Administrator's Statement

85th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

785 The University of Texas Health Science Center at Tyler

AGENCY BACKGROUND

The University of Texas Health Science Center at Tyler (UTHSCT) is a health-related institution of The University of Texas System and is the only academic medical center in Northeast Texas. UTHSCT serves a region the size of West Virginia, a population of over 1.3 million Texans, and has an annual economic impact of nearly half a billion dollars.

Mission Highlights

Established by the Legislature in 1947 and joining The University of Texas System in 1977. UTHSCT's mission is to serve Northeast Texas and beyond through excellent patient care and community health, comprehensive education, and innovative research. Mission highlights include:

Patient Care: With more than 20 outpatient clinics, a 200-bed hospital, and a Level IV Trauma Center, UTHSCT sees more than 265,000 outpatient visits annually. UTHSCT's signature programs in primary care, pulmonary and chest disease, mental health, and cancer are centers of excellence here and globally. The Cancer Treatment and Prevention Center continues to provide cancer care to underserved populations in the region, many of whom would otherwise leave the region for care or go without treatment.

Education: UTHSCT's graduate medical education residency programs in family medicine, rural family medicine, internal medicine in Longview, occupational medicine, and psychiatry (Summer 2017) attract the state and nation's top medical school graduates, and the psychology internship program is highly sought after by doctoral students throughout the country. The institution serves as a clinical rotation site for nursing, medical, and allied health students from across the State, and provides distance education through the Northeast Texas Consortium (NETnet) to 125,000 students in Pre-K through graduate and continuing professional education programs. The School of Medical Biological Sciences offers a Master of Science in Biotechnology degree program, which is focused on meeting the workforce needs of Texas' growing biotechnology industry. In January 2017, UTHSCT will admit its first students in the newly created School of Community & Rural Health, with a specialized focus in training the workforce to meet the public health needs in rural Texas.

Research: UTHSCT's scientific discoveries improve the quality of life for all Texans. Over the past five years, UTHSCT research faculty have earned \$45.1 million in sponsored research funding, including funding from the National Institutes of Health. The campus consistently competes with Harvard, Johns Hopkins, other UT System institutions, and other top medical research hospitals for funding, particularly in the research of chest diseases, cancer, and infectious diseases. Despite increasing competitiveness for extramural research funding, the majority of researchers at UTHSCT have federal grant support for their research, and half of all research investigators are multi-grant funded through the NIH. In the recent months, UTHSCT scientists have received ten new awards, including six from the NIH, a testimony to the quality of research conducted at UTHSCT.

Researchers at UTHSCT recently received approval to begin clinical trials on a groundbreaking molecule discovered on the campus that offers hope to hundreds of thousands of people worldwide with untreatable lung disease.

State & Federal Designations

The state and federal governments have recognized UTHSCT's expertise and importance through multiple designations, including:

State Chest Hospital: Texas Health and Safety Code Section 74.603 designates UTHSCT as the state chest hospital. UTHSCT is the primary facility in this state to: (1)

785 The University of Texas Health Science Center at Tyler

conduct research related to respiratory diseases; (2) develop diagnostic and treatment techniques and procedures for respiratory diseases; (3) provide training and teaching programs; and (4) provide diagnosis and treatment of inpatients and outpatients with respiratory disease. UTHSCT continues to provide clinical leadership and medical services to patients at the Department of State Health Services' Texas Center for Infectious Diseases in San Antonio.

East Texas Center for Rural Geriatric Studies: Texas Health and Safety Code Section 74.604 designates UTHSCT as the East Texas Center for Rural Geriatric Studies for the purposes of: (1) researching issues in geriatrics, gerontology, and long-term care for the elderly, with an emphasis on the elderly living in rural and nonmetropolitan areas; and (2) providing related resources in East Texas and other rural areas in this state for training and research for: (a) professionals in medicine. including psychiatry, and in nursing, pharmacy, and allied health fields who provide health care to the elderly: (b) caregivers and advocates for the elderly; and (c) individuals employed by agencies that provide services to the elderly.

Center for Pulmonary & Infectious Disease Control: The Center for Pulmonary and Infectious Disease Control (CPIDC) was established by the 73rd Texas Legislature and began operations in 1993. Today, CPIDC is integrated into UTHSCT's pulmonary immunology department and is a clinical services and applied research and development laboratory that serves State and local health agencies and medical professionals regarding the management and control of pulmonary infectious diseases, including tuberculosis.

Heartland National Tuberculosis Center: The Centers for Disease Control and Prevention funds five regional training and medical consultation centers across the United States to manage and control tuberculosis. UTHSCT leads the Heartland National Tuberculosis Center and provides technical assistance, medical consultation, and other services to nine states, including Texas.

Southwest Center for Agricultural Health. Injury Prevention, and Education: Since 1995. UTHSCT has been home to a federally funded center with research, prevention, intervention, education, and outreach efforts designed to reduce occupational injuries and diseases among agricultural workers and their families in five states, including Texas.

Public Health Lab of East Texas: UTHSCT is home to the Nation's only federally funded bioterrorism laboratory located on the campus of a university medical center. This partnership between UTHSCT, the Texas Department of State Health Services, and the Centers for Disease Control and Prevention is part of the United States Laboratory Response Network.

REGIONAL CHALLENGES

UT Health Science Center Tyler is vital to the health and well-being of Northeast Texas. To understand the institution's important mission in the region, it is important to note the region's unique challenges.

Northeast Texas is the unhealthiest region of the State of Texas. The 1.3 million people who live here face more severe primary care and mental health provider shortages than other regions of the State, are at greater risk of early death than the statewide average, and have a suicide rate that is 65% higher than the statewide average.

Key statistics about the region include:

Medically Underserved Areas/Populations: All but three counties in Northeast Texas are either wholly or partially designated as medically underserved areas/populations.

785 The University of Texas Health Science Center at Tyler

Primary Care Workforce Shortages: Nearly 90% of the counties in the region have shortages in primary care providers. In some communities, the shortage is five times worse than the state average and nearly eight times worse than the national benchmark.

Mental Health Workforce Shortages: An estimated **85**,000 people in Northeast Texas have a serious mental illness, and approximately 113,000 need substance abuse treatment; yet, in nearly every community, there is a critical shortage of mental health professionals. In some communities, the ratio of people to mental health providers is 25.000:1, seven times the average for Texas.

Cancer Incidence & Mortality: Northeast Texas has higher age-adjusted invasive cancer incident rates than the statewide average, and the mortality rates for both men and women are higher than the statewide average.

Health Outcomes & Risk Factors: Over half of the counties in the region are in the bottom 20 percent of Texas counties in health outcomes and over one third are in the bottom 20 percent of Texas counties in risk factors.

MEETING THE NEEDS OF TEXAS

UT Health Science Center Tyler believes the campus exists to solve problems, and the institution's leadership takes seriously its charge to address the most pressing needs of Texas. The institution has developed new programs specifically aimed at meeting the needs identified by the Legislature as State priorities, including:

Mental Health

In partnership with DSHS. UTHSCT is working to improve mental health services in Texas. In March 2013, UTHSCT opened a 30-bed subacute mental health unit that is providing care to mentally ill patients previously residing in a state mental health hospital. This addition of beds has helped to alleviate congestion in the state's mental health system, allowing DSHS to open up state mental health hospital capacity. In addition to the subacute unit, UTHSCT opened a 14-bed acute mental health unit to provide additional beds to the State to better care for patients in acute mental illness crisis. UTHSCT also operates a 21-bed geriatric psychiatry unit to treat elderly patients with mental illness. These 65 mental health beds support not only the clinical care needs of patients with mental illness but also support our newly developed psychiatry residency and psychology internship workforce training programs.

Women & Child Health

UTHSCT participates in the Healthy Texas Women and family planning programs through the Department of State Health Services. The institution also has programs in partnership with DSHS to reduce infant mortality, help at-risk parents keep their babies and children healthy, and initiatives to reduce the number of injuries to children related to abuse.

Graduate Medical Education

UTHSCT is making a difference in the most underserved areas of the State. Approximately 80 percent of the family medicine residents trained at UTHSCT stay in Texas, and over half of those stay in rural Texas. The institution is expanding its GME programs to address workforce shortages in rural primary care and mental health. UTHSCT has received accreditation of two new graduate medical education programs – a family medicine rural track program in Sulphur Springs and a psychiatry program located on our main campus in Tyler with partnerships with Rusk and Terrell State Hospitals. In addition to those two programs, UTHSCT is actively seeking new partners for residency programs and has requested planning grant funding from the Texas Higher Education Coordinating Board to establish psychiatry and primary care residencies at a private hospital located in rural Palestine, Texas.

785 The University of Texas Health Science Center at Tyler

School of Community & Rural Health

A critical component of addressing the serious challenges in communities like Northeast Texas is developing a workforce that is skilled in public health. Nationally, the public health workforce shortage has been worsening since 1980. In 2008, the Association of Schools and Programs of Public Health reported that by 2020, an additional 250.000 public health workers would be needed to address pending threats and potential crisis such as pandemic flu, bioterrorism, and natural disasters.

To address the significant workforce shortages in public health, particularly in rural Texas. UTHSCT established the School of Community and Rural Health in February 2016. The newly established School will initially offer a Master of Public Health (MPH) degree, with students enrolling by January 2017. The initial MPH program is unique in that it is the only program in the State of Texas focused on meeting the needs of rural Texans. It is designed to be accessible and affordable to students in underserved areas of the State and is an applied approach to public health. This means that while graduates will have a grasp of the important theoretical concepts of public health, the main focus of their education will be on solving real-world problems in rural Texas communities.

Cancer Care & Prevention

Cancer is a public health challenge. UTHSCT's Cancer Treatment and Prevention Center was established to bring state-of-the-art cancer care and prevention strategies to one of the most underserved areas of Texas. In March 2015, the cancer center received accreditation with commendations from the Commission on Cancer of the American College of Surgeons. In partnership with UT MD Anderson Cancer Center, UTHSCT received a Cancer Prevention and Research Institute of Texas (CPRIT) training grant to educate family medicine physicians and residents on cancer survivorship and CPRIT funding to recruit new and highly competitive talent to the institution. The institution is also working with CPRIT to provide colon cancer screening services to vulnerable rural populations. UTHSCT is proud to have integrated mental health care into its cancer center services, so that patients receive the very best in cancer care and mental health care by one integrated team.

SELECTED UPDATES ON 2016-17 BIENNIUM FUNDING

Mental Health Workforce Expansion

There is a critical shortage of mental health professionals in Texas, particularly in rural Texas. In some communities in Northeast Texas, the ratio of mental health professionals to patients is 25,000:1, seven times worse than the state average. The 84th Texas Legislature funded an exceptional item for UTHSCT to start the region's first mental health workforce training program. The funds provided by the Legislature have been used to recruit faculty, including child and adolescent mental health faculty, and develop a new psychiatric residency program. This new psychiatry residency program is now accredited by the Accreditation Council for Graduate Medical Education (ACGME) and has begun recruiting residents. The program is expected to grow to 24 residents, with rotations at UTHSCT, local mental health authorities, and Rusk and Terrell State Hospitals. In addition to psychiatry, UTHSCT has tripled the number of clinical psychology internship positions and expanded rotations to Rusk State Hospital. Additional mental health workforce programs are in development.

The funding in strategy D.1.2. Mental Health Training Programs, is identified in the Policy Letter as an exception to the baseline request limitation. Current funding levels for this particular strategy are less than the expenses necessary to operate the strategy. UTHSCT appreciates the State's elected leadership exempting this critical funding from required baseline limitations. Additional funding needs related to this strategy are outlined in future sections of this administrator's statement.

NETnet Expansion

UTHSCT serves as the fiscal agent for the Northeast Texas Consortium, or NETnet, which was created by the Legislature and funded as a special item. The Legislature's intent in creating NETnet was to provide critical infrastructure to public schools, community colleges, and universities in the region that would otherwise have to be

785 The University of Texas Health Science Center at Tyler

duplicated at each institution at great expense to Texas taxpayers. NETnet serves 125.000 students in Pre-K through graduate school and delivers more than 2.400 courses annually.

Utilizing funds from the 84th Legislature and in partnership with the Federal Communications Commission Rural Health Initiative, NETnet is in the process of a multi-year upgrade of deteriorating infrastructure to support Texarkana College, Texas A&M Texarkana, Texas A&M Commerce. Paris Junior College, Northeast Texas Community College, Angelina College, Trinity Valley Community College, Panola College, Stephen F. Austin State University, and the network management center at UTHSCT. Additionally, improved fiber optics and equipment is being deployed to support services to UT Tyler, Tyler Junior College, and Stephen F. Austin State University.

NETnet has also deployed technology to modernize internet services at over two dozen public school districts in rural Northeast Texas, effectively bringing advanced courses to small, rural public school students who would otherwise not have access to specialized courses. This system serves 70,000 students annually.

The 84th Legislature also directed NETnet to develop a shared services initiative that provides collaborative software to manage financial aid, business services, and student support services for community colleges in Northeast Texas. As a result, NETnet created the Texas Community College Consortium, or TC3, and enrolled Texarkana College, Northeast Texas Community College, and Kilgore College as initial members. Paris Junior College and Angelina College will join the partnership in 2017, and the consortium is expected to expand to other community colleges. The consortium provides ongoing shared services that prevent the need for costly duplication at individual community colleges.

The East Texas Interactive Healthcare Network. NETnet's healthcare arm, has invested in technology to improve mental health services across rural Northeast Texas. Partnerships with the Andrews Center, the Burke Center, and Community Healthcore have increased services to populations in remote areas of deep East Texas. Legislative funding has been leveraged to acquire more than \$9 million in additional funding for broadband services in the region.

IMPACT TO AGENCY PERFORMANCE OF DIRECTED BUDGET REDUCTIONS (4%, 5%, 10%)

One of the core goals of the UTHSCT strategic plan is that the institution will be a good steward of our resources. In December 2015, six months prior to the directives issued in the Policy Letter, the UTHSCT President directed campus leadership to reduce actual operating expenses by three percent. Campus leaders have implemented several cost containment strategies, including realigning staffing levels, tighter supply and inventory controls, travel restrictions, and restrictions on hiring of non-essential positions. These voluntary measures have resulted in actual savings to the State of Texas.

Because the institution voluntarily reduced costs earlier in the fiscal year, additional reductions as directed by the Policy Letter impact core operations to a greater extent than would have otherwise occurred. Campus leadership reviewed all general revenue and general revenue dedicated items that are not exempted by the Policy Letter and ranked those items based on their impact to patient safety, quality of care, and continuity of operations.

In achieving the four percent required reduction, the institution reduced strategy D.1.1, Northeast Texas Initiative, by the total amount of the required reduction. The Northeast Texas Initiative, or NETnet, provides telecommunications infrastructure and shared services to 28 public school districts, 20 community colleges and universities, three regional mental health systems, and five regional healthcare centers. These services reduce unnecessary duplication of infrastructure and cost while also providing 125,000 students access to over 2.400 distance education courses annually. Other options for the required reductions would have impacted our family medicine residency training program, indigent care support, or negatively impacted patient safety, clinical quality, and critical research and training efforts. UTSHCT respectfully requests restoration of the four percent reductions.

Administrator's Statement

85th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

785 The University of Texas Health Science Center at Tyler

The institution followed the same methodology in applying the five and ten percent reduction scenarios as directed by the Policy Letter. In both scenarios, the total amount of the reduction is applied to strategy D.1.1. Northeast Texas Initiative.

SIGNIFICANT CHANGES IN POLICY

No significant changes in policy to report.

SIGNIFICANT CHANGES IN PROVISION OF SERVICES

Mental Health: UTHSCT continues to grow its mental health program. Three years ago, the institution had very limited outpatient mental health services and no inpatient services. Today, UTHSCT operates 65 inpatient beds, two intensive outpatient programs for patients with mental illness, a child and adolescent outpatient clinic, and has successfully integrated mental health and physical health in clinics throughout the institution.

SIGNIFICANT EXTERNALITIES

Texas Healthcare Transformation and Quality Improvement Program (1115 Waiver)

UTHSCT serves as the Anchor and a performing provider for the Northeast Texas Regional Healthcare Partnership (RHP 1) for the Texas Healthcare Transformation and Quality Improvement Program (1115 Waiver). The 1115 Waiver has led to better outcomes, reduced healthcare costs, and greater primary care and mental health care access in Northeast Texas. Initially set to expire in October 2016, the State of Texas and the federal Centers for Medicare and Medicaid Services have agreed to a 15-month extension to negotiate whether a longer-term agreement can be reached. If a longer-term agreement is not reached, Northeast Texas faces the loss of roughly \$1 billion in both uncompensated care and quality improvement funding. This would jeopardize the continued funding innovative projects that reduce the cost of care, increase the quality of care, and expand access to vulnerable populations. These services include mental health crisis stabilization centers, jail diversion programs for the mentally ill, behavioral and physical health integration services, and mobile pediatric asthma programs that have reduced hospitalizations by 90% and emergency department use by 80%.

Declining Federal Research Funding

The federal National Institutes of Health budget is declining and funded projects are at historically low levels. Because of the decline in federal research funding, an average of only 15 percent of researchers who apply for federal NIH funding will receive an award. This means that in order to retain high quality researchers in Texas institutions, these researchers must be supported through other sources, including state research formula funding.

EXEMPT POSITIONS AT THE AGENCY Not applicable.

BACKGROUND CHECKS

Consistent with Texas Government Code Section 411.094 and Texas Education Code Section 51.215, UTHSCT's policy is to conduct criminal history record background checks on all applicants who are finalists for positions, employees who are promoted, individuals wishing to volunteer, students who are assigned to patient care, and all non-employees who conduct business at the institution. Upon conclusion of the review of the criminal background check, the chief of police and human resources department determine an applicant's suitability for employment.

CENTRALIZED ACCOUNTING AND PAYROLL/PERSONNEL SYSTEM (CAPPS) Not applicable.

Administrator's Statement

85th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

785 The University of Texas Health Science Center at Tyler

FY 2018 - 19 BUDGET PRIORITIES

The following section summarizes the agency's legislative appropriations request and outlines funding that exists outside of UTHSCT's legislative appropriations request that is critical to core operations of the campus.

Restore 4% Reductions

UTHSCT respectfully requests that the 85th Texas Legislature restore the four percent base reduction required by the Policy Letter. The required reduction negatively impacts NETnet, which provides cost saving services to more than 25 public school districts and 18 higher education institutions across 50 rural East Texas counties. Without a restoration of funding, these public school districts, community colleges, and higher education institutions would lose some cost saving benefit of shared services and would be required to provide the lost services at a greater cost to taxpayers.

Fully Fund Mission Specific Formula

UTHSCT requests that the 85th Texas Legislature fund the growth of the mission specific formula that provides formula support to UTHSCT. UTHSCT does not provide formal undergraduate medical education, so the 77th Texas Legislature created mission specific funding to recognize the patient care, research, and training programs at UTHSCT and the institution's designation as the State Chest Hospital.

Preserve Funding for Existing Special Items

UTHSCT receives modest, but critical, special item support from the Legislature. Special item funding totals supports critical mental health and rural primary care workforce training programs in the most underserved area of Texas. The institution, as fiscal agent for NETnet, saves Texas taxpayers millions of dollars per year by reducing duplication of services and infrastructure across nearly 50 different public school and higher education institutions and provides critical infrastructure to mental health organizations and rural hospitals. Without these funds, UTHSCT would be forced to close these programs and services.

Fund Mental Health Workforce Expansion Exceptional Item

UTHSCT requests \$2.73 million per year (\$5.46 million over the biennium) to expand its existing mental health workforce training programs and research to serve youth and families with mental illness. There is a significant need for professionals trained in serving youth and families with mental illness, as one in five children ages 13-18 either currently have or will develop a serious mental illness. Half of all lifetime cases of mental illness begin by age fourteen, and nearly half of children in foster care have clinically significant emotional or behavioral problems. Yet 80 percent of Texas counties, especially rural counties, have no practicing child or adolescent psychiatrists. UTHSCT recently recruited four child and adolescent psychiatrists to East Texas, but the need for services continues to grow and the region will require additional resources to meet that growing need.

UTHSCT proposes expanding its mental health workforce training program to include specific programs in the areas of child and adolescent mental illness. This expansion would include educational, research, and clinical initiatives using evidence based approaches to high risk youth populations with a focus on integrated training and clinical experiences that treat the family system. These funds would also support new research in the area of depression and testing of new therapeutic strategies for the treatment of depression.

Funding Priorities Outside UTHSCT Legislative Appropriations Request

The following budget requests exist outside of UTHSCT's legislative appropriations request but are of particular importance to the daily operations of the institution.

UTHSCT respectfully requests full funding of formula funding that is critical to the operations of higher education institutions in Texas.

8

Administrator's Statement 85th Regular Session, Agency Submission, Version 1

Automated Budget and Evaluation System of Texas (ABEST)

785 The University of Texas Health Science Center at Tyler

Graduate Medical Education Formulas

UTHSCT's graduate medical education programs in family medicine, internal medicine, occupational medicine, and psychiatry, are supported by the graduate medical education formulas and related programs at the Texas Higher Education Coordinating Board. UTHSCT requests that the 85th Texas Legislature adequately fund the growth in the various formulas that fund graduate medical education and higher education in Texas.

Instruction & Operations Formula for Health Related Institutions

UTHSCT requests that the 85th Texas Legislature fund the growth in the instruction and operations (I&O) formula for health related institutions. While these formulas provide limited support directly to UTHSCT, the institution's mission specific formula is capped at the average growth in funding for health-related institutions in the I&O formula. Because UTHSCT is a fast-growth institution, the growth in the mission-specific formula typically outpaces the average growth in the health related institution I&O formula.

Research Enhancement Formula

The research enhancement formula supports a critical mass of biomedical research at UTHSCT. The research conducted at UTHSCT is highly competitive nationally, especially in the areas of lung and infectious diseases, where the focus is on translational research. Translational, or bench to bedside, research is aimed at bringing discoveries in the research lab to patients as quickly as possible. The funding provided by the research enhancement formula is leveraged to provide additional support from the federal government, non-profit organizations, and private industry. In addition to producing new treatments for diseases, these discoveries enhance the State's biotech industry. A recent scientific discovery at UTHSCT led to the creation of a new biotech start-up company, which has attracted strong investor and pharmaceutical industry interest.

Mental Health Funding

UTHSCT has rapidly and dramatically expanded mental health services to help the State meet the needs of Texans with mental illness, particularly those who are in the care of the state mental health hospitals or who need crisis services and have no ability to pay. These services rely on the Legislature's continued funding of mental health programs at the Department of State Health Services and the Health and Human Services Commission. UTHSCT fully participates as a voting member of the Statewide Behavioral Health Strategic Planning and Coordinated Expenditures Council created by Article IX, Section 10.04 of the 2016-17 general appropriations act, and stands ready as a willing partner with the State to address mental health needs in East Texas.

CONCLUSION

UT Health Science Center Tyler's commitment to the Legislature is to focus educational programs on high-demand fields, collaborate with state and local agencies and private industry to solve tough problems in Northeast Texas, and manage taxpayer resources well and eliminate waste. UTHSCT's growth will be responsible and accountable with a focus on community health and health professions, clinical programs that emphasize population health and managing healthcare cost, and rapid responses to community and state needs.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, student services and institutional support. The formula for this strategy is based on weighted biomedical student full time equivalent. The rate per weighted student headcount or full time equivalent is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2018-19 because amounts are not determined by institutions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The University of Texas Health Science Center at Tyler has a statutory mission to conduct research, develop diagnostic and treatment techniques, provide training and teaching programs, and provide diagnosis and treatment of inpatients and outpatients with pulmonary, respiratory, and other diseases of the chest. The Chest Disease Center Operations formula allocates funds based on the number of cases in which disease diagnoses are treated by UTHSCT. These funds are used to provide leadership and excellence in the diagnosis, treatment, and prevention of disease; and to provide primary patient care that is accessible, appropriate, effective, and compassionate.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2018-19 because amounts are not determined by institutions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the Northeast Texas Consortium of Colleges and Universities is to increase access to distance learning and rural health programs for the people of Northeast Texas through collaboration and state-of-the-art technology. Senator Bill Ratliff commissioned a study of the higher education needs of Northeast Texas in 1993. As a result of that study, NCHEMS Management Services, Inc. concluded that the region needed enhanced distance learning connectivity and expanded educational opportunities within defined programmatic areas. In response, fifteen Texas institutions of higher education formed a collaborative initiative in 1994 called the Northeast Texas Consortium (NETnet), established a central coordinating office staffed by a full-time director in 1996, and began to assess the diverse and widely disparate technology needs of the fifteen members, the surrounding communities, and a 50-county region in East Texas distance learning network came online, connecting 15 higher education members and creating educational access points in the member communities. In accordance with NCHEMS recommendations, NETnet membership is currently pursuing opportunities to expand the project into additional high-need communities, add centralized, leveraged technology services for delivery through the network linkages, and increase the number and scope of programmatic prospects for the students and citizenry of the region.

STRATEGY DESCRIPTION AND JUSTIFICATION:

There is a critical shortage of mental health professionals in Texas, particularly in rural Texas, the state's mental health hospital system, and local mental health authorities.

This strategy helps fund the costs of a variety of mental health workforce training programs, including medical residencies in psychiatry and clinical psychology internships (the residency equivalent for psychologists), among others. The funding supports faculty positions in the Department of Psychiatry and Behavioral Medicine at multiple sites, which are required to meet Accreditation Council for Graduate Medical Education (ACGME) and other accrediting standards. The mental health workforce training program at UTHSCT is unique in that it is geared toward meeting the needs of rural and underserved areas in Texas and is collaborative in nature, with training partnerships in community mental health settings, state mental health hospital locations, and on location at The University of Texas Health Science Center at Tyler.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Additional information for this strategy is available in Schedule 9, Special Item Information.

OBJECTIVE:	2 Residency Training Special Items			Service Categori	es:	
STRATEGY:	1 Family Practice Residency Training Program			Service: 19	Income: A.2	Age: B.3
CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019

This strategy helps fund the costs UTHSCT bears in training its family medicine residents. Medical education is only partially complete when a physician is awarded his or her medical degree. Further education in an accredited residency program is essential for the development of the full range of knowledge and skills to perform medical diagnosis and treatment and the certification required before a doctor is qualified to practice. This residency education is a major part of the primary mission of all Texas medical schools. Serving the mission of training residents has significant costs, and the primary cost borne by medical schools is that of providing education by faculty.

The Family Practice Residency Program's mission is to prepare residents for the skilled practice of family medicine through patient-centered teaching from dedicated faculty in a professional academic environment, encouragement of academic excellence and the achievement of the individual resident's optimum potential, and the fostering of a healthy balance between successful living and vigorous learning.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Additional information for this strategy is available in Schedule 9, Special Item Information.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The poverty rate in rural Northeast Texas is higher than the state average. As a result of the high poverty rate in the area, a large number of UTHSCT's patients are indigent or self-pay patients who either don't pay their bills or pay a very minimal amount. The funds from this strategy allow UTHSCT to continue providing quality care to indigent patients while offsetting the strain on resources caused by the increase in the volume of indigent patients.

DESCRIPTION / JUSTIFICATION:

There is a critical shortage of mental health professionals in Texas, particularly in rural Texas, the state's mental health hospital system, and local mental health authorities. This strategy helps fund the costs of a variety of mental health workforce training programs, including medical residencies in psychiatry and clinical psychology internships (the residency equivalent for psychologists), among others. The funding supports faculty positions in the Department of Psychiatry and Behavioral Medicine at multiple sites. which are required to meet Accreditation Council for Graduate Medical Education (ACGME) and other accrediting standards. The mental health workforce training program at UTHSCT is unique in that it is geared toward meeting the needs of rural and underserved areas in Texas and is collaborative in nature, with training partnerships in community mental health settings, state mental health hospital locations, and on location at The University of Texas Health Science Center at Tyler.

EXTERNAL/INTERNAL FACTORS:

Additional information for this strategy is available in Schedule 9, Special Item Information.

DATE: 10/16/2016 TIME: 12:49:43PM Agency code: 785

Agency name:

The University of Texas Health Science Center at Tyler

CODE DESCRIPTION

Excp 2018 Excp 2019

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS:

Out-year costs represent ongoing maintenance and administrative costs. They are dependent upon funding of the exceptional item request. These funds would be used to target a specific population representing expansion of the scope of the current mental health workforce training program. If the exceptional item is not funded, this expansion could not be implemented and would eliminate the out-year funding requirements.

ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:

2020	2021	2022
\$2,730,000	\$2,730,000	\$2,730,000

Item Name:	Restoration of the 4% non-formula reduction		
Item Priority:	2		
IT Component:	No		
Anticipated Out-year Costs:	Yes		
Involve Contracts > \$50,000:	No		
Includes Funding for the Following Strategy or Strategies:	05-01-01 Northeast Texas Initiative		
BJECTS OF EXPENSE:			
2001 PROFESSIONAL FEES AND SERVICES		268,232	268,232
TOTAL, OBJECT OF EXPENSE		\$268,232	\$268,232
ETHOD OF FINANCING:			
1 General Revenue Fund		268.232	268,232
TOTAL, METHOD OF FINANCING		\$268,232	\$268,232

DESCRIPTION / JUSTIFICATION:

In achieving the four percent required reduction, the institution reduced strategy D.1.1, Northeast Texas Initiative, by the total amount of the required reduction. The Northeast Texas Initiative, or NETnet, provides telecommunications infrastructure and shared services to 28 public school districts, 20 community colleges and universities, three regional mental health systems, and five regional healthcare centers. These services reduce unnecessary duplication of infrastructure and cost while also providing 125,000 students access to over 2,400 distance education courses annually. Other options for the required reductions would have impacted our family medicine residency training program, indigent care support, or negatively impacted patient safety, clinical quality, and critical research and training efforts. UTSHCT respectfully requests restoration of the four percent reductions.

EXTERNAL/INTERNAL FACTORS:

Additional information for this strategy is available in Schedule 9, Special Item Information.

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS:

Out year costs are associated with the institutions ongoing maintenance and operating costs of providing services to more than 25 public school districts and 18 higher education institutions across 50 rural East Texas counties.

UTHSCT respectfully requests that the 85th Texas Legislature restore the four percent base reduction required by the Policy Letter. The required reduction negatively impacts NETnet, which provides cost saving services to would lose some cost saving benefit of shared services and would be required to provide the lost services at a greater cost to taxpayers.

B. Assessment of Fiscal Year 2014 - 2015 Efforts to Meet HUB Procurement Goals

Attainment:

UTHSCT exceeded statewide HUB goal in "Special Trade." It did not meet the goals in other categories. See "Factors Affecting Attainment" and "Good Faith Efforts."

Applicability:

UTHSCT did not have any qualifying purchases in "Heavy Construction" or Building Construction."

Factors Affecting Attainment:

UTHSCT obtained the statewide HUB goal in "Special Trade". Statewide HUB goal attainment is difficult for UTHSCT to achieve because of its relatively rural location combined with its need for highly specialized medical, research, pharmaceutical, blood and other supplies and services required to operate and maintain a state-of-the-art acute-care hospital, biomedical research facility and graduate-level academic campus. The availability of HUB vendors to fill these needs, in the region, is very limited.

"Good-Faith" Efforts:

UTHSCT makes good faith efforts to increase opportunities for minority and women owned businesses by networking with existing and potential HUB certified vednors as well as attending and hosting forums such as those listed below:

FY15

- Black Contractors Association Banquet, September 26, 2014, Grapevine, TX
- UT System Supply Chain Alliance Meeting & Vendor Fair, October 27-28, 2014, Houston, TX
- Stephen F. Austin Vendor Fair, Nacogdoches, TX, October 30, 2014

Agency Code: 785 Agency: The University of Texas Health Science Center at Tyler

- Professional Service Advisory Roundtable, TAAACC, UT Health Science Center at Tyler, 12-05-2014
- Women Entrepreneurs Conference and Vendor Fair, February 24, 2015, Tyler, TX
- Doing Business Texas Style Access 2015, Irving, TX, May 11-12, 2015
- Presentation Texas is Big Business, Tyler Metro Chamber, May 16, 2015, Tyler, TX
- Economic Vendor Fair, UT Tyler, June 16, 2015, Tyler, TX

USE OF HOMELAND SECURITY FUNDS

The Public Health Lab of East Texas (PHLET) is an extension of the Texas Department of State Health Services Bureau of Laboratories. PHLET provides testing services for the Public Health Region 4/5N. The PHLET facility is located on the campus of The University of Texas Health Science Center at Tyler. Texas. Funds have been used to convert the Camp Fanin Army Base laundry facility into a state of the art Public Health Laboratory. PHLET is a registered Laboratory Response Network (LRN) facility that offers public health laboratory services as well as bioterrorism confirmation testing.

1 Northeast Texas Initiative

Category: Programs - Service Reductions (Other)

Item Comment: Funding reductions would negatively impact the Northeast Texas Initiative (NETnet), which provides cost saving services to more than 25 public school districts and 18 higher education institutions across 50 rural East Texas counties. These public school districts, community colleges, and higher education institutions would lose some cost saving benefit of shared services and would be required to provide the lost services at a greater cost to taxpayers.

Strategy: 5-1-1 Northeast Texas Initiative

				\$ 3,721,766.00	\$ 3,721,766.00

Special Item: 1 Northeast Texas Initiative

(1) Year Special Item:2000Original Appropriations:\$5,000,000

(2) Mission of Special Item:

The 73rd Texas Legislature commissioned a study of the higher education needs of Northeast Texas and concluded that the region needed broadly enhanced distance learning connectivity and expanded educational opportunities. The Legislature's intent in creating the Northeast Texas Initiative (known as NETnet) was to provide critical infrastructure to public schools, community colleges, and universities in the region that would otherwise have to be duplicated at each institution at great expense to Texas taxpayers.

(3) (a) Major Accomplishments to Date:

1. The Northeast Texas Initiative serves 125,000 students in Pre-K through graduate school and delivers more than 2,400 courses annually across 50 rural East Texas counties.

2. The East Texas Interactive Network, NETnet's healthcare arm, has invested in technology to improve mental health and telehealth services across rural East Texas. Partnerships with local mental health authorities have increased services to populations in remote areas.

3. NETnet has deployed new technology to modernize internet services at over two dozen public school districts, effectively bringing advanced courses to small, rural public school students who would otherwise not have access to specialized courses.

4. NETnet provides connectivity for member institutions to generate approximately 70,000 online video based enrollments to approximately 6.000 Full Time Equivalent Students.

5. NETnet infrastructure makes distance education programs possible, including education that trains medical residents.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The 84th Texas Legislature directed NETnet to develop a shared services initiative that provides shared software to manage financial aid, business services, and student support services for community colleges in Northeast Texas. The new consortium currently includes Texarkana College, Northeast Texas Community College, and Kilgore College as initial members. Paris Junior College and Angelina College are expected to join in 2017, and the consortium is expected to continue to expand. The consortium provides ongoing shared services that prevent the need for costly duplication at individual community colleges.

2. Integrate NETnet with the Lonestar Education and Research Network (LEARN) to become the regional hub for LEARN institutions, primarily in medical applications.

3. Invest in critical infrastructure, including upgrading NETnet microwave towers to current standards, and dismantle towers in areas where sufficient fiber connections occur.

4. Support medical residency training program growth at UT Health Science Center Tyler and its partner hospitals, including Rusk State Hospital.

5. Support tele-psychiatric services through NETnet broadband network in Longview, Atlanta, Gilmer, Texarkana, and Kilgore.

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5)	Formula	Funding:
N		

(6) Startup Funding: N

(7) Transition Funding:

Ν

(8) Non-general Revenue Sources of Funding:

Fees charged to member institutions

(9) Consequences of Not Funding:

NETnet provides services to over two dozen public school districts, eighteen higher education institutions and five regional healthcare centers across 50 counties in East Texas. Without funding, these institutions would all be forced to operate and maintain duplicative infrastructure at considerable cost to Texas taxpayers. 2. Because UTHSCT does not receive formula funding for this item, there are no other funds sufficient to carry out the operations of this program. If funding were reduced or eliminated, UTHSCT will have to reconsider the level at which it can maintain the program or whether the program can continue in operations

Special Item: 2 Mental Health Training Programs

(1) Year Special Item: 2016 Original Appropriations: \$4,000,000

(2) Mission of Special Item:

a. To expand the Mental Health Workforce in Northeast Texas by training competent psychiatrists and psychologists to provide effective treatments to those who need them, including the chronically and seriously mentally ill, at-risk youth, and rural underserved and disadvantaged populations, including but not limited to. Rusk State Hospital and Terrell State Hospital.

(3) (a) Major Accomplishments to Date:

a. The psychiatry faculty has expanded to 8, with 3 being credentialed in child psychiatry. This expansion has increased access to mental health services for adults and youth need. In addition, a Residency Program Director and Coordinator have been hired.

b. UT Health Science Center Tyler received an initial accreditation award by ACGME on 4/29/16 for a full resident complement of 24 residents. Initial planning for recruitment began in fall 2015, with resident match in spring of 2017. The first 6 residents will begin in July 2017.

c. The psychology internship was granted APPIC membership in 2015 and has an APA site visit anticipated for fall 2016. Faculty has expanded to include 3 full-time and several part-time psychologists, including those with a child & adolescent focus.

d. The inaugural class of 4 psychology interns began in 2015 and has increased to 6 in July of 2016. In addition, a post-doctoral training opportunity was developed with a candidate appointed and beginning in July 2016.

e. The internship offers two tracks, psychology in the primary care setting and neuropsychology. Interns also have the opportunity to train in the palliative care clinic. Training affiliations have been established with Rusk State Hospital and Terrell State Hospital with rotations beginning July 2016. In addition, a training opportunity has been created for Master's level practicum students attending UT Tyler.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

a. The first 6 psychiatry residents will begin in July 2017 and adjunct appointments for Rusk State Hospital will be developed with rotations beginning in academic year 2018-2019.

b. The psychology internship program will be expanded in July 2018 with adjunct appointments at Terrell State Hospital for faculty.

c. Psychiatry and Behavioral Medicine will be transitioned to Departmental Status.

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Formula Funding: N

(6) Startup Funding:

Ν

(7) Transition Funding: N

(8) Non-general Revenue Sources of Funding:

None

(9) Consequences of Not Funding:

a. An estimated 85,000 individuals in Northeast Texas have a serious mental illness. Over 85% of counties in the region have a shortage of mental health providers. In some communities the ratio of mental health providers to patients is nearly 25,000 to 1, seven times worse than the state average. There is an even greater shortage of child/adolescent psychiatrists and geriatric psychiatrists. Over 55% of psychiatrists are over the age of 55 and are likely to retire in the near future. If the Mental Health Training Program is not funded these gaps will continue to widen resulting in thousands of those with mental illness unable to receive appropriate treatment. Without appropriate treatment, many will receive help only in crisis, if at all, continuing to place undue burden on Emergency Departments and the Criminal Justice System and potentially escalating a suicide rate that is already 65% above the state average.

Special Item: 3 Family Practice Residency Program

(1) Year Special Item: 1985 Original Appropriations: \$150,000

(2) Mission of Special Item:

a. The mission of the Family Medicine Residency program at The University of Texas Health Science Center at Tyler is to train competent family physicians in all aspects of the specialty of family medicine as per the ACGME requirements. We continue to assist residents in developing skills that enable residents to practice compassionate medicine and communicate with the patient within the family dynamic, and to develop leadership skills that enable residents to be health advocates within the community.

(3) (a) Major Accomplishments to Date:

a. Since its inception in 1985, the Family Medicine Residency Program of the University of Texas Health Science Center at Tyler has graduated 188 family physicians in 29 graduating classes. Of the 188 graduates, 145 have remained in Texas to practice primary care and 72 of those have remained in East Texas.
b. The Family Medicine Residency program at The University of Texas Health Science Center at Tyler continues to enjoy a reputation as a premier training program in Texas. Because of the excellent teaching faculty and state of the art facilities, the program is consistently able to attract highly ranked medical residents from medical schools in Texas and surrounding states.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

a. To continue to help train Family Medicine residents and supply the people of Texas and East Texas with the best in primary health care.

b. Begin a Rural Track in Family Medicine to train six Family Medicine Residents in conjunction with Hopkins County Memorial Hospital in Sulphur Springs. Texas.

c. Begin providing primary care rotations for residents in The University of Texas Health Science Center at Tyler Psychiatry Residency Program.

(4) Funding Source Prior to Receiving Special Item Funding:

Locally generated hospital revenue Patient Income

(5) Formula Funding:

Ν

(6) Startup Funding: N

(7) Transition Funding: N

(8) Non-general Revenue Sources of Funding:

None

(9) Consequences of Not Funding:

Northeast Texas has primary care workforce shortages that are five times worse than the statewide average. Primary care providers are in high demand in Texas and with a rapidly growing and aging population, Texas will need even more primary care providers, particularly in rural areas. Without funding for this family medicine residency program, Texas will have fewer family medicine physicians available to provide primary and preventive care.

Special Item: 4 Support for Indigent Care

(1) Year Special Item:2002Original Appropriations:\$1,500,000

(2) Mission of Special Item:

To serve Northeast Texas and beyond through excellent patient care and community health, and to promote health for individuals in the region who do not have access to care due to limited financial resources.

(3) (a) Major Accomplishments to Date:

The University of Texas Health Science Center at Tyler provides approximately \$41 million per year in uncompensated care costs to patients who otherwise cannot afford medical care or insurance coverage, or are underinsured Uncompensated care costs also include the unreimbursed costs from government-sponsored health programs. A portion of these uncompensated care costs are dedicated to provide charity care to patients who apply for financial assistance according to The University of Texas Health Science Center at Tyler's charity care policy. Support for Indigent Care has been used to partially offset the costs incurred to provide essential care to these eligible patients.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

To provide a responsible amount of charity health care, within the constraints of The University of Texas Health Science Center at Tyler's finite resources, in order to improve the health of indigent patients in the region.

(4) Funding Source Prior to Receiving Special Item Funding:

Locally generated hospital revenue Income

(5) Formula Funding: N

(6) Startup Funding: N

(7) Transition Funding: N

(8) Non-general Revenue Sources of Funding:

None

(9) Consequences of Not Funding:

Reduced healthcare access to patients who do not have the ability to pay for services.

Special Item: 5 Institutional Enhancement

(1) Year Special Item: 2000 Original Appropriations: \$1,000.000

(2) Mission of Special Item:

a. To maintain and enhance The University of Texas Health Science Center at Tyler's investment in infrastructure in order to enhance the quality and value of campus facilities and improve the patient experience.

(3) (a) Major Accomplishments to Date:

Funds have been used to improve the facility, including projects that improved the health and safety features of the property. Funds were used to revitalize the UTHSCT public health clinic.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Continued campus improvement projects. Planned renovation of high traffic areas on the first floor of the patient care and administration towers, which have not been updated since the 1970s

(4) Funding Source Prior to Receiving Special Item Funding:

Locally generated hospital revenue

```
(5) Formula Funding: N
```

(6) Startup Funding: N

```
(7) Transition Funding: N
```

(8) Non-general Revenue Sources of Funding:

None

(9) Consequences of Not Funding:

1. Deferred maintenance of infrastructure, which must eventually be "caught up" and typically represents higher cost at later dates due to compounded damage caused by natural elements and normal "wear and tear."
