## CERTIFICATE

**Agency Name** Texas A&M Veterinary Medical Diagnostic Laboratory

This is to certify that the information contained in the agency Legislative Appropriation Request filed with the Legislative Budget Board (LBB) and the Office of the Governor, Budget Division, is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the Governor's office will be notified in writing in accordance with Article IX, Section 7.01 (2016-17 GAA).

**Mission and Scope**

The mission of the Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) is to promote animal health and protect agricultural, companion animal and public health interests in Texas and beyond. Our vision is to be the global leader in providing innovative, state-of-the-art veterinary diagnostic services.

TVMDL, created by the 60th Legislature in 1967, is the only state agency with a mandate to provide veterinary diagnostic services to the citizens of Texas. TVMDL is a member of the Texas A&M University System and is governed by its Board of Regents. TVMDL serves the citizens and veterinarians of Texas by safeguarding animal and public health with rapid, accurate and quality diagnoses for animal and zoonotic (infecting both humans and animals) diseases. TVMDL is composed of four laboratories: two full service laboratories (College Station and Amarillo) and two poultry laboratories (Center and Gonzales). The full service laboratories are staffed and equipped to provide the full range of diagnostic testing procedures in the disciplines of bacteriology, endocrinology, virology, mycology, serology, toxicology, molecular genetics and pathology for all species of livestock and companion animals. The TVMDL staff consists of 19 veterinarians, most with advanced degrees (MS or PhD) and/or board certification. In addition, 9 staff with PhDs in various specialties round out the professional staff.

Samples submitted to TVMDL originate from all regions of Texas, the nation and the globe. Our testing contributes to an animal and zoonotic disease surveillance system; provides an early detection, identification and response testing capacity for high consequence diseases (e.g. Foot and Mouth Disease, Avian Influenza), vector-borne diseases (e.g. West Nile Virus, Chaga's Disease) and bioterrorism agents (e.g. plague, anthrax); provides diagnostic tests to aid in commerce (intrastate, interstate and international trade); provides drug testing for pari-mutuel racing animals and livestock shows; and contributes to the protection and health of animal/human interactions.

TVMDL is one of the highest volume veterinary diagnostic laboratories in the nation. It routinely receives and processes nearly 150,000 submissions and performs approximately 750,000 tests per year. The agency values its general revenue support which allows TVMDL to keep fees reasonable, so submissions stay at a critical mass for effective biosurveillance. The laboratory is accredited by the American Association of Veterinary Laboratory Diagnosticians (AAVLD), American Association for Laboratory Accreditation (ISO 17025) and the Racing Medication Testing Consortium (RMTC). TVMDL is a Level 1 member of the National Animal Health Laboratory Network (NAHLN). Construction of a new headquarters laboratory in College Station is nearly 85% complete and is on track to be completed in December 2016. The new facility will enable TVMDL to enhance the technologies and services it provides to clients as well as meet the requirements to maintain accreditation as one of the premier veterinary diagnostic laboratories in the nation. As a NAHLN Level 1 laboratory, TVMDL participates in national targeted surveillance programs for foreign animal diseases that pose significant economic threats to Texas livestock and poultry. TVMDL staff routinely work with NAHLN partners and are leaders in establishing testing standards. In addition, we actively participate in critical preparedness and response training for a statewide or national animal/public health disease emergency.

Veterinary diagnostic laboratories (VDLs) are often the first line of defense for both the animal and public health sectors. VDLs must have animal disease diagnostic systems capable of providing adequate capacity and capability for early detection and characterization of newly emergent, accidental, or intentionally introduced diseases, including potential bioterrorism events. We must also fully embrace multi-disciplinary integrated approaches to protect animal health and public health.

Current initiatives to strengthen TVMDL's diagnostic capabilities and capacity, thereby improving our preparedness and level of service, include: collaborating with other state agencies and Texas A&M University System components for the development, validation and implementation of new diagnostic technologies for endemic and high consequence pathogens; developing early detection and testing protocols which can provide surge testing capacities for responding to, and recovering from, a foreign animal or zoonotic disease introduction; investing in infrastructure and equipment, with emphasis on advanced technology and robotics; development of an agency-specific high consequence disease diagnostic response plan; integration of TVMDL's emergency response plan with other local, state, and federal programs;

---

development of joint veterinary residency programs with the College of Veterinary Medicine and Biomedical Sciences at Texas A&M University; enhancing our quality system to provide customers with validated, quality-controlled test results; and investments in current and future veterinary diagnosticians and homeland security professionals.

TVMDLs' Accomplishments and Their Impacts on the Citizens of Texas and the Agricultural Community:

- In addition to over 500,000 tests/year for domestic diseases, TVMDL performs over 250,000 assays annually for high consequence disease agents (e.g. Foot and Mouth Disease, Avian Influenza). TVMDL's routine testing capacity is the backbone of an animal, emerging and zoonotic disease surveillance system for Texas.
- TVMDL plays a key role in facilitating livestock commerce, an industry worth nearly \$12 billion. Each month TVMDL performs an average of 12,000 tests to aid producers and animal owners in selling and transporting animals within the state, across state lines, and internationally.
- The American Association of Veterinary Laboratory Diagnosticians (AAVLD) conducted a 5-year site review in May 2016 with the preliminary report of the review indicating no major problems. The Drug Testing Laboratory successfully completed accreditation by the Racing Medication Testing Consortium (RMTTC) in early 2016, to add to its previous ISO 17025 international accreditation. Accreditation and the associated procedures and practices provide a method to assure the quality and validity of our test results. The accuracy and timeliness of results from a testing laboratory depends on the quality control of the testing laboratory. TVMDL's quality management program provides a system for the ongoing monitoring of test performance and laboratory quality.
- As a member of the NAHLN, TVMDL participates in USDA-APHIS training and proficiency testing surveillance programs for high consequence pathogens such as highly pathogenic avian influenza ("bird-flu"), exotic Newcastle disease, chronic wasting disease, scrapie, and classical swine fever. TVMDL routinely tests over 24,000 samples annually in animal disease surveillance initiatives. TVMDL is also certified to perform testing for foot and mouth disease, equine piroplasmiasis, African swine fever, rinderpest, contagious equine metritis, and pandemic H1N1 influenza.
- In July 2015, TVMDL diagnosed the first case of chronic wasting disease (CWD) in captive-bred Texas deer. CWD is a progressive, fatal disease with no known treatment or cure which poses a severe threat to both wild and farmed deer. Since last July, TVMDL has conducted over 23,000 tests for CWD to aid the Texas Animal Health Commission and the Texas Parks and Wildlife Department, as well as the nearly \$2.5 billion deer industry, respond to this significant disease outbreak.
- In response to industry needs, TVMDL developed or implemented 10 new testing services in 2014 and 21 new testing services in 2015.
- During FY15, TVMDL tested over 7,900 animals to ensure drug-free racing and livestock show events.
- Also in FY15, TVMDL provided all of the testing and certification paperwork necessary to qualify 156 live cattle to be sold to Ecuador, many of them from Texas ranches. This was the first shipment of live cattle allowed to any South American country since 2003. Ecuador has plans to buy upwards of 20,000 cattle to improve their genetic stocks.
- Beginning in August 2016, TVMDL will play an expanded role in training veterinary students through a mandatory diagnostic laboratory rotation as part of the new Food Animal Track at the College of Veterinary Medicine and Biomedical Sciences.
- To make testing and educational information more accessible to clients, TVMDL completed a major revision of its website, including adding the capability to

instantly translate the entire website into 5 different languages. Several educational handouts have also been translated into Spanish versions.

Exceptional Item: Restoration of 4% Reduction

Requested Amount: FY18: \$212,877; FY19: \$212,877

The first exceptional item the agency requests is a return to base funding and restoration of the 4% reduction. This reduction will directly reduce services to Texans, including slower testing results and reduction in the kinds and amount of testing services available. This will have a significant negative impact on the competitiveness and economic viability of the Texas livestock and poultry industries. A return to base funding allows TVMDL to maintain an adequate level of surveillance and respond to a high consequence disease event.

Exceptional Item: Veterinary Biosurveillance Capacity Development Program

Requested Amount: FY18: \$1,290,000; FY19: \$750,000

Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) has identified mission-critical needs that are key to enhancing our capabilities to detect and identify new diseases affecting both animal and public health, including those that are naturally occurring and those associated with intentional, bioterrorism events. Rapid disease detection through testing and biosurveillance activities and the timely and effective communication of epidemiologic data to decision makers are all essential to mitigating the effects such diseases will have on the health and financial well-being of all Texans. We request funding to develop a program that will (1) build a much-needed veterinary diagnostic workforce, (2) enhance laboratory automation, and (3) develop epidemiologic tools necessary for TVMDL to respond to these ever-increasing and serious threats posed by disease outbreaks.

TVMDL's Capacity Development Program will:

1. Increase training opportunities in veterinary diagnostics to ensure our agency has the full complement of professionals needed to recognize and diagnose disease incursions
2. Leverage laboratory automation to maximize human resource and workflow efficiencies increase testing and reporting accuracy.
3. Develop epidemiologic data analytics and IT infrastructure for disease reporting and communications.

Agency Overview of 4% Reduction to Baseline Request:

The reduction jeopardizes our ability to meet high volume testing requirements, adequately perform surveillance, and respond to a high consequence disease event. These activities help ensure the health of our agricultural, companion animal, and public health sectors. Cuts to general revenue and state support also negatively impact the agency's fee revenue. It is estimated that for every one dollar of general revenue that is lost to a budget reduction, an estimated 1.5 dollars of fee-generated income could potentially be lost. Early detection of important zoonotic diseases such as West Nile Virus and Rabies will also be hampered, leading to slower recognition and response to these devastating diseases and therefore more illness and deaths than need be.

Agency Approach to Additional 10% Budget Reduction:

An additional 10% budget reduction would be implemented by reducing critical capital equipment expenditures, operating costs, and additional FTE reductions. Personnel expenditures account for nearly 70% of the agency's budget. Budget reductions of this magnitude would critically impair the agency from meeting its primary strategy and goal: providing diagnostic services and disease surveillance for the State of Texas.

Texas A&M University System-wide Funding Issues and Needs:

We recognize the financial situation facing the State of Texas and the difficult budget decisions that face the 85th Legislature. We also appreciate the efforts through zero-based budgeting to focus spending on the highest priority and most efficient activities that are vital investments to the future well-being of the State of Texas. As we testified last session, TAMUS has engaged in similar exercises since 2011. We have eliminated administrative positions and discontinued performing certain functions that are not core to our mission and redirected those savings to classrooms, research labs, and public service.

Even as we continue to look for ways to improve our efficiency, we must also be clear that 4% reductions to budgets that have already been diligently scrubbed and reprioritized will mean we are left to manage significant budget reductions directly impacting teaching and support services to our students; reductions to significant research projects that directly impact our State's economy; and reductions in outreach and service efforts on which many citizens and public entities depend. Although a last resort, increased tuition may have to be considered to maintain the quality of programs and services you have charged us to provide. For these reasons, we respectfully request that you restore the 4% reduction in our baseline requests for both the formula and non-formula strategies.

Base Funding – Formula funding is the foundation our institutions depend upon to provide high quality teaching and support services for growing student populations to prepare them to meet the workforce needs of this state. The teaching function of our institutions is supported by two key sources of funding: state appropriations primarily through the formulas and students' tuition and fees. Our number one priority is maintaining the current formula funding rates in the base bill and in the final conference committee bill in order to cover enrollment growth through the spring 2017 semester. Any additional funding you can provide through the formulas to increase the rates to cover the cost of inflation on the state's share of the cost of educating students will help us keep our tuition and fees more manageable while also offering the courses and support services necessary to help students graduate in a timely manner.

Our A&M Agencies need base funding support much in the same manner as the formulas that provide basic, on-going support for the academics and health related institutions.

We also request support for other base funding streams be maintained at current levels, including support for research through the Texas Research University Fund and the Comprehensive University Fund and the continuation of Institutional Enhancement.

New Performance Measures – The performance measures added for higher education are important indicators for the legislature to track. We are glad to provide this outcome information. Out-year projections for these measures are held to current levels in this document. Tuition & fee charges and student debt measures are so closely connected to legislative appropriations that accurate projections for the future cannot be made at this time without a better indication of future funding amounts. However, regardless of appropriations levels, TAMUS commits to hold tuition at the lowest levels financially prudent and to look for every way to assist students in graduating well prepared, on time, and with the least debt possible.

Outcomes Based Funding - Our Board is increasingly incorporating performance and outcomes into our internal budget review processes. We welcome a continued dialog on this issue during the legislative session.

Higher Education Group Health Insurance – We request funding to cover increases in enrollments and in health care costs that are beyond control. We also request restoration of some increment of the differential funding level for our employees' group insurance as compared to that provided for other state employees who are covered in the ERS group insurance plan.

Other Matters:

Background Checks - Texas A&M Veterinary Medical Diagnostic Laboratory will continue to conduct background checks for all external and internal applicants filling new or vacant budgeted, wage, or student positions. This published agency procedure is consistent with the Texas A&M University System regulation governing background checks.

# Texas A&M Veterinary Medical Diagnostic Laboratory Organizational Chart

Bacteriology	This laboratory processes samples from companion animals, livestock, and exotic animals that may be infected with or harboring potentially infectious bacteria. Experienced technicians employ various media to isolate bacterial/fungal organisms to identify clinically significant organisms or potential pathogens. This section provides information used in treatment options for herd health management decisions.
Clinical Pathology	This section receives blood, body fluids and secretions along with tissue aspirates from a variety of domestic animals, zoo animals, wildlife species, and birds. Tests help determine illness or abnormalities. Clinical pathologists are available for consultation on these laboratory-generated results.
Diagnostic Services	This section is the first line of communication with our clients. They are responsible for entering case data into an electronic reporting system, fielding client calls, providing result interpretation and test recommendations, distributing reports and answering questions about TVMDL services.
Drug Testing	Organized in response to the Texas Racing Act, this lab serves as the state's legal testing facility for canine and equine racing animals and functions as a confirmatory testing facility for other racing labs. In addition to support of the livestock show industry, it offers pre-purchase exams.
Endocrinology	This laboratory uses state-of-the-art technology to determine the levels of hormones to aid in the confirmation of diseases, the detection of pregnancy and stages of the estrous cycle. In addition, semen analysis can aid in the evaluation of the fertility status of male breeding animals.
Histopathology	Veterinary pathologists perform evaluation on samples collected or submitted from live or dead animals to diagnose disease or cause of death. Pathologists have at their disposal a variety of tissue stains to identify the presence of microorganisms, pigments, or tissue deposits. Veterinary practitioners or oncologists can use this information to determine appropriate therapies.
Molecular Diagnostics	This lab provides fast and reliable genetic tests to help veterinarians diagnose and monitor animal diseases and detect genetic defects. The lab employs the latest molecular, genetic, and computer technologies for routine diagnosis, disease-outbreak investigation, and bioterrorism readiness.
Necropsy	TVMDL pathologists perform more than 1,200 necropsies annually on a variety of species. The pathology staff has expertise in handling large animals, exotics, small ruminants, and surgical biopsies.
Operations & Safety	Safety programs ensure the safety of our workforce is the first and foremost priority. This section ensures that safety programs are robust and that facilities meet both biosafety and biosecurity standards.
Poultry Programs	Texas requires that all domestic poultry used in the production of offspring for the sale or trade be pullorum-typhoid negative and that poultry going to public exhibition or sale must be pullorum-typhoid tested and found to be free of infection, or originate from a certified pullorum-typhoid clean flock. TVMDL performs testing to allow poultry owners to comply with these requirements
Quality Assurance	The Quality Assurance Programs ensure the standardization of agency best practices. This allows TVMDL to ensure the maximum extent possible, the correctness of the tests and diagnostic interpretations it generates.
Serology	The serology section performs diagnostic testing and provides information on serological diagnosis for infectious diseases. In addition to serologic diagnosis of infectious diseases, the section provides immune profiling for herd health status and conducts tests required for interstate or international shipment of food animals and companion animals and their genetic products.
Specimen Receiving	TVMDL receives over 500 cases daily in its College Station laboratory alone. Specimen receiving opens each shipment, ensures samples submitted contain the appropriate paperwork, and assigns each case to the correct testing laboratory. Specimens are submitted from Texas, the US and international clients for routine testing, import/export and surveillance.
Toxicology	Toxicology tests many substances, including: animal tissues, ingesta, blood and urine, plants, feed, hay, water, baits and fertilizer, all in an attempt to help producers and animal owners diagnose causes of illness or death in animals. The staff also investigates nutritional imbalances, conducts therapeutic drug monitoring and offers instrumental analysis for feed additives, pesticides, and other substances.
Virology	Virology offers state-of-the-art diagnostic testing for major viruses of cattle, horses, dogs, and cats, and selected testing for viruses of pigs, sheep, wildlife, and exotics. The lab is responsible for analysis of specimens for evidence of viral infection in clinically ill animals or those suspected of acting as subclinical carriers of viruses that can cause disease in other animals.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

TVMDL promotes animal health and protects agricultural, companion animal and public health interests in Texas and beyond. TVMDL receives nearly 150,000 submissions and performs approximately 800,000 tests per year. The laboratory is accredited by the American Association of Veterinary Laboratory Diagnosticians (AAVLD), and is one of only eleven Level 1 members of the federal National Animal Health Laboratory Network (NAHLN).

TVMDL provides many services that are vital to protecting the Texas animal and public health sectors. The agency’s testing contributes to an animal and zoonotic disease surveillance system; provides an early detection, identification and response testing capacity for high consequence diseases; provides diagnostic tests to aid in commerce; and is a critical component of biosurveillance for new diseases and bioterrorism incidents.

Samples submitted to TVMDL originate from all regions of Texas and the nation, providing the foundation of a robust statewide, regional and national surveillance program. In 2014-2015, in addition to its routine submissions, TVMDL performed targeted surveillance testing for high consequence pathogens, including: pH1N1 influenza, equine piroplasmiasis, exotic Newcastle disease, scrapie, avian influenza, classical swine fever, chronic wasting disease, and pseudorabies virus. TVMDL is certified to perform testing for foot and mouth disease, African swine fever, rinderpest and contagious equine metritis. Any one of these diseases has the potential to devastate the \$12 billion Texas livestock and poultry industries.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The ability of TVMDL to ensure effective disease management through diagnostic testing and disease surveillance would be impacted by the following factors: 1) a diversion of personnel during a high consequence disease event; 2) a budget reduction in TVMDL general revenue or loss of fee-generated revenue forcing TVMDL to reduce the number of staff available for routine diagnostic testing and delaying equipment upgrades to maintain competency; 3) a reduction in samples submitted to the laboratory secondary to an economic downturn or service interruption; 4) a loss of accreditation; and 5) an inability to meet federal biosafety and biosecurity standards and testing demands secondary to facility deficiencies. Any of the aforementioned circumstances would result in an inability to accurately and reliably perform an adequate number of diagnostic tests/services and surveillance activities.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

TVMDL provides the drug testing of animals in equine/canine racing events and those in livestock shows. It is important to identify the use of illegal drugs in racing and show animals and consequently to maintain consumer confidence in the sport and this source of tax revenue for the state.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The numbers of animals tested is determined by the number of race tracks in operation and the number of racing days authorized to each track by the Texas Racing Commission. The number of livestock shows participating in drug testing and the number of entrants into each of these shows also impacts this strategy. Any of the aforementioned factors (see Goal 1 above) could compromise the agency's ability to perform adequate testing.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

To provide funds through the Texas Higher Education Coordinating Board’s formula funding to support infrastructure costs for agencies located in Brazos County. The formula generates the general revenue amount (Fund 1) and TVMDL uses Fee Revenue (Fund 763 and 764) to cover the additional costs not covered by the formula.

Items in this strategy include utilities, building maintenance and repairs, and janitorial services for facilities located inside Brazos County.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

External factors impacting this strategy include inflationary increases in the cost of utilities and materials required for repairs and maintenance of facilities, and changes in the Texas Higher Education Coordinating Board’s recommended formula funding.

(1) - Formula funded strategies are not requested in 2018-19 because amounts are not determined by institutions.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

To provide funds through the Texas Higher Education Coordinating Board’s formula funding to support infrastructure costs for agencies located out of Brazos County. The formula generates the general revenue amount (Fund 1) and TVMDL uses Fee Revenue (Fund 764) to cover any additional costs not covered by the formula.

This includes utilities, building maintenance and repairs, and janitorial services for the laboratories in Amarillo, Center, and Gonzales Texas.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

External factors impacting this strategy include inflationary increases in the cost of utilities and materials required for repairs and maintenance of facilities, and changes in the Texas Higher Education Coordinating Board’s recommended formula funding.

	<b>Item Name:</b> Restoration of 4% Reduction <b>Item Priority:</b> 1 <b>IT Component:</b> No <b>Anticipated Out-year Costs:</b> Yes <b>Involve Contracts &gt; \$50,000:</b> No <b>Includes Funding for the Following Strategy or Strategies:</b> 01-01-01 Provide Diagnostic Service and Disease Surveillance		
<b>OBJECTS OF EXPENSE:</b>			
1001	SALARIES AND WAGES	200,000	200,000
2002	FUELS AND LUBRICANTS	9,000	9,000
2005	TRAVEL	3,877	3,877
<b>TOTAL, OBJECT OF EXPENSE</b>		<b>\$212,877</b>	<b>\$212,877</b>
<b>METHOD OF FINANCING:</b>			
1	General Revenue Fund	212,877	212,877
<b>TOTAL, METHOD OF FINANCING</b>		<b>\$212,877</b>	<b>\$212,877</b>
<b>FULL-TIME EQUIVALENT POSITIONS (FTE):</b>		4.00	4.00

**DESCRIPTION / JUSTIFICATION:**

A restoration of the 4% reduction is critical to ensure the agency maintains services to its clients. This reduction jeopardizes our ability to meet high volume testing requirements, adequately perform surveillance, and respond to a high consequence disease event. These activities help ensure the health of our agricultural, companion animal, and public health sectors.

Reductions to our general revenue and state support also negatively impact the agency's fee revenue. It is estimated that for every one dollar of general revenue that is lost to a budget reduction, an estimated 1.5 dollars of fee-generated income is also lost. Funding reductions will directly reduce services to Texans, including slower testing results and reduction in the kinds and amount of testing services available. This will have a significant negative impact on the competitiveness and economic viability of the Texas livestock and poultry industries. Early detection of important zoonotic diseases such as West Nile Virus and Rabies will also be hampered, leading to slower recognition and response to these devastating diseases and therefore more illness and deaths than need be.

**EXTERNAL/INTERNAL FACTORS:**

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

Restoration of the 4% reduction would be a return to base funding that would continue beyond FY 2018 and FY 2019.

**DESCRIPTION / JUSTIFICATION:**

TVMDL has identified mission-critical needs that are key in detecting new diseases affecting both animals and public health, including those occurring naturally and those associated with bioterrorism. Experienced veterinarians with specialized training in laboratory disease diagnosis are on the front lines of outbreak recognition. Unfortunately, large gaps exist in today's veterinary workforce, especially in diagnostic medicine. This shortage of veterinarians and diagnosticians capable of performing and interpreting tests negatively impacts our ability to protect human and animal health in Texas.

The first component of this program will invest in the professionals and tools necessary to provide formal training programs for veterinary diagnostic laboratory specialists who will provide a pool of needed TVMDL diagnosticians. This effort will employ 2 laboratory professionals (DVM/PhD), 2 technicians, and 1 support staff; provide salary for 2 veterinary trainees; and fund the purchase of equipment for training.

The second component will invest in sample handling automation and robotics which allow machines to take over repetitive procedures, freeing the skilled workforce for higher-level tasks, such as data analysis, and novel assay development. Initial costs are returned many fold as automation allows for more efficient use of personnel, reduces errors, and allows more samples to be processed. Two liquid handling robots, a sample preparation robot, barcoding instrumentation, and high throughput testing platforms would accomplish this goal.

The third component will develop the agency's capacity to provide epidemiologic data and analyses of disease trends, and to perform timely communication of this

-------------	--------------------	------------------	------------------

information to responders. This will enable TVMDL to rapidly analyze our results and communicate vital information to clients, researchers, and state/federal regulatory agencies by employing an epidemiologist and scientist to perform data mining and analysis.

**EXTERNAL/INTERNAL FACTORS:**

Having a veterinary diagnostic laboratory system fully-staffed with trained, experienced veterinary diagnosticians that will recognize the first signs of a potentially devastating animal disease threat (e.g. Foot and Mouth Disease, West Nile Virus, etc.) is vital to protecting the Texas economy and public health. Leveraging laboratory automation will maximize workflow efficiency and utilization of staff, expedite testing results, and reduce human errors. Real time reporting and analysis of animal health data can provide baseline prevalence rates for diseases and offer specific outbreak data on the health of animal populations and the threat to human populations.

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

The Veterinary Biosurveillance Capacity Development Program would continue to provide a formal training program for veterinary diagnostic specialists. The out year costs represent a continuation of the amount represented in FY 2019. This contains salary, travel, and operating costs

**ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:**

**B. Assessment of Fiscal Year - Efforts to Meet HUB Procurement Goals**

**Attainment:**

In FY14, the agency exceeded the agency and statewide goal for commodity purchases. The agency did not obtain the goals for FY15.

**Applicability:**

The heavy construction and building and construction categories not applicable due to agency’s operations in FY14 or FY15 as neither category had budgeted or actual expenditures.

Due to no Building Construction funding, thus no expenditures in professional services in FY 2015

-In fiscal year 2015 “Special Trade” expenditures accounted for only .2% of total expenditures.

-In fiscal year 2014 “Special Trade” expenditures accounted for only 1.85% of total expenditures.

**Factors Affecting Attainment:**

In FY14, 72.7%, and in FY15, 25%, of the agency’s biddable purchases were made against existing contracts (State Term, TXMAS, DIR, TAMUS, and other cooperative contracts) as they represented the best value in both time and financial savings. Given the nature of the agency mission and the resulting highly specialized laboratory scientific products and services, locating qualified HUB vendors is challenging as there are very few HUBs listed in the specific commodity codes. In FY14, 27.2% of the agency’s expenditures were sole source purchases, only available from one manufacturer. In FY15, 37.74 % were sole source purchases with 9.7% in multiyear renewals and 12.4% from governmental entities.

For purchases requiring bids in FY14, 20% of the HUB vendors solicited, with only 66.6% of those responding, were competitive enough to receive an award. Not all contract decisions such as fleet card expenditures and insurance expenditures are within the agencies control.

**6.A. Historically Underutilized Business Supporting Schedule**  
85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

Date: 7/27/2016

Time: 3:44:46PM

---

Agency Code: 557 Agency: Texas A&M Veterinary Medical Diagnostic Laboratory

The Agency is required to utilize the TAMUS agreement for facilities, grounds and custodial services. The agency captures subcontracting opportunities that are reported.

**"Good-Faith" Efforts:**

The agency made the following good faith efforts to comply with statewide HUB procurement goals per 34 TAC 20.13(c):

- (1) The agency participated in, and co-hosted, Economic Opportunity Forums, in an effort to identify potential HUB vendors.
- (2) Provide training to purchasing personnel, and staff regarding the mission of the HUB Program, as well accessing the CMBL and the Certified HUB lists.
- (3) Use TAMUS HUB training in Train-Traq for employees who have procurement responsibilities.
- (4) Encourage minority business to become HUB certified through the State of Texas.
- (5) Participate in activities coordinated by other members of TAMUS, such as HUB Discussion Workgroup, Outreach Legislative Committee, and coordination of Vendor Forums.
- (6) Monitor HUB Subcontracting Plans on projects over \$100,000 to ensure they meet HUB requirements.
- (7) Recruit Mentor's and Protégé's to become a part of the Mentor/Protégé program with the State.
- (8) Keep the Director informed on monthly and year to date HUB expenditures and activities.
- (9) Participate in activities of the Texas Universities HUB Coordinators Alliance (TUHCA)- Gulf Coast Chapter to promote the HUB Program.

## USE OF HOMELAND SECURITY FUNDS

The Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) utilizes funding to enhance diagnostic laboratory systems. These enhanced systems increase TVMDL's capacity for detecting, identifying, characterizing, and responding to high consequence agricultural, emerging and/or zoonotic diseases. Monies are utilized to enhance quality systems, information management, sample receipt and processing, testing capacity, training, and outreach activities.

**6.I. Percent Biennial Base Reduction Options**

**10 % REDUCTION**

85th Regular Session, Agency Submission, Version 1  
 Automated Budget and Evaluation System of Texas (ABEST)

Date: 8/2/2016  
 Time: 11:32:36AM

Agency code: 557 Agency name: Texas A&M Veterinary Medical Diagnostic Laboratory

Item Priority and Name/ Method of Financing	REVENUE LOSS			REDUCTION AMOUNT			TARGET
	2018	2019	Biennial Total	2018	2019	Biennial Total	

**1 Delay in Equipment Purchases**

**Category:** Programs - Delayed or Deferred Capital Projects

**Item Comment:** 1st 5 Reduction Increment: Recent budget cuts have negatively impacted the agency’s ability to purchase capital laboratory equipment. TVMDL has continued to defer needed equipment replacement in order to reduce expenses. The agency must replace equipment in order to consistently deliver quality, timely, relevant and affordable results to livestock, poultry and companion animal owners.

Strategy: 1-1-1 Provide Diagnostic Service and Disease Surveillance

General Revenue Funds

1 General Revenue Fund	\$0	\$0	\$0	\$255,452	\$255,452	\$510,904
<b>General Revenue Funds Total</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$255,452</b>	<b>\$255,452</b>	<b>\$510,904</b>
<b>Item Total</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>\$255,452</b>	<b>\$255,452</b>	<b>\$510,904</b>

**FTE Reductions (From FY 2018 and FY 2019 Base Request)**

**2 Reduction in Operating Costs and Travel**

**Category:** Programs - Service Reductions (Other)

**Item Comment:** 2nd 5% Reduction Increment: The agency will reduce travel and other professional development expenses. Reductions in this category will negatively impact our ability for staff to gain continuing education, quality and safety training. A reduction in this area will also negatively impact in-person client relations and assuring relevancy of testing services.

Strategy: 1-1-1 Provide Diagnostic Service and Disease Surveillance

General Revenue Funds

1 General Revenue Fund	\$0	\$0	\$0	\$32,000	\$32,000	\$64,000

 Time: 11:32:36AM

Agency code: 557 Agency name: Texas A&M Veterinary Medical Diagnostic Laboratory

Item Priority and Name/ Method of Financing	REVENUE LOSS			REDUCTION AMOUNT			TARGET
	2018	2019	Biennial Total	2018	2019	Biennial Total	
<b>3 Reduction in Employees</b>							
<b>Category:</b> Programs - Service Reductions (FTEs-Layoffs)							
<b>Item Comment:</b> 2nd 5% Increment: The agency will be forced to cut FTE's in this scenario. Reductions in personnel (70% of total budget) will negatively impact the agency. These reductions adversely influence the agency's ability to meet customer testing requirements, reduce turnaround time, or be prepared to respond to and recover from a high consequence agriculture or zoonotic disease outbreak. A reduction in staffing will translate into a loss in business and reduction in testing income as well.							
Strategy: 1-1-1 Provide Diagnostic Service and Disease Surveillance
