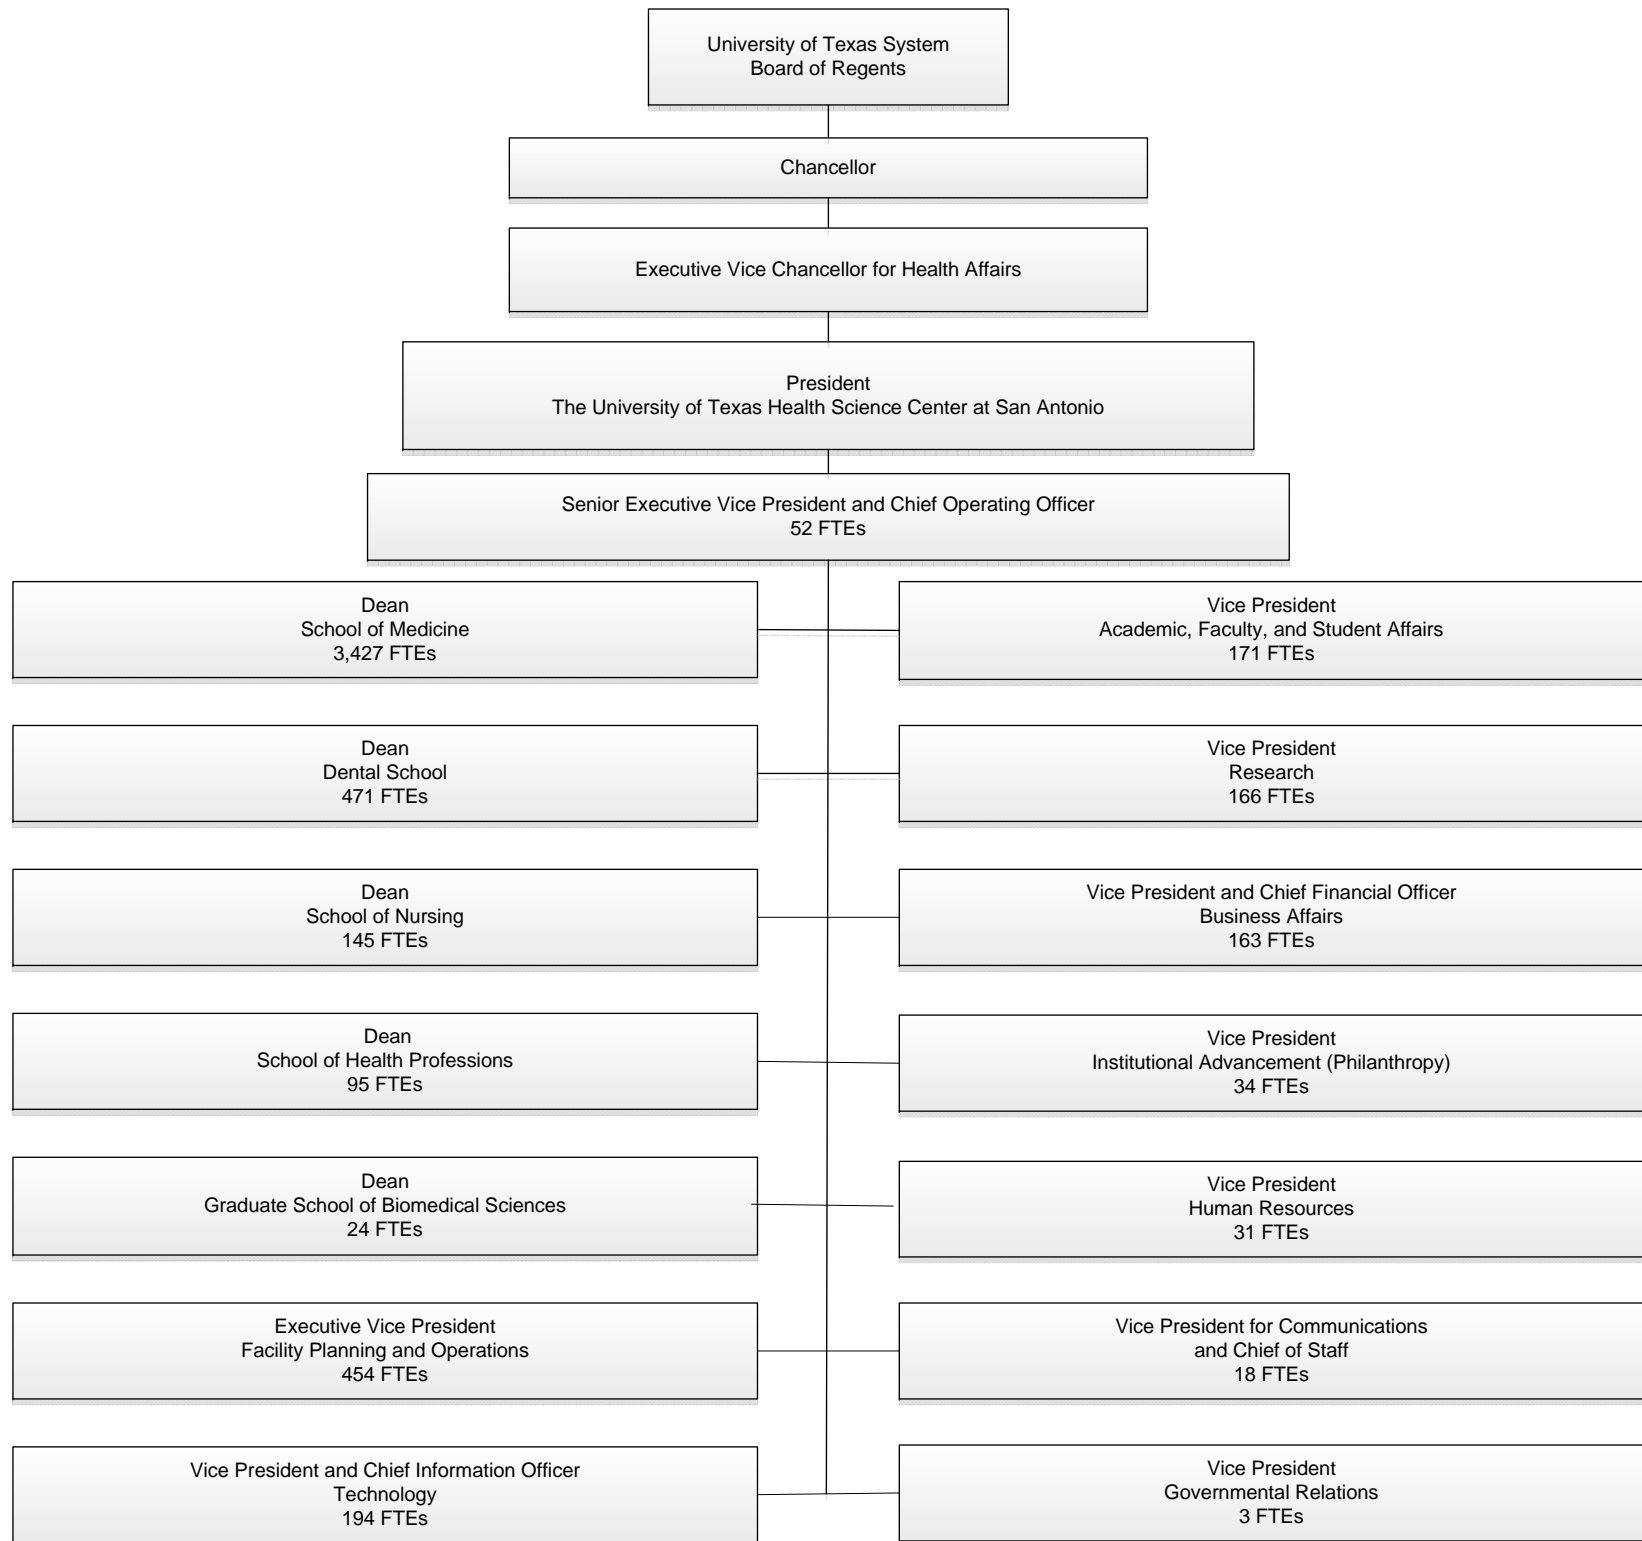

84th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

745 The University of Texas Health Science Center at San Antonio

9. Summary:

The UTHSCSA endorses the THECB's HRI's Formula Advisory Committee's (FAC) Formula Funding recommendations to the 84th Legislature, which would provide enhanced 2016-17 funding for Instruction and Operations (I&O), Research, and Infrastructure. We also support increased funding for Graduate Medical Education (GME) and tuition revenue bonds. We remain dedicated to focusing our resources on educational efforts and disease-related clinical and life sciences research that address the critical health workforce needs especially in San Antonio and the South Texas Border Region.

Security sensitive positions are restricted to those described in Texas Education Code §51.215 and Texas Government Code §411.094. The President has designated all positions at UTHSCSA as being security sensitive. In accordance with UT System policy, criminal history record information will be obtained on all finalists considered for appointment to a security sensitive position. Criminal history record information is not re-obtained for current employees when reclassifications, promotions, or career progressions occur.

745 The University of Texas Health Science Center at San Antonio

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Dental School's predoctoral clinical education and training programs primarily occur in clinics operated by the School. It is in these clinics that dental students acquire the skills and demonstrate the knowledge and values necessary to be deemed competent and ready to provide independent oral health care for the citizens of Texas.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The Dental School's budget for clinical training is increasingly stressed by rising operating costs (staff and supplies) and demand for services from a population that is increasingly older and medically compromised. In addition, technological advances that must be incorporated into the student training program to ensure the currency of our graduates is expensive.

CODE	DESCRIPTION	Exp 2013	Est 2014	Bud 2015	BL 2016	BL 2017
------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

The 75th(SB606) authorized the UT System to establish medical education and research programs serving deep South TX. The Board assigned management of these programs as the RAHC to the UTHSCSA with the exception of public health (to UTHSCH). Ambulatory education programs are conducted at numerous community-based healthcare facilities in Cameron, Hidalgo, Starr, and Willacy counties. Basic/clinical research targets diabetes and emerging, infectious, and other chronic diseases that disproportionately affect populations along the US/Mexico border.

The 81st(SB98) established a stand-alone health science center and medical school in South TX that was subsequently incorporated into the UT Rio Grande Valley (UTRGV) during the 83rd(HB100/SB24). The intention was to establish the new medical school under UTRGV and transition the funding and facilities of the existing RAHC for the Harlingen/Edinburg campuses from UTHSCSA to UTRGV. UT System, UTHSCSA and UTRGV are in full agreement and request \$31.4M of current GR (E.1.1-RAHC \$30.6M and E.2.1-FamilyPracticeResidency \$0.8M) be moved from the UTHSCSA bill pattern and added to UTRGV beginning with the 2016-17 biennium. Tobacco funds appropriated to UT System and designated for the RAHC (\$1.2M) will be redirected from UTHSCSA to UTRGV so that \$32.6M of GR will be available to UTRGV to support existing operations. Enhanced GR to the UTRGV for 2016-17 will be necessary as it develops the medical school and to ensure proper LCME accreditation.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

745 The University of Texas Health Science Center at San Antonio

GOAL:	5	Provide Special Item Support	Statewide Goal/Benchmark:	2	0
OBJECTIVE:	1	Instruction/Operations Special Items	Service Categories:		
STRATEGY:	1	Regional Academic Health Center	Service:	19	Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2013	Est 2014	Bud 2015	BL 2016	BL 2017
------	-------------	----------	----------	----------	---------	---------

Because much of the efforts associated with the Family Practice Residency Training Program are conducted in close proximity to and in conjunction with the Regional Academic Health Center (RAHC) activities, namely at the McAllen Medical Center, the current base appropriation funding for the the Family Practice Residency Training Program (\$402,689/yr) has been added to the base appropriations for the RAHC (\$15,296,261/yr). Base appropriation funding for both the RAHC and the Family Practice Residency Training Program in the amount of \$15,698,950/yr has been incorporated into the overall budget needs for the new medical school at the University of Texas Rio Grande Valley (UTRGV). It is the intent for the biennial base appropriations for these two special items to be transferred from UTHSCSA to UTRGV and reflected in the 2016-2017 bill pattern structure for UTRGV to support the new medical school initiatives. Inadequate funding will impair the access of the South Texas/Boarder Region population to primary care services and impede the development of the new medical school at UTRGV, as initially set forth in SB98 from the 81st Legislature to create a new medical school in South Texas and subsequently amended by HB100/SB24 from the 83rd Legislature.

Additional information for this strategy is available on Schedule 9, Special Item Information.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The UTHSCSA's Regional Campus in Laredo (RCL), authorized by the 76th Texas legislature (SB 1288, Zaffirini/Cuellar), was developed to provide remote health professional education resources to meet community-defined health professional education and clinical training needs in the Laredo area. The D.D. Hachar Administrative building and the academic building are currently supporting a variety of health professional training programs in medical, dental, health professions and public health education. The goals are 1) establishment of graduate level health professions programs to increase the quality and numbers of health professionals in the region. 2) development of research programs that combine community-based participatory translational research with an active community advisory board to address the epidemic of diabetes and obesity that is widespread in the community. 3) provision of mini grants to motivated high school and college students interested in hands-on research. 4) engaging of high school and University students in pipeline programs that will expand the number of qualified applicants eligible to enroll in graduate level programs. 5) fostering of active community participation in order to develop a healthier Laredo, better educated and committed to improving their quality of life. 6) linking of the Regional Campus with other HSC Campuses and South Texas Academic Institutions to enhance student opportunities through distance education technology.

------	-------------	----------	----------	----------	---------	---------

The Formula Funding equation does not include funding for Administrative Costs required to provide infrastructure support to programs such as the Regional Academic Health Center (RAHC), the Regional Campus in Laredo (RCL), the Family Practice and Podiatry Residency training programs, and the Mycobacterial-Mycology Research Lab funded as Special Items. This required the UTHSCSA to subsidize administrative support for these programs through the General Revenue funding provided to core mission-based operations. These programs have made positive impacts on health care and education in San Antonio and the South Texas region. As these programs continue to flourish, the cost of providing core infrastructure support to Special Item programs in San Antonio and South Texas out-pace any infrastructure funding provided through the formula funding mechanism. The 77th Legislature recognized this formula funding deficiency and appropriated funding for Outreach Support to cover administrative and infrastructure costs for Special Item programs, such as the RAHC and the Regional Campus in Laredo. The distance between the main campus in San Antonio and the regional campuses in Harlingen, Edinburg and Laredo is predominately causing the need for separate infrastructure support for these established and growing programs and facilities in South Texas.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The purpose of the Family Practice Residency Training Program is to provide training to family practice resident physicians, as well as third and fourth year medical students in order to address the shortage of primary care physicians in San Antonio and throughout South Texas.

Because much of the efforts associated with this residency training program are conducted in close proximity to and in conjunction with the Regional Academic Health Center (RAHC) activities, namely at the McAllen Medical Center, the current base appropriation funding levels have been incorporated into the overall budget needs for the new medical school at the University of Texas Rio Grande Valley (UTRGV). Thus, biennial base appropriations for this special item in the amount of \$805,378 will be consolidated with RAHC funding and transferred from UTHSCSA to UTRGV and reflected in the 2016-2017 bill pattern structure for UTRGV to support the new medical school initiatives. Inadequate funding will impair the access of the South Texas/Boarder Region population to primary care services and impede the development of the new medical school at UTRGV, as initially set forth in SB98 from the 81st Legislature to create a new medical school in South Texas and subsequently amended by HB100/SB24 from the 83rd Legislature.

------	-------------	----------	----------	----------	---------	---------

Generation of new knowledge that can be translated to the practical benefit of Texas is a critical catalyst fundamental to the growth, development and well-being of our state. Recognizing this, Sen. Leticia Van de Putte and Rep. Robert Puente, along with other Bexar County delegates authored HB1716 and SB728 during the 77th session to authorize the creation of the San Antonio Life Sciences Institute (SALSI). This institute was designed to: 1) facilitate the establishment of collaborative activities between public and private institutions that would lead to the overall enhancement of their research, teaching and service missions; 2) promote collaboration (joint doctoral programs, research projects) between these institutions; and 3) enable the development of initiatives that stimulate the growth of the biomedical and biotechnology industries in San Antonio and South TX that foster the commercialization of the products of research at the partner institutions. SALSI's goal is to develop synergies in research and education that exceed the combined efforts of the institutions if each acts alone. The initial response from faculty of SALSI and its mission has been outstanding and suggests this structure will not only substantially and synergistically enhance the relationship between the UTHSCSA and its public/private partners in their academic and research missions, but will also serve as a successful paradigm for future interactions between other UT academic and health components.

CODE	DESCRIPTION	Exp 2013	Est 2014	Bud 2015	BL 2016	BL 2017
------	-------------	----------	----------	----------	---------	---------

The SALSI brings together expertise to collaborate on joint studies that significantly contribute to solutions for challenges facing healthcare in Texas and around the nation. SALSI will achieve its mission through Faculty Development Programs, Shared Resources (Core Laboratories, etc.) and Collaborative Funding Mechanisms. These are challenging times in Research and Research education, but these challenges can be met via strong collaborative efforts that bring multiple factions/viewpoints to a common cause. The goal is to create a long-standing, co-operative structure that will have multiple points for collaborations and interactions for research projects, infrastructure, and education. New initiatives will be launched in interdisciplinary research, significantly raise our international research profile/competitiveness, and foster excellence/innovation for both institutions.

The 81st appropriated \$4M as Special Item funding to the UTHSCSA for SALSI in Article XII from Federal Stimulus Funds received through ARRA, but funding was eliminated for the 2012-13 biennium and instead appropriated to UTSA at a reduced level of \$1.47M. UTHSCSA and UTSA each requested \$4M during the 83rd session but only \$1.47M for the 2014-15 biennium was again appropriated to our sister institution UTSA, of which \$735,000 (\$367,500/yr) has been allocated to the UTHSCSA.

Enhanced funding of \$4M is being requested for the 2016-17 biennium at funding levels previously received in the 2010-11 biennium to support the recurring costs of SALSI and grow existing programs.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Providing quality health care for an increasing number of elderly citizens will become one of the major needs facing the public sector in this century because per capita expenditures for health care costs for the elderly are disproportionately high, especially the oldest old (e.g., individuals over 80 years of age). The incidence of cancer, Alzheimer’s disease, cardiovascular disease, and diabetes will also increase as our population ages. Therefore, it is universally recognized that increased spending for research in aging is one of the most important strategies in reducing health-care costs by improving the health of the elderly and in enhancing their contributions to our work force and society. Research emanating from the Barshop Institute for Longevity and Aging Studies will improve the quality of life for the growing numbers of elderly people in Texas and the United States.

------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

Initial funding for this strategy was legislatively provided in the 2000-01 biennium to support the growth and expansion of existing and new programs both in South Texas and San Antonio locations, and to address salary competitiveness issues. Funds also flowing through this strategy, commonly referred to as Article III, Section 56 funding, represents the partial restoration of a 12.5% General Revenue budget reduction experienced during the 2004-05 biennium and enacted by the 78th Legislature for health-related higher education institutions. At the recommendation of the LBB, these funds were allocated to Institutional Enhancement in the 2006-07 biennium since the restoration was related to formula strategies and operations at the main campuses in San Antonio. This strategy also includes funds from the restructuring of the South Texas Professional Education special item strategy that was consolidated into the 2008-09 baseline requests for the RAHC, the Regional Campus-Laredo (LCE), and the main campuses in San Antonio during the 2008-09 biennium as authorized by the 80th Legislature. The portion of the STPE supporting the main campuses in San Antonio was allocated to Institutional Enhancement. This special item was legislatively provided because formula pools have been significantly reduced and are significantly underfunded to cover the actual costs of instruction, research and space support. These funds support the costs of the UTHSCSA's core missions.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Additional information for this strategy is available on Schedule 9, Special Item Information.

DESCRIPTION / JUSTIFICATION:

The UTHSCSA's Regional Campus in Laredo (RCL), authorized by the 76th Texas legislature (SB 1288, Zaffirini/Cuellar), was developed to provide remote health professional education resources to meet community-defined health professional education and clinical training needs in the Laredo area. The D.D. Hachar Administrative building and the academic building are currently supporting a variety of health professional training programs in medical, dental, health professions and public health education. The goals are 1) establishment of graduate level health professions programs to increase the quality and numbers of health professionals in the region. 2) development of research programs that combine community-based participatory translational research with an active community advisory board to address the epidemic of diabetes and obesity that is widespread in the community. 3) provide mini grants to motivated high school and college students interested in hands-on research. 4) engaging of high school and University students in pipeline programs that will expand the number of qualified applicants eligible to enroll in graduate level programs. 5) fostering of active community participation in order to develop a healthier Laredo, better educated and committed to improving their quality of life. 6) linking of the Regional Campus with other HSC campuses and South TX Academic Institutions to enhance student opportunities through distance education technology.

EXTERNAL/INTERNAL FACTORS:

Enhanced funding in the amount of \$2.8M is being requested to provide targeted "pipeline" activities that will increase diversity in the dental and allied dental professions, grow student enrichment programs that promote an interest in health careers, develop professional health degree programs geared towards nontraditional students and/or post graduate students, to expand the existing Pediatric Dentistry residency training program and to reestablish the Physician's Assistant clinical training program in Laredo.

Additional information related to this request is available in Schedule 9, Special Item Information.

TOTAL, OBJECT OF EXPENSE			\$2,000,000	\$2,000,000
METHOD OF FINANCING:				
1	General Revenue Fund		2,000,000	2,000,000
TOTAL, METHOD OF FINANCING			\$2,000,000	\$2,000,000
FULL-TIME EQUIVALENT POSITIONS (FTE):			20.00	20.00

DESCRIPTION / JUSTIFICATION:

The SALSI has a mission to bring together expertise to collaborate on joint studies that significantly contribute to solutions for challenges facing healthcare in Texas and around the nation. The SALSI will achieve its mission through Faculty Development Programs, Shared Resources (Core Laboratories, etc.) and Collaborative Funding Mechanisms. These are challenging times in Research and Research education. The strategy to meet these challenges is via strong collaborative efforts that bring multiple factions and viewpoints to a common cause. The goal of the SALSI is to create a long-standing, co-operative structure between us and UTSA that will have multiple points for collaborations and interactions for research projects, research infrastructure, and research education. Several new joint initiatives will be launched within the SALSI to enhance interdisciplinary research collaborations, significantly raise our international research profile and competitiveness, and foster excellence and innovation for both institutions.

The 81st appropriated \$4M as Special Item funding to the UTHSCSA for SALSI in Article XII from Federal Stimulus Funds received through ARRA, but funding was eliminated for the 2012-13 biennium and instead appropriated to UTSA at a reduced level of \$1.47M. UTHSCSA and UTSA each requested \$4M during the 83rd session but only \$1.47M for the 2014-15 biennium was again appropriated to our sister institution UTSA, of which \$735,000 (\$367,500 per year) has been allocated to the UTHSCSA. This request is to sustain the funding previously received for the 2010-11 biennium to support the recurring costs of SALSI and grow existing programs. Both UTHSCSA and UTSA will seek funding for the 2016-17 biennium.

EXTERNAL/INTERNAL FACTORS:

4.A. Exceptional Item Request Schedule
 84th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: 10/13/2014
 TIME: 11:16:15AM

Agency code: 745

Agency name:

The University of Texas Health Science Center at San Antonio

CODE	DESCRIPTION	Excp 2016	Excp 2017
------	-------------	-----------	-----------

Major accomplishments to date and expected over the next two years: Past SALS I efforts have helped UTSA and UTHSCSA make great strides in their missions and has benefited San Antonio, South TX, and beyond. With this critical mass in place, and the formation of a SALS I Academy, we are now proposing to strengthen and build new bridges. Past legislative funds have created multiple pillars upon which to build. Based on previous successes, these funds will be used to evolve our SALS I Academy as the permanent ongoing entity that will develop and facilitate joint interactions; to increase research funding bases through the development of inter-institutional programmatic/thematic/translational research and educational efforts; and to support joint academic development crucial for furthering programmatic goals. A new Vaccine Center has been developed between UTHSCSA, UTSA, Texas Biomedical Research Institute (TBRI) and Southwest Research Institute (SWRI), and a new Center for Innovation in Drug Discovery between UTSA and UTHSCSA works to identify new compounds important for treating diseases in South TX and beyond. In addition to the substantial fiscal ROI, philanthropic success, large number of joint publications, and new research centers, there are new educational programs that have been established and supported such as the Biomedical Engineering (BME) and Translational PhD Programs.

Year established and funding source prior to receiving special item funding: 2010. Initial \$4.5M funding from UTHSCSA and UTSA (\$1M each) and UT System (\$2.5M); \$2M for the joint Bioinformatics/Computational Biology Program; \$1.25M of in kind funding

Formula funding: No

Non-general revenue sources of funding: None.

Consequences of not funding: These new educational programs will be substantial to growing the biomedical community. With restored legislative funding, SALS I will continue to catalyze the highly successful collaborative research and education programs between UTSA and UTHSCSA.

4.A. Exceptional Item Request Schedule
 84th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: 10/13/2014
 TIME: 11:16:15AM

Agency code: 745

Agency name: **The University of Texas Health Science Center at San Antonio**

CODE	DESCRIPTION	Excp 2016	Excp 2017
	Item Name: Facilities Renewal and Modernization Item Priority: 3 Includes Funding for the Following Strategy or Strategies: 03-02-01 Tuition Revenue Bond Retirement		
OBJECTS OF EXPENSE:			
2008	DEBT SERVICE	9,940,000	9,940,000
TOTAL, OBJECT OF EXPENSE		9,940,000	9,940,000
METHOD OF FINANCING:			
1	General Revenue Fund	9,940,000	9,940,000
TOTAL, METHOD OF FINANCING		9,940,000	9,940,000

DESCRIPTION / JUSTIFICATION:

Modern course delivery methods require educators to utilize digital tools and provide media-rich sources of information, which our current information technology infrastructure does not support in our existing classrooms and library. UTHSCSA faces significant deficits in deferred maintenance whereby the Medical, Dental, and Nursing Schools (over 40 years old) are in dire need of major renovation. It has become necessary to replace significant building systems such as mechanical, electrical, plumbing, medical gases, security and life safety systems, and to repurpose existing space to improve its functionality for new uses. This funding would allow UTHSCSA to address a \$35M deferred maintenance backlog, which could be reduced by approximately 80%. In addition, operational costs would be reduced by replacing outdated equipment with new high efficient star rated energy equipment and building management systems.

Debt Assumptions

TRB Authorizaton - \$114,000,000
 Terms-20 years at 6%
 Project Start Date - 06/01/2015
 Project Completion Date - 6/1/2018
 Annual Debt Service Requirement - \$9,940,000

EXTERNAL/INTERNAL FACTORS:

4.A. Exceptional Item Request Schedule
84th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

DATE: 10/13/2014
TIME: 11:16:15AM

Agency code: 745

Agency name:

The University of Texas Health Science Center at San Antonio

CODE	DESCRIPTION	Excp 2016	Excp 2017
------	-------------	-----------	-----------

Major accomplishments to date and expected over the next two years: With this funding, the institution will be able to renew and repurpose existing 40-year old facilities rendering them code compliant and energy efficient, and to modernize existing classrooms and library space with digital and upgraded technology. These significant improvements will result in a more productive and stimulating environment for students, faculty and staff which will help attract the world class talent necessary for continued success in South Texas. Students will be able to navigate and interact with information in a media rich environment, and contribute to a shared learning environment within and outside of the classroom. There will be no additional operational costs added to institution's budget. There is an opportunity to renovate large blocks of deteriorated space which will be used to move campus elements from leased space back home and save lease costs. The Health Professions School could be consolidated near the labs, classrooms and research space that they need. Deferred maintenance items that have needed attention for many years can be addressed, and energy consumption cost per square foot will be significantly reduced.

Year established and funding source prior to receiving special item funding: Not applicable. This is the first TRB request of this type.

Formula funding: None.

Non-general revenue sources of funding: Institutional resources of approximately \$2M per year; UTS Permanent University Funds (PUF) and Library, Equipment, Renewal and Repair (LERR) allocations

Consequences of not funding: At this level of funding, institutional deficiencies can be corrected so important work in training the next generation of health care providers can continue. The UTHSCSA currently house and support the medical research that will transform the world. The work and discoveries that occur at the institution have the power to educate, unite and transform the culture of South Texas.

FULL-TIME EQUIVALENT POSITIONS (FTE):		125.00	125.00

DESCRIPTION / JUSTIFICATION:

The 75th(SB606) authorized the UT System to establish medical education and research programs serving deep South TX. The Board assigned management of these programs as the RAHC to the UTHSCSA with the exception of public health (to UTHSCH). UTHSCSA has affiliation agreements with the Valley Baptist Medical Center (VBMC), Doctors Hospital at Renaissance (DHR), McAllen Medical Center, and other surrounding hospitals throughout the Valley. Ambulatory education programs are conducted at the Su Clinica Familiar in Harlingen and numerous other community-based healthcare facilities in Cameron, Hidalgo, Starr, and Willacy counties. Basic/clinical research targets diabetes and emerging, infectious, and other chronic diseases that disproportionately affect populations along the US/Mexico border.

The 81st(SB98) established a stand-alone health science center and medical school in South TX that was subsequently incorporated into the UT Rio Grande Valley (UTRGV) during the 83rd(HB100/SB24). The intention was to establish the new medical school under UTRGV and transition the funding and facilities of the existing RAHC for the Harlingen/Edinburg campuses from UTHSCSA to UTRGV. UT System, UTHSCSA and UTRGV are in full agreement and request \$31.4M of current GR (E.1.1-RAHC \$30.6M and E.2.1-FamilyPracticeResidency \$0.8M) be moved from the UTHSCSA bill pattern and added to UTRGV beginning with the 2016-17 biennium. Tobacco funds appropriated to UT System and designated for the RAHC (\$1.2M) will be redirected from UTHSCSA to UTRGV so that \$32.6M of GR will be available to UTRGV to support existing operations. Enhanced GR appropriations to the UTRGV for 2016-17 for the RAHC operations will be necessary as it develops into a School of Medicine and to ensure it is properly accredited under UTRGV pursuant to Liaison Committee on Medical Education (LCME) policies, procedures, and deadlines. Any enhanced appropriations for these purposes are requested under UTRGV's bill pattern.

<u>CODE</u>	<u>DESCRIPTION</u>	<u>Excp 2016</u>	<u>Excp 2017</u>
-------------	--------------------	------------------	------------------

Total funding in the amount of \$72.6M (\$32.6M current, \$40M exceptional) is being requested to continue expansion efforts in undergraduate/graduate medical education and research; develop basic sciences and clinical curriculum for a full complement of 200 medical students and over 150 residency positions; provide an interdisciplinary approach to education, research and health services; provide programmatic and infrastructure support for the new medical school as part of UTRGV. Legislative funding at an appropriate level will be crucial to build, as outlined in UT System's road map, a new medical school that sustains current medical and basic sciences education and research, and clinical research programs; shapes the necessary infrastructure of a fully accredited medical school, including new faculty in a variety of disciplines covering all years of medical education, related support functions, maintaining accreditation requirements; and continues the regionalization/expansion of programs. LCME accreditation requires evidence of firm financial support such that secured funding from the State is essential at this time. Programs may be terminated with resulting adverse reactions from local communities, their leadership, local practicing health professionals, and participating and future health professional students. Support from the UTHSC San Antonio campus will be necessary for a temporary period to ensure LCME accreditation is obtained and to appropriately matriculate existing RAHC students. The budget for these services provided by the UTHSC San Antonio to support the existing RAHC as it develops into the UTRGV School of Medicine will be negotiated and approved by UT System as a subcontract outlay to the UTRGV in an amount not to exceed \$15,698,950 per year.

Additional information related to this request is available in Schedule 9, Special Item Information.

	Total Expenditures		10.2%		\$10,790,084	\$105,898,516		10.1%		\$9,206,900	\$90,770,555	

B. Assessment of Fiscal Year 2012 - 2013 Efforts to Meet HUB Procurement Goals

Attainment:

FY2012 - Agency exceeded one of the applicable procurement category goals.

FY2013 - UTHSCSA increased its outreach to the HUB and Small Business vendor community by actively participating in ten HUB organizations including local minority Chambers of Commerce.

Applicability:

The "Heavy Construction" category is not applicable to agency operations in either fiscal year 2012 or 2013 since the agency does not have any strategies or programs for heavy construction.

Factors Affecting Attainment:

In both fiscal years 2012 and 2013, the goals were not met due to the procurement needs of specialized commodities and services that are limited by lack of HUB certified vendors available or receiving "no response" to subcontracting opportunities.

"Good-Faith" Efforts:

- FY 2012-
- Conducted training workshops
- Member of 3 local Chambers of Commerce
- Member of 5 HUB organizations
- Board member of 5 HUB organizations

NO FUNDS WERE PASSED THROUGH TO OTHER STATE AGENCIES OR INSTITUTIONS OF HIGHER EDUCATION

USE OF HOMELAND SECURITY FUNDS

In Fiscal Year 2011, a grant was awarded to operate a public health emergency preparedness program. This grant was only extended into FY 2013, ending 6/30/2013. There are currently no Federal grants related to natural or man-made disasters for 2014 and at this time, there are no awards anticipated for 2015-2017.

LEGAL AUTHORITY/STATUTORY REFERENCE FOR ITEM:

HR 3590 - Patient Protection Act; HR 4872 - Health Care & Education Reconciliation Act

DESCRIPTION/KEY ASSUMPTIONS:

A clinical informatics physician expert is leading the PQRI effort in our organization. Costs associated with this project were \$828,649 in FY14 and are projected to be \$834,382 in FY15. Costs are expected to increase to \$856,940 in FY16 and \$879,202 in FY17. Costs associated with this program are for personnel to manage the documentation required, including a Care Manager, a Lead Quality Coordinator, a Clinical Reporting Analyst, and an EPIC Analyst.

CONCERNS:

Costs related to this initiative will impact clinical revenues earned outside the General Appropriations Act (GAA).

LEGAL AUTHORITY/STATUTORY REFERENCE FOR ITEM:

HR 3590 -Patient Protection Act; HR 4872 -Health Care & Education Reconciliation Act; SSA 1115 Waiver

DESCRIPTION/KEY ASSUMPTIONS:

Initiatives under the DSRIP program are designed to provide incentive payments to hospitals and other providers for investment in delivery system reforms that increase access to health care, improve the quality of care, and enhance the health of patients and families they serve. The program of activity funded by the DSRIP is based on Regional Health Care Partnerships (RHPS). Each RHP has a geographical boundary and is coordinated by a public hospital or local government entity with the authority to make intergovernmental transfers. UT Medicine acts as its own IGT provider for DSRIP purposes within Region 6. The 1115 Waiver ends in 2016. Total costs are \$8,682,125 for FY14, \$8,734,391 for FY15, \$8,996,423 for FY16, and \$9,266,315 for FY17 and include costs for the following items:

- Expansion of Primary Care Access
- Expansion of Specialty Care Access
- Expansion of Behavioral Health Access
- Extension of Electronic Health Records to Providers
- Development of Innovation for Provider Training
- Disease Registry
- Patient Centered Medical Home

----------	----------	---------	---------	-----------	-----------

Since preventive care services are covered, we will see more employees/students to promote health, prevent illness and modify risk factors for chronic diseases. Due to the age range of Student Health Center population, approximately 15% of students are covered on their parents insurance until age 26; 85% of students are on the Student Academic Health Plan (AHP), ACA removes co-pays and promotes preventive services for students covered by AHP. ACA strengthens Medicare services with no cost sharing, reducing donut holes in prescription drugs and including coverage on preventative services; Medicare application will be in process with growing employee cohort of age 65 and over. Retirees will be seen in the Employee Health and Wellness Clinic in 2015.

When millions of uninsured Texans become insured in 2014, our community based settings will have a large influx of new patients that qualify for healthcare under the ACA. We are now positioning our community settings for this expansion through grant writing, partnership expansion, and hiring more NPs. However, 85% of our students have BCBS and 95% of our employees are BCBS enrollees. Those not covered by BCBS are covered by one of 15 other insurance companies. In the short term, ACA will not have huge impacts on Nursing Clinical Enterprise.

Costs related to this item include hiring more clinical staff (\$70,690 in FY14 and \$275,966 per year in FY15 through FY17 and purchasing more equipment and supplies to meet increasing demand (\$4,000 for FY14 and \$5,000 per year for FY15 through FY17).

CONCERNS:

Costs related to this item will impact clinical revenues earned outside the General Appropriations Act (GAA).

HR 3590 - Patient Protection Act; HR 4872 - Health Care & Education Reconciliation Act						
DESCRIPTION/KEY ASSUMPTIONS:						
The Respiratory Care department will be required to pay clinical instructors to serve as preceptors overseeing students during their clinical rotations. This will require 5 FTEs per semester at a rate of \$4,000 each, for a total cost of \$40,000 per year for FY15 through FY17. This has not yet been an issue for other departments within the School of Health Professions but has the potential to affect these departments in the future.						
CONCERNS:						
Costs related to this initiative will impact clinical revenues earned outside the General Appropriations Act (GAA).

6.K. Budgetary Impacts Related to the Federal Budget Control Act-Sequestration

Agency Code: 745

Agency Name: The University of Texas Health Science Center at San Antonio

CFDA Number and Program	Exp 2012	Exp 2013	Est 2014	Bud 2015	BL 2016	BL 2017
	\$0	\$0	\$0	\$0	\$0	\$0

Impact on Program

It is estimated that the total impact of sequestration to-date for our institution is approximately \$2.5 million. To offset sequestration, most federal sponsors reduced the number of new awards that they issued. As such, the total impact cannot be precisely determined. We do not foresee an impact to our General Revenue funds.

Assumptions and Methodology

Project Description

Modern course delivery methods require educators to utilize digital tools and provide media-rich sources of information, which our current information technology infrastructure does not support in our existing classrooms and library. UTHSCSA faces significant deficits in deferred maintenance whereby the Medical, Dental, and Nursing Schools (over 40 years old) are in dire need of major renovation. It has become necessary to replace significant building systems such as mechanical, electrical, plumbing, medical gases, security and life safety systems, and to repurpose existing space to improve its functionality for new uses. This funding would allow UTHSCSA to address a \$35M deferred maintenance backlog, which could be reduced by approximately 80%. In addition, operational costs would be reduced by replacing outdated equipment with new high efficient star rated energy equipment and building management systems.

Debt Assumptions

745 The University of Texas Health Science Center at San Antonio

Special Item: 1 **Regional Academic Health Center (RAHC)**

(1) Year Special Item: 2000
Original Appropriations: \$2,000,000

(2) Mission of Special Item:

The 75th(SB606) authorized the UT System to establish medical education and research programs serving deep South TX. The Board assigned management of these programs as the RAHC to the UTHSCSA with the exception of public health (to UTHSCH). Ambulatory education programs are conducted at numerous community-based healthcare facilities in Cameron, Hidalgo, Starr, and Willacy counties. Basic/clinical research targets diabetes and emerging, infectious, and other chronic diseases that disproportionately affect populations along the US/Mexico border.

The 81st(SB98) established a stand-alone health science center and medical school in South TX that was subsequently incorporated into the UT Rio Grande Valley (UTRGV) during the 83rd(HB100/SB24). The intention was to establish the new medical school under UTRGV and transition the funding and facilities of the existing RAHC for the Harlingen/Edinburg campuses from UTHSCSA to UTRGV. UT System, UTHSCSA and UTRGV are in full agreement and request \$31.4M of current GR (E.1.1-RAHC \$30.6M and E.2.1-FamilyPracticeResidency \$0.8M) be moved from the UTHSCSA bill pattern and added to UTRGV beginning with the 2016-17 biennium. Tobacco funds appropriated to UT System and designated for the RAHC (\$1.2M) will be redirected from UTHSCSA to UTRGV so that \$32.6M of GR will be available to UTRGV to support existing operations. Enhanced GR to the UTRGV for 2016-17 will be necessary as it develops the medical school and to ensure proper LCME accreditation.

(3) (a) Major Accomplishments to Date:

The RAHC opened the initial medical education campus in Harlingen in June 2002, the basic research building opened in Edinburg in April 2006, and a 2nd building in Harlingen in November 2007. The med ed component in Harlingen has had over 1,000 medical students complete a portion of their clinical education and 10 groups of med students graduate since 2002. Internal Medicine has graduated 11 classes; over 80% have remained in TX to practice with over 45% practicing in South TX. Over 250 community-based practitioners in the Valley are UTHSCSA faculty participating in RAHC programs. Activities targeting clinical faculty are ongoing as new community-based providers seek faculty appointments. The Academic & Clinical Research (ACR) building houses the Clinical Research Unit (CRU), the newly dedicated 15,000 sqft state of the art simulation teaching hospital, and the established Federal VA Health Care Center (VA), the subspecialty referral site for Valley Veterans. At the VA, students/residents have access to patients with unique sets of health challenges that create opportunities for developing med ed programs. The development of residency programs across the RGV is currently underway. New residency programs in Internal Medicine and Family Medicine will start on 7/2015, while existing programs in these areas are in expansion stages. Two residency programs are awaiting accreditation and 3 are in planning stages. A Founding Dean of the new medical school was recruited in April 2014.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

745 The University of Texas Health Science Center at San Antonio

Funding will sustain RAHC's educational and research initiatives in this region of the State, and will continue to support the development of research activities in Edinburg and clinical research in Harlingen. The RAHC will continue to provide medical education to MS3 and MS4 students initiating from UTHSCSA through 2019 under the South TX Clinical Education Campus (CEC) track and will cease to admit medical students under this track after 2016. The inaugural UTRGV medical school class (MS1) is expected to begin in July 2016. Current/enhanced funding will: 1) provide infrastructure for faculty, staff, educational programs, facilities, and student support services needed to maintain accreditation requirements and to function as a geographically separated clinical education campus (CEC) of the UTHSCSA; 2) provide for the continued regionalization of the RAHC programs throughout the Valley; 3) allow for continued development of academic and support faculty, staff and programs for the new medical school under the leadership of the new Founding Dean as part of UTRGV; 4) provide for the continued development of clinical research allowing students at the medical education division in Harlingen the opportunity to be engaged in an activities that complements their academic experience; and 5) support the development of the South TX Institute for Diabetes and Obesity. General Revenue appropriations are expected to transition from the UTHSCSA to UTRGV beginning in the 2016-17 biennium.

(4) Funding Source Prior to Receiving Special Item Funding:

None.

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

The UT System Board of Regents have allocated \$54 million in Permanent University Funds (PUF) for an academic building currently being constructed on the RAHC campus at Edinburg and have committed an additional \$10 million per year for operations of the new UTRGV medical school for the next 10 years. Hidalgo county and surrounding cities have also pledged funds to support this endeavor.

(7) Consequences of Not Funding:

Funding of \$72.6M (\$32.6M current, \$40M exceptional) is being requested to continue expansion efforts in undergraduate/graduate medical education and research; develop basic sciences and clinical curriculum for a full complement of 200 medical students and over 150 residency positions; provide an interdisciplinary approach to education, research and health services; provide programmatic and infrastructure support for the new medical school as part of UTRGV. Legislative funding at an appropriate level will be crucial to build, as outlined in UT System's road map, a new medical school that sustains current medical and basic sciences education and research, and clinical research programs; shapes the necessary infrastructure of a fully accredited medical school, including new faculty in a variety of disciplines covering all years of medical education, related support functions, maintaining accreditation requirements; and continues the regionalization/expansion of programs. LCME accreditation requires evidence of firm financial support such that secured funding from the State is essential at this time. Programs may be terminated with resulting adverse reactions from local communities, their leadership, local practicing health professionals, and participating and future health professional students. Support from the UTHSC San Antonio campus will be necessary for a temporary period to ensure LCME accreditation is obtained and to appropriately matriculate existing RAHC students.

745 The University of Texas Health Science Center at San Antonio

Special Item: 2 **Regional Campus - Laredo (RCL)**

(1) Year Special Item: 2000
Original Appropriations: \$700,000

(2) Mission of Special Item:

The UTHSCSA's Regional Campus in Laredo (RCL), authorized by the 76th Texas legislature (SB 1288, Zaffirini/Cuellar), was developed to provide remote health professional education resources to meet community-defined health professional education and clinical training needs in the Laredo area. The D.D. Hachar Administrative building and the academic building are currently supporting a variety of health professional training programs in medical, dental, health professions and public health education. The goals are 1) establishment of graduate level health professions programs to increase the quality and numbers of health professionals in the region. 2) development of research programs that combine community-based participatory translational research with an active community advisory board to address the epidemic of diabetes and obesity that is widespread in the community. 3) provision of mini grants to motivated high school and college students interested in hands-on research. 4) engaging of high school and University students in pipeline programs that will expand the number of qualified applicants eligible to enroll in graduate level programs. 5) fostering of active community participation in order to develop a healthier Laredo, better educated and committed to improving their quality of life. 6) linking of the Regional Campus with other HSC Campuses and South Texas Academic Institutions to enhance student opportunities through distance education technology.

(3) (a) Major Accomplishments to Date:

Since 2002, training programs have been initiated in the fields of medicine, dentistry, allied health, public health and research. An allied health program in respiratory therapy (2002) has graduated over 14 therapists; 9 remained in the region. The Physician Assistant Program (2009) graduated 25 PAs (2009-2013); 10 presently work in the Laredo area. In 2013 the didactic part of the program was transferred to UTHSCSA. There are 24 clinical training sites with 8 PA students training in Laredo. The STEER program for MD/MPH students provides health care professionals an opportunity to learn about environmental and public health concerns that affect residents of this region. The South Texas Diabetes and Obesity Project became operational in February 2014. Public health training programs are available from certificate to master's level, and certificate to masters level training programs in health informatics are available. Student pipeline programs offer K-14 students education opportunities to foster an interest in health careers. The Dental Regional Campus programs offer dental residency and student training at local health care facilities, and dental continuing ed programs are offered to local health professionals. The campus library offers trainees electronic access to the Briscoe Library in San Antonio and is open to the community. The regional campus collaborates with community partners on health ed conferences for healthcare professionals as well as the community at large.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

745 The University of Texas Health Science Center at San Antonio

The re-establishment of the PA Program is projected for the fall of 2017. Plans depend on a pool of qualified applicants and availability of funding for additional faculty members and support staff. The expansion of graduate health professional education through the use of distance communication, including videoconferencing, and clinical simulation, will provide broader health professional education programs through more cost effective means. A bilingual certificate public health program is under consideration. A Masters level Dual Degree Program in Health Information Technology is under discussion with TAMIU that will be a joint degree program between TAMIU and the UT School of Public Health Campus in Brownsville. In the planning phase are collaboration opportunities with the UTRGV Smart Hospital in Harlingen for educational training programs for health care trainees and continuing education for practicing professionals. The UTHSCSA Dental School is seeking approval from the Commission on Dental Accreditation to expand the Pediatric Dentistry residency training program in Laredo. The current focus of the dental educational programs includes building on the current dental education training programs. Dental School will provide targeted “pipeline” activities to increase diversity in the dental and allied dental professions by focusing on students from designated dental health professional shortage areas in South Texas, including the entire San Antonio/South Texas corridor.

(4) Funding Source Prior to Receiving Special Item Funding:

None.

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

None.

(7) Consequences of Not Funding:

Legislative funding at a sufficient level to continue to maintain and operate current programs and expand programmatic needs at the Regional Campus of Laredo and the Dental Regional Campus is crucial. This remote health professional education campus was established by the University of Texas Health Science Center in San Antonio in 2002 to address a critical need for health care professionals and academic resources in this South Texas region. The development of health professional programs to increase opportunities for entry into health careers, improve health status and impact the quality of life of the region’s residents has shown remarkable progress. However, continued funding support is essential in order to develop the academic infrastructure needed to support and enhance the academic programs in progress. The growing epidemic of obesity and diabetes in the adult border population represents a social, economic and health crisis that must be addressed. The enormous challenge facing this community requires the involvement and partnership of the present academic resources along with the community involvement, through education and research.

745 The University of Texas Health Science Center at San Antonio

Special Item: 3 **Outreach Support for South Texas Programs**

(1) Year Special Item: 2002
Original Appropriations: \$2,000,000

(2) Mission of Special Item:

The Formula Funding equation does not include funding for Administrative Costs required to provide infrastructure support to programs such as the Regional Academic Health Center (RAHC), the Regional Campus in Laredo (RCL), the Family Practice and Podiatry Residency training programs, and the Mycobacterial-Mycology Research Lab funded as Special Items. This required the UTHSCSA to subsidize administrative support for these programs through the General Revenue funding provided to core mission-based operations. These programs have made positive impacts on health care and education in San Antonio and the South Texas region. As these programs continue to flourish, the cost of providing core infrastructure support to Special Item programs in San Antonio and South Texas out-pace any infrastructure funding provided through the formula funding mechanism. The 77th Legislature recognized this formula funding deficiency and appropriated funding for Outreach Support to cover administrative and infrastructure costs for Special Item programs, such as the RAHC and the Regional Campus in Laredo. The distance between the main campus in San Antonio and the regional campuses in Harlingen, Edinburg and Laredo is predominately causing the need for separate infrastructure support for these established and growing programs and facilities in South Texas.

(3) (a) Major Accomplishments to Date:

With Special Item funding for this initiative first received in fiscal year 2002, UTHSCSA has been able to address critical administrative and infrastructure needs of the various outreach programs in San Antonio and South Texas for which the UTHSCSA has been named the fiscal agent.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Outreach Support funds will continue to be used to enhance the administrative and infrastructure needs of the Special Items in San Antonio and South Texas funded by the Legislature.

(4) Funding Source Prior to Receiving Special Item Funding:

None.

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

None.

(7) Consequences of Not Funding:

This special item represents funding deficiencies for administrative support costs necessary to Special Item programs in San Antonio and South Texas that are not allocated through the formula funding mechanism. Without the continued support from the Texas State Legislature, the Core mission-based programs of the UTHSCSA will be impaired. UTHSCSA will continue to have institutional funding problems for core administrative and infrastructure support functions.

745 The University of Texas Health Science Center at San Antonio

745 The University of Texas Health Science Center at San Antonio

Special Item: 4 **Family Practice Residency Training Program**

(1) Year Special Item: 2000
Original Appropriations: \$645,908

(2) Mission of Special Item:

The purpose of the Family Practice Residency Training Program is to provide training to family practice resident physicians, as well as third and fourth year medical students in order to address the shortage of primary care physicians in San Antonio and throughout South Texas.

(3) (a) Major Accomplishments to Date:

Many of the residents who train in the South Texas/Border Region remain in the region after their residencies, providing primary care services to this medically underserved area of the State. With greater access to primary care physicians, the health care needs of the population of South Texas are better served.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

It is essential that the training of medical students & residents be continued in order to increase the quality and level of primary care patient services in the South Texas/Border Region. It is expected that several of the family practice residents who complete their training in the region will remain in the region and open their own practices there.

(4) Funding Source Prior to Receiving Special Item Funding:

None.

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

The program receives nominal support from the Texas Higher Education Coordinating Board (THECB).

(7) Consequences of Not Funding:

745 The University of Texas Health Science Center at San Antonio

Because much of the efforts associated with this residency training program are conducted in close proximity to and in conjunction with the Regional Academic Health Center (RAHC) activities, namely at the McAllen Medical Center, the current base appropriation funding levels have been incorporated into the overall budget needs for the new medical school at the University of Texas Rio Grande Valley (UTRGV). Thus, biennial base appropriations for this special item in the amount of \$805,378 will be consolidated with RAHC funding and transferred from UTHSCSA to UTRGV and reflected in the 2016-2017 bill pattern structure for UTRGV to support the new medical school initiatives.

It is critical that adequate financial support be provided for the family medicine residency training program to ensure that the supply of primary care providers in the South Texas/Border Region continues to improve. Inadequate funding will impair the access of the South Texas/Boarder Region population to primary care services and impede the development of the new medical school at UTRGV, as initially set forth in SB98 from the 81st Legislature to create a new medical school in South Texas and subsequently amended by HB100/SB24 from the 83rd Legislature.

745 The University of Texas Health Science Center at San Antonio

Special Item: 5 **Podiatry Residency Training Program**

(1) Year Special Item: 2000
Original Appropriations: \$202,595

(2) Mission of Special Item:

The purpose of the Podiatry Residency Training Program is to improve the supply of podiatrists and expand outreach clinics for foot care to the population of South Texas to treat predominately diabetic induced foot ulcers and to teach state of the art treatment options that preclude amputation. This program participates in the Area Health Education Council and South Texas Border Initiative, and addresses the shortage of foot care physicians and the high incidence of diabetes and its complications in the South Texas/Border region area.

(3) (a) Major Accomplishments to Date:

The incidence of diabetes and its complications in South Texas is significantly higher than the national average. The residents participating in this program are providing foot care to diabetic and other patients in South Texas. The residents of this region are able to benefit from new treatment options that in many cases prevent amputation. In addition, the program is increasing the supply of podiatrists to the State, and to South Texas, in particular.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

It is essential that the training of podiatry residents be continued in order to increase the quality and level of foot care services to the diabetic population in South Texas. It is expected that some of the podiatry residents who provide services in the outreach clinics will remain in South Texas and open their practices there.

(4) Funding Source Prior to Receiving Special Item Funding:

None.

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

None.

(7) Consequences of Not Funding:

Without adequate foot care, diabetic patients are at risk for serious complications. It is essential that an adequate supply of podiatrists be available to serve the needs of the South Texas/Border Region.

745 The University of Texas Health Science Center at San Antonio

Special Item: 6 **Mycobacterial-Mycology Research Lab (MMRL)**

(1) Year Special Item: 2002
Original Appropriations: \$219,435

(2) Mission of Special Item:

During the 2000-2001 biennium, UTHSCSA assumed responsibility for operation of the Mycobacterial-Mycology Research Laboratory (MMRL) previously located at the Texas Center for Infectious Diseases in San Antonio. Personnel and operating funds have been assumed by the UTHSCSA, and continued funding to support this program is necessary to sustain the current level of activity. This program is a major position of strength in the development of joint research and training programs in conjunction with our sister institution UTSA.

(3) (a) Major Accomplishments to Date:

The MMRL continues to make significant contributions in understanding how mycobacterial and mycological pathogens lead to a range of important human diseases in Texas, nationally and internationally. These research efforts lead to the development of therapeutic interventions and diagnostic tools to improve human health. The focus on these diseases is of high priority as they remain epidemic/endemic in S. Texas, Texas and globally. The MMRL is involved in mentoring doctoral trainees so that they can acquire expertise and contribute to the health and economic future of Texas. The MMRL has made major advances in delineating the fundamental mechanisms contributing to microbial disease progression. It has reported that expression levels of a key genetic transcriptional regulator are sufficient to determine virulence in the most common human fungal and bacterial pathogens. Additional research accomplishments include the identification of several potential virulence factors that could serve as targets for the development of novel and more effective therapies including vaccines, and has had major contributions to national collaborative genome sequencing projects and diagnostic advances. The MMRL is also involved in the Fungal Testing Laboratory which provides diagnostic services for national and international entities, and trains mycologists from all over the world. MMRL is committed to providing molecular diagnostic expertise and reagents.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The research of this group is expected to provide an increased understanding of mycobacterial and fungal pathogen populations and processes, thereby advancing development of epidemiologic and diagnostic methods, as well as vaccines.

(4) Funding Source Prior to Receiving Special Item Funding:

Interagency Agreement, Kleberg Fdn, Center for Disease Control, San Antonio Life Sciences Institute, California Health Care Foundation, UTHSCSA, Advanced Technology Program, San Antonio Area Foundation, NIH

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

Interagency Agreement (2002-2003), Kleberg Foundation, Center for Disease Control (2002-2003), San Antonio Life Sciences Institute (SALSI), UTHSCSA local funds for the Institutional Review Grant (IRG) program, THECB Advanced Technology Program (ATP), San Antonio Area Foundation (SAAF)

Schedule 9: Special Item Information

10/13/2014 11:16:25AM

84th Regular Session, Agency Submission, Version 1

Automated Budget and Evaluation System of Texas (ABEST)

745 The University of Texas Health Science Center at San Antonio

(7) Consequences of Not Funding:

Funding reductions would likely result in program terminations. Any interrupted progress will severely impair the success of this research that will prevent the elimination of important human diseases in Texas and improvements in human health for its citizenry.

745 The University of Texas Health Science Center at San Antonio

Special Item: 7 **Barshop Institute for Aging Studies**

(1) Year Special Item: 2014
Original Appropriations: \$2,000,000

(2) Mission of Special Item:

Providing quality health care for an increasing number of elderly citizens will become one of the major needs facing the public sector in this century because per capita expenditures for health care costs for the elderly are disproportionately high, especially the oldest old (e.g., individuals over 80 years of age). The incidence of cancer, Alzheimer’s disease, cardiovascular disease, and diabetes will also increase as our population ages. Therefore, it is universally recognized that increased spending for research in aging is one of the most important strategies in reducing health-care costs by improving the health of the elderly and in enhancing their contributions to our work force and society. Research emanating from the Barshop Institute for Longevity and Aging Studies will improve the quality of life for the growing numbers of elderly people in Texas and the United States.

(3) (a) Major Accomplishments to Date:

Over the past 25 years, UTHSCSA has developed an internationally recognized program in aging research. The UTHSCSA created the Barshop Institute for Longevity and Aging Studies in 1998 and has recruited leaders in aging research from outstanding research institutions such as Harvard Medical School, University of Pittsburgh, Baylor College of Medicine, Johns Hopkins, the Buck Institute, University of North Carolina, and Mount Sinai Medical School. The building housing the Institute was completed in March 2005 and funded through private donations. The Barshop Institute ranks 2nd nationally in basic research funding from the National Institute on Aging (NIA) compared to other Medical Schools/Health Science Centers in the U.S., and receives more funding for basic research in aging than all medical centers and research institutions in Texas. Thus, the UTHSCSA has a strong base to build upon as funding agencies are showing increasing interest in aging research.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The funds requested will allow continued expansion of the aging research program at UTHSCSA, including opportunities for translational and clinical aging research to flourish and improve the quality of life for all Texans as they age.

(4) Funding Source Prior to Receiving Special Item Funding:

The institute was created in 1998 and received \$393k in E&G funds and \$1.7M in Indirect Cost Recoveries from federal grants per year for operation prior to 2014.

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

Extramural federal grant and contract awards.

Schedule 9: Special Item Information

10/13/2014 11:16:25AM

84th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

745 The University of Texas Health Science Center at San Antonio

(7) Consequences of Not Funding:

The UTHSCSA is in the enviable position of having the best Aging Research Institute in the world when research in aging is expected to increase significantly and lead to major discoveries in the aging processes and age-related diseases. Discoveries emanating from the Institute will provide the basis for improving the quality of life for the growing numbers of elderly in Texas and the US. In addition, the Institute will be at the forefront of training physicians in geriatric medicine.

745 The University of Texas Health Science Center at San Antonio

Special Item: 8 **Institutional Enhancement**

(1) Year Special Item: 2000
Original Appropriations: \$1,000,000

(2) Mission of Special Item:

Initial funding for this strategy was legislatively provided in the 2000-01 biennium to support the growth and expansion of existing and new programs both in South Texas and San Antonio locations, and to address salary competitiveness issues. Funds also flowing through this strategy, commonly referred to as Article III, Section 56 funding, represents the partial restoration of a 12.5% General Revenue budget reduction experienced during the 2004-05 biennium and enacted by the 78th Legislature for health-related higher education institutions. At the recommendation of the LBB, these funds were allocated to Institutional Enhancement in the 2006-07 biennium since the restoration was related to formula strategies and operations at the main campuses in San Antonio. This strategy also includes funds from the restructuring of the South Texas Professional Education special item strategy that was consolidated into the 2008-09 baseline requests for the RAHC, the Regional Campus-Laredo (RCL), and the main campuses in San Antonio during the 2008-09 biennium as authorized by the 80th Legislature. The portion of the STPE supporting the main campuses in San Antonio was allocated to Institutional Enhancement. This special item was legislatively provided because formula pools have been significantly reduced and are significantly underfunded to cover the actual costs of instruction, research and space support. These funds support the costs of the UTHSCSA's core missions.

(3) (a) Major Accomplishments to Date:

Core institutional missions and infrastructure functions have been preserved with these funds.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Continue to help preserve core institutional missions and functions.

(4) Funding Source Prior to Receiving Special Item Funding:

E&G General Revenue

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

None.

(7) Consequences of Not Funding:

745 The University of Texas Health Science Center at San Antonio

This special item reflects restorative funding to Health-Related Institutions of Higher Education from Article III, Section 56 of the 78th Legislature as it pertained to an overall 12.5% General Revenue reduction. It also includes funds, as authorized by 80th Legislature, from the restructuring of the South Texas Professional Education special item strategy into the 2008-09 baseline requests for the Regional Academic Health Center, the Regional Campus in Laredo (LCE), and the main campuses in San Antonio. The portion of the STPE restructuring that supported the main campuses in San Antonio was allocated to Institutional Enhancement. As the workforce demands in the San Antonio area shift towards more skilled and highly trained employees, competition for available employees is felt institution-wide. As our involvement in outreach programs increases, greater demands are placed on the main campus for support functions. Because state General Revenue plays such a significant role in financing the core mission of our institution, it is important that it be maintained and not reduced. Without this General Revenue funding, educational, research, clinical training programs, and healthcare will negatively affect communities, practicing health professionals, and students. No alternative source of funding is available to support the institution's educational and clinical training programs in the South Texas and San Antonio locations.
