Automated Budget and Evaluation System of Texas (ABEST)

---

**718 Texas A&M University at Galveston**

---

Dr. Douglas Palmer  
Interim VP and COO, Texas A&M University at Galveston

**Introduction**

Texas A&M University at Galveston (TAMUG) is grateful for the support and commitment of the Texas Legislature. In the last legislative session, Texas A&M University at Galveston received \$62 million to support construction of campus facilities and related infrastructure. Construction is underway; this support will enable TAMUG to educate more students in fields of study critical for the economy and development of Texas, conduct translational research to enhance and protect marine-related economic and environmental resources of the state, and expand outreach educational programs for K-12 students and the general public.

**Special Purpose Mission**

The Galveston Campus of Texas A&M University (TAMUG) is a premier institution for maritime leadership and ocean and coastal studies on the Gulf Coast and a 21st century academic institution where research and scholarship are one with student learning and success. The proximity to the Gulf of Mexico as a window to the sea has enabled TAMUG to focus academic, research, and student opportunities into a unique marine and maritime experience that TAMUG alone can offer. As a branch campus of Texas A&M University, TAMUG shares the mission of Land Grant universities defined by a tradition of affordability, accessibility, and providing applied solutions to the needs of the state and the nation, as well as the high standards of achievements of an Association of American Universities institution.

With a distinct focus on marine-related issues, this mission is accomplished through an integrated program of undergraduate and graduate education; scholarly research; outreach programs for the public concentrating on K-12 science education; and licensing programs under the auspices of the U.S. Maritime Administration (MARAD). In the upcoming five years, TAMUG will make significant and national impacts on ocean and coastal studies through catalyzing scholarship and innovation in maritime transportation and administration, engineering solutions in coastal zones (storm surge protection), littoral urban planning and coastal community development (megacity sustainable development, coastal tourism, and health industry), environmental sustainability, global communication, maritime public policy, marine and subsea engineering, maritime cultural studies, and in marine safety and cyber security.

The TAMUG Campus impacts national security and the state's economic viability through the preparation of professionals who become practitioner leaders and future scholars in the dynamic maritime industry. In addition, TAMUG faculty are generating new knowledge in natural resource management, environmental quality assessment, coastal protection and littoral urban planning, offshore/deep-water engineering and technology, smart ports and logistics operations, maritime cybersecurity, infrastructure design, tourism and coastal community development and coastal sustainability. TAMUG's research is a vital component of the Tier I ocean and coastal research conducted at Texas A&M University.

The Texas A&M Maritime Academy has a commanding presence in the nation's strategy, a strategy that is essential to the U.S. economic, political, and naval power. That presence on the high seas depends on the graduates of the six state maritime academies and the U.S. Maritime Academy. The Texas A&M Maritime Academy is the only maritime academy located on the Gulf Coast. Significantly, the Texas A&M Maritime Academy is also the only maritime academy that is an integral component of a major American research university. The Texas A&M Maritime Academy cadets graduate as licensed officers in the United States Merchant Marines or commissioned ensigns in the United States Coast Guard or United States Navy in addition to obtaining a degree from Texas A&M University at Galveston. Maritime graduates currently serve as boat captains for inland waterways, pilots for major American and foreign harbors, engineers for offshore energy exploration and development, and in leadership positions within the maritime industries. The development of new curricular options in maritime cybersecurity and Electronic Technology Officer (ETO) will not only be a first in the nation but will also better serve and protect this critical industry, from port operations to maritime transportation, through its rapid evolution towards more automation and remote operation.

---

**Economic Impact Creates Demand for TAMUG Students**

A recent survey indicated that the ocean economy's 147,000 business establishments employed almost 3 million people, paid over \$113 billion in wages, and produced almost \$343 billion in goods and services. This accounted for about 2.2 percent of the nation's employment and 2.1 percent of its gross domestic product. Trends in gross domestic product also show the resilience of the ocean economy. In 2012, inflation-adjusted gross domestic product in the ocean economy was 15.7 percent higher than in 2007, contrasted with a 2.8 percent increase in the U.S. economy as a whole over the same period.

For example, Texas is home to more deep-water ports than any other state in the nation. Included in this number are Houston, Galveston, Corpus Christi, Texas City, and Beaumont. Texas ports alone rank No. 1 in the U.S. in overall tonnage throughput and No. 2 in U.S. exports. They contribute to 1.4 million jobs and represent over \$82.8 billion in economic value to the state. In addition, the U.S. petrochemical industrial complex concentrated around the Houston Metropolitan area contributes to national security through their production of 30% of all petroleum products and 100% of exotic fuels while three Texas ports are designated by the Department of Defense as strategic military ports, providing surface deployment and distribution for strategic military cargo worldwide. The Houston metropolitan area is the world's leading center for building oilfield equipment and home to more than 3,000 energy-related establishments, including many of the top oil and gas exploration, petro-Chemical and petroleum pipeline operating companies. As of 2011, 23 companies on the Fortune 500 list have their headquarters in Houston or the surrounding metropolitan region. The Houston Metropolitan Area's Gross Metropolitan Product (GMP) of \$384 billion ranks 5th in the United States.

TAMUG graduates support this dynamic and growing industry. For example, a survey of all alumni who graduated in the past five years reinforces TAMUG's effectiveness at preparing graduates for successful careers. Almost all Galveston Campus alumni surveyed were either employed (87%) or attending graduate school (8%), with ~80% of working alumni employed in a related field. Moreover, the expansion of the Panama Canal will result in a dramatic increase in demand for our students. The Port of Houston is already experiencing an explosion of terminal, warehouse, and intermodal facility construction (\$1.4 billion Port of Houston terminal at Bayport), which will double its container capacity.

TAMUG's degree programs such as the new Master's degree in Maritime Administration and Logistics are filling the positions that will be needed by this increased demand. The University produces:

- business graduates for port operations and maritime based industries
- maritime systems engineers
- licensed officers for the U. S. flag fleet, Military Sealift Command, offshore deep drill platforms and other foreign shipping companies
- urban planners and community developers
- natural and life scientists

**World Class Researchers**

During the summer 2010, TAMUG moved into the new gold LEED certified Oceans and Coastal Studies Building. This new state-of-the-art science complex is one of the finest research facilities for marine research in the United States. It houses critical laboratories such as the state and FDA certified Texas Seafood Safety Laboratory, the Laboratory for Oceanographic and Environmental Research that has generated >\$15 million in external funding expenditures, a new Sea Life Center that supports both sea life rescue work and micro to mesocosms for experiments on model species and ecosystems research. Additionally, Texas A&M University, one of a few select schools that carries the rare designation of being a land grant, sea grant and space grant institution, operates a fleet of research vessels that contribute to advancing our knowledge of the biodiversity, functioning, and natural resources of the oceans.

During the 2014-2015 academic year, TAMUG's faculty have done an outstanding job at moving our institution significantly closer to meet the scholarship goals of

**Administrator's Statement**

85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**718 Texas A&M University at Galveston**

Texas A&M University at Galveston. In FY14, TAMUG researchers were awarded over \$4.1M in new research awards from federal, state, and private sources (an increase of 24% from the prior year). In FY15, the total for research grants is \$17.6M, which amounts to more than a fourfold increase from the previous year. This extraordinary achievement is due in part to the award of a number of large grants from Gulf of Mexico Research Initiative (GoMRI ~\$9.1M), National Science Foundation (NSF \$3.6M), and Mexico's National Council for Science & Technology (CONACYT ~\$1M). Such large awards speak to the preeminence our faculty are gaining in their field. In addition, TAMUG researchers received funding from highly competitive federal programs such as the National Oceanographic and Atmospheric Administration and the Department of Energy leading to the most successful year of research fundraising in TAMUG's history.

Hurricanes can wreak havoc across the coastal regions of the U.S., killing thousands of people and destroying everything in their path. Because of development that has stemmed from population growth, the Texas Gulf Coast is increasingly vulnerable to these massive storms. With funding from private sources as well as NSF, NASA, Homeland Security and other federal agencies, researchers at TAMUG led by Dr. Samuel Brody, Director of the Center for Texas Beaches and Shores, and Dr. Bill Merrell, George P. Mitchell Chair in Marine Sciences are developing innovative tools that coastal residents and decision makers can use to reduce the impact of natural disasters and environmental variability. A major, ongoing initiative is using best practices in the Netherlands to design a coastal spine, the Ike Dike, which would protect the entire Houston-Galveston region from hurricane storm surge.

Additional research projects include major programs funded by GoMRI to conduct scientific studies of the impacts of oil spills on the Gulf of Mexico ecosystem, public health, and the future of fisheries. Another research group has received funding over multiple years from the Department of Energy to evaluate the mobility and impact of radionuclides following nuclear waste disposal or major catastrophes such as the Fukushima accident. The National Science Foundation regularly supports the work of TAMUG faculty including the reconstruction of hurricane frequency and intensity in the North Atlantic over the last 2,000 years, major biogeochemical shifts in Arctic ecosystems due to climate change in the region, state of fisheries and ecosystem structure in all major ocean basins of the world, and research and educational programs that help recruit students from underrepresented communities in high impact STEM fields. Finally, research funded by NASA examined the combined impacts of human activity on vegetation along the Texas coast, which leads to less absorption of carbon in these natural coastal ecosystems, affecting their role in balancing the climate along the coast.

**Texas A&M University System-wide Funding Issues and Needs**

We recognize the financial situation facing the state of Texas and the difficult budget decisions that face the 85th Legislature. We also appreciate the efforts through zero-based budgeting to focus spending on the highest priority and most efficient activities that are vital investments to the future well-being of the state of Texas. As we testified last session, TAMUS has engaged in similar exercises since 2011. We have eliminated administrative positions and discontinued performing certain functions that are not core to our mission and redirected those savings to classrooms, research labs, and public service.

Even as we continue to look for ways to improve our efficiency, we must also be clear that 4% reductions to budgets that have already been diligently scrubbed and reprioritized will mean we are left to manage significant budget reductions directly impacting teaching and support services to our students; reductions to significant research projects that directly impact our state's economy; and reductions in outreach and service efforts on which many citizens and public entities depend. Although a last resort, increased tuition may have to be considered to maintain the quality of programs and services you have charged us to provide. For these reasons, we respectfully request that you restore the 4% reduction in our baseline requests for both the formula and non-formula strategies.

Base Funding – Formula funding is the foundation our institutions depend upon to provide high quality teaching and support services for growing student populations to prepare them to meet the workforce needs of this state. The teaching function of our institutions is supported by two key sources of funding: state appropriations primarily through the formulas and students' tuition and fees. Our number one priority is maintaining the current formula funding rates in the base bill and in the final conference committee bill in order to cover enrollment growth through the spring 2017 semester. Any additional funding you can provide through the formulas to

**Administrator's Statement**

8/8/2016 1:39:07PM

85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**718 Texas A&M University at Galveston**

---

increase the rates to cover the cost of inflation on the state's share of the cost of educating students will help us keep our tuition and fees more manageable while also offering the courses and support services necessary to help students graduate in a timely manner.

Our A&M Agencies need base funding support much in the same manner as the formulas that provide basic, on-going support for the academics and health related institutions.

We also request support for other base funding streams be maintained at current levels, including support for research through the Texas Research University Fund and the Comprehensive University Fund and the continuation of Institutional Enhancement.

New Performance Measures – The performance measures added for higher education are important indicators for the legislature to track. We are glad to provide this outcome information. Out-year projections for these measures are held to current levels in this document. Tuition & fee charges and student debt measures are so closely connected to legislative appropriations that accurate projections for the future cannot be made at this time without a better indication of future funding amounts. However, regardless of appropriations levels, TAMUS commits to hold tuition at the lowest levels financially prudent and to look for every way to assist students in graduating well prepared, on time, and with the least debt possible.

Outcomes Based Funding - Our Board is increasingly incorporating performance and outcomes into our internal budget review processes. We welcome a continued dialog on this issue during the legislative session.

Capital – Thank you for the commitment you made to higher education last session through the increase in the Higher Education Fund and the authorization for facilities to address our critically needed classrooms and labs. We have moved forward immediately to build the critical teaching and research space you approved so we very much appreciate the policy letter exemption for appropriations needed to satisfy debt service requirements. We expect to have binding contracts on all of our projects that require two years of debt service. Providing the second year of debt service appropriations for the 2018-19 biennium is of the utmost importance to keep the projects on track.

Higher Education Group Health Insurance – We request funding to cover increases in enrollments and in health care costs that are beyond our control. We also request restoration of some increment of the differential funding level for our employees' group insurance as compared to that provided for other state employees who are covered in the ERS group insurance plan.

Student Financial Aid – Thank you for the increase in financial aid for students last session; students and their families are the beneficiaries. Because it is so important to these families, we request increased support for student financial aid, including TEXAS Grants and other financial aid programs. However, please recognize that since it is a method of paying for tuition and fees that otherwise would have to be paid by students and their families, student financial aid does not increase much needed funding for the universities.

We appreciate the relief provided by the 84th Legislature for the Hazlewood Legacy program that supports our veteran students and veterans' families. While we do not anticipate that the recent court ruling will cause an increase in the already rapid growth in the veteran students and their families served through the Hazlewood program, the current rates of growth of Legacy students continue to be an increasing cost to our institutions.

Legislative Requests – Special Item  
Restore 4% Base Cut

**Administrator's Statement**

8/8/2016 1:39:07PM

85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**718 Texas A&M University at Galveston**

---

The mandated 4% reduction will constrain further our ability to hire faculty and staff needed for our growing institution. This is especially true as we expect a significant influx in students coming to our campus in the fall of 2016 as part of our new Engineering partnership with Texas A&M University Main Campus in College Station. We expect to teach an additional 290 students core curriculum courses as well as provide other services to them such as advising, mentoring and tutoring. We respectfully request this reduction be restored. If not, it will most likely result in larger class sections and possible reduction in some of our academic enhancement services.

**Coastal Surge Protection Initiative**

2018-19 Requested Amount: \$2,000,000/Year

**Links to Strategic Vision and Mission:**

The state of Texas needs a Coastal Surge Protection program and plan. The Center for Texas Beaches and Shores (CTBS) at Texas A&M University at Galveston was established in 1993 by the Texas Legislature without funding. The CTBS is dedicated to the conservation and protection of the Texas shorelines, bays and waterways through innovative research in cooperation with government and private sector agencies. Its focus is on developing a comprehensive, holistic, approach to Texas coastal research and restoration solutions incorporating natural, economic and political processes. The CTBS has multiple externally funded research projects totaling more than \$4M. The Center has also launched two initiatives: the Texas Coastal Communities Planning Atlas and the Coastal Protection Program

- Through private funding, CTBS conceived, developed and informed the public and regional, state and national decision makers on the Ike Dike (Coastal Spine) concept, which would greatly reduce surge damages in the entire Galveston Bay region.
- Strong partnerships have been established and joint institutional agreements have been signed with Delft University of Technology and The Homeland Security Center of Excellence at Jackson State University. This CTBS led research has established the Ike Dike (Coastal Spine) as the preferred option for coastal surge protection and has received endorsements from 30 municipalities, over 20 economic and civic organizations, and the East Harris County Manufacturers Association's 138 industrial concerns in the Galveston Bay Region. The Texas Coastal Atlas (conceived and developed by the CTBS researchers) has proven effective at demonstrating the damaging effects of storm surge and the reduction in damages should the Ike Dike be put in place.
- Working with its Dutch and U.S. partners, the Center was also able to obtain a NSF grant (\$3.6M over 5 years) to study flood risk reduction at the national level using the Galveston Bay region as a national test bed. This major grant, along with the progress made on the Ike Dike concept and the present power and accessibility of the Coastal Atlas, gives us a strong base to advance understanding of the Ike Dike and the usefulness of the Atlas over the next two years.
- Funding for the Coastal Viability and Protection Initiatives will accelerate the optimization work, looking at different barrier placements and combinations of coastal spine heights and in-bay measures. These funds will thus allow the CTBS team to concentrate its efforts on development of a coastal spine strategy that is cost-effective, environmentally-sensitive, and politically acceptable and has long-term impact. This work will result in an actionable plan for federal and state agencies for design and implementation of an effective coastal spine initiative.
- The Center and its programs, specifically the Ike Dike and the Coastal Atlas, were a major focus of a hearing of the joint committee of the Texas Legislature on the Coastal Barrier. Strong legislative support was voiced for the Ike Dike concept and the value of the Coastal Atlas as well as the desire for the CTBS to continue and accelerate progress through state funding for the Center.

**Vision for the Future Growth of Texas A&M at Galveston**

To better serve the people of the state of Texas, Texas A&M at Galveston continues to place strategic importance in planning for future demands for our graduates. In the past six years, our student enrollment has grown over 25% and will continue to grow in response to these needs. Additionally, we have planned new partnerships with our parent campus that will expand Engineering offerings to the state of Texas by placing even more students on our campus in the Engineering track. Responding to this

**Administrator's Statement**

8/8/2016 1:39:07PM

85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

**718 Texas A&M University at Galveston**

expected growth is a priority for TAMUG and will require additional ways to teach and provide experiential learning. Toward this we have developed a longer term needs list that although are not included in any of our legislative requests for this biennium, may be reflected in future biennium requests.

1. Multi-mission Research/Instruction Vessel to be named the Neptune.

Building a multipurpose Research/Instruction Vessel will offer opportunities to develop international multi-mission academic, research, and training use through a unique model merging instruction/classroom and research laboratories that would provide hands-on training for future scholars and professionals in the maritime sector. Such a multifunctional platform would in turn provide economic and intellectual advancement of the state of Texas and the nation through innovation (applied and fundamental research), and address 60x30 priorities by favoring retention and increasing completion rates (high impact learning experiences), and the development of intellectual and practitioner leaders that will have an impact on national security and economic growth in littoral and marine zones. The capacity to train students in a natural “laboratory” and to offer researchers a chance to explore first hand one of the most dynamic environments and major resource of the planet, is controlled by a handful of institutions in the nation, and arguably in the world. In addition, the limited research vessel capacity in the U.S. is predominantly deployed in the Atlantic and Pacific Oceans. Hence, such vessel would fill the capacity gap of the current research fleet on the Gulf of Mexico by adding blue water long endurance missions (4000 nm, 3 weeks range), would provide open access to the Gulf of Mexico and Caribbean Sea, and as such would establish Texas A&M at Galvstn as a national platform for sea-going research and innovation and a port-of-call for such activities. A number of large research programs presently shared across multiple colleges at Texas A&M at Galveston (NSF, GoMRI, NOAA, Sea Grant,) would strongly benefit from a research vessel operated as a shared research facility. The research fleet of the future needs to design new sea-going platforms (vessels) that are adapted to the future needs of the nation, and not reflective of an aged model. Presently, all research vessel platforms are single mission and have a very high cost of operation, thus reducing their flexibility and service to the nation.

2. Immersive Scholarship and Learning Environment Building to be named “The ISLE”

TAMUG’s strategic plan calls for growing our campus to 3,000 students by 2018. We plan to accomplish this through expansion of our local curriculum as well as support of other University programs in high impact/high needs fields. The plan places particular emphasis on enrollment, retention, and graduation of underrepresented minorities (first generation, ethnic minorities, etc.). Our partnership with the College of Engineering (COE) and the 25x25 initiative shines as one example toward this commitment as the campus saw the first cohort of nearly 300 COE first-year students enrolled on the Galveston Campus in fall 2016. Our rapidly expanding enrollment (~30% in next three academic years) and the increasing proportion of students in STEM degrees will require instructional and support facilities that are adapted to modern teaching methods, including distance delivery and technology-enabled learning environments.

To support these higher quality space needs, this project will include design and construction of a new academic support space along with new central plant needs, related utility equipment and an underground thermal, electrical and data grid. The ISLE will create a modern and innovative learning environment that supports inquiry and technology-based instruction through an extensive support structure of work/study spaces, information resources, faculty, academic coaches, counselors, advisors, tutors, librarians, and other staff — all of whom proactively and holistically support student successful preparation to enter careers in maritime affairs, marine sciences and technology, and engineering.

Organizational Changes

Due to the recent retirement of Admiral Robert Smith III, Texas A&M University has appointed Dr. Douglas Palmer as Interim VP and COO.

Educational Outreach Programs

Finally, no status report would be complete without recognizing the tremendous support being provided by TAMUG’s educational outreach division in meeting the Texas mandate to improve K-12 science education. Our outreach camp program has welcomed well over 13,000 middle and high school students. In conjunction with Sea Camp, approximately 80 volunteer teachers are trained in enhanced science teaching. Every sixth grader in Galveston visits the campus each year for a day of science,

**Administrator's Statement**

85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**718 Texas A&M University at Galveston**

---

and the campus has developed lesson plans and virtual science tours on the internet for use by teachers in their home classrooms. Science workshops were conducted in approximately 140 public and private schools this past year.

**10% General Revenue Reduction Impact**

The impact of a 10% General Revenue reduction is challenging. The result would be cancellation of certain class sections, increased class sizes, and possible reductions in retention programs such as writing, math or academic enhancement services. To address the ten percent general revenue-related base reduction, TAMUG may have to eliminate positions or expand our current limited hiring freeze.

**10% General Revenue Dedicated Oyster Sales Reduction**

The impact of a 10% GR dedicated reduction would reduce or eliminate student interns supported in the Seafood Safety Lab, reduce the frequency of collecting, sampling and analysis of Texas oysters, and reduce the number of on-site visits to Texas harvesters and processors.

**Background Checks**

TAMUG's statutory authority to conduct background checks on employees of the university comes from Texas Government Code Chapter 411 Subchapter (f) and Texas Education Code Section 51.215. It is TAMUG's policy and practice to conduct such checks on all employees being considered for positions at Texas A&M University at Galveston.

**Summary**

TAMUG is a jewel on the Gulf Coast that brings unique and vital contributions to the Texas, the nation and the world. Our graduates, staff and world class faculty are a vital marine and maritime educational and research resource for a state with 3,359 miles of coastline, the second largest petrochemical complex in the world, and home to six of the top ten ports for inbound and outbound tonnage in the United States.

CERTIFICATE

Agency Name Texas A&M University at Galveston

This is to certify that the information contained in the agency Legislative Appropriation Request filed with the Legislative Budget Board (LBB) and the Office of the Governor, Budget Division, is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the Governor's office will be notified in writing in accordance with Article IX, Section 7.01 (2016-17 GAA).

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium. The Teaching Experience Supplement formula provides an additional weight of 10 percent to lower and upper division semester credit hours taught by tenured and tenure-track faculty.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model. The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The mission of the Texas Institute of Oceanography is to facilitate research that attracts federal and non-state support. TIO funds:

- Support the marine sciences/oceanography programs at Texas A&M University, Texas A&M University at Galveston, and the University of Texas.
- Are used to leverage research (external grants 7 to 1; state grants 5 to 1).
- Grants have included ocean circulation/weather patterns, nearshore processes and coastal erosion, estuarine and coastal water quality, seafood safety and management of commercial fisheries.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Additional information for this strategy is available in Schedule 9, Special Item Information.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

Institutional Enhancement Funds are a vital funding source for Texas A&M at Galveston. These funds are used to support all appropriately related strategies but mainly supporting salaries in the Operations Support and E&G Space Support strategies. Salaries comprise 90% of the state appropriated budget excluding debt service. The only exceptions are in two special line items where the funding supports other operation expenses. Any reduction in Institutional Enhancement funds would cut at the core of TAMUG's teaching mission and would impact teaching loads, class sizes and possibly reduce some programs and class offerings.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Additional information for this strategy is available in Schedule 9, Special Item Information.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Texas Comprehensive Research Fund provides funding to promote increased research capacity at eligible general academic teaching institutions including those other than The University of Texas at Austin, Texas A&M University, or any institution designated as an emerging research university under the Higher Education Coordinating Board's (THECB) accountability system.

Funding is to be expended for the support and maintenance of educational and general activities, including research and student services, that promote increased research capacity.

A legislatively determined amount of funding is allocated based on the average amount of restricted research funds expended by each institution per year for the three preceding state fiscal years as reported by the THECB.

**DESCRIPTION / JUSTIFICATION:**

TAMUG has engaged in efficiency and cost reduction measures since 2011. We have eliminated administrative positions and discontinued functions that are not part of our core mission. As a result we have redirected savings to classrooms, labs and public service. A 4% reduction to budgets already diligently scrubbed and reprioritized will mean we will be left to manage reductions that will impact our core mission.

**EXTERNAL/INTERNAL FACTORS:**

Major accomplishments to date and expected over the next two years:  
 These funds are used to directly fund our core mission of teaching and providing academic support services.  
 Year established and funding source prior to receiving special item funding: New exceptional item request  
 Formula funding: n/a  
 Non-general revenue sources of funding: n/a

Consequences of not funding: Even as we continue to look for ways to improve our efficiency, we must also be clear that 4% reductions to budgets that have already been diligently scrubbed and reprioritized will mean we are left to manage this reduction that will directly impact teaching and support services to our students.

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

Restored funding is needed to address growing student population and especially to serve the additional anticipated and growing engineering population on this campus in these out years. For FY 2017, the first year of our partnership with TAMU Engineering, we expect an additional 280 students on our campus who will take TAMUG's core curriculum courses in support of the merged Engineering Program. These students will also be provided services from advising to academic enhancement to tutoring. In the out years these numbers will grow even more.

**DESCRIPTION / JUSTIFICATION:**

Texas needs a Coastal Surge Protection program and plan. The Center for Texas Beaches and Shores (CTBS) at Texas A&M University at Galveston is dedicated to the conservation and protection of the Texas shorelines, bays and waterways through innovative research in cooperation with government and private sector agencies. This center can and will provide this plan. Its focus is on developing a comprehensive, holistic, approach to Texas coastal research and restoration solutions incorporating natural, economic and political processes. The Center has launched two initiatives needing special funding: the Texas Coastal Communities Planning Atlas and the Coastal Protection Program. Funding for the Coastal Viability and Protection Initiatives will accelerate the optimization work, looking at different barrier placements and combinations of coastal spine heights and in-bay measures. These funds will thus allow the CTBS team to concentrate its efforts on a coastal spine with selected additional measures that are cost effective, environmentally friendly, socially just and politically acceptable. This is turn will permit the development of an actionable plan that will be ready for implementation without delay were the region exposed to a significant storm event.

**EXTERNAL/INTERNAL FACTORS:**

Major accomplishments to date and expected in the next two years:

Through private funding, CTBS conceived, developed and informed the public and regional, state and national decision makers on the Ike Dike (Coastal Spine) concept, which would greatly reduce surge damages in the entire Galveston Bay region. Strong partnerships have been established and joint institutional agreements have been signed with Delft University of Technology and the Homeland Security Center of Excellence at Jackson State University. This CTBS-led research has established the Ike Dike (Coastal Spine) as the preferred option for coastal surge protection and has received endorsements from 30 municipalities, over 20 economic and civic organizations, and the East Harris County Manufacturers Association's 138 industrial concerns in the Galveston Bay Region. The Texas Coastal Atlas (conceived and developed by the CTBS

------	-------------	-----------	-----------

researchers) has proven effective at demonstrating the damaging effects of storm surge and the reduction in damages should the Ike Dike be put in place.

Year established: New exceptional item request

Formula Funding: N/A

Non-General Revenue Sources of Funding:

Working with its Dutch and U.S. partners, the Center was also able to obtain a NSF grant (\$3.6M over 5 years) to study flood risk reduction at the national level using the Galveston Bay region as a national test bed. This major grant, along with the progress made on the Ike Dike concept and the present power and accessibility of the Coastal Atlas, gives us a strong base to advance understanding of the Ike Dike and the usefulness of the Atlas over the next two years.

Consequences of not funding:

Inability to develop an actionable plan that will be ready for implementation without delay were the region exposed to a significant storm event.

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

Out-year costs include salaries, wages, operational costs, and some capital needs necessary to push forward without delay, the development of an actionable plan that will be ready for implementation in a region exposed to significant storm events. Costs include research and testing of different barrier placements and combinations of coastal spine heights and in-bay measures.

**ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:**

2020	2021	2022
\$2,000,000	\$2,000,000	\$2,000,000

**APPROXIMATE PERCENTAGE OF EXCEPTIONAL ITEM :** 11.77%

**CONTRACT DESCRIPTION :**

Unique modeling not duplicated elsewhere to be provided by Delft University in the Netherlands and the Homeland Security Center of Excellence at Jackson State University. These partnerships may consist of consulting services, professional services, and other goods and services and will be ongoing as long as needed for these types of services. Expected duration will be as long as needed to complete the plan.

**B. Assessment of Fiscal Year 2014 - 2015 Efforts to Meet HUB Procurement Goals**

**Attainment:**

Agency 718 exceeded one of five, or 20% of the applicable statewide HUB procurement goals in both FY14 and FY15.

**Applicability:**

The Heavy Construction category is not applicable to this agency's operations.

**Factors Affecting Attainment:**

In 2013, the Texas A&M University System implemented a major outsourcing contract for dining, custodial, landscape, and building maintenance. This initiative had a temporary negative impact on the overall percentage of HUB expenditures.

**"Good-Faith" Efforts:**

Agency 718 made the following good faith efforts to comply with statewide HUB procurement goals in FY 2014-2015:

\* Agency 718 collaborated with other TAMUS members as well as other state agencies to encourage participation in procurement opportunities through forums and systematically deployed pre-bid/proposal meetings that ensured information dissemination that reflected the university's procurement and HUB requirements.

\* Agency 718 worked closely with our sourcing partner to increase the opportunities and utilization of HUB suppliers through increased subcontracting opportunities.

In accordance with Texas A&M University Rule 25.06.01.M1, every university employee has the responsibility of making a good faith effort of ensuring that HUBs are afforded an equitable opportunity to compete for all procurement and contracting activities.

			<u>\$ 8,415,045.00</u>	<u>\$ 8,425,174.00</u>

---

**718 Texas A&M University at Galveston**

---

**Special Item:**     1           **Coastal Zone Laboratory**

**(1) Year Special Item:**           1973  
 Original Appropriations:   \$40,000

**(2) Mission of Special Item:**

The mission of the Coastal Zone Laboratory (CZL), which is associated with the Laboratory of Oceanographic and Environmental Research, is to facilitate and coordinate technical know-how to University faculty, especially those in the Marine Sciences and Marine Biology Departments through laboratory instrumentation support, training and advising, which helps to foster scientific research in the Coastal Zone. The goals and objectives of the CZL are three fold: 1) provide scientific expertise of faculty and students to respond to important problems primarily facing the Texas Coastal Zone, 2) educate and train students in solving environmental problems, and 3) provide vital health, economic data and expertise on coastal problems to Texas regulatory agencies.

**(3) (a) Major Accomplishments to Date:**

This funding allowed graduate and undergraduate students to conduct research in numerous projects that resulted in approximately 10-12 peer-reviewed publications per year, in which students were co-authors. This is an extraordinary productivity that could not be achieved without the existence of CZL.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

The original mission of the CZL was to manage and coordinate research, advisory and public service function initiated by the faculty of Texas A&M University at Galveston. Due to the relatively small amount of funding and changing needs of modern Texas, the focus of CZL changed to research, teaching, and public service on problems and solutions related to contamination of the marine environment. The unique geographical setting of Texas A&M University at Galveston provides the CZL with unequalled opportunity to carry out its mission. The CZL provides scientific expertise as well as opportunities for specialized training of undergraduate and graduate students in the areas of coastal process, marine seafood safety, and marine environmental risk analysis and contingency planning.

**(4) Funding Source Prior to Receiving Special Item Funding:**

None

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**(8) Non-general Revenue Sources of Funding:**

0

---

**718 Texas A&M University at Galveston**

---

**(9) Consequences of Not Funding:**

A reduction or elimination of funding for this special item would result in the loss of educational and training opportunities for 10-12 graduate students and approximately 5 undergraduate students per year. The upper Texas coast would see a reduction in the services provided by the only laboratory specializing in the fate of trace metals and toxic contaminants in Texas waters which effect consumable seafood. Examples include statistics on the health of Galveston Bay shrimp and oyster catches.

---

**718 Texas A&M University at Galveston**

**Special Item:**     2       **Texas Institute of Oceanography**

**(1) Year Special Item:**             1989  
Original Appropriations:   \$1,300,000

**(2) Mission of Special Item:**

The mission of the Texas Institute of Oceanography (TIO) is to provide focus for research of the Gulf of Mexico coast, to manage and coordinate the academic marine research programs of the State of Texas, to assure scientists of Texas universities of suitable multi-user facilities, to manage federal programs, and to provide the research and technological base for the development of marine-related businesses in the State of Texas and Gulf of Mexico.

**(3) (a) Major Accomplishments to Date:**

In the past 10 years, TIO has averaged an 11:1 leverage ratio of external to state funding generating over \$46 million in external dollars. TIO submitted more than 720 proposals to federal, state and other agencies to support its mission. In the past 10 years, 70 undergraduate scholars, 34 graduate students, 13 postdoctoral research scientists, and 6 visiting scientists have received TIO funds. State funding for TIO is used to leverage funding of external proposals, provide undergraduate, graduate and post-doc support, and provide access to specialized laboratories that support programs of numerous Texas state agencies – such as the Seafood Safety Laboratory of the Texas Department of Health. The Postdoctoral Fellowship Program, started in FY99, has successfully supported 22 Fellows since its inception. The Graduate Program, started in FY98, has supported 49 students. The Undergraduate Program, started in FY99, has allowed 97 students to conduct independent research projects. Many of these have resulted in publications.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

With the opening of the largest ocean research facility on the Gulf Coast, the opening of the Powell Engineering Complex, and the expansion of TAMU Engineering programs to Galveston, the reach and impact of TIO will expand into new areas where modern science and engineering approaches can be leveraged through this Special Item. This is strengthened with the addition of new undergraduate degrees in areas such as Marine Environmental Law and Policy, Maritime Public Policy and Communication and Oceans and One Health. The latter addresses any number of health-related issues that result from urbanization of coastal areas or increased development of marine environments.

**(4) Funding Source Prior to Receiving Special Item Funding:**

None

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

---

**718 Texas A&M University at Galveston**

---

**(8) Non-general Revenue Sources of Funding:**

Leveraged funds in the past 10 years have exceeded \$46 million dollars. Approximately half of the funds or almost \$23 million have been in federal funds.

**(9) Consequences of Not Funding:**

Texas A&M University at Galveston would be unable to meet the legislative mandated maritime research mission of the University. There would be a loss of opportunities for faculty, research staff, and undergraduate and graduate students. Loss of state funding would result in a significant loss of federal funding.

**Special Item:     3           Institutional Enhancement**

**(1) Year Special Item:**           2000  
 Original Appropriations:   \$1,009,376

**(2) Mission of Special Item:**

To support an institution's base funding for core academic operations. This funding enables Texas A&M at Galveston to seek levels of programs and academic excellence beyond that which is provided by our basic formula funding.

**(3) (a) Major Accomplishments to Date:**

Since receiving institutional enhancements funds in 2000, TAMUG enrollment has increased from 1288 to 2324 in fall of 2015, an increase of 80.4%. Demographics have changed as well. Black enrollment has increased 235% and Hispanic enrollment 189%. Funds have also been used to help expand or add degree programs. Examples of expanded programs are: 1) Maritime Administration Degree, 2) Maritime Transportation Degree, and 3) Texas Maritime Academy License Option Program. Examples of new programs are 1) Marine Biology Masters and Ph. D. Program, 2) Maritime Administration and Logistics Masters and 3) University Studies – Marine Recreation Management. Funding has also allowed us to design creative partnerships such as 1) Master of Science Education with TAMU, 2) Doctor of Coastal Systems Science with TAMU-Corpus Christi, 3) the Coastal Bend Initiative with TAMU-Corpus Christi and UT-Brownsville and 4) our newest partnership with our parent campus Texas A&M's College of Engineering. TAMUG has also added a new freshman year experience, the Maritime Studies Pilot Program which is a partnership with the Tall ship Elissa in Galveston.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

Continued expansion of programs and new degree offerings responding to the needs of industry demands. We plan to continue and expand academic partnerships with the main campus such as the new Engineering expansion to the Galveston Campus.

**(4) Funding Source Prior to Receiving Special Item Funding:**

The Institutional Enhancement special item was the result of the consolidation of certain types of special items by the 76th Leg., plus the addition of an initial \$1M per year for academic enhancement purposes.

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**Schedule 9: Special Item Information**  
85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**718 Texas A&M University at Galveston**

---

**(8) Non-general Revenue Sources of Funding:**

0

**(9) Consequences of Not Funding:**

Not funding this special item would severely impact our institution's ability to fund the core academic costs of the university. A reduction to these funds would overall negatively impact access, success, retention and graduation of students.

**Special Item:**     4           **Coastal Viability & Surge Protection**

**(1) Year Special Item:**           2018  
 Original Appropriations:   \$2,000,000

**(2) Mission of Special Item:**

Texas needs a Coastal Surge Protection program and plan. The Center for Texas Beaches and Shores (CTBS) at Texas A&M University at Galveston is dedicated to the conservation and protection of the Texas shorelines, bays and waterways through innovative research in cooperation with government and private sector agencies. This center can and will provide this plan. Its focus is on developing a comprehensive, holistic, approach to Texas coastal research and restoration solutions incorporating natural, economic and political processes. The Center has launched two initiatives needing special funding: the Texas Coastal Communities Planning Atlas and the Coastal Protection Program. Funding for the Coastal Viability and Protection Initiatives will accelerate the optimization work, looking at different barrier placements and combinations of coastal spine heights and in-bay measures. These funds will thus allow the CTBS team to concentrate its efforts on a coastal spine with selected additional measures that are cost effective, environmentally friendly, socially just and politically acceptable. This in turn will permit the development of an actionable plan that will be ready for implementation without delay were the region exposed to a significant storm event.

**(3) (a) Major Accomplishments to Date:**

Through private funding, CTBS conceived, developed and informed the public and regional, state and national decision makers on the Ike Dike (Coastal Spine) concept, which would greatly reduce surge damages in the entire Galveston Bay region. Strong partnerships have been established and joint institutional agreements have been signed with Delft University of Technology and the Homeland Security Center of Excellence at Jackson State University. This CTBS-led research has established the Ike Dike (Coastal Spine) as the preferred option for coastal surge protection and has received endorsements from 30 municipalities, over 20 economic and civic organizations, and the East Harris County Manufacturers Association's 138 industrial concerns in the Galveston Bay Region. The Texas Coastal Atlas (conceived and developed by the CTBS researchers) has proven effective at demonstrating the damaging effects of storm surge and the reduction in damages should the Ike Dike be put in place.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

Funding for the Coastal Viability and Protection Initiatives will accelerate the optimization work, looking at different barrier placements and combinations of coastal spine heights and in-bay measures. These funds will thus allow the CTBS team to concentrate its efforts on a coastal spine with selected additional measures that are cost effective, environmentally friendly, socially just and politically acceptable. This in turn will permit the development of an actionable plan that will be ready for implementation without delay were the region exposed to a significant storm event.

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**(8) Non-general Revenue Sources of Funding:**

Working with its Dutch and U.S. partners, the Center was also able to obtain a NSF grant (\$3.6M over 5 years) to study flood risk reduction at the national level using the Galveston Bay region as a national test bed. This major grant, along with the progress made on the Ike Dike concept and the present power and accessibility of the Coastal Atlas, gives us a strong base to advance understanding of the Ike Dike and the usefulness of the Atlas over the next two years.

**(9) Consequences of Not Funding:**

Inability to develop an actionable plan that will be ready for implementation without delay were the region exposed to a significant storm event.
