85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

556 Texas A&M AgriLife Research

Texas A&M AgriLife Research is a member of the Texas A&M University System and is governed by a Board of Regents. The current members of the Board of Regents are referenced in the Texas A&M University System legislative appropriation request.

Mission and Scope

The mission of Texas A&M AgriLife Research is to develop new knowledge and tools through basic and translational research to benefit consumers, expand agricultural sustainability and profitability, and enhance environmental stewardship. Our research is focused on ensuring the continued viability of the agriculture industry, enhancing natural resources and ensuring a healthy, safe, affordable supply of agricultural products.

We will maintain our position as the leader among peer organizations – both nationally and internationally – in the discovery and application of research in agricultural and life sciences. Our discoveries, development, and transfer of innovative technologies will continue to produce economic, environmental and health benefits that are key to Texas' success and vital to the lives of its citizens.

Texas A&M AgriLife Research is the only public institution of higher education agency in Texas with a statewide mandate to carry out research in the agricultural, environmental, and life sciences. Current priority research areas include:

- sustaining healthy ecosystems and conserving our natural resources;
- enhancing the competitiveness, prosperity and sustainability of urban and rural agricultural industries;
- improving public health and well-being; and
- creating and utilizing fundamental information to optimize plant and animal production and improve human health.

Our scientists operate out of 13 research and extension centers located around the state as well as in the 14 academic departments of the College of Agricultural and Life Sciences and 5 academic departments of the College of Veterinary Medicine and Biomedical Sciences, both at Texas A&M University. We also share scientist appointments with agricultural components of other universities within and outside of the Texas A&M University System. In addition, our regulatory functions support the Texas feed and fertilizer and honeybee industries. Our scientists collaborate with many state and federal agencies and with a wide range of industry partners to carry out our programmatic mission in order to maximize our research impacts on Texas agribusinesses and consumers.

Investment in research in agriculture, natural resources, and the life sciences is critical to the future of Texas, the nation and the world because of its basic impact on security and health.

Challenges facing Texas, the nation, and the world are growing and becoming more complex, including threats to our food and water supplies; increasing population and industrial growth putting pressures on the state's natural resources; increasing conflicts between use of agricultural commodities for food or fuels; increasing threats from vectored diseases of humans, livestock and crops; and rising demand for innovative technologies, systems and management practices to sustain agricultural production and to enhance the quality of our natural resources in both rural and urban settings. Continued investment in the state's capacity to conduct research in agriculture, natural resources, and the life sciences is essential if we are to meet these challenges.

Innovative solutions are required that will create adaptive agricultural systems capable of meeting the demands of a growing population today and tomorrow. The development of these solutions depends upon fundamental and translational scientific discoveries that can be applied and developed into technologies which will enhance the resilience of adaptive agricultural systems. These agile systems can meet the needs not just for food and fiber, but for clean water, air, and functional landscapes, improved health and well-being, and the sustainability of resources for generations to come.

Administrator's Statement

8/3/2016 4:52:30PM

85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

556 Texas A&M AgriLife Research

Strategic priorities are particular areas that the Agency will emphasize in order to make measurable progress toward enhancing the resilience of agricultural systems. After a review of internal capacities, and in the context of the obstacles to sustainable systems, five priority areas have been identified:

- 1) Achieve resilience in food, fiber, and ecological systems through adaptive strategies
- 2) Detect, monitor, and mitigate insect vector-borne diseases
- 3) Enhance and exploit agricultural information systems
- 4) Integrate basic and translational research at the nexus of food and health
- 5) Protect discoveries and deploy innovative solutions through intellectual property and commercialization strategies

Impacts of Research by Texas A&M AgriLife Research on Texas Citizens and Agricultural Producers

Combating Drug Resistance

- The Sacchettini Lab is combatting drug resistance by using novel strategies to restore the effectiveness of existing therapeutic drug regimens for Non-Hodgkin's lymphoma and ovarian cancer in humans, and drug-resistant canine cancer. These methods have also identified novel uses of herbicide-like compounds that provide efficacy against parasites in humans, livestock and poultry.

Reversing Quail Decline

- AgriLife Research published the first genome assembly for the northern bobwhite quail (*Colinus virginianus*). This seminal work will prove to be helpful to researchers working to identify the genetic causes of the decline in native Texas quail populations and to reverse this decline.

Testing Wildlife Genes

- Genetic testing by scientists at the Uvalde Center, in partnership with the College of Veterinary Medicine and Biomedical Sciences, revealed that deer cannot transmit tick fever to cattle. This finding protects the \$1.7 billion hunting industry in Texas by eliminating the requirements to impose quarantine restrictions on Texas cattle and to fund a costly tick-control program in wildlife.

Saving Water through Hydroponics

- AgriLife Research developed hydroponic cropping systems that increased lettuce yields by more than 40% while achieving water savings of more than 90% when compared to lettuce grown under conventional irrigation systems.

Increasing Feed Efficiency

- AgriLife Research has made a preliminary identification of a gene variant that could result in a 20%–30% difference in feed efficiency in growing and finishing cattle. Capitalizing on this discovery could be worth \$112 per head, or more than \$460 million for Texas cattle feeders.

Improving Air Quality in Feedlots

- Our air quality research team showed that ground-level particulate matter (dust) concentration could be reduced by 54%–84% by achieving optimal animal density in large cattle feedyards. This team has saved concentrated animal feeding operations more than \$20 million annually in potential fines and remediation.

Controlling Invasive Insects

- AgriLife Research and Extension worked with the Texas Department of Agriculture to obtain a Section 18 exemption from the Environmental Protection Agency for an unlabeled but effective insecticide to respond to an invasion of sugarcane aphids. Producer groups estimated savings of at least \$160 million in 2014 alone.

Administrator's Statement

8/3/2016 4:52:30PM

85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

556 Texas A&M AgriLife Research

Designing Disease-Resistant Citrus

- Our scientists introduced a natural plant defensin (a protein that helps the plant fend off bacteria) from spinach into citrus varieties to control citrus greening, an insect-transmitted disease that threatens to wipe out a large portion of the \$13 billion citrus industry.

Developing Drought-Resistant Wheat

- TAM 111, TAM 112, and TAM 113 wheat are among the most drought-resistant varieties ever developed for the High Plains. Texas' growers have realized an almost \$5 million increase in yields when planting wheat varieties developed by AgriLife Research.

Reducing Cotton Irrigation

- Researchers found that cutting early cotton irrigations reduced total water use by 20% while reducing lint yield by only 5%. A 25% adoption rate of this irrigation method could reduce annual water requirements by more than 1 million acre-inches, or 27 trillion gallons. This potential water savings could meet the municipal water needs of Lubbock for 20 months.

The following priority needs for agricultural and life sciences research for FY 2018-19 have been identified for our agency:

Exceptional Item – Return to Base Funding - \$3,866,005 (Biennium);

The first priority for Texas A&M AgriLife Research is to retain the four percent proposed for reduction in the base for 2018 19. This reduction, if implemented, will significantly threaten important research programs serving agriculture, the environment, health, rural and urban communities, and the general public of Texas. AgriLife Research's scientists serve as the engine of the agency by creating new technologies, generating grants and contracts, and producing intellectual property--all of which bring additional funds into Texas and add to the economic strength and viability of the state. The loss of key scientists, research associates, and programs would negatively impact the leverage these state dollars create--specifically in the areas of biotechnology research, vector borne research, water conservation, environmental protection, and critical genomics research. If funding is not restored, AgriLife Research's capacity would be narrowed and limited in its ability to respond to emerging problems, positions would be eliminated, and research locations may be closed. It is estimated the loss of funding would result in an additional loss of nearly \$8 M over the biennium in externally-generated revenue due to contracts and grants not received and intellectual property not created.

Exceptional Item – Safeguarding Human Health and Animal Agriculture by Combating Antibiotic Resistance - \$6,000,000 (Biennium)

There is keen interest and support both nationally and worldwide for combating antibiotic resistance. Overuse and misuse of antibiotics in both humans and animals are a concern. AgriLife Research is an active part of this global effort, in support of the president's Task Force for Combating Antibiotic-Resistant Bacteria. Agriculture must be a full partner in the U.S. National Action Plan for Combating Antibiotic-Resistant Bacteria.

To address the critical issue of antibiotic resistance, Texas A&M AgriLife Research will join other land-grant universities, corporate entities, and the livestock and poultry industry in Texas and beyond who are seeking to:

- o Expand the knowledge base to address antibiotic resistance.
- o Extend the usefulness of existing antibiotics or replace them with effective alternatives — without sacrificing human and animal health and food production.
- o Emphasize innovation and the use of new scientific and mathematical tools.
- o Design on-farm studies to determine the success of proposed policies and strategies.

AgriLife Research requests resources to (1) create internal grants as seed money to stimulate research and enhance competition for federal, state, and/or corporate funding; (2) hire new faculty and supporting staff, including experts in antibiotic resistance and food safety; and (3) support translational research and development that will lead to intellectual property and commercialization opportunities.

Administrator's Statement

8/3/2016 4:52:30PM

85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

556 Texas A&M AgriLife Research**Agency Approach to 4% Budget Reduction**

A 4% reduction to the base funding for the FY18-19 biennium will significantly impact the research programs of the agency. Measures have been taken over the past biennium to align the agency's research programs with its strategic plan to better serve the people of Texas. Any budget reduction will severely impede on the progress of these research programs. The budget reduction would be implemented by assessing the current programs using performance-based criteria such as external sponsored research and intellectual property produced to determine the programs to reduce. Unit heads will work with agency leadership in applying the reductions within their units.

Agency Approach to 10% Budget Reduction

An additional 10% budget reduction would significantly threaten the research programs of the agency. Since measures have been taken over the past biennium to reprioritize the programs to meet the needs of the people of Texas, further reductions would negatively impact these programs. The budget reduction would be implemented by reducing allocations to programs using performance-based criteria reflecting research outputs such as publications and extramural grant funding as well as contributions to the agency strategic plan. Reductions within each unit will be administered by individual unit heads in consultation with the agency leadership.

Indirect Cost Recovery Earned by Texas A&M AgriLife Research:

In compliance with Section 30, Article III, General Appropriations Act, indirect cost recovery revenue earned by Texas A&M AgriLife Research grants and contracts for the last full year (FY2015) including amounts by the Texas A&M Research Foundation is as follows:

Fiscal Year 2015

Indirect Costs Earned on Texas A&M AgriLife Research Administered Contracts and Grants	\$10,558,323
Indirect Costs Earned on Research Foundation Administered Contracts and Grants for Texas A&M AgriLife Research	\$2,408,993
-Sponsored Research Services Assessment	(\$3,308,269)
Total Earnings of Indirect Costs on Texas A&M AgriLife Research and Research Foundation Projects	\$9,659,047

Other Matters

Background Checks. Texas A&M AgriLife Research conducts criminal history background checks on all external and internal applicants filling new or vacant budgeted, wage, student or graduate assistant positions, following published agency procedures, which also comply with Texas A&M University System regulations.

Texas A&M University System-wide Funding Issues and Needs: We recognize the financial situation facing the State of Texas and the difficult budget decisions that face the 85th Legislature. We also appreciate the efforts through zero-based budgeting to focus spending on the highest priority and most efficient activities that are vital investments to the future well-being of the State of Texas. As we testified last session, TAMUS has engaged in similar exercises since 2011. We have eliminated administrative positions and discontinued performing certain functions that are not core to our mission and redirected those savings to classrooms, research labs, and public service.

Even as we continue to look for ways to improve our efficiency, we must also be clear that 4% reductions to budgets that have already been diligently scrubbed and reprioritized will mean we are left to manage significant budget reductions directly impacting teaching and support services to our students; reductions to significant research projects that directly impact our State's economy; and reductions in outreach and service efforts on which many citizens and public entities depend. Although a last resort, increased tuition may have to be considered to maintain the quality of programs and services you have charged us to provide. For these reasons, we

Administrator's Statement

8/3/2016 4:52:30PM

85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

556 Texas A&M AgriLife Research

respectfully request that you restore the 4% reduction in our baseline requests for both the formula and non-formula strategies.

Base Funding – Formula funding is the foundation our institutions depend upon to provide high quality teaching and support services for growing student populations to prepare them to meet the workforce needs of this state. The teaching function of our institutions is supported by two key sources of funding: state appropriations primarily through the formulas and students' tuition and fees. Our number one priority is maintaining the current formula funding rates in the base bill and in the final conference committee bill in order to cover enrollment growth through the spring 2017 semester. Any additional funding you can provide through the formulas to increase the rates to cover the cost of inflation on the state's share of the cost of educating students will help us keep our tuition and fees more manageable while also offering the courses and support services necessary to help students graduate in a timely manner.

Our A&M Agencies need base funding support much in the same manner as the formulas that provide basic, on-going support for the academics and health related institutions.

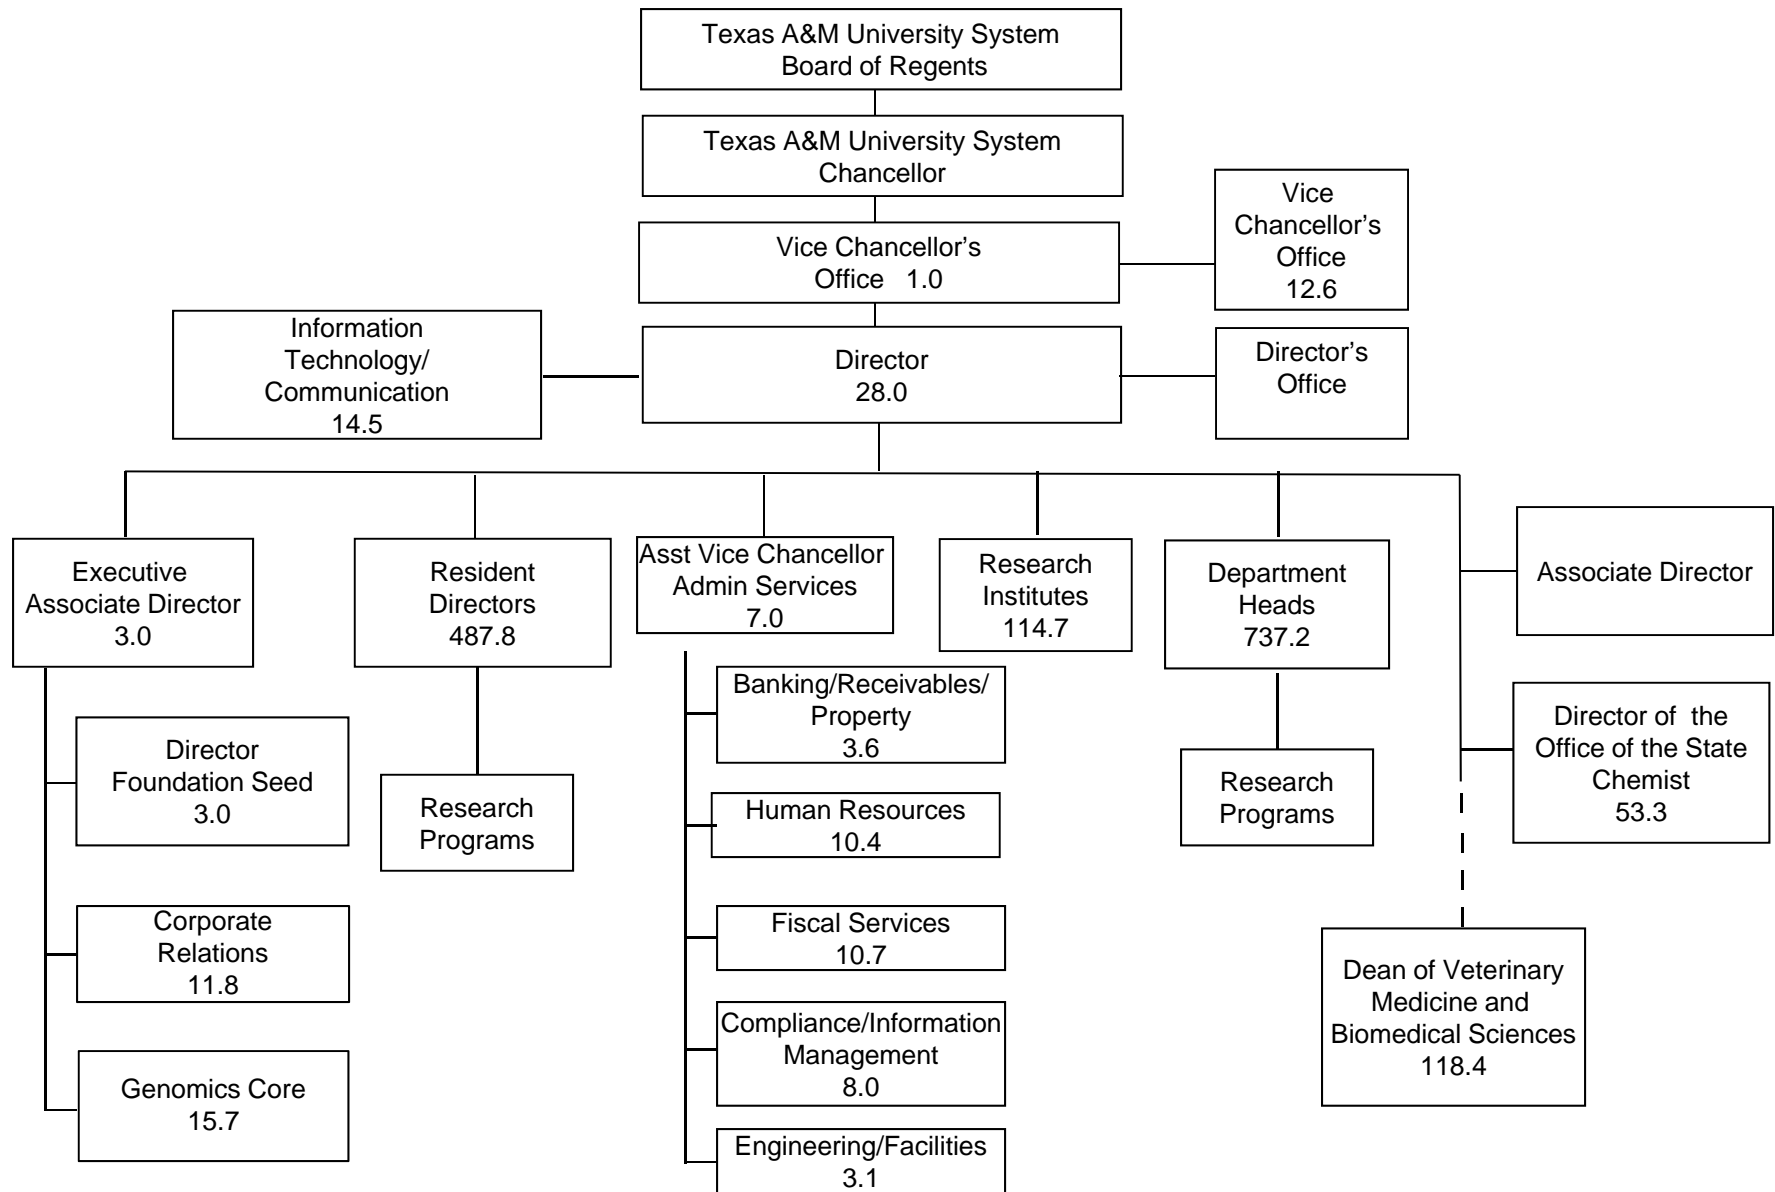

We also request support for other base funding streams be maintained at current levels, including support for research through the Texas Research University Fund and the Comprehensive University Fund and the continuation of Institutional Enhancement.

New Performance Measures – The performance measures added for higher education are important indicators for the legislature to track. We are glad to provide this outcome information. Out-year projections for these measures are held to current levels in this document. Tuition & fee charges and student debt measures are so closely connected to legislative appropriations that accurate projections for the future cannot be made at this time without a better indication of future funding amounts. However, regardless of appropriations levels, TAMUS commits to hold tuition at the lowest levels financially prudent and to look for every way to assist students in graduating well prepared, on time, and with the least debt possible.

Outcomes Based Funding - Our Board is increasingly incorporating performance and outcomes into our internal budget review processes. We welcome a continued dialog on this issue during the legislative session.

Higher Education Group Health Insurance – We request funding to cover increases in enrollments and in health care costs that are beyond control. We also request restoration of some increment of the differential funding level for our employees' group insurance as compared to that provided for other state employees who are covered in the ERS group insurance plan.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Research in the Agricultural and Life Sciences area is essential to develop the knowledge and skills to ensure a strong Texas economy and to protect our natural resources. In particular, it provides benefits to Texas in the following manners: 1) It enables Texas producers to be more competitive in the global economy by reducing production costs and by enhancing quality, marketability, and health attributes of agricultural products; and 2) It improves environmental quality and helps sustain our natural resource base, even under increased environmental pressures (e.g. chemical and soil loadings into rivers) and rapid urban and rural population growth.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

External factors affecting this strategy include the availability of funding from external sources (e.g. industry and federal and state government agencies), increases in operating costs, new federal regulations, climatic conditions, and commodity prices.

Internal factors impacting this strategy include budget reductions resulting in lower salaries and loss of key research scientists and staff to other employers, lack of fiscal resources to ensure proper scientific equipment is available, and programmatic and fiscal redirections in response to our Strategic Plan that outlines our goals and objectives and in response to constituent input.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

The goal of this research is to develop improved systems for feedyard beef cattle production through efficient use of co-products from the rapidly expanding ethanol production industry in the Texas High Plains. Research objectives include defining the optimal and maximal substitution rates for wet and dry distiller's grains in steam-flaked corn diets for beef cattle; evaluating the environmental impacts of ethanol co-products; ensuring that food safety and meat quality are maintained when ethanol co-products are fed; and developing data and models to accommodate changes in composition and availability of ethanol co-products.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

External factors affecting this strategy include volatile prices for corn and fuel that could affect the quantity of distiller's grains available for feeding, continued cooperation from our research and industry partners, and federal legislation affecting fuel ethanol standards. Internal factors affecting this strategy include our ability to continue to form effective teams of key faculty inside and outside the Texas A&M System to focus on this problem, and lower salaries affecting employee recruitment and retention.

STRATEGY DESCRIPTION AND JUSTIFICATION:

For a variety of reasons, Texas is an attractive over-wintering location for interstate bee operators of European Honey Bees (EHB). Also, Texas has seen the influx of Africanized Honey Bees (AHB). Issuing certificates for EHBs and assisting in detection of AHBs are critical aspects of supporting this industry and fulfilling this regulatory function of Texas A&M AgriLife Research.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

External factors affecting this component of Texas A&M AgriLife Research 's regulatory services include a loss in our ability to keep revenues from fees due to legislative mandates, changes in AHB policy (no longer declaring quarantines), weather effects on hive movement, and uncertainty of the level of Beekeeper participation in a voluntary program. Internal factors affecting this strategy include low salaries resulting in losses of key staff to other employers.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Maintenance of a safe and reliable supply of fertilizer and foods is a critical component of the state's economy. Statistical sampling, prompt and accurate lab analyses, and follow up to ensure compliance with regulations are requirements to maintain a reliable level of interstate and intrastate trade. Regulations and procedures from this office are based on needs of and guidance from the user/consumer advisory committee.

	TOTAL, METHOD OF FINANCING	\$1,933,002	\$1,933,003
 FULL-TIME EQUIVALENT POSITIONS (FTE):		36.80	36.80

DESCRIPTION / JUSTIFICATION:

This exceptional item will provide funding to allow the agency to maintain current capacity, especially in the areas of supporting our competitiveness in genomics and biotechnology research and of developing knowledge to enhance conservation and environmental protection. If funding was not restored, Texas A&M AgriLife Research's capacity would be narrowed and limited in its ability to respond to emerging problems, research scientist and staff positions would be eliminated, and research locations may need to be closed. The agency estimates the loss of general revenue would result in a reduction of about \$8M over the biennium in externally-generated revenue due to contracts and grants and intellectual property not acquired or generated as a result of losing research scientists, and would result in additional losses to the state in the future due to the lack of development and application of new technologies. AgriLife Research's scientists serve as the engine of the agency, creating new technologies and generating grants and contracts that bring new dollars to Texas and create economic activity and other jobs. It is through the research scientists that Texas maintains a comparatively favorable position in the global economy.

EXTERNAL/INTERNAL FACTORS:

External factors affecting this strategy include the availability of funding from external sources (e.g. industry and federal government); increases in operating costs; increasing population and industrial growth putting pressure on the state's natural resources; the changing global environment; the growing demand for state-of-the-art technologies,

4.A. Exceptional Item Request Schedule

-------------	--------------------	------------------	------------------

systems and management practices to meet simultaneous demands placed on natural resources, production agriculture, and the urban community. Internal factors impacting this strategy include lower salaries resulting in loss of key scientists and staff to other employers, lack of fiscal resources to ensure proper scientific equipment is available, and possible closure of certain units across the state. In regards to indirect administration, the impact could result in a reduction in the separation of duties and possible delays in timely payments and reporting.

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

Continued funding for 36.7 FTE that would be lost if base funding were not restored. Impacts of lost funding would result in a loss of about at least \$4 million in externally-generated revenue per year, and loss of scientists due to lower salaries and lack of proper scientific equipment availability.

ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:

DESCRIPTION / JUSTIFICATION:

Vibrant and effective health systems in Texas and around the world depend on preventing and curing infectious diseases. Antibiotics have transformed human and veterinary medicine and animal agriculture over the past 70 years. Antibiotic resistance causes about 23,000 deaths and costs the U.S. economy approximately \$70 billion annually. The loss of effective antibiotics could result in a rollback of advancements in human and animal health. Successfully combating antibiotic resistance can save lives and ensure continued worldwide progress in human and animal health. It can also preserve animal agriculture and food production to feed a growing global population. Agriculture must be a full partner in the U.S. National Action Plan for Combating Antibiotic-Resistant Bacteria. Combating antibiotic resistance is of great interest to state and national livestock associations. Texas A&M AgriLife Research requests resources to (1) create internal grants to stimulate research and enhance competition for federal, state, and/or corporate funding, including support for equipment upgrades and operating budgets; (2) build on our existing capabilities and infrastructure by identifying and recruiting world-class experts in the field of antibiotic resistance; (3) hire new faculty and supporting staff; (4) provide funding for graduate or post-doctoral students in research; and (5) support translational research and development that will lead to intellectual property and commercialization opportunities.

EXTERNAL/INTERNAL FACTORS:

External factors affecting this strategy include the emergence of new strains of bacteria that are resistant to existing antibiotics, competition for world-class researchers and the rising cost of advanced equipment and infrastructure.

Internal factors affecting this strategy include our ability to redesign existing facilities, increased cost of equipment, and our ability to meet the expectations and needs of world-class faculty.

	Total Expenditures		13.9%		\$4,106,173	\$29,488,204		11.5%		\$3,722,800	\$32,251,021

B. Assessment of Fiscal Year 2014 - 2015 Efforts to Meet HUB Procurement Goals

Attainment:

For FY15 overall expenditures the agency HUB expenditures were 11.54% compared to the entire State of Texas 11.97%
 The agency exceeded the Statewide HUB and agency goals in “Heavy Construction” and agency goal “Special Trade” in FY 2014. The agency exceeded the “Special Trade Construction” agency and Statewide HUB goal in FY 2015. As a result, the agency exceeded 2 of 6, or 33.3% of the applicable agency HUB procurement goals in FY 2014. The agency exceeded 2 of 6, or 33.3% of the applicable agency HUB procurement goals in FY 2015.
 The Agency failed to meet the goal for Building Construction for FY 2014 and 2015.

Applicability:

The expenditures in “Heavy Construction” for FY 2014 accounted for only 0.22% of the total expenditures for the year. The expenditures in “Heavy Construction” for FY 2015 accounted for only 0.03% of the total expenditure for the year. The expenditures in “Building Construction” for FY 2014 accounted for only 4.40% of the total expenditures for the year. The expenditures in “Building Construction” for FY 2015 accounted for only 14.35% of the total expenditure for the year
 The expenditures in “Special Trade Construction” for FY 2014 accounted for only 5.13% of the total expenditures for the year. The expenditures in “Special Trade Construction” for FY 2015 accounted for only .02% of the total expenditure for the year

Factors Affecting Attainment:

In both FY14 and FY15, 50% FY14 and 42.74% FY15 of the agency’s biddable purchases were made against existing contracts (State Term contracts, TXMAS contracts, DIR contracts, TAMU System wide contracts and cooperative contracts) as these represented best value to the agency in both time and financial savings. Given the research mission and the acquisition of agricultural, highly technical and scientific goods and services, locating qualified HUB vendors is challenging. Of purchases made, 31% of the biddable purchases in FY14 and 40.32% in FY15 were sole purchases.

6.A. Historically Underutilized Business Supporting Schedule
85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: **8/3/2016**
Time: **4:52:49PM**

Agency Code: **556** Agency: **Texas A&M AgriLife Research**

For purchases requiring bids in FY14, 10.80% of the HUB vendors solicited responded, with only 3.60% of those responding, being competitive enough to receive an award.

For purchases requiring bids in FY15, 9.3% of the HUB vendors solicited responded, with only 2% of those responding, being competitive enough to receive an award. Not all contract decisions such as fleet card expenditures and insurance expenditures are within the agencies control.

The Agency is required to utilize the TAMUS agreement for facilities, grounds and custodial services. The agency captures subcontracting opportunities that are reported.

"Good-Faith" Efforts:

The agency made the following good faith efforts to comply with statewide HUB procurement goals per 34 TAC 20.13(c):

1. Use employee trainings to emphasize the need to solicit from diverse ethnicities
2. Encourage minority business to become HUB certified through the State of Texas and participate in all areas of procurement at the Agency
3. Participate in activities coordinated by other members of the A&M System, HUB Discussion Workgroup, Outreach Legislative Committee and coordination of Vendor Forums.
4. Monitor HUB Subcontracting Plans on projects over \$100,000 to make sure they meet HUB requirements.
5. Recruit Mentor's and Protégé's to become a part of the Mentor/Protégé program with the State of Texas.
6. Keep the Director and units informed on monthly and year to date HUB expenditures and activities.
7. Actively participate in any activities of the Texas Universities HUB Coordinators Alliance (TUHCA)- Gulf Coast Chapter to promote the HUB Program.
8. Assist vendors in becoming HUB certified through the State of Texas.
9. Promote HUB awareness through FAMIS training of new agency employees with purchasing role. On Line web base training thru traintraq is available.

6.E. Estimated Revenue Collections Supporting Schedule
 85th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

Agency Code: **556** Agency name: **Texas A&M AgriLife Research**

FUND/ACCOUNT	Act 2015	Exp 2016	Exp 2017	Bud 2018	Est 2019
<u>1</u> General Revenue Fund					
Beginning Balance (Unencumbered):	\$0	\$0	\$0	\$0	\$0
Estimated Revenue:					
3410 Agriculture Registration Fees	40,000	40,000	40,000	40,000	40,000
Subtotal: Actual/Estimated Revenue	40,000	40,000	40,000	40,000	40,000
Total Available	\$40,000	\$40,000	\$40,000	\$40,000	\$40,000
DEDUCTIONS:					
Expended	(40,000)	(40,000)	(40,000)	(40,000)	(40,000)
Total, Deductions	\$(40,000)	\$(40,000)	\$(40,000)	\$(40,000)	\$(40,000)
Ending Fund/Account Balance	\$0	\$0	\$0	\$0	\$0

REVENUE ASSUMPTIONS:

Estimated amounts assume apiary inspection fees will continue to be provided to the program. No changes in fee rates are assumed. Funds are not enough to cover the entire cost of the program, so additional general revenue are allocated to the program.

USE OF HOMELAND SECURITY FUNDS

The Institute for Infectious Animal Diseases (IIAD) performs research and develops products to defend the nation from high-consequence foreign animal and zoonotic diseases. Founded in April 2004 as a Department of Homeland Security (DHS) Science and Technology (S&T) Center of Excellence (COE), the IIAD leverages the resources of multiple major universities, Minority Serving Institutions, national laboratories, and partners in state and federal government.

10 % REDUCTION

85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: 8/3/2016

Time: 4:52:50PM

Agency code: 556 Agency name: Texas A&M AgriLife Research

Item Priority and Name/ Method of Financing	REVENUE LOSS			REDUCTION AMOUNT			TARGET
	2018	2019	Biennial Total	2018	2019	Biennial Total	
1 Indirect Administration							
Category: Administrative - FTEs / Layoffs							
Item Comment: A reduction in Indirect Administration would result in a loss of almost 4 FTE's, which would result in a reduction of separation of duties, delay in timely payments and delays in timely reporting.							
Strategy: 4-1-1 Indirect Administration							
<u>General Revenue Funds</u>							
1 General Revenue Fund	\$0	\$0	\$0	\$247,771	\$247,771	\$495,542	
General Revenue Funds Total	\$0	\$0	\$0	\$247,771	\$247,771	\$495,542	
Item Total	\$0	\$0	\$0	\$247,771	\$247,771	\$495,542	
FTE Reductions (From FY 2018 and FY 2019 Base Request)				3.7	3.7		
2 Research Programs							
Category: Programs - Service Reductions (FTEs-Layoffs)							
Item Comment: If funding were reduced in the primary research areas, Texas A&M AgriLife Research capacity would be severely affected. Research would be narrowed and limit the scientist's ability to quickly respond to emerging problems, like Zika. Scientists and staff jobs would be eliminated and research locations could be consolidated or closed. The reduction in general revenue and reduction of scientists will negatively impact our ability to obtain over \$10 million in externally generated revenue due to the loss of contracts and grants and intellectual property. This would result in additional losses to the state in the future due to the lack of licensed technology in turn generating fewer grants and contracts that bring new dollars to Texas and create economic activity and increase jobs. It is through scientists and their research that Texas maintains a favorably competitive position in the global economy.							
Strategy: 1-1-1 Conduct Agricultural and Life Sciences Research							
<u>General Revenue Funds</u>							
1 General Revenue Fund	\$0	\$0	\$0	\$2,018,702	\$2,018,702	\$4,037,404	
General Revenue Funds Total	\$0	\$0	\$0	\$2,018,702	\$2,018,702	\$4,037,404	
<u>Gr Dedicated</u>

FTE Reductions (From FY 2018 and FY 2019 Base Request)				3.7	3.7		
4 Research Programs							
Category: Programs - Service Reductions (Contracted)							
Item Comment: If funding is reduced an additional 5% from our various research programs, Texas A&M AgriLife Research's ability to carry on competitive research will be severely impacted. The scope of research will be further narrowed and limited and the researcher's ability to respond to emerging problems will be drastically limited. There would be additional unfilled vacancies in both scientist and staff positions, requiring the closing of some centers around the state. The added reduction in general revenue and FTE's would further limit our ability to obtain externally generated revenue due to the loss of contracts and grants. With a total of 10% reduction, these types of external funds could be reduced by more than \$20 million. This also generates a negative impact on the state of Texas, as the technology continues to lag and the loss of new funding impacts loss of new jobs and economic activity.							
Strategy: 1-1-1 Conduct Agricultural and Life Sciences Research
